FINANCIAL MANAGEMENT

Audit of the Department of the Treasury's Consolidated Financial Statements for Fiscal Years 2016 and 2015

November 15, 2016

## Office of Inspector General

Department of the Treasury

#### ACCESSIBILITY NOTICE

#### The Treasury Department is committed to making its Website accessible to all citizens and ensuring that it meets or exceeds the requirements of <u>Section 508 of the</u> <u>Rehabilitation Act</u>.

Treasury's Agency Financial Report (AFR) FY 2016, does not conform to the requirements of Section 508 of the Rehabilitation Act, as it includes complex tables (in Part 3 on pages 199, 202, 203, 207, 210, 211, 213, 225, 226 and 234) that do not meet the Web Content Accessibility Guidelines (2.0) that call for using table markup to present tabular information<sup>1</sup> with table regularity<sup>2</sup>.

To obtain an accessible copy of the Department of the Treasury FY 2016 Agency Financial Report, see its website at:

http://www.treasury.gov/about/budget-performance/annual-performanceplan/Pages/default.aspx

For Treasury's Web Accessibility and Section 508 Compliance policy page, see:

Site Policies and Notices re: Accessibility-Section 508 of the Rehabilitation Act

<sup>&</sup>lt;sup>1</sup> The objective of this technique is to present tabular information in a way that preserves relationships within the information even when users cannot see the table or the presentation format is changed. Information is considered tabular when logical relationships among text, numbers, images, or other data exist in two dimensions (vertical and horizontal). These relationships are represented in columns and rows, and the columns and rows must be recognizable in order for the logical relationships to be perceived.

Using the table element with the child elements tags (tr, th, and td) makes these relationships perceivable. Techniques such as inserting tabs to create columns or using the pre element are purely visual, and visually implied logical relationships are lost if the user cannot see the table or the visual presentation is changed.

 $<sup>^{2}</sup>$  Table Regularity requires that to be accessible, tables must contain the same number of columns in each row, and rows in each column.

#### DEPARTMENT OF THE TREASURY

## Agency Financial Report

Fiscal Year 2016

#### **ABOUT THIS REPORT**

Our Agency Financial Report (AFR) for Fiscal Year (FY) 2016 presents the Department of the Treasury's (Treasury, Department, or our) financial information relative to our vital mission and stewardship of the resources entrusted to us.

The AFR also highlights our priorities, accomplishments, and challenges implementing programs that promote conditions for sustaining economic growth and stability at home and abroad, protecting the integrity of our nation's financial

#### How This Report Is Organized

Our AFR provides financial and performance information for the FY beginning October 1, 2015, and ending on September 30, 2016, with comparative prior year data, where appropriate. The AFR demonstrates our commitment to our mission and accountability to system, and effectively managing the U.S. government's finances and resources. In accordance with Office of Management and Budget's (OMB) Circular A-136, *Financial Reporting Requirements,* we produce the following three reports: (*i*) an *AFR* issued on November 15, 2016 and (*ii*) an *Annual Performance Report* (APR) submitted with Treasury's congressional budget justification to be issued by February 1, 2017. The AFR will be available online at <u>http://www.treasury.gov/about/</u> <u>budget-performance/annual-performance-plan/Pages/</u>

<u>default.aspx</u>. The APR will be available online at <u>http://www.treasury.gov/</u> <u>about/budget-performance/Pages/cj-index.aspx</u>.

Congress and the American people. This report presents Treasury's operations, accomplishments and challenges. The AFR begins with a message from the Secretary of the Treasury, Jacob J. Lew. This introduction is followed by three main sections.

## Part 1: Management's Discussion and Analysis

Provides a high-level overview of our organizational structure, strategic framework, programmatic and financial performance, and management assurances related to Treasury's internal controls.

#### Part 2: Financial Section

Begins with a message from the Assistant Secretary for Management and Deputy Chief Financial Officer, followed by the Independent Auditors' Report, audited financial statements and notes, and supplementary information.

#### Part 3: Other Information

Contains various information including Management and Performance Challenges identified by the Inspector General and the Secretary's response, along with information related to tax gap and tax burden, improper payments, and other relevant information.

#### **MESSAGE FROM THE SECRETARY OF THE TREASURY**

#### **MISSION STATEMENT**

Maintain a strong economy and create economic and job opportunities by promoting conditions that enable economic growth and stability at home and abroad; strengthen national security by combating threats and protecting the integrity of the financial system; and manage the U.S. government's finances and resources effectively.

In this year's Agency Financial Report, the Department of the Treasury looks back at a year of continued economic growth and financial stability.

Fiscal Year 2016 was a very successful year for Treasury. We helped secure the passage of legislation to provide Puerto Rico with critical tools to address its fiscal crisis, including access to an orderly restructuring process to adjust its debts to a sustainable level. We took additional administrative action against inversions and other tax avoidance techniques, while continuing to press the case for the need for business tax reform. Following fulfillment of Iran's commitments under the Joint Comprehensive Plan of Action (JCPOA), we lifted certain sanctions and engaged stakeholders around the world about its implications. And we announced that, for the first time in over 100 years, a woman, Harriet Tubman, will grace the front of U.S. currency.

Domestically, we maintained our focus on safeguarding the financial system, continuing to implement and protect the *Dodd-Frank Wall Street Reform and Consumer Protection Act.* The work of the Financial Stability Oversight Council, comprehensive assessments of the Treasury securities market, and a review of the online marketplace lending industry have helped to strengthen the financial system. The Department also sought to promote a financial inclusion agenda through a host of initiatives aimed at fostering opportunity for all Americans to share in our economic growth. The Treasury Department also conducted significant work with diplomatic partners to advance American interests abroad. Congressional authorization of the 2010 International Monetary Fund (IMF) Quota and Governance Reforms demonstrated U.S. economic leadership in the world at the beginning of the fiscal year. We also successfully advanced U.S. growth priorities with the Group of 20 (G-20), including reaching agreements on exchange rate policy, refraining from competitive devaluation, and employing all policy levers — monetary, fiscal, and structural reforms — in an effort to achieve more sustainable, inclusive growth. This important work resulted in outlining a new framework for financing development throughout the world. As part of this report, Treasury received an unmodified audit opinion on its consolidated financial statements and validated its financial data as accurate, complete, and reliable. Treasury strengthened its management controls, made progress towards correcting the material weaknesses discussed in Part III of this report, and made progress toward achieving all U.S. financial systems and control objectives. We provide this report as a comprehensive review of the Department's important work and finances.

The Treasury Department's accomplishments are a credit to the many dedicated and committed employees in the Departmental Offices and Bureaus. Our persistent focus on core management priorities allows the Department to succeed in meeting its strategic goals, and I am confident that the steps we have taken will allow Treasury to continue to build on this work for many years to come.

Secretary of the Treasury Jacob J. Lew and Deputy Secretary Sarah Bloom Raskin attended a Treasury Town Hall meeting, June 12, 2015. DEPARTMENT OF THE TREASURY

#### **TREASURY AT A GLANCE**

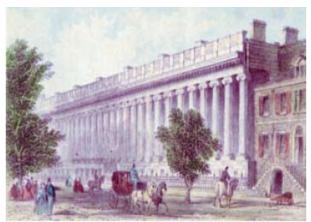

#### FOUNDATION

After the American Revolution, Congress realized that funding a war without proper infrastructure and financial discipline presented an enormous challenge to our country's economic stability. Out of the sheer necessity and lack of authority to levy and collect taxes, Congress established the Department of the Treasury on September 2, 1789, for the primary purpose of managing the U.S. government's finances. President George Washington appointed Alexander Hamilton as Treasury's first Secretary. Just nine days after the Department originated, Secretary Hamilton took office. Since that time, we have served under 76 Treasury Secretaries.

Throughout history, Treasury was the foundation for other federal agencies. The U.S. Postal Service, U.S. Customs Service, Secret Service, Federal Law Enforcement Training Center, and U.S. Coast Guard – to name a few – were all, at one point, under Treasury's jurisdiction.

 DEPARTMENT OF THE TREASURY

East front of the Main Treasury circa 1865. The 336-foot long colonnade was rebuilt with granite in 1908. On the right stands the old State Department building, which was razed in 1866 to make room for the north wing of Main Treasury. DEPARTMENT OF THE TREASURY

## TODAY'S TREASURY AND HOW WE SERVE THE NATION

Treasury remains the premier financial institution of the United States, responsible for managing our nation's debt, cash, loans made to other federal agencies, tax collection, money production, and economic policy formulation. We are a trusted policy advisor to the President, formulating and recommending domestic and international financial, economic, and tax policy. We contribute to the development of key policies that shape our economic health and financial security, while simultaneously and seamlessly managing the public debt and monitoring the Nation's surplus and deficit.

The Department also performs a critical and far-reaching role in enhancing national security and reducing our exposure to international terrorism by implementing economic sanctions against foreign threats to the United States.

Additionally, we identify and target the financial support networks of national security threats to sever their funding streams. At the same time, we improve safeguards on U.S. financial systems to help combat cyber threats. We also leverage our relationships with our federal partners and the private sector to identify cutting-edge technologies to identify, detect, and prevent threats to our economic stability before occurring.

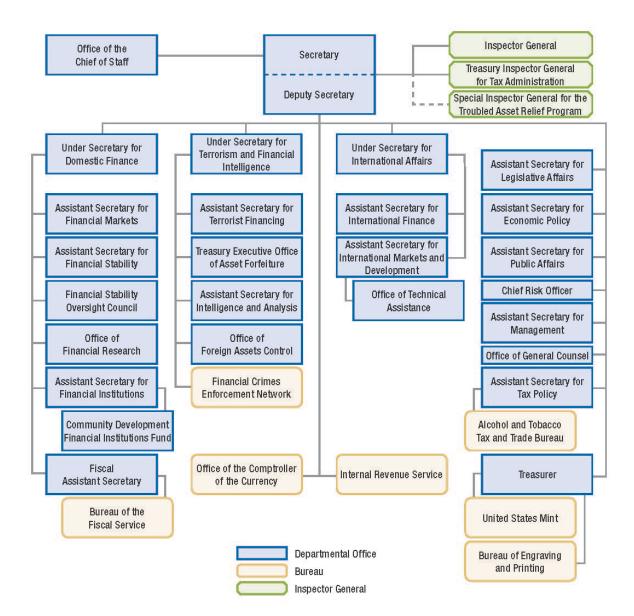

In recent years, we assisted the Administration in taking extraordinary steps to alleviate the effects of natural and man-made disasters in the Gulf of Mexico and other regions; worked to increase opportunities for small businesses, which are the backbone of our economy; helped to create jobs to improve the wellbeing of U.S. citizens; and led the safeguarding and growth of our national economy. Since 2008, we have held investments in two Government Sponsored Enterprises (GSEs) – Fannie Mae and Freddie Mac – and are committed to help maintain their solvency so they can continue fulfilling their vital roles in the home mortgage market. We have been a continuously influential part of the government's service to the American people, growing and developing to meet the Nation's needs.

Globally, Treasury represents the U.S. in key economic forums and international financial institutions, including the Group of Seven (G-7) and the G-20, which hold annual summits with heads of state to discuss global foreign policy issues. Treasury plays a vital role in promoting stability and growth in the global economy via our leadership roles in the International Monetary Fund, the World Bank, the regional development banks, and other multilateral organizations like the Financial Stability Board and the Financial Actions Task Force.

Although Treasury has evolved to meet the Nation's needs, our core mission has remained the same since 1789. Today, with approximately 100,000 employees, we remain steadfast in our commitment to promote conditions that enable economic growth and stability at home and abroad, protect the integrity of the financial system, and effectively manage the U.S. government's finances and resources. We remain the principal steward of the U.S. economy — collecting revenue, meeting financial obligations, and, when appropriate, borrowing and investing public funds.

#### ORGANIZATION

Treasury is organized into the Departmental Offices, seven bureaus, and three offices of inspector general. The Departmental Offices are primarily responsible for policy formulation, while the bureaus are the operating units of the organization.

#### **DEPARTMENTAL OFFICES**

**Domestic Finance** works to preserve confidence in the U.S. Treasury securities market, effectively manage federal fiscal operations, strengthen financial institutions and markets, promote access to credit, and improve financial access and education in service of America's long-term economic strength and stability.

#### <u>Terrorism and Financial Intelligence (TFI)</u> uses

Treasury's unique financial intelligence, expertise, and authorities to disrupt and disable terrorists, criminals, and other national security and foreign policy threats to the United States and to protect the U.S. and international financial systems from abuse.

<u>International Affairs</u> protects and supports U.S. economic prosperity and national security by working to foster the most favorable external environment for sustained employment and economic growth.

<u>Tax Policy</u> develops and implements tax policies and programs, reviews regulations and rulings to administer the Internal Revenue Code, negotiates tax treaties, and provides economic and legal policy analysis for domestic and international tax policy decisions. Tax Policy also provides revenue estimates for the President's Budget.

Other offices within Departmental Offices include <u>General Counsel</u>, <u>Legislative Affairs</u>, and <u>Public</u> <u>Affairs</u>.

**Economic Policy** reports on current and prospective economic developments and assists in the determination of appropriate economic policies. The office is responsible for the review and analysis of domestic economic issues and developments in the financial markets.

The <u>Treasurer of the United States</u> oversees the U.S. Mint and Bureau of Engraving and Printing, chairs the Advanced Counterfeit Deterrence Steering Committee, and is a key liaison with the Federal Reserve. In addition, the Treasurer serves as a senior advisor to the Secretary in the areas of community development and public engagement.

The <u>Office of Management</u>, including the Chief Financial Officer (CFO), manages the Department's financial resources and oversees Treasury-wide programs, including human capital, information technology, acquisition, and diversity and inclusion.

#### INSPECTORS GENERAL

Three Inspectors General – the <u>Office of Inspector</u> <u>General (OIG)</u>, the <u>Treasury Inspector General for Tax</u> <u>Administration (TIGTA)</u>, and the <u>Special Inspector</u> <u>General for the Troubled Asset Relief Program</u> (<u>SIGTARP</u>) – provide independent audits, investigations, and oversight of Treasury and our programs.

#### **BUREAUS**

The <u>Alcohol and Tobacco Tax and Trade Bureau</u> (<u>TTB</u>) collects federal excise taxes on alcohol, tobacco, firearms, and ammunition and is responsible for enforcing and administering laws covering the production, use, and distribution of alcohol products.

#### The Bureau of Engraving and Printing (BEP)

develops and produces U.S. currency notes that are trusted worldwide.

#### The Financial Crimes Enforcement Network

(FinCEN) safeguards the financial system from illicit use, combats money laundering, and promotes national security through the collection, analysis, and dissemination of financial intelligence and strategic use of financial authorities.

#### The Bureau of the Fiscal Service (Fiscal Service)

provides central payment services to federal program agencies, operates the U.S. government's collections and deposit systems, delivers administrative shared services to federal agencies, provides government-wide accounting and reporting services, manages the collection of delinquent debt owed to the U.S. government, borrows the money needed to operate the U.S. government through the sale of marketable, savings, and special-purpose U.S. Treasury securities (including the state and local government series), and accounts for and services the public debt.

### **WIRS**

The <u>Internal Revenue Service (IRS)</u> is the largest of our bureaus and determines, assesses, and collects tax revenue in the United States.

#### UNITED STATES MINT

The <u>United States Mint (U.S. Mint)</u> designs, mints, and issues U.S. circulating and bullion coins; prepares and distributes numismatic coins and other items; and strikes Congressional Gold Medals and other medals of national significance. The U.S. Mint maintains physical custody and protection of most of the Nation's gold and all of its silver assets.

The Office of the Comptroller of the Currency (OCC) charters, regulates, and supervises national banks and federal savings associations (thrifts) to ensure that they operate in a safe and sound manner, provide fair access to financial services, treat customers fairly, and comply with applicable laws and regulations. The OCC also supervises federal branches and agencies of foreign banks and has rule-making authority for all savings associations.

#### **TREASURY STRATEGIC FRAMEWORK**

The Government Performance and Results Act (GPRA) and the GPRA Modernization Act of 2010 establish the need for agencies to identify performance goals, report progress against targets, and conduct data-driven reviews. When done well, these practices serve two key purposes for stakeholders within and outside of the organization: to assess the organization's health and impact and to inform decision-making and strategy, including effective resource allocation. In this spirit, we developed a strategic framework supported by using best-in-class organizational performance practices to ultimately help achieve our strategic goals.

#### TREASURY ORGANIZATIONAL PERFORMANCE REVIEW CYCLE

Our organizational performance reviews provide a regular forum for open dialogue and coordination between departmental, bureau, and office leadership. We bring together different perspectives to set and align priorities, identify and solve problems, review agency performance goals, and drive results. The cycle integrates statutory requirements to conduct quarterly performance reviews of agency goals and a Strategic Objective Annual Review (SOAR), which analyzes cross-cutting performance and designates a set of strategic objectives as making "Noteworthy Progress" or as a "Focus Area for Improvement."

| Sessions       | Fall<br>(October – November)   | Winter<br>(February - March)  | Spring<br>(April – May)   | Summer<br>(June – July)   |

| Goals/Outcomes | <ul> <li>Gain a shared<br/>understanding of prior<br/>year's performance at the<br/>bureau/office level</li> <li>Set priorities for current<br/>year</li> <li>Recognize successes</li> </ul> | <ul> <li>Evaluate cross-agency<br/>progress toward strategic<br/>objectives</li> <li>Identify strategic shifts/<br/>validate Treasury priorities</li> <li>Outline potential topics for<br/>annual FedStat meeting<br/>with OMB</li> </ul> | <ul> <li>Assess progress on<br/>priorities</li> <li>Surface problems or<br/>assistance needed</li> <li>Recognize successes</li> </ul> | <ul> <li>Connect priorities to<br/>future funding</li> <li>Explore performance<br/>impacts</li> <li>Strengthen IT<br/>acquisition<br/>budgeting<br/>accountability</li> </ul> |

#### FY 2014 - 2017 STRATEGIC FRAMEWORK

The strategic framework comprises the Department's FY 2014-2017 strategic goals and objectives and FY 2015-2016 Agency Priority Goals (APGs), which align to specific objectives. All bureaus and offices align their programs and performance within this framework.

|            | Strategic Goals  | Strategic Objectives/APGs   | Contributing<br>Bureaus/Offices          |  |  |  |  |

#### **PERFORMANCE OVERVIEW**

## Goal 1: Promote domestic growth and stability while continuing reforms of the financial system

Economic growth stimulates opportunity, mobility, and security for Americans – and allows citizens and businesses to have more confidence in the safety and soundness of the financial system. Strategic objectives for achieving our first goal are to: *(i)* promote savings and increased access to credit and affordable housing; *(ii)* wind down emergency financial crisis response programs; *(iii)* implement financial regulatory reform initiatives, continue monitoring capital markets, and address threats to stability; and *(iv)* facilitate commerce by providing trusted and secure U.S. currency, products, and services for use by the public.

We continue to work closely with other agencies and monitor the evolving market structure and liquidity. For example, we issued a request for information (RFI), "Public Input on Expanding Access to Credit through Online Marketplace Lending", in January 2016. Through this effort, we took steps to understand the potential opportunities and risks presented by this evolving industry, and to foster discourse about how this industry could best serve the financial needs of the American people.

We received hundreds of responses to the RFI from online marketplace lenders, trade associations, consumer and small business advocates, academics, investors, and financial institutions. Comments covered a wide range of issues, but common themes emerged. They include the risks and benefits of using various underwriting techniques, opportunities to expand access to credit, new credit models and operations that remain untested, enhanced safeguards that small business borrowers will require, and greater transparency that can benefit borrowers and investors. In May 2016, we released a white paper, "Opportunities and Challenges in Online Marketplace Lending." The paper discusses these important themes, highlights certain best

THINKSTOCK .com

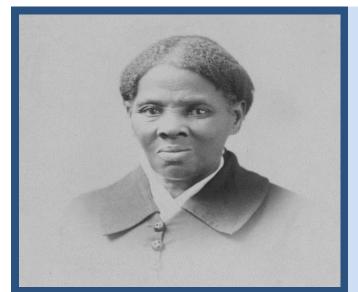

#### Strengthening Consumers' Financial Safeguards

The Dodd-Frank Wall Street Reform and Consumer Protection Act, signed into law on July 21, 2010, made important and fundamental changes to the structure of the U.S. financial system to strengthen safeguards for consumers and investors and to provide better tools for limiting risk in the major financial institutions and financial markets. practices, and provides policy recommendations. To follow up, we are facilitating interagency coordination through the creation of a standing working group on online marketplace lending with other federal agencies. Our partners include the Consumer Financial Protection Bureau, the Federal Deposit Insurance Corporation, the Federal Reserve Board, the Federal Trade Commission, the Securities and Exchange Commission, the Small Business Administration, a representative of a state bank supervisor, and the OCC. During 2016, the group met four times to discuss and share information on marketplace lending issues.

In addition, Treasury's Office of Financial Stability (OFS) has undertaken efforts to effectuate a smooth wind-down of the Making Home Affordable program (MHA), which will close to new applications in December 2016. To this end, OFS initiated and continues to work with stakeholders to influence a framework for loss mitigation following the end of MHA. This included joint publication with the Department of Housing and Urban Development (HUD) and the Federal Housing Finance Agency in July of a white paper designed to serve as a guide for future loss mitigation programs that drew from the lessons learned from the government's crisis-era housing programs. At the same time, OFS continues to implement the Hardest Hit Fund (HHF) to help stabilize housing markets in 18 states and the District of Columbia. In April 2016, OFS concluded a process to allocate an additional \$2 billion to HHF, enabling participating states to continue helping struggling homeowners avoid foreclosure and to stabilize their state housing markets.

In September 2016, our Community Development Financial Institutions Fund (CDFI Fund) awarded 32 organizations nearly \$91.5 million in grants for the development of affordable housing and community facilities in low-income communities. These awards were made through the FY 2016 round of the Capital Magnet Fund (CMF). They will support financing for the preservation, rehabilitation, development or purchase of affordable housing for low-income communities. These grants will also support related economic development and community service facilities such as day care centers, workforce development centers, and health care clinics. Recipients are able to use CMF awards to create financing tools such as loan reserves, loan funds, risk sharing loans, and loan guarantees. CMF awards must be used to leverage

The front of the new \$20 note will feature the portrait of Harriet Tubman, whose life was dedicated to fighting for liberty. The reverse of the new \$20 note will depict the White House and an image of President Andrew Jackson.

DEPARTMENT OF THE TREASURY

## TREASURY'S 2 ÇENTS

#### Introducing the New \$20, \$10, and \$5 Notes

America's currency is a statement about who we are as a nation. Our modern money honors our history and celebrates our values. Building on tremendous feedback from Americans across our country about the theme of democracy, Treasury will create new design concepts for the \$20, \$10, and \$5 dollar notes. For the first time in over a century, the front of our currency will feature the portrait of a woman — Harriet Tubman on the \$20 note. Learn more about our currency redesign at <u>https://modernmoney.treasury.gov/.</u> housing and economic development investments to achieve a leverage ratio of at least 10:1.

Also, the Small Business Jobs Act of 2010 created the CDFI Bond Guarantee Program, which is administered by the CDFI Fund. Bonds issued under the program support CDFI lending activity in underserved communities by providing a source of long-term, lowcost capital. Since 2013, we have provided bond guarantees totaling \$1.11 billion for financial institutions to finance small businesses, affordable rental housing, day care centers, senior living facilities, charter schools, and health care facilities. On September 28, 2016, we announced that an additional two bond issuances, totaling \$265 million, were guaranteed in FY 2016.

#### **KEY PERFORMANCE DATA HIGHLIGHTS**

| Measure<br>(Responsible Bureau/Office)   | FY 13 | FY 14 | FY 15 | FY 16 | FY 16<br>Target | Result vs Target |
|--|-------|-------|-------|-------|-----------------|------------------|
| Percentage of CDFI Program loans &<br>investments originated to eligible distressed<br>communities or underserved populations by<br>dollar amount (%) (Domestic Finance - CDFI<br>Fund) <sup>1</sup> | 77.1  | 70.8  | 80.1  | 80.9  | 60.0            | Exceeded         |
| Manufacturing costs for currency – dollar costs per thousand notes produced (BEP) <sup>2</sup>   | 50.5  | 42.0  | 42.4  | 44.3  | 50.0            | Exceeded         |
| Seigniorage per dollar issued (Mint) <sup>3</sup>  | .24   | .37   | .49   | .52   | .47             | Exceeded         |
| Percent of permit applications processed within service standards (TTB) <sup>4</sup>   | 50    | 58    | 47    | 32    | 85              | Unmet            |
| Percent of label and formula applications processed within service standards (TTB) <sup>5</sup>  | 49    | 67    | 75    | 75    | 85              | Unmet            |

#### **Explanation of Results**

<sup>1</sup>This measure demonstrates the impact of CDFI awardees in serving eligible distressed communities and underserved populations by lending reported during the program year. By regulation, all certified CDFIs must originate 60 percent or more of their loans and investments in eligible distressed census tracts or to underserved populations. The target is a threshold that must be met or exceeded, recognizing the need for CDFIs to balance their mission to service distressed communities and underserved populations against financial safety and soundness considerations. The FY 2016 results exceeded the threshold target reflecting the mission-oriented lending by the reporting awardee cohort, and improvements in reporting systems and guidance on how to track the deployment of loans.

<sup>2</sup>This measure calculates the actual manufacturing cost for currency notes, which include direct labor costs, the cost of raw materials used, and related manufacturing overhead charges. The FY 2016 cost was lower than anticipated due to savings resulting from decreased spoilage as well as the recovery of Series 2009 \$100 notes thru the Single Note Inspection process.

<sup>3</sup>This measure calculates the difference between the face value and the cost of minting and issuing circulating coins. Seigniorage per dollar issued is the seigniorage generated from each dollar of circulating coinage face-value shipped to Federal Reserve Banks. FY 2016 results exceeded the target and prior year performance as a result of a 1 percent increase in circulating shipment volumes combined with a 10 percent decrease in cost of goods sold.

<sup>4</sup>This measure indicates how often TTB processes permit applications within the established customer service standards, which are reviewed annually for new businesses seeking to engage in alcohol or tobacco manufacturing or distribution to ensure timely market entry for qualified individuals. TTB continues to face challenges in timely service due to resource constraints combined with the recent spike in applications for new breweries, wineries, and distilleries. TTB expects performance improvement in FY 2017 as a result of workflow enhancements implemented this fiscal year. TTB also continues to develop enhancements to its electronic filing system to reduce application errors that delay processing times.

<sup>5</sup>This measure indicates how often TTB processes alcohol beverage label and formula applications within the customer service standards established for the respective programs to improve consistency and reliability for the business community served. Service standards are annually reviewed and updated to account for various factors, including workload and resources. Performance in the latter half of the fiscal year improved dramatically following an infusion of dedicated resources provided in the FY 2016 enacted budget for this program. TTB expects the additional staffing and ongoing efforts to manage workload volume through the elimination of filing requirements and improved application compliance will result in significant and sustainable improvements.

## Goal 2: Enhance U.S. competitiveness and job creation, and promote international financial stability and more balanced global growth

We protect and support American economic prosperity by strengthening the external environment for U.S. growth, preventing and mitigating global financial instability, and managing key global challenges. Our strategic objectives for achieving our second goal are to: (i) promote free trade, open markets, and foreign investment opportunities; (ii) protect global economic and financial stability and press for marketdetermined foreign exchange rates; (iii) advance U.S. economic, financial, and national security goals by leveraging multilateral mechanisms; and *(iv)* provide technical assistance to developing countries working to improve public financial management and strengthen their financial systems. In FY 2016, we identified objective 2.3 as achieving noteworthy progress due to Congressional passage of the 2010 IMF Quota and Governance Reforms, which was a focus area for improvement in FYs 2014 and 2015.

#### **EFFORTS TO PROMOTE GLOBAL STABILITY**

In December 2015, Congress approved the IMF Quota and Governance Reforms to strengthen the IMF in its role of supporting global growth and financial stability. The reforms significantly increased the IMF's core resources, enabling swift and effective responses to crises, and also improved the IMF's governance by better reflecting the increasing role of dynamic emerging and developing countries in the global economy. Since the global financial crisis, the international financial regulatory community has taken important steps to foster a more resilient financial system through shoring up bank balance sheets, developing tools to resolve failing institutions, assessing risks from non-bank financial institutions, and strengthening derivatives markets and central counterparty clearing. We continue working with international partners, including the Financial Stability Board, Financial Action Task Force, IMF, and World Bank to address challenges related to a

decline in correspondent banking relationships, including by prioritizing technical assistance aimed at helping countries address deficiencies in their financial sector supervisory regime and by clarifying regulatory expectations.

We also leveraged strong multilateral institutions to make progress in supporting global growth and reinforcing norms against unfair currency practices. The G-20 members in Shanghai in February 2016 committed to using all policy tools—monetary, fiscal, and structural—to boost economic growth in a time of weak demand. The G-20 also committed to refrain from competitive devaluation and, for the first time, to consult on foreign exchange markets to avoid surprises that could threaten global financial stability.

In November 2015, Treasury and macroeconomic policy authorities of the 11 other Trans-Pacific Partnership (TPP) countries adopted provisions to address unfair currency practices in the context of the TPP free trade agreement. This first-ever Joint Declaration sets a high standard among TPP countries to prevent unfair currency practices, and calls for unprecedented transparency and accountability among countries that are entering into a trade agreement. All TPP countries committed to avoid unfair currency practices and refrain from competitive devaluation; to publicly report their foreign exchange intervention and foreign reserves data; and to consult regularly to address macroeconomic issues, including engaging on efforts to avoid unfair currency practices. We developed and negotiated the Joint Declaration, which addresses the principal negotiating objectives on currency that Congress included in the Trade Priorities and Accountability Act passed in June 2015.

At the June 2016 U.S.-China Strategic and Economic Dialogue we secured new commitments that help ensure that China's economic growth continues to deliver concrete benefits for the American people. China committed to clearly communicate its economic policies and to improve the transparency and scope of economic and financial data, which will benefit U.S. firms and investors, in addition to the global economy and financial system. The United States and China committed to a policy framework for the private sector to further develop renminbi trading and clearing capacity, thus expanding the ability of U.S. firms and investors to access and transact in China's currency, enhancing their competitiveness in capturing trade and investment opportunities in China. New efforts were announced to address regulatory barriers and promote more open trade in sectors including biotechnology products, financial services, aviation services, and information and communications technology. As the world's two largest economies, cooperation between the United States and China is vital for tackling many of today's most pressing global challenges. These include progress in the development of new international export credit guidelines and China's commitment to play a more constructive role in the Paris Club, including further discussion on potential membership. The two countries also pledged to work together to prioritize efforts to provide public financing for low-carbon technologies, and eliminate inefficient fossil fuel subsidies. China also committed to a package of structural reform policies that would make its steel industry more responsive to market forces and reduce net steel capacity. China committed to support international efforts to address excess capacity through the establishment of a Global Forum on Steel and to maintain communication on excess capacity in the aluminum sector.

We, along with the Office of the U.S. Trade Representative, announced the intention to negotiate a covered agreement with the European Union in November 2015 that will, among other things, help

#### 

Strategic Economic Dialogue in Beijing, China, June 6-7, 2016. DEPARTMENT OF THE TREASURY

#### Improving U.S. Economic Engagement with China

Secretary Lew and Chinese Vice Premier Wang Yang were joined by leaders from 16 U.S. government agencies and senior officials representing key Chinese ministries and agencies. Since its establishment in 2009, this economic forum has served as a platform for the two sides to make progress on core issues in the economic relationship. The Administration has secured actions from China that:

- level the playing field for U.S. workers and firms;
- deepen cooperation on global challenges such as climate change; and
- promote critical market-oriented reforms in China.

level the playing field for American insurers and reinsurers. U.S. and European Union representatives met three times in FY 2016 to discuss prudential insurance and reinsurance measures. Both sides committed to pursuing an agreement on matters relating to group supervision, exchange of information between supervisory authorities, and reinsurance supervision, including collateral. Representatives are currently continuing the negotiations.

#### **PROTECTING THE GLOBAL FINANCIAL SYSTEM**

In November 2015, we announced further guidance to make it more difficult for companies to undertake an inversion and to reduce the economic benefits of doing so. A corporate inversion is a transaction in which a U.S.-parented multinational group changes its tax residence to reduce or avoid paying U.S. taxes. In April 2016, we released temporary regulations that incorporated rules from prior inversion guidance (i.e., two notices issued in 2014 and 2015). In addition, the temporary regulations served to further limit inversions by disregarding foreign parent stock attributable to certain prior acquisitions of U.S. companies. As part of the same package, we released proposed regulations addressing the issue of earnings stripping by targeting transactions that increase related-party debt that does not finance new investment in the United States.

In May 2016, we finalized a customer due diligence rule that will require financial institutions to identify beneficial owners of companies that become their customers. Some bad actors have used shell companies and offshore accounts to evade taxes, launder money, or finance terrorist activity. We also took several steps to further increase transparency and disclosure requirements, including proposing a rule requiring certain foreign-owned companies to obtain a tax identification number from the IRS, thereby requiring these entities to report ownership and transaction information to the IRS. These steps serve to help combat money laundering and tax evasion, but additional tools are needed to promote transparency and strengthen law enforcement.

#### **KEY PERFORMANCE DATA HIGHLIGHTS**

| Measure<br>(Responsible Bureau/Office)   | FY 13 | FY 14 | FY 15 | FY 16 | FY 16<br>Target | Result vs Target |
|--|-------|-------|-------|-------|-----------------|------------------|
| Timely review of Committee on Foreign<br>Investment in the U.S. (CFIUS) cases (%)<br>(International Affairs) <sup>1</sup>                    | 100   | 100   | 100   | 100   | 100             | Met              |
| Program Engagement (Traction) – scope and<br>intensity of engagement – 5 point scale<br>(Office of Technical Assistance or OTA) <sup>2</sup> | 3.8   | 3.7   | 3.8   | 3.9   | 3.6             | Exceeded         |
| Explanation of Results   |       |       |       |       |                 |                  |

<sup>1</sup>By statue and regulation, CFIUS must complete its consideration of a covered transaction within 75 days of acceptance of a notice regarding the transaction, except for transactions for which CFIUS has granted a party's request for withdrawal from CFIUS 's consideration or that are the subject of notices that CFIUS has rejected due to, e.g., a material misstatement. The 100 percent result for FY 2016 reflects that CFIUS timely reviewed all such notified transactions for national security concerns and concluded action after determining there were no unresolved national security concerns.

<sup>2</sup>This measure indicates the degree to which foreign counterparts are engaging proactively and constructively with OTA advisors at both the working and policy levels. Counterpart engagement is crucial to the achievement of a project's intermediate goals and ultimate outcomes such as passage of law or regulation, an increase in government revenues, more transparent budgets, an improvement in a government's credit rating, or a reduction in economic crimes. The measure is scored on a 5-point scale, and averaged across all projects to provide one overall measure of OTA's performance. In FY16, the average score for OTA projects was 3.9, up from 3.8 in the prior reporting period. It should be noted that assigning an aggregate numerical value to a program that consists of more than 90 individual projects does not convey the inevitable deviation from one project to the next. Moreover, OTA engages in a broad range of countries where policy, political and security environments are more or less conducive to achieving traction with foreign counterparts. In that context, OTA's aggregate score reflects generally strong traction with foreign counterparts.

## Goal 3: Fairly and effectively reform and modernize federal financial management, accounting, and tax systems

Treasury is entrusted with managing the Nation's finances. This includes collecting money due to the U.S. government, making payments owed by the United States, and financing the federal government by determining and executing a borrowing strategy that meets the federal government's needs at the lowest cost. Strategic objectives for achieving this goal are to: (*i*) improve the efficiency and transparency of federal financial management and government-wide accounting; (*ii*) improve the disbursement and collection of federal funds and reduce improper payments made by the U.S. government; and (*iii*) pursue tax reform, implement the ACA and the Foreign Account Tax Compliance Act (FATCA), and improve the execution of the tax code.

#### DIGITAL ACCOUNTABILITY AND TRANSPARENCY ACT OF 2014 (DATA ACT)

Treasury continues our important role leading the government in modernizing federal financial management. As co-lead with the Office of Management and Budget (OMB), we designated implementation of the DATA Act as an APG for FYs 2016-2017. Through this initiative, we are engaging with other organizations and communities that create and use federal data to make it more transparent and available to the American people.

Last year, we worked with OMB to finalize data definition standards. In April 2016, we released the DATA Act Information Model Schema Version 1.0 (DAIMS v1.0), which defines the relationships between data elements and provides technical guidance for agencies on what data to report to us and what format to use. We reviewed hundreds of comments by the public and federal agencies before finalizing DAIMS v1.0.

In addition, we made progress in developing the DATA Act operating infrastructure, including

developing the DATA Act Broker. It is a web-based tool agencies will use to submit and validate their data for publication on USAspending.gov. Treasury also launched OpenBeta to obtain feedback from the public on future design of USAspending.gov. OpenBeta is a public interactive website where users can participate in the website's development. Finally, Treasury and OMB developed recommendations for a future governance structure for expanding and maintaining the data exchange standards.

#### TAX ADMINISTRATION

Effective tax administration is a critical part of our mission. Ensuring the efficiency and transparency of financial management processes and the integrity and accuracy of government accounting of tax revenues is an ongoing area of focus for the Department. As part of this effort, we have continued to work to improve tax administration through the modernization of systems, and the strengthening of fraud and identity theft protections. To facilitate these efforts, the IRS received a funding increase of \$290 million in FY 2016 specifically for the purpose of achieving "measurable improvements in the customer service representative level of service rate, to improve the identification and prevention of refund fraud and identity theft, and to enhance cybersecurity to safeguard taxpayer data." With these additional resources the IRS was able to increase the level of telephone service rate to 72.1 percent during the most recent filing season (January through April) as well as develop and deploy several new cybersecurity initiatives. Despite these improvements, the total FY 2016 IRS budget of \$11.235 billion remains \$911 million below the FY 2010 enacted level which, combined with inflationary growth in labor and non-labor expenses, has resulted in a reduction of more than 15,000 fulltime employees.

These funding constraints continued to significantly affect the IRS's ability to modernize and improve information technology systems. Without adequate funding to address the aging infrastructure, the IRS's tax administration systems and cybersecurity infrastructure become increasingly vulnerable. Additionally, we will need to reduce hiring and defer infrastructure and technology investments. Since over 56 percent of the IRS workforce is fifty years of age or older, the lack of needed new hires prevents the transfer of knowledge from the IRS's existing workforce, which is essential to prevent loss of critical knowledge and experience as retirements occur over the next several years. In order to manage the current funding situation, the IRS prioritized the allocation of resources toward areas of critical and immediate need, such as the delivery of a successful filing season in 2016 and the ongoing implementation of multiple legislative mandates.

Several key areas of focus for the IRS in FY 2016 were continuing the implementation of the ACA tax provisions and the FATCA, and administering the existing tax code fairly and effectively. For the ACA, the IRS improved education and outreach to taxpayers, employers, and tax professionals this year by developing and distributing materials such as webinars, social media broadcasts, and traditional media publications. The IRS also revised several forms, instructions, and notices in order to improve comprehension and readability and to ensure that taxpayers understood their tax filing responsibilities. In order to ensure compliance with ACA-related filing requirements, the IRS worked closely with the Centers for Medicare and Medicaid Services (CMS) to conduct outreach to uninsured people who paid the penalty or claimed an exemption, letting them know that tax credits are available for marketplace coverage and providing information about their health coverage options. In addition, during the course of the filing season, the IRS processed a significant number of ACA related documents.

#### IRS' Dirty Dozen Scam List: Don't be a Victim

Each year, individuals fall prey to tax scams. That's why the IRS provides a list of its annual "Dirty Dozen." Illegal scams can lead to significant penalties and interest and possible criminal prosecution. IRS Criminal Investigation works closely with the Department of Justice to shutdown scams and prosecutes the criminals behind them. Additional information about tax scams available on IRS social media sites provide in depth information on various types of scams such as identity theft, telephone scams, phishing, return preparer fraud, and fake charities. The best defense is to remain informed and alert.

#### We are the **Bureau of the Fiscal Service** Lead. Transform. Deliver.

DEPARTMENT OF THE TREASURY

#### **Reducing Improper Payments**

Fiscal Service – the primary disburser of payments to individuals and vendors on behalf of federal agencies – established the "*Do Not Pay*" portal to help federal agencies reduce improper payments. The portal helps identify ineligible recipients by verifying eligibility of a vendor, grantee, loan recipient, or beneficiary prior to award; and reverifying eligibility before, during, and after payments are made. The Portal's mission is to protect the integrity of the government's payment process by assisting agencies in mitigating and eliminating improper payments in a cost-effective manner while safeguarding the privacy of individuals.

The IRS is also continuing to implement FATCA. This legislation requires foreign financial institutions (FFIs) to report detailed information about foreign account holders to the IRS or face a 30 percent withholding tax. This program has an unprecedented impact on stakeholders worldwide, including the global financial industry, U.S. taxpayers domestically and overseas, and foreign tax administrations. The IRS has been continuing efforts to reach out to impacted entities and paid preparers in order to provide education on the FATCA filing and reporting requirements. IRS registration efforts support the program; in FY 2016 nearly 190,000 financial institutions registered with the IRS, while over 5,000 financial institutions have enrolled in the International Data Exchange Service to submit FATCA returns to the IRS.

In order to support the FATCA program, the IRS continued to develop and deploy the FATCA registration system, which provided improved online services for FFIs, and enhanced the IRS's ability to capture, exchange, manage, and analyze data. By the end of FY 2016, more than 48,000 of the over 217,000 Financial Institutions and sponsored entities in the FATCA program with active Global Intermediary Identification numbers registered with the IRS. Finally, in the realm of tax enforcement, the IRS updated the FATCA Compliance Roadmap with additional approaches to identifying non-compliance by FFIs.

#### **IDENTITY THEFT AND IMPROPER PAYMENTS**

Identity theft continues to be a serious and evolving issue, which has a significant impact on tax administration. In FY 2016, the IRS stopped more than \$4 billion in fraudulent refunds claimed by identity thieves on more than 787,000 tax returns. In March 2015, the IRS established a Security Summit, an unprecedented public-private partnership consisting of leaders from the IRS and state tax agencies and the private sector tax industry. One of the most important aspects of the Security Summit's charge is to ensure that the IRS, tax administrators, and tax industry leaders share information with one another and among their work groups about what they are doing to combat identity theft and fraud. Since March 2015, Summit partners protected taxpayers from tax-related identity theft, stopped suspicious tax returns, and prevented fraudulent refunds from getting into criminals' hands. Because of the safeguards enacted by this partnership, fewer people became victims of tax-related identity theft during the 2016 filing season.

Because of Security Summit efforts, the number of anticipated taxpayer victims fell between 2015 and 2016. The number of refunds that banks and financial institutions returned to the IRS because they appeared suspicious dropped by 55 percent. Working together, Security Summit partners were able to warn the public – including the payroll industry, human resource personnel and tax preparers - of emerging scams in which criminals either posed as company executives to steal employee Form W-2 information or instances where criminals used technology to gain remote control of preparers' office computers. The IRS also provided specialized outreach and education campaigns to help taxpayers avoid fraud and augmented staffing to assist taxpayers who have become victims of identity theft.

The IRS strengthened its ability to identify and respond to fraud by bolstering analytics capabilities, making full use of existing data sources and exploring potential new data sources and techniques that allow better identification of anomalies. The IRS deployed maintenance and enhancements for the Return Review Program system, which is used to evaluate and flag potentially fraudulent returns, in preparation for the 2016 filing season, which allowed for receipt of Forms W-2, Wage and Tax Statement, directly from reporting agents and other Form W-2 issuers earlier in the filing season in order to verify income and reduce fraud and anomalies. Receiving the Form W-2 information earlier allowed the IRS to release good returns sooner in the fraud detection process, which reduced burden to taxpayers.

In addition, addressing Improper Payments continues to be an area of focus for us. In FY 2016, we had one program identified as being high risk and high priority - the Earned Income Tax Credit (EITC) program. Reducing improper payments in the EITC program continues to be a significant challenge due to the nature of the credit. EITC allows eligible lowincome filers to reduce tax liability by claiming credits for working and earning income. However, the complexity of the program, the high rate of annual turnover in program participants, and the difficulty of verifying self-reported information from taxpayers claiming the credit make it difficult to reduce improper payment rates for EITC. We continue to propose legislative changes to the program and to the authority of the IRS to address errors and other anomalies on tax returns, and while Congress has enacted some of these proposals, the IRS must still use traditional approaches in attempting to cut down the number of improper payments. Education, outreach to the return preparer community, preemptive engagement with professional filers who have historically had high error rates on returns, prerefund validation checks, and post-refund compliance activities are all tools employed to address EITC improper payments.

As part of the guidance from OMB, risk assessments are also conducted on all other refundable tax credit programs. In FY 2016, the IRS identified as medium risk the American Opportunity Tax Credit (AOTC) and the Child Tax Credit (CTC) programs. The IRS acknowledges concerns by auditors over the dollar value of improper payments from these programs: the challenges inherent in reducing these levels are similar to those associated with EITC. Internal controls over these programs are relatively strong, but in the absence of additional statutory authority, the IRS remains limited in its ability to mitigate improper payments.

Finally, we have continued to coordinate closely with the Department of Health and Human Services (HHS) and CMS on the refundable tax credit portion of the ACA. The advance part of this credit, known as the Advance Premium Tax Credit (APTC), is administered by CMS working with state Marketplaces, and is paid to insurance providers designated by eligible taxpayers. If a taxpayer receives APTC, they are required to file a tax return in order to reconcile the APTC amount against their income level in order to determine the proper tax credit amount for the year. Taxpayers who received less in APTC than the Premium Tax Credit (PTC) for which they were eligible may claim additional PTC on their tax return. Taxpayers who received more APTC than the PTC for which they were eligible are required to repay the difference, up to a certain cap amount. HHS and Treasury completed risk assessments for their portions of the program; we determined that the PTC program carries a medium risk of improper payments, and we will continue to accumulate data on tax returns and taxpayer behavior relative to this program in order to quantify the potential improper payments value.

#### **KEY PERFORMANCE DATA HIGHLIGHTS**

| Measure<br>(Responsible Bureau/Office)   | FY 13 | FY 14 | FY 15 | FY 16 | FY 16<br>Target | Result vs Target |
|--|-------|-------|-------|-------|-----------------|------------------|
| Percentage of Treasury payments and<br>associated information made electronically<br>(%) (Fiscal Service) <sup>1</sup>       | 92.5  | 94.4  | 94.8  | 94.9  | 94.9            | Met              |
| Percentage of total dollar amount of U.S.<br>Government receipts settled electronically<br>(%) (Fiscal Service) <sup>1</sup> | 97.0  | 98.0  | 98.0  | 98.2  | 98.0            | Exceeded         |
| Percentage of individual returns processed electronically (IRS) <sup>2</sup>   | 82.5  | 84.1  | 85.3  | 86.4  | 86.0            | Exceeded         |
| Taxpayer Self-Assistance Rate (IRS) <sup>3</sup>   | 83.3  | 84.7  | 88.7  | 89.0  | 90.0            | Unmet            |

<sup>1</sup>Fiscal Service has been promoting the Paperless Treasury initiative for several years in an effort to disburse payments, as well as receive and settle collections, through electronic means. Fiscal Service has expanded the number of digital wallet providers and the number of agencies using the digital wallet. Fiscal Service is piloting an agency-facing mobile application as a part of strategies for transitioning more customers to electronic initiatives.

<sup>2</sup>The number of electronically filed individual tax returns divided by the total individual returns filed. The IRS exceeded the annual target and actual prior year performance for individual returns processed electronically.

<sup>3</sup>The percentage of taxpayer assistance requests resolved using self-assisted automated services. In FY 2016, the Taxpayer Self-Assistance Rate was one percentage point below plan. This is due in part to higher than expected Assistor Calls Answered and lack of availability of some online applications. The IRS will continue to look for new applications that support the needs of the taxpayer as well as continue our efforts to manage resources as efficiently as possible in order to meet all future goals.

## Goal 4: Safeguard the financial system and use financial measures to counter national security threats

We work to protect the integrity of the financial system and advance key national security and foreign policy objectives through regulation, enforcement, financial intelligence analysis, outreach, and targeted financial measures. Strategic objectives for achieving our fourth goal are to: (i) identify priority threats to the financial system using intelligence analysis and outreach to the financial sector; (ii) develop, implement, and enforce sanctions and other targeted financial measures; (iii) improve the cybersecurity of our nation's financial sector; and (iv) protect the integrity of the financial system by implementing, promoting, and enforcing anti-money laundering and counterterrorism financing standards. In our FY 2016 SOAR, we identified that objectives 4.1 and 4.3 achieved noteworthy progress as a result of coordinating the creation and sharing of actionable and targeted financial intelligence with stakeholders (4.1) and coordination with cybersecurity partners and the financial sector (4.3). Objective 4.3 was also identified as a focus area for improvement, as there are many challenges to achieving this objective, including the continued growth and increasing sophistication of cybersecurity threats.

#### **EFFECTIVENESS OF SANCTIONS PROGRAMS**

In January and March 2016, Treasury and the Department of Commerce announced amendments to regulations governing the Cuba embargo, further implementing the set of diplomatic and economic changes to Cuba relations laid out by President Obama in December 2014. These amendments further facilitate the normalization process between Cuba and the U.S. by increasing the ability of U.S. citizens to travel to Cuba to engage directly with the Cuban people, expanding Cuba's access to U.S. financial institutions and the dollar, and enabling Cubans legally present in the U.S. to earn a salary or compensation. The Joint Comprehensive Plan of Action reached in July 2015 was a landmark international achievement, removing the threat of a nuclear-armed Iran while illustrating the power of economic sanctions, coupled with tough diplomacy, to bring about a safer world. We are meeting commitments under the JCPOA by lifting nuclear-related secondary sanctions and by providing clear and timely guidance to government and private sector partners about engagement with Iran that is now permitted. The U.S. remains clear that the JCPOA did not resolve, nor was intended to resolve, concerns outside of the nuclear arena, including Iran's support for terrorism and its ballistic missile program, and will continue to leverage various tools (including sanctions) to counter this behavior.

In April 2015, the President issued an executive order that authorizes the Secretary of the Treasury, in consultation with the Attorney General and the Secretary of State, to impose financial sanctions on individuals and entities whose malicious cyberenabled activities have contributed to a significant threat to the national security, foreign policy, or economic health or financial stability of the United States. In establishing this new policy, the Administration is creating a means of imposing economic costs against not just those that conduct cyber-attacks, but those responsible for supporting, enabling, or ordering such attacks.

#### **CONTINUED CYBERSECURITY PROGRESS**

Cyber threats are vast and evolving. The sophistication, frequency, and severity of threats across U.S. corporations and government agencies continue to increase. The increased prevalence of cyber risks creates persistent and complex challenges for entities throughout the financial sector. The constantly changing risk landscape presents challenges to Treasury and financial regulatory agencies in their efforts to enhance the cybersecurity and resiliency of both individual entities and the U.S. financial system.

Cyber-attacks can result in direct financial losses, as well as serious non-financial consequences. Implications from cyber-attacks can include the disruption of critical economic functions, loss of customer and market confidence in affected institutions, and loss of general consumer and market confidence in the financial sector.

Per Presidential Policy Directive 21 Critical Infrastructure Security and Resilience, Treasury is responsible for coordinating the federal government's cybersecurity efforts in the financial sector. Treasury monitors reporting by intelligence community and law enforcement sources for information on threats to the financial sector, collaborates with other parts of the government in improving security and preparing response plans for major cyber incidents, and works closely with the private sector to enhance baseline protections, facilitate information sharing, and coordinate on incident response and recovery.

In December 2015, President Obama signed the *Cybersecurity Act* (CSA) into law. CSA establishes a system for cybersecurity information sharing within

the federal government, within the private sector, and between the federal government and the private sector, ultimately enabling firms to bolster their cyber defenses. As part of Treasury's ongoing efforts to improve the quality and flow of cyber information, we engaged with members of the financial services sector. including trade associations and financial regulators, to encourage participation in CSA information sharing processes. Further, we worked to identify any legal, policy, or technical impediments to information sharing and assist in addressing them. Additionally, we helped craft the implementation documents called for in the CSA and established a direct link with the Department of Homeland Security's Automatic Indicator Sharing Program. We also implemented new technology to begin participating in automated indicator exchange with DHS and the private financial sector.

Over the past year, we have also worked with partners in the financial sector to carry out publicprivate sector tabletop exercises designed to simulate plausible cyber incidents. These exercises help identify gaps in the preparedness of individual entities and in response and recovery coordination among the government and private sector. In FY 2016, Treasury facilitated an exercise that brought together, for the first time, representatives of the cyber-focused Financial and Banking Information Infrastructure Committee and the Financial Stability Oversight Council, as well as representatives from key financial institutions and financial market utilities, to examine how to mitigate the effects of a significant cybersecurity incident on financial stability. Another first this year was a joint exercise with another critical infrastructure sector—the energy sector which was coordinated with the Department of Energy.

Overall, this year, in collaboration with private-sector representatives and regulatory agencies in the financial services sector, Treasury has executed over 15 cybersecurity and resiliency exercises.

In addition, Treasury has responded to the evolving cyber risk landscape with increased resources, proposing a Cybersecurity Enhancement Account in the FY 2017 President's Budget that is designed to bolster our cybersecurity posture and to better mitigate cybersecurity risks to the U.S. financial system. This dedicated funding source provides leadership with greater visibility into cybersecurity efforts and encourages information sharing across the Department.

Treasury has also sought to address cybersecurity risks globally, recognizing that cybersecurity incidents can generate negative consequences across sovereign borders through the interconnectedness of the international financial system. Starting in late 2015, the Deputy Secretary has co-chaired the G-7 Cyber Expert Group with the Bank of England, bringing together finance ministries, central banks, and financial supervisors from Canada, France, Germany, Italy, Japan, United States, United Kingdom, and the European Union to evaluate current approaches to cybersecurity in each country's financial sector and to identify commonalities, differences, and potential gaps in those approaches. Through Treasury and the Bank of England's leadership, the G-7 Cyber Expert Group also began development of a concise set of principles on best practices in cybersecurity for public and private entities in the financial sector in an effort to promote convergence in entity-specific and sector-wide cyber frameworks and build mutual trust and

#### Safeguarding the U.S. Financial System from Illicit Funds

Money laundering can facilitate crimes such as drug trafficking and terrorism, and can adversely impact the global economy. FinCEN regulates, collects, and analyzes reporting from financial institutions to hinder money laundering, terrorist financing and other financial crimes. This reporting alone, and when combined with information from law enforcement and other sources, assists investigators in identifying financial networks, banking and travel patterns, businesses and personal associations, and communication methods; and provides previously unknown physical addresses, IP addresses, and phone numbers that help identify and link subjects of interest to criminal activity. FinCEN regulation and enforcement further harden the U.S. financial system against illicit activity.

cooperation among countries with closely linked financial systems.

We are equally dedicated to enhancing Treasury's internal cybersecurity and resiliency. At the start of FY 2016, our Chief Information Officer (CIO) Council formally adopted an agency-wide Cybersecurity Strategy and Framework for 2016 implementing a unified defense for Treasury bureaus and offices. The primary objective of our 2016 Cybersecurity Strategy is for all bureaus to achieve all of the specified targets called for by the Administration under the President's Management Council and Cybersecurity National Action Plan.

We have been recognized by OMB and DHS for our leadership in cyber incident response and analytical capabilities against advanced persistent threats. We continue to block threats on a weekly basis across the enterprise, sharing lessons learned and practices across government and the financial sector.

In September 2016, our Chief Information Security Officer (CISO) called the first quarterly Financial and Banking Information Infrastructure Committee CIO/CISO Subcommittee meeting. This meeting was established to facilitate information sharing and develop common risk-based approaches to managing internal cybersecurity risk at financial regulatory agencies.

Also in FY 2016, we developed the Cyber Cohort program to address concerns raised in OMB's

Cybersecurity Strategy and Implementation Plan. A critical concern for Treasury included the lack of a pipeline of cybersecurity employees. This program aims to promote long-term Treasury needs by attracting, developing, and retaining cyber talent for long-term success. The pilot, launched in September 2016, provides enhanced developmental opportunities, including a cyber training curriculum designed by cyber professionals and focused on cyber certification, individualized mentoring, concentrated developmental plans, and six-month rotational assignments for participants at a Treasury bureau.

#### INCREASING THE USE OF FINANCIAL INTELLIGENCE

Strategic Objective 4.1 was identified as achieving noteworthy progress, as a result of the creation and sharing of actionable and targeted financial intelligence among stakeholders. In FY 2016, we experienced growing demand for our national security response efforts. The Office of Intelligence and Analysis and FinCEN continued to support the broader Treasury efforts against terrorism by identifying illicit sources of revenue and illegal attempts to access the international financial system. In support of this effort, FinCEN systems operate using more than 180 business rules daily to screen BSA filings and identify reports that merit further review for topics of national security concern, such as terrorist financing and cyber threats. These rules generated roughly 71,000 findings in FY 2016, compared to roughly 56,000 in FY 2015.

The Department and FinCEN, in particular, have worked on a number of fronts to strengthen financial transparency. Key among these initiatives has been the rollout of the final customer due diligence rule and draft beneficial ownership legislation. FinCEN has helped lead these efforts with extensive feedback from the public, both of which seek to increase the ability of law enforcement to identify the assets and accounts of money launderers and other illicit actors. Over the past few years, FinCEN successfully has used its Geographic Targeting Order (GTO) authority to target money laundering threats such as tax fraud by identity theft, the movement of U.S. dollar cash across the southern border, and trade-based money laundering for priority drug trafficking organizations. FinCEN issued a GTO in Florida that contributed to the arrests and pending arrests of twenty-two alleged co-conspirators in a money-laundering scheme with ties to the Mexican Sinaloa drug cartel. A separate GTO aimed at money laundering in real estate focuses on the proceeds of cash purchases of luxury real estate in Manhattan and Miami in an effort to uncover individuals attempting to hide assets for potentially illegal purposes by concealing their identities.

In 2014, FinCEN initiated a multi-tiered partnership between law enforcement, financial intelligence units (FIUs), and financial institutions, the Global Rapid Response Program to recover and restrain funds obtained through cyber-enabled crimes targeting financial institutions and their clients. Since its creation, the program has recovered or restrained more than \$267 million before it could be used by criminals. FinCEN leverages its relationships with counterpart FIUs to encourage foreign authorities to intercede and freeze funds or reverse wire transfers. The program has completed over 475 requests to foreign FIUs on behalf of the Federal Bureau of Investigation, United States Secret Service, and various U.S. financial institutions.

# **Criminal Asset Forfeiture**

Asset forfeiture is an important tool in the U.S. fight against money laundering. From drug cartels to criminal syndicates, law enforcement can inflict damage on these insidious structures by the removal of enabling assets and profits that support and/or encourage their existence. Congress established the Treasury Executive Office of Asset Forfeiture to hold non-tax forfeitures. Its mission is to affirmatively influence the consistent and strategic use of asset forfeiture by participating agencies to disrupt and dismantle criminal enterprises. The greatest opportunities for the Fund is using asset forfeiture sanctions to punish and deter broad and growing areas of criminal activity including cyber fraud, identity theft, money laundering, immigration violations and others.

# **KEY PERFORMANCE DATA HIGHLIGHTS**

| Measure<br>(Responsible Bureau/Office)  | FY 13 | FY 14 | FY 15 | FY 16 | FY 16<br>Target | Result vs Target |
|---|-------|-------|-------|-------|-----------------|------------------|
| Percentage of users finding that the financial<br>intelligence collected by FinCEN pursuant to<br>its regulations provides valuable information<br>to safeguard the financial system, combat<br>money laundering, and counter terrorist<br>financing <sup>1</sup> | 80    | 81    | 83    | 84    | 84              | Met              |
| Explanation of Results  |       |       |       |       |                 |                  |

<sup>1</sup>Survey data that looks at the value of FinCEN data, such as whether the data provided unknown information, supplemented or expanded known information, verified information, helped identify new leads, opened a new investigation or examination, supported an existing investigation or examination, or provided information for an investigative or examination report. In FY 2016, FinCEN met its target of 84 percent. FinCEN attained this result by continued emphasis on on-line training that will better assist users in understanding and utilizing the FinCEN Query tool for their unique cases and situations.

# Goal 5: Create a 21<sup>st</sup> Century approach to government by improving efficiency, effectiveness, and customer interaction

We continuously strive to work better and smarter, recognizing that how we use our resources directly impacts our ability to deliver results to the American people. Our strategic objectives for achieving our fifth goal are to: (i) increase workforce engagement, performance, and diversity by instilling excellence, innovation, and inclusion in our organizational culture and business practices; (ii) support effective, data-driven decision-making and encourage transparency through intelligent gathering, analysis, sharing, use, and dissemination of information; (iii) promote efficient use of resources through shared services, strategic sourcing, streamlined business processes, and accountability; and (iv) create a culture of service through relentless pursuit of customer value.

We have an agency priority goal to increase selfservice options for taxpayers, led by the IRS, which is aligned to Objective 5.4, which we identified in our FY 2016 SOAR as a focus area for improvement. Objective 5.4 was categorized as a focus area for improvement because the IRS and Fiscal Service, our key external-facing providers, began efforts in FY 2015 to improve their customers' experience. Additionally, in keeping with Objective 5.3, we are working to implement the provisions of the *Fixing America's Surface Transportation (FAST) Act*, which requires the use of private debt collection agencies to collect unpaid federal tax.

# **INFORMATION TECHNOLOGY CAPABILITIES**

Our implementation of the *Federal Information Technology Acquisition Reform Act* (FITARA) improved a number of our processes, notably information technology (IT) procurement and budget coordination, and transparency for IT acquisitions across Treasury. We are dedicated to implementing FITARA in accordance with OMB's guidelines and our needs. Our self-assessment against the common baseline established by OMB demonstrates that we have achieved the highest rating (3 out of 3) in all but two of the 17 measurable categories. OMB requested that we present our FITARA implementation strategy to the Federal CIO Council. Our focus is sustainability, which means integrating the goals of FITARA into existing processes to reduce redundancies and ensure efficiencies over time.

Since 2010, we have closed 19 out of 59 tiered data centers and another 573 non-tiered data centers. Along with the closing of data centers, Treasury, over the last year, also has focused on changing the approach to how we spend our technology budget. We have focused more on enterprise-wide services, which has led to the Department moving more money into efforts to develop new or modernize existing systems, and away from legacy technology. We increased our spending on modernization and enhancements from 19 to 24 percent of our total IT budget over the last five years.

# **HIGH VALUE ASSETS**

We have worked closely with bureaus to identify and prioritize high value assets (HVAs) of the Department based on mission criticality, amount and sensitivity of data stored, and external interconnections, among other factors. For each HVA, we performed an initial security review and are developing security controls tailored to each HVA; these controls will supplement existing baseline security controls that apply across the Department. Additionally, we have engaged with DHS to perform security assessments of select HVAs, and have begun to integrate HVA into the Corporate Planning and Investment process.

# SERVICE TO TAXPAYERS

The IRS increased the filing season Customer Service Representative Level of Service (LOS) to 72.1 percent during the 2016 filing season (January through April), a substantial improvement over the filing season LOS delivered in FY 2015. The IRS assistors answered more than 13.1 million calls, an increase of over 5 million from the prior year filing season. The average speed of answer was 11 minutes, compared to a wait time of 23 minutes in the prior year.

To improve the experience of taxpayers who visit IRS sites in person, the IRS expanded the use of appointments to 310 Taxpayer Assistance Center (TAC) sites and 24 virtual sites located in external partner offices. This rollout included several of the busiest TACs in order to alleviate taxpayer and Congressional concerns about long lines and extended wait times. Following the rollout, the appointment service enabled the IRS to realize a significant reduction in taxpayer wait time, with more than 91 percent of customers receiving service within 30 minutes. Wait times on the TAC appointment line averaged six minutes, and nearly 51 percent of taxpayers who called to make an appointment had their issues resolved during the call without the need to come in, allowing the IRS to reserve face-to-face service for more complex issues. For taxpayers with those issues, the appointment line also gave the IRS a chance to delineate the documents they need to bring to the meeting, which helped make appointments more efficient. As a result, appointment service has significantly reduced taxpayer burden by eliminating the need for time and travel to IRS offices.

IRS.gov continued to be the primary method for providing tax information and services to taxpayers. The IRS enhanced existing online and self-help service options by increasing the amount of tax information and services available to taxpayers through IRS.gov. Self-service applications on IRS.gov enabled taxpayers to exchange information online with the IRS, decreasing service requests from highercost channels such as telephone assistance. IRS.gov ensures that the public has access to current and accurate tax information with near real-time updates of more than 140,000 forms, publications, news items, rules, and articles.

IRS2Go is the official mobile app of the IRS Check your relund status, make a payment, find free tax preparation assistance, sign up for helpful tax tips, and morel IRS2Go is available in both English and Spanish. Download IRS2Go for your mobile device IRS2Go offers many features

DEPARTMENT OF THE TREASURY

2 CENTS

# The IRS Goes "Mobile"

The IRS has enhanced its digital self-service options by increasing the amount of tax information and services available through IRS.gov and the mobile app, IRS2Go. The new mobile tool allows taxpayers to electronically access refund status, make a payment, receive free tax preparation assistance, and view helpful videos. While staying ahead of continuously evolving cybercrime is a constant challenge and requires extreme vigilance, the IRS was able to continue to build robust programs to improve the identification and prevention of refund fraud and identity theft, and to enhance cybersecurity to safeguard taxpayer data. For example, the IRS completed the first release of its Short Messaging Service Platform, which allowed for the issuance of a one-time password to a taxpayer via text messaging services, paving the way for two-factor authentication for taxpayers trying to access their tax records.

In addition, the IRS implemented advanced security capabilities for all IRS.gov applications to provide protection from various, ever-expanding cyber threats and attacks. These capabilities will allow IRS to detect and block criminal access, as well as allow the bureau to perform analytics to identify and assess vulnerabilities leading to the development and implementation of risk mitigation strategies. In FY 2016, taxpayers viewed IRS.gov web pages more than 1.7 billion times, using the website to retrieve tax information and to gain access to applications and products. The IRS also developed and launched several web and mobile tools allowing taxpayers and third parties to communicate and transact with the IRS, such as the IRS Direct Pay application, PayNearMe, the Online Payment Agreement application, a Web Chat Feature for tax return preparers, and the Get Transcript re-launch.

In the summer of 2016, the IRS re-launched a more rigorous e-authentication system for taxpayers that is expected to significantly increase protection against identity thieves impersonating taxpayers to access tax return information through the Get Transcript online service. This new, more secure framework requires a multi-step authentication process, enabling citizens to access their information while helping defend against fraud.

# RISK MANAGEMENT GOVERNANCE STRUCTURE

In July 2016, OMB released an updated Circular No. A-123 Management's Responsibility for Enterprise Risk Management and Internal Control to ensure federal managers are effectively managing risks to achieve strategic objectives. Management, together with the Chief Risk Officer (CRO), is responsible for establishing a governance structure to effectively implement, direct and oversee implementation of the Circular and all the elements of a robust process of risk management and internal control. Successful implementation of this Circular requires us to establish and foster an open, transparent culture that encourages people to communicate information about potential risks and other concerns with their superiors. The Deputy Secretary and the CRO cochair regular risk committee meetings of leaders from across the Department and routinely coordinate with OMB.

# **KEY PERFORMANCE DATA HIGHLIGHTS**

| Measure<br>(Responsible Bureau/Office)   | FY 13  | FY 14  | FY 15  | FY 16 | FY 16<br>Target | Result vs Target |
|--|--------|--------|--------|-------|-----------------|------------------|
| Federal Employee Viewpoint Survey (FEVS)<br>Engagement Index – 1 to 100 (%)<br>(Management) <sup>1</sup> | 68     | 66     | 66     | 67    | 67              | Met              |
| Treasury-wide Footprint in Thousands of Sq.<br>Ft. (Management) <sup>2</sup>                             | 37,320 | 36,418 | 35,439 | TBD   | 34,927          | TBD              |
| Full-year Customer Service Representative<br>Level of Service (%) (IRS) <sup>3</sup>                     | 60.5   | 64.4   | 38.1   | 53.4  | 47.0            | Exceeded         |

### **Explanation of Results**

<sup>1</sup>The FEVS Engagement Index is comprised of three OPM calculated indices *Leaders Lead, Supervisors*, and *Intrinsic Work Experiences*. The Engagement Index denotes the extent to which employees are engaged in their work and motivated by their organization's leadership. Treasury's Engagement Index showed a one percent increase from 66 percent to 67 percent between 2015 and 2016. Eight out of eleven Treasury components continue to show increases in their Engagement Index by 1 to 3 points from 2015 to 2016. The increase in Treasury's Engagement Index can be attributed to gains in all three indices.

<sup>2</sup>Measures the total square footage occupied by Treasury's owned and leased buildings. The Department's real property footprint was reduced by an estimated three percent (almost one million square feet) during FY 2015. The reduction was achieved through better use of existing office space, consolidations and co-locations, increased use of telework, and the implementation of new space design standards that use a reduced footprint to optimally right-size the portfolio consistent with Department mission and essential program needs. The Department projects that the footprint will be reduced by another 500,000 square feet in FY 2016. The final FY 2016 footprint data is expected to be available in late December 2016 following the Federal Real Property Profile asset reporting period.

<sup>3</sup>This measure indicates the number of toll free callers that either speak to a Customer Service Representative or receive information messages divided by the total number of attempted calls during the full fiscal year. In FY 2015, the Customer Service LOS target was lowered due to decreased resources and staffing and a projected increase in the number of ACA inquiries. Due to an increase in appropriated resources in FY 2016, the IRS has been able to increase the Customer Service Representative LOS compared to last year. This is largely due to an increase in the number of assistor calls answered. Through extensive communication, the IRS encourages taxpayers to use online or automated tools and alternate service channels to resolve their concerns quickly and efficiently.

# SUMMARY OF MANAGEMENT AND PERFORMANCE CHALLENGES

Several cross-cutting challenges were identified in our FY 2016 organizational performance reviews that affect efforts to achieve our strategic priorities:

**Rapid Pace of Change:** In many strategic objectives, programs face risks and challenges posed by continuously evolving threats or increasing sophistication of criminals, growth and change in key customer industries or work portfolios, and the need to modernize technology to support these changes.

# Human Capital –Workforce Planning/Recruitment:

Challenges within the human capital lifecycle (e.g., recruitment-development-retention) and the lengthy security clearance process are routinely referenced as challenges to mission success. Additionally, expanding the use of workforce planning and metrics to proactively forecast and meet workforce needs, particularly in the enforcement, analytics, and regulatory fields, proves challenging.

**Need for Congressional Action:** In a third of our strategic objectives, Congressional action on funding and authorizations is needed.

**Cybersecurity:** Continued growth of increasingly sophisticated threats requires constant vigilance through sophisticated monitoring, implementation of cyber hygiene, an insider threat program, and retention and recruitment of top talent (enabled by the use of strategic workforce planning) to ensure proper baseline protections.

In addition to the performance challenges discussed above and in the previous sections of this report, OIG and TIGTA have identified the most significant management and performance challenges facing the Department, in accordance with the *Reports Consolidation Act of 2000.* These challenges do not necessarily indicate deficiencies in performance; some represent inherent risks that require continuous monitoring. Refer to Section D of *Part 3, Other Information*, for detailed discussion of these challenges, including our progress toward addressing them.

# **OIG IDENTIFIED MANAGEMENT CHALLENGES**

- Cyber Threats
- Efforts to Promote Spending Transparency and to Prevent and Detect Improper Payments
- Anti-Money Laundering and Terrorist Financing/Bank Secrecy Act Enforcement
- Management of Treasury's Authorities Intended to Support and Improve the Economy

# TIGTA IDENTIFIED MANAGEMENT CHALLENGES

- Security Over Taxpayer Data and Protection of IRS Resources
- Identity Theft and Impersonation Fraud
- Implementing the Affordable Care Act and Other Tax Law Changes
- Improving Tax Compliance
- Reducing Fraudulent Claims and Improper
  Payments
- Improving Tax Systems and Expanding Online Services
- Providing Quality Taxpayer Services
   Operations
- Impact of Global Economy on Tax Administration
- Protecting Taxpayer Rights
- Achieving Program Efficiencies and Cost Savings

Additional details on the OIG and TIGTA identified Management and Performance Challenges can be found in Part 3, Section D, of this report.

# SUMMARY OF MATERIAL WEAKNESSES

# FISCAL SERVICE CONSOLIDATED FINANCIAL STATEMENT PROCESS

The Fiscal Service material weakness for internal control over the preparation of the Consolidated Financial Statements of the U.S. government continued to exist in FY 2016. Effective internal controls are a challenge not only at the agency level, but also at the government-wide level. While progress is being made at many agencies and across the government in identifying and resolving internal control deficiencies, continued diligence and commitment are needed.

The Fiscal Service made progress on implementing corrective actions during FY 2016 that resolved certain control deficiencies, however, recommendations remained open. Fiscal Service has a robust remediation plan and we are committed towards improving federal financial reporting through continued collaboration with the U.S. Government Accountability Office, OMB, and the federal agency community to pursue mitigation and resolution of the remaining issues.

# IRS UNPAID TAX ASSESSMENTS AND FINANCIAL REPORTING

The IRS material weakness in internal control over unpaid tax assessments and significant deficiency in internal control over financial reporting systems continued to exist in FY 2016, and are collectively considered a material weakness at the Department level. The IRS has a robust remediation plan that is updated and reviewed by the IRS and Treasury Executives on a quarterly basis. Additionally, the progress of the remediation plan is reviewed annually by TIGTA. The outstanding corrective actions are scheduled to be completed by FY 2021.

Additional information on the material weaknesses can be found in Part 3, Section E, of this report.

# FY 2017 OUTLOOK

In considering the challenges and risks to successful mission delivery facing the Department, we identified several initiatives to pursue in FY 2017:

- Utilize Cybersecurity Enhancement Account to strengthen our cybersecurity posture and mitigate cybersecurity risks to improve the resilience of the nation's financial sector.
- Build on the IRS efforts to identify opportunities for a more user-friendly and cost-effective customer service channel, improve the overall taxpayer experience, and gain operational efficiency and productivity. **(FY 2016-2017 APG led by IRS)**
- Secure FY 2017 State Small Business Credit Initiative and CDFI Bond Guarantee Reauthorization to continue programs that support small businesses, create and retain jobs, and assist disadvantaged communities.

- Issue notice of proposed rulemaking to clarify and consolidate federal labeling regulations.
- Continue to engage with G-20 members to leverage the Financial Stability Board (FSB) to collective advantage and support FSB objectives, and secure renewed G-20 commitments to refrain from competitive devaluation and consult on exchange rates.
- Maintain commitment to taking aggressive action against Islamic State of Islam and Levant and Al-Qaeda by imposing sanctions on designated financiers and facilitators.
- Continue increasing financial transparency through managing government-wide implementation of the DATA Act and completing major milestones to meet the statutory deadline of May 2017. (FY 2016-2017 APG led by OFAS/Fiscal Service)

# **FINANCIAL HIGHLIGHTS – FINANCIAL OVERVIEW**

The financial highlights below are an analysis of the information included in our consolidated financial statements that appear within Part 2, "Financial Section" of this report. Our principal financial statements have been prepared to report Treasury's financial position and results of operations, pursuant to the requirements of 31 USC 3515(b). These consolidated financial statements have been prepared from our books and records in accordance with generally accepted accounting principles (GAAP) for federal entities and the formats prescribed by OMB. The consolidated financial statements are in addition to the financial reports used to monitor and control budgetary resources, which are prepared from the same books and records. The financial statements are for a component of the U.S. government, a sovereign entity.

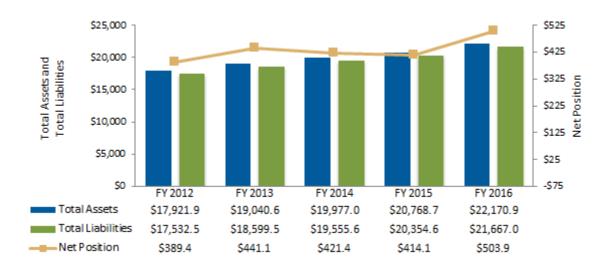

The chart below presents changes in key financial statement line items as of and for the FY ended September 30, 2016, compared to September 30, 2015.

|  | 2016                     | 2015        | \$ Change | % Change |
|--|--------------------------|-------------|-----------|----------|
| Total Assets   | \$<br><b>22,170.9</b> \$ | 20,768.7 \$ | 1,402.2   | 6.8%     |
| Total Liabilities  | \$<br><b>21,667.0</b> \$ | 20,354.6 \$ | 1,312.4   | 6.4%     |
| Total Net Position   | \$<br><b>503.9</b> \$    | 414.1 \$    | 89.8      | 21.7%    |
| Total Net Cost of Treasury Operations                      | \$<br><b>17.7</b> \$     | 23.5 \$     | (5.8)     | (24.7)%  |
| Net Federal Debt Interest Costs                            | \$<br><b>385.7</b> \$    | 367.3 \$    | 18.4      | 5.0%     |
| GSEs Non-Entity Revenue, Net                               | \$<br><b>(13.8)</b> \$   | (30.8) \$   | 17.0      | (55.2)%  |
| Total Net Cost of Treasury Operations and Non-Entity Costs | \$<br><b>403.6</b> \$    | 374.9 \$    | 28.7      | 7.7%     |
| Total Budgetary Resources                                  | \$<br><b>797.3</b> \$    | 800.0 \$    | (2.7)     | (0.3)%   |
| Agency Outlays, Net  | \$<br><b>400.3</b> \$    | 370.2 \$    | 30.1      | 8.1%     |
| Net Revenue Received (Custodial)                           | \$<br><b>3,048.7</b> \$  | 3,024.0 \$  | 24.7      | 0.8%     |

# Summary Financial Information (dollars in billions)

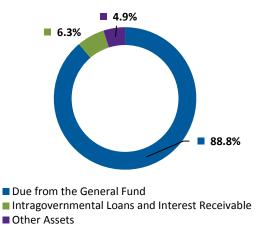

**Financial Overview.** Our financial performance as of and for the FY ended September 30, 2016, reflects several major trends. Most significantly, the outstanding federal debt, including interest, rose by \$1.4 trillion to \$19.7 trillion to finance the U.S. government's operations. Of this increase, \$352.6 billion stemmed from the restoration on November 2, 2015 of Treasury securities, plus \$2.7 billion of foregone interest, to certain trust funds that had been either suspended or redeemed early during 2015 as a result of extraordinary debt management measures we took during the period between March 16, 2015 and October 30, 2015 in which Congress delayed raising the statutory debt limit (referred hereinafter as "Delay"). We accrued a liability of \$350.7 billion as of September 30, 2015, reflecting our obligation by statute as of that date to issue Treasury securities, and foregone interest, to the trust funds.

Additionally, our "Total Net Cost of Treasury Operations and Non-Entity Costs" for FY 2016 increased by \$28.7 billion primarily stemming from non-entity activity, including \$18.4 billion of higher net federal debt interest costs and \$17.0 billion of lower revenue from our investments in two government-Sponsored Enterprises (GSEs) – Fannie Mae and Freddie Mac – pursuant to our Senior Preferred Stock Purchase Agreements, as amended.

### Figure 1: Total Assets, Total Liabilities, and Net Position (in billions)

**Total Assets** of \$22.2 trillion at September 30, 2016 consist of a receivable due from the General Fund of the U.S. government of \$19.7 trillion, intra-governmental loans and interest receivable of \$1.4 trillion, and fund balance and various other assets totaling \$1.1 trillion (Figure 2).

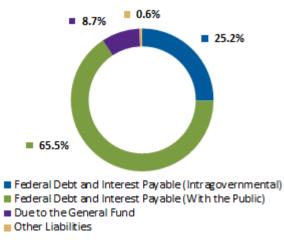

### Figure 2: FY 2016 Total Assets (Composition)

The \$1.4 trillion (or 6.8 percent) increase in total assets at the end of FY 2016 over the prior year is primarily due to a \$1.1 trillion increase in the "Due from the General Fund of the U.S. government" account which corresponds to increases in the following liabilities: a \$1.4 trillion increase in federal debt and related interest payable, partially offset by a \$350.7 billion decrease in a liability established in 2015 for the restoration of federal debt principal and interest in connection with the Delay. The net addition to Treasury liabilities at September 30, 2016 caused a corresponding rise in the "Due from the General Fund of the U.S. government" asset account which represents future funds required from the General Fund of the U.S. government to pay borrowings from the public and other federal agencies.

Intra-governmental loans and interest receivable represent loans issued primarily by the Fiscal Service to other federal agencies for their own use or for the agencies to loan to private sector borrowers whose loans are guaranteed by the federal agencies. This receivable grew by \$94.1 billion (or 7.2 percent) to \$1.4 trillion at the end of FY 2016 due to increased borrowings by various federal agencies – such as the Departments of Education and Agriculture – to fund their existing programs.

Other assets include, among other things, operating cash balances (held on behalf of the U.S. government), foreign currency investments and Special Drawing Rights, as well as investments in, and credit program receivables due from, certain financial institutions for which we provide financial assistance in an effort to stabilize financial markets. Other assets increased by \$241.2 billion, primarily reflecting increases in both the U.S. government's operating cash balances and Treasury's fund balance of \$157.0 billion and \$82.7 billion, respectively. Operating cash balances, held in depository institutions and Federal Reserve Bank accounts, increased in FY 2016 due to increased borrowings from the public. The increase in our fund balance stems from new legislation, *Consolidated Appropriations Act, 2016*  (*P.L. 114-113*), which, among other things, ended the application of the *Federal Credit Reform Act of 1990* guidelines for funding transactions involving the United States' participation in the IMF, and therefore required us to obtain an appropriations warrant totaling \$94.4 billion to cover the full amount of the commitment made to the IMF.

#### Figure 3: FY 2016 Total Liabilities (Composition)

**Total Liabilities** of \$21.7 trillion at September 30, 2016 principally consist of the federal debt held by the public (Figure 3), including interest, of \$14.2 trillion, which were mainly issued as Treasury Notes and Bills. Liabilities also include intra-governmental liabilities totaling \$7.4 trillion (of which \$5.5 trillion represent principal and interest of federal debt in the form of Treasury securities held by federal agencies), and various other liabilities totaling \$83.6 billion. The \$1.3 trillion (or 6.4 percent) increase in total liabilities over the prior year is attributable to a \$1.4 trillion increase in federal debt, including interest, held by the public and federal agencies that was needed to finance the U.S. government's budget deficits. This was partially offset by the reduction in full of a \$350.7 billion liability established at the end of FY 2015 for the restoration of federal debt principal and interest owed to three trust funds – the Government Securities Investment Fund of the Federal Employees' Retirement System Thrift Savings Plan, Civil Service Retirement and Disability Trust Fund, and the Postal Service Retiree Health Benefits Fund – in connection with extraordinary measures we undertook during the Delay.

The increase in total liabilities is also attributable to a \$242.7 billion increase in the "Due to the General Fund of the U.S. government" account, which corresponds primarily to increases in the U.S. government's operating cash balances and intra-governmental loans and interest receivable, as discussed above. Through the Fiscal Service, we account for and report on the principal borrowings from and repayments to the General Fund, as well as the related interest due to the General Fund.

Total Net Position of \$503.9 billion at September 30, 2016 represents the combined total of our cumulative results of operations and unexpended appropriations at the end of the FY. The \$89.8 billion (21.7 percent) increase in the net position at the end of FY 2016 was principally attributable to an increase in unexpended appropriations as a result of our obtaining an appropriations warrant in FY 2016 to cover the full amount of the U.S. government's commitment to the IMF in connection with the enactment of P.L. 114-113 in 2016.

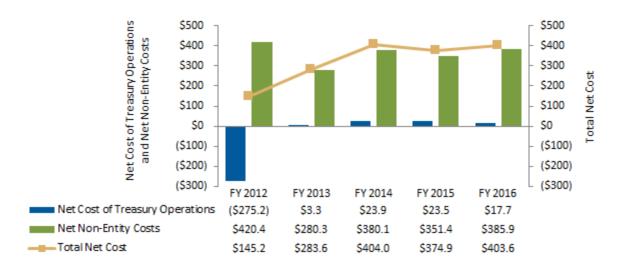

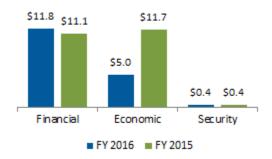

Figure 4: Net Cost of Treasury Operations and Non-Entity Costs (in billions)

Total Net Cost of Treasury Operations and Non-Entity Costs, as presented on our Consolidated Statements of Net Cost, consists of the Net Cost of Treasury Operations and Net Non-Entity Costs (Figure 4). Net Cost of Treasury Operations represents the gross costs, net of earned revenues, we incurred related to our own entity activities comprising both operating bureaus and DO that are consolidated with the Department. Net Non-Entity Costs represent the gross costs, net of earned revenues, we incurred on behalf of the U.S. government (or General Fund), and primarily include federal debt interest costs, net of GSE non-entity revenues. Total Net Cost of Treasury Operations and Non-Entity Costs totaled \$403.6 billion and \$374.9 billion for FYs 2016 and 2015, respectively, an increase of \$28.7 billion (or 7.7 percent) over the prior year. Net Non-Entity Costs contributed \$34.5 billion of the year-over-year increase in net costs, offset by a year-over-year decrease in Net Cost of Treasury Operations of \$5.8 billion.

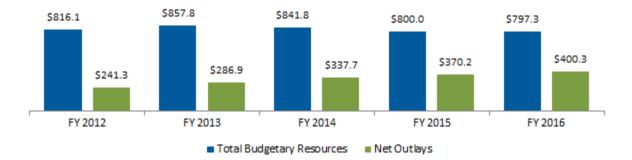

### Figure 5 : Net Cost of Treasury Operations by Strategic Program (*in billions*)

Net Cost of Treasury Operations is presented on our Consolidated Statements of Net Cost by strategic program. There are three main categories of strategic programs presented – financial, economic, and security – as well as a management strategic program which is combined with the financial program due to the immateriality of the management program (Figure 5). Our Net Cost of Treasury Operations totaled \$17.7 billion for 2016 compared to \$23.5 billion for 2015, a decrease of \$5.8 billion (or 24.7%). This decrease is primarily a result of reduced valuation losses associated with our foreign denominated investments due to improved currency exchange rates of foreign currencies against the U.S. dollar.

**Net Federal Debt Interest Costs** primarily reflect interest expense on the federal debt. Federal interest costs increased by \$20.5 billion (or 5.0 percent) in FY 2016 primarily attributable to increased net outstanding debt held by the public, and increased inflation adjustments associated with Treasury Inflation-Protected Securities which are driven by increases in the Consumer Price Index.

**GSEs Non-Entity Revenue, Net** totaled \$13.8 billion for 2016 compared to \$30.8 billion for 2015. The \$17.0 billion decrease in this net revenue in 2016 was driven by an \$8.8 billion year-to-year decrease in senior preferred stock dividends received from the two GSEs due to lower combined GSE earnings in 2016. Additionally, the fair value of our GSE investments increased by \$2.3 billion at the end of FY 2016 compared to an increase of \$10.5 billion at the end of FY 2015, contributing to an additional \$8.2 billion decrease in this non-entity revenue. This year-to-year variance primarily reflects changes in forecasted GSE earnings derived from guarantee fees, forecasted mortgage loan losses, and lower interest rates.

#### Figure 6 : Total Budgetary Resources and Agency Outlays, Net (in billions)

**Total Budgetary Resources** of \$797.3 billion in FY 2016 (Figure 6) were relatively unchanged year over year, reflecting a slight decline of \$2.7 billion (or 0.3 percent), from the prior year.

Agency Outlays, Net of \$400.3 billion were higher in FY 2016 (Figure 6) by \$30.1 billion (or 8.1 percent) primarily due to a \$26.9 billion increase in interest payments on debt.

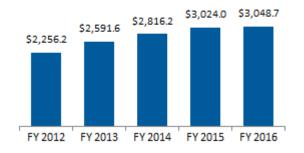

Figure 7 : Net Revenue Received (Custodial) (in billions)

Net Revenue Received (Custodial), representing net revenue we collected on behalf of the U.S. government, includes various taxes, primarily income taxes, as well as user fees, fines and penalties, and other revenue. Over 90 percent of these revenues are related to income and social security taxes. Net revenue received was \$3.0 trillion for FY 2016, an increase of \$24.7 billion (or 0.8 percent) over the prior fiscal year. This increase is attributable mainly to an overall growth in individual invcome tax collections, partially offset by reduced corporate income tax collections.

# **MANAGEMENT ASSURANCES**

# THE SECRETARY'S ASSURANCE STATEMENT

The Department of the Treasury's management is responsible for establishing and maintaining effective internal control and financial management systems that meet the objectives of the *Federal Managers' Financial Integrity Act* (FMFIA). Treasury has evaluated its management controls, internal controls over financial reporting, and compliance with federal financial systems standards. As part of the evaluation process, Treasury considered results of extensive testing and assessment across the Department and independent audits.

Treasury provides assurance that the objectives of Section 2 of the FMFIA (Financial Reporting and Operations) have been achieved, except for the material weaknesses noted below. Treasury is in substantial conformance with Section 4 (Financial Management Systems) of the FMFIA. Also, in accordance with OMB Circular A-123, Management's Responsibility for Enterprise Risk Management and Internal Control, Appendix A, Internal Control over Financial Reporting, Treasury provides modified assurance that internal control over financial reporting was operating effectively based on the results of the assessment as of June 30, 2016. Treasury's financial management systems are not in substantial compliance with the Federal Financial Management Improvement Act (FFMIA) due to the IRS's material weakness related to unpaid tax assessments.

Jacob J. Lew Secretary of the Treasury November 15, 2016

As of September 30, 2016, Treasury had two FMFIA material weaknesses as follows (with origination/planned resolution timeframes indicated):

### **Operations**:

 Bureau of the Fiscal Service – Control Deficiencies in the Processes used to Prepare the Consolidated Government-wide Financial Statements (Fiscal Years 2001/2018)

### Financial Reporting:

• IRS – Unpaid Tax Assessments (Fiscal Year 1995/2021)

Treasury management remains dedicated to the resolution of these remaining weaknesses. Overall, Treasury continues to work to maintain high standards, eliminate internal control weaknesses, and meet federal financial management systems requirements. Additional information on the material weaknesses can be found in Part 3, Section E, of this report.

# SYSTEMS, CONTROL AND LEGAL COMPLIANCE FMFIA weaknesses

# Background

The FMFIA requires Executive branch agencies to establish and maintain internal control to ensure that Federal programs operate efficiently, effectively, and in compliance with applicable laws. The management control objectives under FMFIA are to reasonably ensure that:

- Obligations and costs are in compliance with applicable laws
- Funds, property, and other assets are safeguarded against waste, loss, unauthorized use, or misappropriation
- Revenues and expenditures applicable to agency operations are properly recorded and accounted for to permit the preparation of accounts and reliable financial and statistical reports and to maintain accountability over the assets

FMFIA requires agencies to evaluate and report on the effectiveness of controls over financial and operational reporting (FMFIA Section 2), and conformance with financial management systems requirements (FMFIA Section 4 and FFMIA) that protect the integrity of federal programs. Deficiencies that seriously affect an agency's ability to meet these objectives are deemed "material weaknesses." We include resolution of material weaknesses as a performance requirement for every executive, manager, and supervisor.

# **Internal Control over Reporting**

We continue to strengthen and improve the execution of the Treasury mission through the application of sound internal controls over financial reporting. In accordance with Appendix A to OMB Circular A-123. Internal Control over Financial Reporting, we use an extensive annual testing and assessment methodology that identifies and documents internal controls over financial reporting at the transaction level integrated with the Government Accountability Office's Standards for Internal Control in the Federal Government. Our bureaus and offices completed their testing and assessment of internal controls for material transactions as of June 30, 2016. Based on the results of this assessment, we can provide a modified statement of assurance that internal control over financial reporting was effective as of June 30, 2016, due to the IRS's material weakness for unpaid tax assessments.

In conjunction with our OMB Circular A-123, Appendix A, FY 2016 Guidance and Implementation Plan, our bureaus and offices documented their compliance with applicable laws and regulations. Based on these results, we are in compliance with applicable laws and regulations with the exception of the FFMIA as addressed below and in Part 3, Section E, of this report.

# FFMIA AND FINANCIAL MANAGEMENT SYSTEMS

## FFMIA

The FFMIA requires federal agencies to implement and maintain financial management systems that substantially comply with federal financial management systems requirements, applicable federal accounting standards, and the United States Standard General Ledger at the transaction level. A financial management system includes an agency's overall financial operation, reflecting the people, processes, and technology to capture, classify, summarize, and report data in a meaningful manner to support business decisions.

Section 803(c) (1) of the FFMIA requires us to make an annual determination of the agency's substantial compliance with Section 803(a) of the Act based on review of relevant factors. We assess our financial management systems annually for conformance with the requirements of Appendix D to OMB Circular A-123, *Compliance with the FFMIA*, and other federal financial system requirements. Our assessment process includes the use of the FFMIA Compliance Determination Framework, which incorporates a risk model of risk levels against common goals and compliance indicators. OMB Circular A-123, Appendix D, contains an outcome-based approach to assess FFMIA compliance through a series of financial management goals that are common to all agencies.

In addition, we assess available information from audit reports and other relevant and appropriate sources, such as FISMA compliance activities, to determine whether our financial management systems substantially comply with FFMIA. We also assess improvements and ongoing efforts to strengthen financial management systems and the impact of instances of non-compliance on overall financial management system performance. Based on the results of our overall assessment, we concluded that our financial management systems are substantially compliant with the FFMIA requirements, with the exception of the IRS. The IRS did not comply with federal financial management systems requirements or applicable federal accounting standards. The IRS has established a robust remediation plan to achieve compliance with the FFMIA requirements. The IRS received agreement from OMB that the current remediation plan satisfies the requirements of Appendix D to OMB Circular A-123, replacing the need for a waiver from OMB for remediating a material weakness taking longer than three years under FMFIA. The remediation plan is updated and reviewed by IRS and Treasury Executives on a quarterly basis. Additionally, the progress of the remediation plan is reviewed annually by TIGTA. Additional information on the IRS's remediation plan can be found in IRS's FY 2016 Annual Financial Report.

## **Financial Management Systems**

Our financial management systems framework consists of two fundamental components: (1) financial and mixed systems maintained by the Treasury bureaus, and (2) the Department-wide Financial Analysis and Reporting System (FARS). The bureau systems process and record detailed financial transactions and submit summary-level data to the FARS, which maintains the key financial data necessary for Treasury-wide consolidated financial reporting. This framework satisfies the bureaus' diverse financial operational and reporting needs, as well as our internal and external reporting requirements. The FARS framework provides essential support each year to our efforts to obtain an unmodified audit opinion.

The FARS includes the following financial applications:

- Treasury Information Executive Repository (TIER) a financial data repository used to consolidate and validate bureau financial data
- TIER Financial Statements (TFS) a reporting application used to produce monthly and annual financial statements, notes, and other supporting reports

Our bureaus submit summary-level financial data to TIER on a monthly basis. The TFS application uses the

bureau data to produce financial statements and reports on both a Department-wide and bureau-level basis, including Treasury's annual audited financial statements and monthly management reports. Fifteen Treasury bureaus and offices use centralized financial operations, budget execution services, or IT support provided by the Fiscal Service's Administrative Resource Center (ARC). This shared service approach enables bureaus and offices to have access to core financial systems without having to maintain the necessary technical and systems architectures. The ARC also provides administrative services in the areas of accounting, payroll, human resources, procurement, financial management of budget execution, fixed assets, inventory and order management, and travel to our bureaus and offices and to other federal entities to support core business activities. Using these services reduces the need for us to maintain duplicative financial management systems; enhances the quality, timeliness, and accuracy of financial management processes; and provides a more efficient and cost-effective business model.

In FY 2016 ARC began providing financial management and procurement system services to its first cabinet level customer agency (HUD). Additionally, ARC initiated three multi-year system enhancement efforts: 1) implementation of Service Oriented Architecture to standardize integration technology; 2) implementation of an automated financial statement tool; and 3) enhancement of the ad-hoc reporting tool.

# **Goals and Supporting Strategies**

Our financial system goals and supporting strategies focus on improving and streamlining the current bureau financial management systems as well as the current FARS applications in order to support new financial requirements and continue to provide management with accurate and timely financial information. In FY 2016, we updated TIER to meet new and evolving reporting requirements, including the reporting of financial and award data to support compliance with the DATA Act.

We also enhanced FARS IT infrastructure by beginning the migration of FARS applications from their current location at the Main Treasury building to IRS data centers in Memphis, Tennessee, and Martinsburg, West Virginia. The migration will support our Data Center Consolidation Initiative and will incorporate new physical hardware for hosting the FARS. The migration should be completed during the first quarter of FY 2017.

Along with bureau financial systems, the TIER and TFS applications form a unified financial governance solution that focuses on improving financial processes and controls. These systems and applications help us reduce operating costs, provide assurance over the quality of our financial data, improve the timeliness and quality of financial management processes and reporting, enhance internal controls, and improve transparency in the entire reporting process.

# **IMPROPER PAYMENTS**

### Background

The Improper Payments Elimination and Recovery Improvement Act of 2012 (IPERIA) requires agencies to annually report on all programs and activities, identify those that may be susceptible to significant improper payments, estimate annual improper payments in the susceptible programs and activities, and report the results of their improper payment activities.

Improper payments occur when funds go to the wrong recipient, the recipient receives the incorrect amount of funds (including overpayments and underpayments), documentation is not available to support a payment, or the recipient uses funds in an improper manner. Appendix C to OMB Circular A-123, Requirements for Effective Estimation and Remediation of Improper Payments, defines "significant improper payments" as gross annual improper payments in a program exceeding both the threshold of 1.5 percent of program outlays and \$10 million of all program or activity payments or \$100 million regardless of the improper payment percentage. Appendix C also requires agencies with programs susceptible to significant improper payments to implement corrective action plans that include improper payment root cause identification, reduction targets, and identification of accountable officials.

# **Risk Assessments and Results**

In FY 2016, we completed a full program inventory and performed risk assessments to identify programs that have a significant risk of improper payments. We performed our assessment of each program using the nine qualitative risk factors identified in OMB Circular A-123, Appendix C. We also performed quantitative risk assessments and assessed risks related to the amounts of payments processed relative to the OMB specified threshold amounts which define payment programs susceptible to improper payments.

As a result of the risk assessments, we determined that the agency's programs and activities presented low and medium risk of improper payments, except for the IRS's EITC program. The EITC is a high risk program susceptible to significant improper payments.

## EITC Program

The EITC is a refundable tax credit that offsets income tax owed by low-income taxpayers and, if the credit exceeds the amount of taxes due, provides a lump-sum payment in the form of a refund to those who qualify. The IRS estimates that for FY 2016, between 22.2 percent (\$15.5 billion) and 25.9 percent (\$18.1 billion) of the total EITC program payments of \$69.8 billion were improper. The IRS has a robust enforcement program for the EITC which consists of examinations and audits, math error notices, and document matching. Additional information on the IRS's EITC program can be found in Part 3, Section F, of this report.

# Affordable Care Act

Treasury and HHS each have responsibilities for ensuring payment accuracy in Marketplace programs created under the ACA. Performing program-specific comprehensive risk assessments provides reasonable assurance of whether improper payments could exceed statutory thresholds and remains critical to evaluating and improving payment accuracy. HHS has conducted risk assessments to determine areas that might affect APTC, Cost-Sharing Reduction (CSR) and other programs' payment accuracy, and Treasury has conducted a risk assessment to determine areas that might affect PTC payment accuracy. The Departments leveraged the same Federally Funded Research and Development Center to facilitate interagency coordination, information exchange, and risk analysis during the APTC and PTC program risk assessments.

Qualitative risk assessments of the Marketplace programs administered by the Departments were conducted in accordance with the risk factors listed in Appendix C to OMB Circular A-123, Part I.A.9.b. The risk assessments identified and evaluated potential improper payment risks.

Treasury has completed the risk assessment for the PTC program and has concluded that the program carries a medium risk of improper payments. HHS has completed risk assessments on the APTC and CSR programs (refer to the FY 2016 HHS AFR for details on the APTC and CSR risk assessment determination).

In addition to the work on the improper payment risk assessments, both Departments have established internal controls to provide for effective program operations, reliable financial reporting, and compliance with laws and regulations. Treasury and OMB will continue to monitor the PTC program and provide updated risk assessment results, program metrics, and corrective action plans consistent with existing guidance and regulatory and legislative requirements. Updated information on risk assessments and program measurement methodologies will be provided in each Department's FY 2017 AFR.

## **Payment Recapture Audits**

The Improper Payments Elimination and Recovery Act of 2010 (IPERA) requires agencies to conduct payment

recapture audits (also known as recovery audits) for each program and activity that expends \$1 million or more annually, if conducting such audits would be costeffective. We performed the payment recapture activities in accordance with OMB Circular A-123, Appendix C. Details on our improper payments and payment recapture program activities and results can be found in Section F of Part 3, Other Information.

## **Do Not Pay Initiative**

Our Do Not Pay Working System (Working System) is the legislative mandated and OMB designated source of centralized data and analytic services to help agencies verify eligibility and to identify and prevent potential fraud, waste, and abuse associated with improper payments. The results of the checks against these data sources provide information that an agency should consider in pre-award or prepayment assessments to help prevent improper payments. Fiscal Service, our shared service provider, compares our payee records in the financial system with payee records in the Working System. We review potential matches on an on-going basis to prevent improper payments and incorporates a pre-award check on potential contractors against the Working System. Additional information on the Do Not Pay initiative can be found in Part 3, Section F, of this report.

# MESSAGE FROM THE ASSISTANT SECRETARY FOR MANAGEMENT AND DEPUTY CHIEF FINANCIAL OFFICER

Kody H. Kinsley Assistant Secretary for Management

Dorrice C. Roth Deputy Chief Financial Officer

In Fiscal Year 2016, Treasury pursued an aggressive set of management programs and initiatives designed to manage the U.S. government's finances efficiently and responsibly. By focusing on a comprehensive set of management priorities, Treasury led and supported government-wide efforts to increase productivity, reduce waste and non-essential expenses, and modernize processes and systems. Treasury continued to build maturity into its Strategic Objective Annual Review (SOAR) and Quarterly Performance Review (QPR) processes, which form the basis for organizational performance management across every program in the Department.

As part of our ongoing effort to increase efficiency in Treasury's acquisition

methods and use of technology, the Department worked closely with the Office of Management and Budget (OMB) to implement requirements of the Federal Information Technology Acquisition Reform Act (FITARA) across government. In Fiscal Year 2016, Treasury also demonstrated leadership in the areas of fiscal prudence and management excellence by:

- Receiving an "A" on our small business report card for the sixth consecutive year;
- Taking a renewed look at deferred investments, particularly in infrastructure and technology;
- Continuing to strengthen our internal cybersecurity through critical review of our High Value Assets, expansion of our education and awareness programs, and deploying insider threat detection more broadly; and
- Using Federal Employee Viewpoint Survey results to design activities focused on increasing employee engagement, and improving the alignment of individual performance to organizational results within the Department to achieve mission goals.

The Department received an unmodified audit opinion on its consolidated financial statements for the 17th consecutive year. Treasury continues to make steady progress toward resolving the two Federal Managers' Financial Integrity Act material weaknesses remaining open as of September 30, 2016 (Internal Revenue Service – Unpaid Tax Assessments, and Bureau of the Fiscal Service – Systems, Controls, and Procedures to Prepare the Government-wide Financial Statements). Despite the complexity of Treasury's financial systems contributing to these material weaknesses, we continue to make considerable progress towards closing the issues.

As we lead Treasury's management programs and initiatives, we will continue to ensure that the Department can deliver its mission efficiently and provide the best value to the taxpayers.

Kody H. Kinsley Assistant Secretary for Management

# INSPECTOR GENERAL'S TRANSMITTAL LETTER

INSPECTOR GENERAL

DEPARTMENT OF THE TREASURY WASHINGTON, D.C. 20220

November 15, 2016

# INFORMATION MEMORANDUM FOR SECRETARY LEW

FROM:

Eric M. Thorson /s/ Inspector General

SUBJECT: Audit of the Department of the Treasury's Consolidated Financial Statements for Fiscal Years 2016 and 2015

# INTRODUCTION

The Chief Financial Officer's Act, as amended, requires the Department of the Treasury's (Treasury) Inspector General or an independent auditor, as determined by the Inspector General, to audit Treasury's consolidated financial statements. We contracted with the independent certified public accounting firm of KPMG LLP (KPMG) to audit the consolidated financial statements of Treasury as of September 30, 2016 and 2015, and for the years then ended, to provide a report on internal control over financial reporting, to report instances in which Treasury's financial management systems did not substantially comply with the requirements of the Federal Financial Management Improvement Act of 1996 (FFMIA), and to report any reportable noncompliance with laws, regulations, contracts, and grant agreements tested. The contract required that the audit be performed in accordance with U.S. generally accepted government auditing standards and Office of Management and Budget (OMB) Bulletin No. 15-02, *Audit Requirements for Federal Financial Statements*.

# **RESULTS OF INDEPENDENT AUDIT**

In its audit of Treasury, KPMG found

- the consolidated financial statements were fairly presented, in all material respects, in accordance with U.S. generally accepted accounting principles;
- a material weakness in internal control over unpaid tax assessments and a significant deficiency in internal control over financial reporting systems identified by the auditor of the Internal Revenue Service, collectively representing a material weakness for Treasury as a whole;
- deficiencies in internal control over information systems at the Bureau of the Fiscal Service, representing a significant deficiency for Treasury as a whole;

- noncompliance with certain requirements of FFMIA related to Federal financial management systems requirements and Federal accounting standards; and
- no instances of reportable noncompliance with laws, regulations, contracts, and grant agreements tested.

# **EVALUATION OF AUDITORS' PERFORMANCE**

In connection with the contract, we reviewed KPMG's report and related documentation and inquired of its representatives. Our review, as differentiated from an audit in accordance with U.S. generally accepted government auditing standards, was not intended to enable us to express, and we do not express, an opinion on Treasury's consolidated financial statements or conclusions about the effectiveness of internal control; whether Treasury's financial management systems substantially complied with FFMIA; and compliance with laws, regulations, contracts, and grant agreements. KPMG is responsible for the attached auditor's report dated November 15, 2016, and the conclusions expressed in the report. However, our review disclosed no instances where KPMG did not comply, in all material respects, with U.S. generally accepted government auditing standards.

I appreciate the courtesy and cooperation extended to KPMG and my staff during the audit. Should you or your staff have questions, you may contact me at (202) 622-1090 or Deborah L. Harker, Assistant Inspector General for Audit, at (202) 927-5400.

## **Independent Auditors' Report**

Inspector General Department of the Treasury:

## **Report on the Financial Statements**

We have audited the accompanying consolidated financial statements of the Department of the Treasury (Department), which comprise the consolidated balance sheets as of September 30, 2016 and 2015, and the related consolidated statements of net cost, consolidated statements of changes in net position, combined statements of budgetary resources and statements of custodial activity for the years then ended, and the related notes to the consolidated financial statements (hereinafter referred to as "consolidated financial statements").

## Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

## Auditors' Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We did not audit the financial statements of the Internal Revenue Service (IRS), a component entity of the Department, which statements reflect total assets of \$57.2 and \$48.7 billion, net cost of operations of \$12.0 and \$11.8 billion before applicable eliminating entries, budgetary resources of \$12.8 and \$12.5 billion, and custodial activity of \$3,341 and \$3,304 billion, as of and for the years ended September 30, 2016 and September 30, 2015, respectively. Those statements were audited by other auditors, whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for IRS, is based solely on the report of the other auditors.

We also did not audit the financial statements of the Office of Financial Stability (OFS), a component entity of the Department, which statements reflect total assets of \$24.2 and \$28.6 billion, net cost of operations of \$4.1 and \$4.4 billion before applicable eliminating entries, and budgetary resources of \$3.9 and \$10.2 billion, as of and for the years ended September 30, 2016 and September 30, 2015, respectively. Those statements were audited by other auditors, whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for OFS, is based solely on the report of the other auditors.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America, in accordance with the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, and in accordance with Office of Management and Budget (OMB) Bulletin No. 15-02, *Audit Requirements for Federal Financial Statements*. Those standards and OMB Bulletin No. 15-02 require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

KPMG LLP is a Delaware limited liability partnership and the U.S. member firm of the KPMG network of independent member firms affiliated with KPMG International Cooperative ("KPMG International"), a Swiss entity.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

## **Opinion on the Financial Statements**

In our opinion, based on our audits and the reports of the other auditors, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Department of the Treasury as of September 30, 2016 and 2015, and its net costs, changes in net position, budgetary resources, and custodial activity for the years then ended in accordance with U.S. generally accepted accounting principles.

## Emphasis of Matter

As discussed in Notes 1AC and 7, effective October 1, 2015 the Department changed its budgetary accounting policy for transactions with the International Monetary Fund. Our opinion is not modified with respect to this matter.

As discussed in Notes 9 and 10, the Department is a participant in significant legislation and transactions whose purpose is to assist in stabilizing the financial markets. Also as discussed in note 1A, the consolidated financial statements do not include the assets, liabilities, or results of operations of commercial entities in which the Department has a significant equity interest as it has determined that none of these entities meet the criteria for inclusion as a federal entity and are therefore not included in the consolidated financial statements. Furthermore, as discussed in notes 1V, 9, and 10, the value of certain investments, loans, and commitments is based on estimates. These estimates are inherently subject to substantial uncertainty arising from the likelihood of future changes in general economic, regulatory, and market conditions. In addition, there are significant uncertainties related to the amounts that the Department will realize from its investments. As such, there will likely be differences between the estimated value of these investments, loans, and commitments as of September 30, 2016 and 2015, and the amounts that may ultimately be realized from these assets or may be required to settle these commitments. Such differences may be material and will also affect the ultimate cost of these programs. Our opinion is not modified with respect to these matters.

## **Other Matters**

### Interactive Data

Management has elected to reference to information on websites or other forms of interactive data outside the *Agency Financial Report* to provide additional information for the users of its financial statements. Such information is not a required part of the basic consolidated financial statements or supplementary information required by the Federal Accounting Standards Advisory Board. The information on these websites or the other interactive data has not been subjected to any of our auditing procedures, and accordingly we do not express an opinion or provide any assurance on it.

## Required Supplementary Information

U.S. generally accepted accounting principles require that the information in the *Management's Discussion and Analysis* and *Required Supplementary Information* sections be presented to supplement the basic consolidated financial statements. Such information, although not a part of the basic consolidated financial statements, is required by the Federal Accounting Standards Advisory Board who considers it to be an essential part of financial reporting for placing the basic consolidated financial statements in an appropriate operational,

economic, or historical context. We, and the other auditors, have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic consolidated financial statements, and other knowledge we obtained during our audits of the basic consolidated financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

## Other Information

Our audits were conducted for the purpose of forming an opinion on the basic consolidated financial statements as a whole. The *Message from the Secretary of the Treasury*, the *Message from the Assistant Secretary for Management and the Deputy Chief Financial Officer*, and the *Other Information sections* are presented for purposes of additional analysis and are not a required part of the basic consolidated financial statements. Such information has not been subjected to the auditing procedures applied in the audits of the basic consolidated financial statements, and accordingly, we do not express an opinion or provide any assurance on it.

### Other Reporting Required by Government Auditing Standards

## Internal Control Over Financial Reporting

In planning and performing our audit of the consolidated financial statements as of and for the year ended September 30, 2016, we considered the Department's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the consolidated financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Department's internal control. Accordingly, we do not express an opinion on the effectiveness of the Department's internal control. This report includes our consideration of the results of the other auditors' testing of internal control over financial reporting that was reported on separately by those auditors. However, this reporting, insofar as it relates to the results of the other auditors, is based solely on the reports of the other auditors. We, and the other auditors, did not test all internal controls relevant to operating objectives as broadly defined by the *Federal Managers' Financial Integrity Act of 1982*.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that have not been identified. However, as described below, we and the other auditors identified certain deficiencies in internal control that we consider to be a material weakness and a significant deficiency.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. We consider the deficiency described below to be a material weakness.

### A. Material Weakness in Internal Control Over Financial Reporting at IRS (Repeat Condition)

IRS needs to improve internal control over financial reporting and systems to ensure reliable and timely financial information is obtained, maintained, and reported in accordance with OMB Circular A-123, *Management's Responsibility for Enterprise Risk Management and Internal Control.* The other auditors reported a material weakness in internal control over unpaid tax assessments and a significant deficiency in internal control over financial reporting systems that we collectively considered a material weakness at the Department level. The other auditors performed an audit of IRS's internal control over financial reporting for the purpose of providing an opinion on the effectiveness of internal control. Because of the material weakness, the other auditors' opinion on IRS's internal control over financial reporting stated that IRS did not maintain, in all material respects, effective internal control over financial reporting as of September 30, 2016, and thus a reasonable possibility exists that a material misstatement of IRS's financial statements could occur and not be prevented or detected and corrected on a timely basis. IRS internal control deficiencies are summarized as follows:

## 1. Unpaid Tax Assessments

IRS continued to have system deficiencies in its unpaid tax assessment subsidiary ledger and supporting financial systems that led to errors in tax payer accounts. In addition, IRS's management and reporting of unpaid tax assessments continued to be hindered by inaccurate tax records because IRS did not consistently record information in tax payers' accounts accurately and timely. As a result, IRS subsidiary ledger and supporting financial systems did not: (1) produce reliable and useful information for IRS to manage unpaid tax assessments; and (2) provide accurate and complete transaction level financial information that IRS needed to properly report its federal tax receivables, compliance assessments, and write-offs in accordance with the federal accounting standards. IRS used a compensating estimation process to determine unpaid tax assessments generated by its subsidiary ledger in order to produce reliable amounts for reporting its federal taxes receivables, compliance assessments, and write-offs.

## 2. Financial Reporting Systems

IRS made improvements in internal control over financial reporting systems; however, IRS continued to have information security control deficiencies that increase the risk of inappropriate and undetected use, modification, or disclosure of IRS systems and data. Specifically, IRS did not (1) fully implement controls for logging and monitoring audit trails of certain systems and update mainframe logging and monitoring policies; (2) limit access to a taxpayer database; (3) implement a secure method for managing administrator passwords; (4) use strong encryption and safeguard media storage devices to prevent unauthorized disclosure of and changes to information; (5) segregate incompatible responsibilities; (6) install security updates on certain databases and servers that support financial systems; and (7) effectively manage security risk of certain databases.

## Recommendation

The other auditors separately provided IRS management a report detailing the conditions identified and their recommendations to address the above material weakness. We recommend that the Assistant Secretary for Management (ASM) and Deputy Chief Financial Officer (DCFO) ensure that IRS implements corrective actions to resolve this material weakness.

A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. We consider the deficiency described below to be a significant deficiency.

# B. Significant Deficiency in Internal Control Over Information Systems at the Bureau of the Fiscal Service (Repeat Condition)

Effective information system controls and security programs over financial systems are essential to protecting information resources in accordance with OMB Circular No. A-130, *Management of Federal Information Resources*. The Bureau of the Fiscal Service (Fiscal Service) relies on an extensive array of information technology systems to perform their primary missions. During fiscal year 2016, Fiscal Service made progress in remediating the prior year significant deficiency; however, Fiscal Service's corrective action plans were not effectively designed and implemented. Specifically, Fiscal Service's general information technology controls (GITCs) did not provide reasonable assurance that: (1) access to financial systems is protected against unauthorized modification, loss, or disclosure; and (2) responsibilities are properly segregated; and (3) contingency planning minimizes the risk of unplanned interruptions and provides for recovery of critical operations should an interruption occur. Until these control deficiencies are fully addressed, there will be an increased risk of inadequate security controls in financial systems; unauthorized access to, modification of, or disclosure of sensitive financial data and programs; and disruption of critical financial operations.

## Recommendation

Due to the sensitivity of the details of the deficiencies described above, we will issue a separate report detailing the conditions identified and our recommendations for corrective action. We recommend that the ASM and

DCFO ensure that the Fiscal Service implement requisite corrective actions to resolve control deficiencies over its information systems.

## **Compliance and Other Matters**

As part of obtaining reasonable assurance about whether the Department's consolidated financial statements are free from material misstatement, we, and the other auditors, performed tests of the Department's compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our, and the other auditors', tests of compliance disclosed no instances of noncompliance or other matters that are required to be reported herein under *Government Auditing Standards* or OMB Bulletin No. 15-02.

We, and the other auditors, also performed tests of its compliance with certain provisions referred to in Section 803(a) of the *Federal Financial Management Improvement Act of 1996* (FFMIA). Providing an opinion on compliance with FFMIA was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests of FFMIA and those of the other auditors disclosed instances described below, in which the Department's financial management systems did not substantially comply with the Federal financial management systems requirements and applicable Federal accounting standards. The results of our tests of FFMIA and those of instances in which the Department's financial management systems did not substantially comply with the tests of FFMIA and those of the other auditors disclosed no instances in which the Department's financial management systems did not substantially comply with the United States Government Standard General Ledger at the transaction level.

### C. Noncompliance with Federal Financial Management Improvement Act of 1996 (Repeat Condition)

The Department's financial management systems did not substantially comply with the following FFMIA requirements:

1. Federal Financial Management Systems Requirements

As discussed in finding A. Material Weakness in Internal Control Over Financial Reporting at IRS (Repeat Condition), the Department continues to have deficiencies in IRS's financial management systems. Specifically, IRS did not consistently design, implement, and operate information system controls and security programs over its financial systems in accordance with the federal financial management system requirements.

2. Federal Accounting Standards

As discussed in finding A. Material Weakness in Internal Control Over Financial Reporting at IRS (Repeat Condition), the Department has a material weakness at IRS that affected the Department's ability to prepare its financial statements in accordance with the federal accounting standards. Specifically, IRS subsidiary records and supporting financial systems were unable to support the federal taxes receivable amount on the consolidated balance sheet, and the compliance assessments and write-offs in the required supplementary information disclosures, in accordance with the federal accounting standards.

### Recommendation

The other auditors separately provided IRS management with recommendations to address the above noncompliance with FFMIA. We recommend that the ASM and DCFO ensure that IRS implements its remediation plan outlining actions to be taken to resolve noncompliance with the FFMIA requirements and the resources and responsible organizational units for such planned actions.

## Department's Response to Findings

The Department indicated in a separate letter immediately following this report that it concurs with the findings and recommendations presented in our report. Further, the Department responded that it will take necessary corrective actions to address each of the matters presented. The Department's response was not subjected to the auditing procedures applied in the audit of the consolidated financial statements and, accordingly, we express no opinion on the response.

## Purpose of the Other Reporting Required by Government Auditing Standards

The purpose of the communication described in the Other Reporting Required by *Government Auditing Standards* section is solely to describe the scope of our testing of internal control and compliance and the result of that testing, and not to provide an opinion on the effectiveness of the Department's internal control or compliance. Accordingly, this communication is not suitable for any other purpose.

Washington D.C. November 15, 2016

# **MANAGEMENT'S RESPONSE TO INDEPENDENT AUDITORS' REPORT**

DEPARTMENT OF THE TREASURY WASHINGTON, D.C.

November 15, 2016

KPMG LLP 1801 K Street, NW Washington, DC 20006

Ladies and Gentlemen:

On behalf of Secretary Lew, we are responding to your audit report on the Department of the Treasury's fiscal year 2016 consolidated financial statements. Our bureaus and program offices are proud of the Department's success in achieving an unmodified audit opinion on the Department's financial statements for the seventeenth consecutive year.

The high level of professionalism, technical expertise, and integrity demonstrated by KPMG in conducting this year's audit contributed greatly to Treasury's successful fiscal year 2016 results. We also appreciate the expertise and commitment demonstrated by the other organizations involved in the audit process – the Office of the Inspector General, Government Accountability Office (GAO), and the firms that audited several of our bureaus.

We acknowledge the one material weakness and one significant deficiency at the Department level, and the one instance of noncompliance with laws and regulations described in your report. We agree with your recommendations, and will focus on necessary corrective actions to address each of the issues.

Overall, we have made strong progress in enhancing our internal control environment. We are very proud of our progress, and remain committed to ensuring high standards of integrity and transparency in reporting our financial performance.

Kody H. Kinsley Assistant Secretary for Management

Donnie C. Roth

Dorrice C. Roth Deputy Chief Financial Officer

# Consolidated Statements of Net Cost For the Fiscal Years Ended September 30, 2016 and 2015

| Intimutation         2016         2015           Cost of Treasury Operations:         Financial Program         Gross Cost         \$ 14,969 \$ 14,476           Gross Cost         \$ 14,969 \$ 14,476         (3,129)         (3,362)           Less Earned Revenue         (3,129)         (3,362)         (3,362)           Net Program Cost         11,840         11,114           Economic Program         (7,078)         (8,287)           Gross Cost         12,045         19,998           Less Earned Revenue         (7,078)         (8,287)           Net Program Cost         4,967         11,711           Security Program         (3)         (6)           Gross Cost         412         406           Less Earned Revenue         (3)         (6)           Net Program Cost         409         400           Total Program Gross Costs         27,426         34,880           Total Program Gross Costs         17,216         23,225           (Gain)/Loss on Pension, ORB, or OPEB Assumption Changes         501         299           Total Net Program Cost before Changes in Actuarial Assumptions         17,717         23,524           Non-Entity Costs:         427,479         406,982         - <t< th=""><th>(te estilizers)</th><th></th><th>2016</th><th>2015</th></t<>                            | (te estilizers)   |    | 2016              | 2015     |

# **1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

# **A. REPORTING ENTITY**

The accompanying financial statements include the operations of the Department of the Treasury, one of 24 Chief Financial Officers (CFO) Act agencies of the Executive Branch of the U.S. government, and certain custodial activities the Department manages on behalf of the entire U.S. government. Except where the content clearly indicates otherwise, the use of the terms "Department," "Treasury," "we," "us," or "our" refers to the Department of the Treasury, including its Departmental Offices (DO) and operating bureaus which are further discussed below. The following paragraphs describe the activities of the reporting entity.

We were established by an Act of Congress approved on September 2, 1789. Many subsequent acts affected our development, delegating new duties to our charge and establishing the numerous bureaus and divisions that now comprise the Department. As a major policy advisor to the President, the Secretary of the Treasury (Secretary) has primary responsibility for formulating and managing the domestic and international tax and financial policies of the U.S. government.

Further, the Secretary is responsible for recommending and implementing U.S. domestic and international economic and fiscal policy; governing the fiscal operations of the U.S. government; maintaining foreign assets control; managing the federal debt; collecting income and excise taxes; representing the United States on international monetary, trade, and investment issues; overseeing our overseas operations; and directing the manufacture of coins, currency, and other products for customer agencies and the public.

Our reporting entities include DO and seven operating bureaus. For financial reporting purposes, DO is composed of: Community Development Financial Institutions (CDFI) Fund, Office of D.C. Pensions (ODCP), Exchange Stabilization Fund (ESF), Federal Financing Bank (FFB), Government Sponsored Enterprises (GSE) Program, International Assistance Programs (IAP), Office of Financial Research (OFR), Office of Financial Stability (OFS), Office of Inspector General (OIG), Small Business Lending Fund (SBLF), Special Inspector General for the Troubled Asset Relief Program (SIGTARP), Treasury Forfeiture Fund (TFF), Treasury Inspector General for Tax Administration (TIGTA), and the DO policy offices.

Our seven operating bureaus are: Bureau of Engraving and Printing (BEP); Bureau of the Fiscal Service (Fiscal Service); Financial Crimes Enforcement Network (FinCEN); Internal Revenue Service (IRS); United States Mint (Mint); Office of the Comptroller of the Currency (OCC); and Alcohol and Tobacco Tax and Trade Bureau (TTB). Our consolidated financial statements reflect the reporting of our entity activities, comprising both our operating bureaus and DO. This includes appropriations received to conduct our operations and revenue generated from those operations. They also reflect the reporting of certain non-entity (custodial) functions we perform on behalf of the U.S. government and others. Non-entity activities include collecting certain federal revenue, servicing the federal debt, disbursing certain federal funds, and maintaining certain assets and liabilities for the U.S. government (refer to Notes 4 and 14), as well as for other federal entities. Our reporting entity does not include the General Fund of the U.S. government (General Fund), which maintains receipt, disbursement, and appropriation accounts for all federal agencies. Following generally accepted accounting principles (GAAP) for federal entities, we do not consolidate into our financial statements the assets, liabilities, or results of operations of any financial organization or commercial entity in which we hold either a direct or indirect majority equity investment, unless they constitute a part of the reporting entity per GAAP. Even though some of the equity investments are significant, these entities meet the criteria of "bailed out" entities under paragraph 50 of Statement of Federal Financial Accounting Concepts (SFFAC) No. 2, *Entity and Display*, which directs that such "bailout" investments should not be consolidated into the Financial Report of the U.S. government, either in part or as a whole.

# **B.** BASIS OF ACCOUNTING AND PRESENTATION

The financial statements have been prepared from our accounting records in conformity with GAAP for federal entities, and OMB Circular No. A-136, *Financial Reporting Requirements*, as revised. Accounting principles generally accepted for federal entities are the standards prescribed by the Federal Accounting Standards Advisory Board (FASAB). The American Institute of Certified Public Accountants recognizes FASAB as the official accounting standards-setting body for the U.S. government.

These financial statements consist of the Consolidated Balance Sheets, the Consolidated Statements of Net Cost, the Consolidated Statements of Changes in Net Position, the Combined Statements of Budgetary Resources, and the Statements of Custodial Activity. The statements and the related notes are prepared in a comparative form to present both fiscal years 2016 and 2015 information.

To provide additional clarity to our financial statements, we have presented additional financial statement line items on the Consolidated Balance Sheets and Consolidated Statements of Changes in Net Position than are required by the guidance in OMB Circular No. A-136. The following summarizes how our additional financial statement line items relate to the financial statement guidelines of the OMB Circular No. A-136. For the Consolidated Balance Sheets: (*i*) Advances to the Unemployment Trust Fund and Due From the General Fund represent other intra-governmental assets; (*ii*) Gold and Silver Reserves and the Reserve Position in the International Monetary Fund (IMF) represent other monetary assets; (*iii*) Loans and Interest (intra-governmental) and Due To the General Fund represent other intra-governmental liabilities; (*v*) Liability for Restoration of Federal Debt Principal and Interest (intra-governmental) and Due To the General Fund represent other intra-governmental liabilities; (*v*) Liability for Restoration of Special Debt Principal and Interest (non-intra-governmental), Certificates Issued to the Federal Reserve, Allocation of Special Drawing Rights, Gold Certificates Issued to the Federal Reserve, Refunds Payable, and the D.C. Federal Pension and Judicial Retirement Actuarial Liability represent other liabilities. For the Consolidated Statements of Changes in Net Position, Accrued Interest and Discount on Debt, Accrued Interest on Restoration of Federal Debt Principal, and Transfers to the General Fund and Other represent other non-exchange financing sources.

We have eliminated transactions and balances among our entities from the Consolidated Balance Sheets, Consolidated Statements of Net Cost, and Consolidated Statements of Changes in Net Position. We present the Statement of Budgetary Resources on a combined basis; therefore, intra-departmental transactions and balances have not been eliminated from these statements.

While these financial statements have been prepared from our accounting records in accordance with the formats prescribed by OMB, these financial statements are in addition to the financial reports used to monitor and control budgetary resources which are prepared from the same accounting records.

Intra-governmental assets and liabilities are those due from or to other federal entities. Intra-governmental earned revenues are collections or accruals of revenue from other federal entities, and intra-governmental costs are payments or accruals of expenditures to other federal entities.

The financial statements should be read with the realization that we are a component of the U.S. government, a sovereign entity and, accordingly, our liabilities not covered by budgetary resources cannot be liquidated without the legislative enactment of an appropriation, and that the payment of all liabilities other than for contracts can be abrogated by the sovereign entity. Liabilities represent the probable and measurable future outflow or other sacrifice of resources as a result of past transactions or events. Liabilities covered by budgetary resources are those liabilities for which Congress has appropriated funds or funding is otherwise available to pay amounts due. Liabilities not covered by budgetary or other resources represent amounts owed in excess of available, congressionally appropriated funds or other amounts, and there is no certainty that the appropriations will be enacted.

We have reclassified certain fiscal year 2015 activity and balances presented on the financial statements to conform to the presentation in the current year, the effects of which are immaterial, including format and terminology changes we made to our Combined Statements of Budgetary Resources in accordance with OMB Circular A-136.

There are numerous acronyms used throughout the notes herein as well as other sections of this Agency Financial Report. Refer to the *"Glossary of Acronyms"* located in the Appendix of this report for a complete listing of these acronyms and their definitions.

# **C. FUND BALANCE**

The Fund Balance is the aggregate amount of our accounts with the U.S. government's central accounts from which we are authorized to make expenditures and pay liabilities. It is an asset because it represents our claim to the U.S. government's resources. Fund balance is not equivalent to unexpended appropriations because it also includes non-appropriated revolving and enterprise funds, suspense accounts, and custodial funds such as deposit funds, special funds, and trust funds.

# **D.** LOANS AND INTEREST RECEIVABLE

#### Intra-Governmental

Intra-governmental entity loans and interest receivable from other federal agencies represent the principal and related interest receivable on loans we issue, through FFB. We do not record loan loss allowance for credit reform subsidy costs for loans purchased from federal agencies or for guaranteed loans made to non-federal borrowers because those agencies guarantee the outstanding balances (interest and principal).

Intra-governmental non-entity loans and interest receivable from other federal agencies represent the principal and related interest receivable on loans we issue, through the Fiscal Service. We act as an intermediary issuing these loans because the agencies receiving these loans lend these funds to third parties to carry out various programs of the U.S. government. Because of our intermediary role in issuing these loans, we do not record a loan loss allowance related to these non-entity intra-governmental loans. Instead, the ultimate lender, the federal agency that issued the loans to the public, recognizes loan loss allowances and subsidy costs. We accrue interest revenue on intra-governmental loans when earned.

#### Public

Public loans and interest receivable primarily represent supplemental borrowing arrangements between the United States and the IMF (refer to Note 7). These loans are denominated in Special Drawing Rights (SDRs) and recorded at the equivalent U.S. dollar amount (refer to the accounting policy below entitled "Special Drawing Rights"). We periodically adjust the value of these loans, due to fluctuations in the value of the U.S. dollar with respect to the SDR, to maintain the amount of these loans in dollar terms. We do not record a loan loss allowance for these loans as we do not anticipate any defaults on the repayment of these loans.

# E. ADVANCES TO THE UNEMPLOYMENT TRUST FUND

The General Fund issues advances to the Department of Labor's (DOL) Unemployment Trust Fund for states to pay unemployment benefits. The Fiscal Service accounts for the advances issued on behalf of the General Fund. As outlined in the United States Code (USC) 42 USC §1323, these advances bear an interest rate that is computed as the average interest rate as of the end of the calendar month preceding the issuance date of the advance for all interest-bearing obligations of the United States that form the public debt, to the nearest lower 1/8 of 1.0 percent. Interest on the advances is due on September 30th of each year. We repay advances when the Secretary, in consultation with the Secretary of the DOL, determines that the balance in the Unemployment Trust Fund is adequate to allow repayment.

## F. CASH, FOREIGN CURRENCY, AND OTHER MONETARY ASSETS

Substantially all of our operating cash is non-entity government-wide cash held in depository institutions and Federal Reserve Bank (FRB) accounts. Agencies deposit funds that are submitted to them directly into either a Federal Reserve Treasury General Account (TGA) or a local TGA depositary. We transfer the balances in these TGA accounts into the Federal Reserve Bank of New York's (FRBNY) TGA throughout the day.

Operating cash of the U.S. government represents balances from tax collections, customs duties, other revenue, federal debt receipts, and other various receipts, net of cash outflows for budget outlays and other payments held in the FRBs and in foreign and domestic financial institutions. Outstanding checks net against operating cash until they clear the Federal Reserve System.

The FRBNY maintains the TGA, which functions as the U.S. government's checking account for deposits and disbursements of public funds. Cash in the TGA is restricted for government-wide operations.

We classify our foreign currency investments having original maturities of three months or less as cash equivalents. SDR holdings comprise most of the other monetary assets (refer to the accounting policy below entitled "*Special Drawing Rights*").

## G. TAXES, INTEREST, AND OTHER RECEIVABLES, NET

We do not accrue federal taxes receivable, net, and the corresponding liability due to the General Fund, until related tax returns are filed or assessments are made by the IRS and agreed to by either the taxpayer or the court. Additionally, prepayments are netted against liabilities. We make accruals to reflect penalties and interest on taxes receivable through the balance sheet date. Taxes receivable consist of unpaid assessments (taxes and associated penalties and interest) due from taxpayers. The existence of a receivable is supported by a taxpayer agreement, such as filing of a tax return without sufficient payment, or a court ruling in favor of the IRS. We record an allowance for doubtful accounts to reflect an estimate of the portion of total taxes receivable deemed to be uncollectible.

Compliance assessments are unpaid assessments which neither the taxpayer nor a court has affirmed the taxpayer owes to the U.S. government. Examples include assessments resulting from an IRS audit or examination in which the taxpayer does not agree with the results. Compliance assessment write-offs consist of unpaid assessments for which the IRS does not expect further collections due to factors such as taxpayers' bankruptcy, insolvency, or death. We do not report compliance assessments and related write-offs on the balance sheet. Statutory provisions require the accounts to be maintained until the statute for collection expires.

# H. CREDIT PROGRAM RECEIVABLES, NET

We account for all of our credit program receivables under the provisions of credit reform accounting pursuant to the Federal Credit Reform Act (FCRA). Credit programs include loans or equity securities associated with our state and local Housing Finance Agency (HFA) initiative programs, SBLF program, CDFI Fund programs, and the Troubled Asset Relief Program (TARP) (refer to Note 9).

To account for our credit program receivables, we apply the accounting provisions of Statement of Federal Financial Accounting Standards (SFFAS) No. 2, *Accounting for Direct Loans and Loan Guarantees*, as amended. SFFAS No. 2, as amended, requires measurement of the asset or liability at the net present value of the estimated future cash flows. The cash flow estimates for each credit program transaction reflect the actual structure of the instruments. For each of these instruments, we estimate cash inflows and outflows related to the program over the estimated term of the instrument. Further, each cash-flow estimate reflects the specific terms and conditions of the program, technical assumptions regarding the underlying assets, risk of default or other losses, and other factors as appropriate. The measurement of assets within these programs is primarily derived from inputs which generally represent market data and, when such data is not available, management's best estimate of how a market participant would assess the risk inherent in the asset.

The primary purpose of the FCRA is to measure the cost of federal credit programs, and to place the cost of such credit programs on a basis equivalent with other federal spending. FCRA requires that the ultimate costs of a credit program be calculated and the budgetary resources be obtained before incurring the direct loan obligations. To accomplish this, we first predict or estimate the future performance of direct and guaranteed loans when preparing our annual budget. We reestimate the data used for these budgetary estimates at the fiscal year-end to reflect changes in actual loan performance and actual interest rates in effect when the loans were issued. The re-estimated data reflect adjustments for market risks, asset performance, and other key variables and economic factors. We then use the re-estimated data to report the cost of the loans disbursed under the direct or guaranteed loan program as a "Program Cost" in our Consolidated Statements of Net Cost.

Cash flows associated with our credit programs generally include disbursements, repayments, repurchases, fees, recoveries, interest, dividends, proceeds from sales of instruments, borrowings from Treasury, negative subsidy, and the subsidy cost received from the program accounts. We draw security-level data and assumptions used as the basis for cash flow model forecasts and program performance from widely available market sources, as well as information published by investees. Key inputs and assumptions to the cash flow forecasts include, but are not limited to:

- Security characteristics such as unpaid principal balance, coupon rate, weighted-average loan age, issued bond balance, credit rating, maturity date, sinking fund schedules, principal and interest payment schedules, and performance of underlying collateral
- Discount rate and Market Adjusted Discount Rate (MRADR)
- Department actions, as well as changes in legislation
- Forecast dividend payments, late payments, prepayment rates and default rates
- Expected escrow conversion and return rates
- Default and recovery reports published by Moody's and Standard and Poor's
- Other third-party market sources

The recorded subsidy cost associated with each of our credit programs represents the difference between our projected costs of the program and the future cash flows we anticipate receiving. The subsidy allowance specifically takes into consideration projected repayments and defaults and the projected cost of borrowings. We amortize the allowance to reflect the difference between projected and actual financing costs.

Our actions, as well as changes in legislation, may impact estimated future cash flows and related subsidy costs. We recognize the cost or cost savings of a modification in subsidy costs when the terms of a program are modified. Workouts are actions taken to maximize repayments of existing credit programs, and the expected effects on cash flows are included in the original estimate and re-estimates of the subsidy cost. Subsidy costs are also impacted by re-estimates which may occur as a result of updates to the original program subsidy cost estimates to reflect actual cash flows experience, as well as changes in forecasts of estimated future cash flows associated with the credit program.

#### I. INVESTMENTS

#### **Investments in GSEs**

We hold senior preferred stock and warrants for the purchase of common stock of two GSEs, the Federal National Mortgage Association (Fannie Mae) and the Federal Home Loan Mortgage Corporation (Freddie Mac). We present these non-federal investment holdings at their fair value. We record changes in the valuation of these investments as non-entity exchange transactions on the Consolidated Statements of Net Cost. We also record dividends related to these investments as nonentity exchange transactions, and accrued when declared.

The GSE Senior Preferred Stock Purchase Agreements (SPSPAs), which we entered into with each GSE when the GSEs were placed under conservatorship, require that we increase our investment in the GSEs' senior preferred stock if, at the end of any quarter, the Federal Housing Finance Agency (FHFA), acting as the conservator, determines that the liabilities of either GSE exceed its respective assets. Since funding to the GSEs to pay their excess liabilities is appropriated directly to us, we report such payments, as needed, as entity expenses within the Economic Program on the Consolidated Statements of Net Cost, and in the line item, "Cumulative Results of Operations," on the Consolidated Balance Sheets. These payments also result in an increase to the non-entity investment in the GSEs' senior preferred stock, with a corresponding increase to "Due To the General Fund", as we hold the investment on behalf of the General Fund.

#### Investments in Multilateral Development Banks

On behalf of the United States, we invest in Multilateral Development Banks (MDBs) to support poverty reduction, private sector development, transitions to market economies, and sustainable economic growth and development, thereby advancing U.S. economic, political, and commercial interests abroad. As a participating member country, we provide a portion of the capital base of the MDBs, through subscriptions to capital, which allows the MDBs to issue loans at market-based rates to middle-income developing countries. These paid-in capital investments are non-marketable equity investments valued at cost on our Consolidated Balance Sheets.

In addition, on behalf of the United States, we contribute funding to MDBs to finance grants and extend credit to poor countries at below market-based interest rates. We report these U.S. contributions, also referred to as "concessional window" contributions, as an expense within the Economic Program on our Consolidated Statements of Net Cost.

#### Other Investments and Related Interest

The ESF holds most of our foreign currency investments. We classify the ESF's other foreign currency denominated assets and investment securities as either available-for-sale or trading securities recorded at fair value. These holdings are normally invested in interest-bearing securities issued or held through foreign governments or monetary authorities. We recognize interest on investments, amortization of premiums, and accretion of discounts on an accrual basis, and amortize or accrete premiums and discounts over the life of the related investment security as an adjustment to yield using a method which approximates the effective interest method.

# J. PROPERTY, PLANT, AND EQUIPMENT, NET

#### General

Property, plant, and equipment (PP&E) is composed of capital assets used in providing goods or services. It also includes assets acquired through capital leases, which are initially recorded at the amount recognized as a liability for the capital lease at its inception. PP&E is stated at full cost, including costs related to acquisition, delivery, and installation, less accumulated depreciation. Major alterations and renovations, including leasehold and land improvements, are capitalized, while maintenance and repair costs are charged to expense as incurred. Costs for construction projects are recorded as construction-in-progress until completed, and are valued at actual (direct) cost plus applied overhead and other indirect costs.

Internal-use software encompasses software design, development, and testing of projects adding significant new functionality and long-term benefits. We accumulate costs for developing internal-use software in work-in-development until we place a project into service and testing and final acceptances are successfully completed. Once completed, we transfer the costs to depreciable property.

We lease land and buildings from the General Services Administration (GSA) to conduct most of our operations. We have no material leases that meet capital lease requirements for financial reporting purposes. GSA charges a standard level user fee which approximates commercial rental rates for similar properties.

Our bureaus are diverse both in size and in operating environment. Accordingly, our capitalization policy provides minimum capitalization thresholds, which generally range from \$25,000 to \$50,000 for all property categories except for internal-use software. Minimum capitalization thresholds for internal-use software generally range from \$50,000 to \$250,000 (except for the IRS, for which minimum capitalization thresholds generally ranges from \$10 million to \$50 million). We also use a capitalization threshold for bulk purchases, which generally ranges from \$50,000 to \$500,000 for non-manufacturing bureaus, and \$25,000 to \$50,000 for manufacturing bureaus. Bureaus determine the individual items that comprise bulk purchases based on our guidance.

Depreciation is expensed on a straight-line basis over the estimated useful life of the asset with the exception of leasehold improvements and capital leases. We depreciate leasehold improvements over the term of the lease or the useful life of the improvement, whichever is shorter. We depreciate capital leases over the estimated life of the asset or term of the lease, whichever is shorter. Service life ranges (2 to 50 years) are wide due to our diversity of PP&E. We do not depreciate land and land improvements, construction-in-progress, and internal-use software in development. We record impairment costs related to a significant and permanent decline in the service utility of general PP&E and construction-in-progress in the period incurred.

#### **Heritage Assets**

Heritage assets are assets of historical significance. Multi-use heritage assets are those heritage assets for which the predominant use is general government operations. We capitalize all acquisition, reconstruction, and betterment costs for our multi-use heritage asset buildings as general PP&E, and depreciate these costs over their service life.

# K. FEDERAL DEBT AND INTEREST PAYABLE

We issue federal debt in the form of Treasury securities. This debt relates to monies borrowed from the public and certain other federal agencies to fund the operations of the U.S. government. We issue certain federal debt at a discount or premium. We amortize these discounts and premiums over the term of the security using an interest method for all long-term securities and the straight-line method for short-term securities. Interest costs accrue as an expense as incurred and are reported on the Consolidated Statements of Net Cost as non-entity costs.

#### L. COMMITMENTS AND CONTINGENCIES

Through FFB, we make loan commitments with federal agencies, or private sector borrowers with loans guaranteed by federal agencies, to extend credit for their own use (refer to the accounting policy above entitled "*Loans and Interest Receivable, Intra-Governmental*"). We establish loan commitments when FFB and other parties fully execute promissory notes in which we become obligated to issue such loans immediately or at some future date. We reduce loan commitments when we issue the loans or when the commitments expire. Most of our obligations give a borrower the contractual right to a loan or loans immediately or at some point in the future within an agreed upon timeframe.

On behalf of the United States, we subscribe to capital for certain MDBs, portions of which are capital commitments which are callable under certain limited circumstances to meet the obligations of the respective MDB. The capital commitments become binding on the United States when we issue instruments of subscription stating our intention to subscribe to the U.S. portion of callable capital, subject to the amounts provided for in appropriations acts.

Additionally, on behalf of the United States, we have established financial commitments through our participation in the IMF through a quota subscription and certain borrowing arrangements that supplement IMF resources. U.S. financial commitments to the IMF become binding when the United States consents to an increase in its participation as an IMF member country, and all other conditions to the increase have been met. The outstanding financial commitment in the U.S. quota decreases or increases when the IMF draws upon or repays funding obtained pursuant to a letter of credit established by the United States to make domestic currency available to the IMF as needed. The outstanding financial commitment in the supplemental borrowing arrangements decrease or increase when the IMF borrows and repays loans under this supplemental funding arrangement (refer to Note 7).

In accordance with SFFAS No. 5, *Accounting for Liabilities of the Federal Government*, we recognize material contingent liabilities meeting the following criteria:

- A past event or exchange transaction has occurred
- A future cash outflow is probable
- A future cash outflow is measurable

The estimated liability we record is either a specific amount or within a range of amounts. If some amount within the range is a better estimate than any other amount within the range, that amount is recognized. If no amount within the range is a better estimate than any other amount, we recognize the minimum amount in the range, and we disclose the range and a description of the nature of the contingency. We follow this policy in recording a contingent liability, if any, related to the GSE SPSPA program (refer to Note 10), and loss contingencies that may arise from claims, assessments, litigations, fines, penalties, and other sources (refer to Note 26).

If one or more, but not all, of the above criteria for recognition are met, and there is a reasonable possibility of loss, we will disclose, if material, the nature of the contingent liability, along with a range of possible loss, if estimable, and a description of the nature of the contingency.

#### M. SPECIAL DRAWING RIGHTS

The SDR is an international reserve asset created by the IMF to supplement its member countries' official reserves. Under its Articles of Agreement, the IMF may allocate SDRs to member countries in proportion to their IMF quotas. Pursuant to the *Special Drawing Rights Act of 1968*, as amended, the ESF holds all SDRs allocated to or otherwise acquired by the United States.

#### Allocations and Holdings

We record the SDR holdings as part of "Cash, Foreign Currency, and Other Monetary Assets," and we record the SDR allocations as a liability entitled "Allocation of Special Drawing Rights" when the IMF allocates SDRs to the Department. We carry this liability since the SDRs may be withdrawn as needed by the IMF unless the following occurs: a withdrawal by the United States from the IMF membership, cancellation of the SDRs, or liquidation of the IMF or SDR Department of the IMF.

SDR holdings increase primarily as a result of IMF SDR allocations. We record SDR transactions as incurred, and include acquisitions and sales of SDRs, interest received on SDR holdings, interest charges on SDRs allocations, and valuation adjustments. The U.S. government also receives remuneration in SDRs from the IMF based on claims on the IMF as represented by the U.S. Reserve Position in the IMF and loans receivable from supplemental borrowing arrangements. We credit remuneration to the ESF, which transfers to the TGA account an equivalent amount of dollars plus nominal interest. The allocations and holdings are revalued monthly based on the SDR valuation rate as calculated by the IMF, resulting in the recognition of unrealized gains or losses on revaluation that are reported on the Consolidated Statements of Net Cost.

#### Certificates Issued to the Federal Reserve

The *Special Drawing Rights Act of 1968* authorizes the Secretary to issue certificates, not to exceed the value of SDR holdings, to the FRB in return for dollar amounts equal to the face value of certificates issued. We issue certificates to finance the acquisition of SDRs from other countries or to provide U.S. dollar resources to finance other ESF operations. Certificates issued are redeemed by us at such times and in such amounts as the Secretary may determine, and do not bear interest. We report certificates issued to the FRB at their face value which approximates their carrying value since, under the terms of the agreement, there is no set repayment date and no interest accrued while certificates remain outstanding.

## **N. REFUNDS PAYABLE**

Refunds payable arise in the normal course of tax administration when it is determined that taxpayers have paid more than the actual taxes they owe. We record amounts concluded to be valid refunds owed to taxpayers as a liability entitled "Refunds Payable" on the Consolidated Balance Sheets, with a corresponding receivable from the General Fund included in the line entitled "Due From the General Fund."

# **O. FEDERAL EMPLOYEE BENEFITS PAYABLE – FECA ACTUARIAL LIABILITY**

The *Federal Employees' Compensation Act* (FECA) provides income and medical cost protection to covered federal civilian employees injured on the job, and employees who have incurred a work-related injury or occupational disease. The FECA program is administered by the DOL which pays valid claims and subsequently seeks reimbursements from us for these paid claims. Generally, we reimburse the DOL within two to three years once funds are appropriated. The FECA liability consists of two components. The first component is based on actual claims paid by the DOL but not yet reimbursed by us. The second component is the estimated liability for future workers compensation as a result of past events. We report both components in "Other Liabilities" on the Consolidated Balance Sheets. These future workers' compensation estimates are generated by applying actuarial procedures developed to estimate the liability for FECA benefits. The actuarial liability estimates for FECA benefits include the expected liability for death, disability, medical, and miscellaneous costs for approved compensation cases.

# P. ANNUAL, SICK, AND OTHER LEAVE

We report annual and compensatory leave earned by our employees, but not yet used, as an accrued liability. We adjust the accrued balance annually to reflect current pay rates. Any portion of the accrued leave for which funding is not available is recorded as an unfunded liability as reported in "Other Liabilities" on the Consolidated Balance Sheets. We expense sick and other leave as taken and do not record a liability for such amounts because employees do not vest in sick and other leave benefits.

# Q. PENSION COSTS, OTHER RETIREMENT BENEFITS, AND OTHER POST-EMPLOYMENT BENEFITS

#### Federal Pension Costs, Other Retirement Benefits, and Other Post-Employment Benefits

We recognize the full costs of our employees' pension benefits, including recognizing imputed costs for the difference between the estimated service cost and our contributions. However, the Office of Personnel Management (OPM) rather than the Department recognizes the assets and liabilities associated with these benefits.

Most of our employees hired prior to January 1, 1984, participate in the Civil Service Retirement System (CSRS), and employees hired between January 1, 1984 and December 31, 1986 are covered under the CSRS Offset System, to which we contribute 7.0 percent and 7.5 percent of pay for regular and law enforcement employees, respectively. On January 1, 1987, the Federal Employees' Retirement System (FERS) went into effect pursuant to Public Law (P.L.) 99-335. FERS is a three tiered retirement system consisting of a Basic Benefit Plan, Thrift Savings Plan (TSP), and Social Security Benefits. FERS and Social Security automatically cover employees hired after December 31, 1986. For the FERS Basic Benefit Plan, we contribute between 11.9 percent and 13.7 percent for regular employees, and between 28.4 percent and 30.1 percent for law enforcement officers. The TSP under FERS is a 401(k)-type savings plan in which we automatically contribute one percent of base pay and match any employee contributions up to an additional four percent of base pay. For most employees hired after December 31, 1983, we also contribute the employer's matching share for Social Security.

Similar to federal retirement plans, OPM, rather than the Department, reports the assets and liability for future payments to retired employees who participate in the Federal Employees Health Benefits Program (FEHBP) and Federal Employees Group Life Insurance (FEGLI) Program. We report the full cost of providing other retirement benefits (ORB). We also recognize an expense and a liability for other post-employment benefits (OPEB), which includes all types of benefits, provided to former or inactive (but not retired) employees, their beneficiaries, and covered dependents. Additionally, one of our bureaus, OCC, separately sponsors a defined life insurance benefit plan for current and retired employees, and is the administrator for a private defined benefit retirement plan, the Pentegra Defined Benefit Plan (PDBP), that provides retirement, disability, and death benefits for certain retired employees who meet eligibility requirements. In addition to the TSP, the OCC separately sponsors a 401(k) plan.

#### **District of Columbia Federal Pension and Judicial Retirement Plans**

Pursuant to Title XI of the *Balanced Budget Act of 1997*, as amended, we became responsible for benefit payments to certain District of Columbia (D.C.) police officers, firefighters, teachers and judges under D.C. retirement plans (refer to Note 17). The actuarial cost method used to determine costs and actuarial liability for the retirement plans is the Individual Entry Age Normal Funding Method, which approximates the methodology specified by the Aggregate Entry Age Normal Actuarial Cost Method. The methodology bases actuarial liability on long-term economic assumptions. The pension benefit costs incurred by the plans are included on the Consolidated Statements of Net Cost.

The economic assumptions used for the valuation of the D.C. Federal Pension and Judicial retirement plans differ from those used by the OPM for the following reasons: *(i)* the annual rate of salary increase assumptions are based on different plan member experience; *(ii)* the annual rate of inflation and cost-of-living adjustment assumptions are based on different statutory requirements (applicable Consumer Price Index and period of calculation); and *(iii)* for the annual rate of investment return assumption, OPM and the D.C. Federal Pension and Judicial retirement plans use the same underlying yield curve but, unlike the D.C. Federal Pension plan, OPM converts to a single equivalent rate.

# **R. REVENUE AND FINANCING SOURCES**

Our activities are financed either through exchange revenue we receive from others or through non-exchange revenue and financing sources (such as appropriations provided by the Congress and penalties, fines, and certain user fees collected). User fees primarily include collections from the public for the IRS costs to process installment agreements, letter ruling and determinations, and income verification. We recognize exchange revenue when earned; i.e., goods are delivered or services are rendered. We recognize revenue from reimbursable agreements when providing services. We record non-exchange revenues when received or accrued when we have a legal claim through the respective collecting bureau. We recognize appropriations used as financing sources when related expenses are incurred or assets are purchased.

We also incur certain costs paid in total or in part by other federal entities, such as pension costs, the FEHBP, and any unreimbursed payments made from the Treasury Judgment Fund on our behalf. We recognize these subsidized costs on the Consolidated Statements of Net Cost, and we recognize the imputed financing for these costs on the Consolidated Statements of Changes in Net Position. As a result, there is no effect on net position. We also recognize other non-exchange financing sources, such as donations and transfers of assets without reimbursements, for the period in which they occurred on the Consolidated Statements of Changes in Net Position.

We recognize revenue we receive from disposition of forfeited property as non-exchange revenue on the Consolidated Statements of Changes in Net Position. We report costs related to the Forfeiture Fund program on the Consolidated Statements of Net Cost. The TFF is the special fund account for depositing non-tax forfeiture proceeds received pursuant to laws enforced or administered by law enforcement bureaus that participate in the TFF. We report forfeited property balances in "Other Assets" on the Consolidated Balance Sheets.

#### S. CUSTODIAL REVENUES

Non-entity revenue reported on our Statements of Custodial Activity includes cash we collected, primarily from taxes. It does not include revenue collected by other federal agencies, such as user fees and other receipts, which are remitted for general operating purposes of the U.S. government or are dedicated for certain trust funds. We present the Statements of Custodial Activity on the "modified accrual basis." We recognize revenues as cash is collected, and record a "non-cash accrual adjustment" representing the net increase or decrease during the reporting period in net revenue-related assets and liabilities, mainly taxes receivable.

#### T. APPROPRIATIONS AND OTHER BUDGETARY ACTIVITY

#### **Combined Statement of Budgetary Resources Activity**

We record appropriations when authorized by legislation. Incurred obligations of appropriations are recorded when we place an order or sign a contract for goods and services, award a grant, or take other actions that require us to make payments to the public or another federal entity. Outlays are recorded when disbursements are made.

#### Permanent and Indefinite Appropriations

We use permanent and indefinite appropriations to disburse tax refunds, income tax credits, and child tax credits. We recognize refund payment funding as appropriations are used. Permanent indefinite authority for refund activity is available for an unlimited period of time in the amount necessary to cover the refund and/or credit. We report tax refunds and credits as a custodial activity of the Department, since they are, in substance, a custodial revenue-related activity resulting from taxpayer overpayments of their tax liabilities.

We also have two permanent and indefinite appropriations related to debt activity. One permanent and indefinite appropriation is used to pay interest on the public debt securities, and the other is used to redeem securities that are matured, called, or eligible for early redemption. These accounts are not annual appropriations and do not have refunds. We report debt redemption appropriations related to our liability on our Consolidated Balance Sheets. We record interest appropriations at the beginning of the fiscal year and again at mid-year, if necessary, and we return any unused authority to the General Fund at the end of the fiscal year. Permanent indefinite authority for debt redemptions and related interest is available for an unlimited period of time.

We also have permanent and indefinite appropriations to fund increases in the projected subsidy costs of credit programs as determined by the re-estimation process required by the FCRA, and to also cover our renewable energy project.

Additionally, we have other permanent and indefinite appropriations to make certain payments on behalf of the U.S. government. We receive these appropriations to make payments to the FRB for fiscal services provided, and to the financial institutions for services provided as financial agents of the U.S. government. They also include appropriations provided to make other disbursements on behalf of the U.S. government, including payments made to various parties as a result of certain claims and judgments rendered against the United States.

# **U. INCOME TAXES**

As an agency of the U.S. government, we are exempt from all income taxes imposed by any governing body, whether it is a federal, state, commonwealth, local, or foreign government.

## V. USE OF ESTIMATES

We have made certain estimates and assumptions relating to the reporting of assets, liabilities, revenues, expenses, and the disclosure of contingent liabilities to prepare our financial statements. Actual results may differ from these estimates. Adverse changes in the outlook for the key assumptions underlying management's estimates may materially affect the results of our operations, cash flows and/or our financial position in future periods. Transactions subject to estimates principally include loan and credit program receivables, credit reform subsidy costs, investments in GSEs and other non-federal securities and related impairment, tax receivables, loan guarantees, depreciation, imputed costs, actuarial liabilities, cost and earned revenue allocations, as well as contingencies and any related recognized liabilities. The following is a discussion of certain significant transactions subject to estimation.

We account for all of our credit program receivables in accordance with credit reform accounting (refer to the accounting policy above entitled "*Credit Program Receivables, Net*" and Note 9). These receivables are derived using credit reform modeling which is subject to the use of estimates and forecasts that have inherent uncertainty. We recognize the sensitivity of credit reform modeling to slight changes in certain model assumptions such as general economic conditions, specific stock price volatility of the entities in which we have an equity interest, estimates of expected default, and prepayment rates.

We use regular review of model factors, statistical modeling, and annual re-estimates to reflect the most accurate cost of the credit programs to the U.S. government. The purpose of re-estimates is to update original program subsidy cost estimates to reflect actual cash flow experience as well as changes in forecasts of future cash flows. We update forecasts of future cash flows based on actual program performance to date, additional information about the portfolio, additional publicly available relevant historical market data on securities performance, revised expectations for future economic conditions, and enhancements to cash flow projection methods.

We perform annual calculations, as of September 30, to assess our need for recording an estimated liability in accordance with SFFAS No. 5 related to our funding commitment to the GSEs under the SPSPAs. Liability recognition is predicated on the probable future occurrence of an excess of liabilities and minimum capital reserve amounts, as defined, over the assets of either GSE at the end of any reporting quarter. The occurrence of future GSE deficits, which ultimately determines our liability to the GSEs, is most sensitive to future changes in the housing price index and, to a lesser extent, future changes in guarantee fees received by the GSEs on single family mortgages.

The annual valuation performed as of September 30 on the preferred stock and warrants comprising the "Investments in Government Sponsored Enterprises" line item on the Consolidated Balance Sheets incorporates various forecasts, projections and cash flow analyses to develop an estimate of the asset's fair value. The value of the senior preferred stock is estimated by first estimating the fair value of the total equity of each GSE (which, in addition to the senior preferred stock, is comprised of other equity instruments including common stock, common stock warrants, and junior preferred stock). The fair value of the total equity is based on a discounted cash flow valuation methodology, whereby the primary input is the present value of the projected quarterly dividend payments. The fair value of the GSE's other equity instruments is then deducted from its total equity, with the remainder representing the fair value of the GSEs which, along with the junior preferred stock, are traded on the over-the-counter (OTC) Bulletin Board. We evaluate the need for adjusting our OTC market-based valuation of the warrants for the effects, if any, of significant events occurring after the close of the market but before the end of the measurement date. We record any changes in valuation, including impairment, and disclose changes in accordance with SFFAS No. 7, *Accounting for Revenue and Other Financing Sources*. Since the valuation is an annual process, we deem changes in valuation of the preferred stock and warrants as usual and recurring. Note 10 includes a detailed discussion of the results of the asset valuation and estimated liability assessment.

Estimation of such complex and long-duration receivables, investments, and contingencies is subject to uncertainty. It is possible that new developments will adversely impact the value of receivables, investments, and contingencies, as well as ultimate amounts we are required to fund. Except as expressly noted herein, we have not revalued or included in our estimates as of September 30, 2016 the effects of any new developments that may have occurred subsequent to September 30, 2016. Refer to the accounting policy entitled "*Pension Costs, Other Retirement Benefits, and Other Post-Employment Benefits*" above and Note 8 for additional discussion related to the estimation of actuarial liabilities and tax receivables, respectively.

## W. OTHER-THAN-TEMPORARY IMPAIRMENTS

A decline in the market value (either due to credit, price or currency) of any investment below cost that is deemed to be other-than-temporary is accounted for as an impairment, and the carrying value is reduced to fair value for financial reporting purposes. To determine whether an impairment is other-than-temporary, we consider whether we have the ability and intent to hold the investment until a market price recovery, and consider whether evidence indicating the cost of the investment is recoverable outweighs evidence to the contrary.

# X. CREDIT, MARKET AND FOREIGN CURRENCY RISK

Credit risk is the potential, no matter how remote, for financial loss from a failure of a borrower or counterparty to perform in accordance with underlying contractual obligations. We take on possible credit risk when we make direct loans or guarantees to non-federal entities, provide credits to foreign entities, or become exposed to institutions which engage in financial transactions with foreign countries (refer to Note 12). Our following programs entail credit risk: monetary assets held; committed but undisbursed direct loans; funding commitment to the GSEs; GSE obligations obtained under the HFA initiative (the New Issue Bond Program); investments, loans, and other credit programs including the CDFI Fund programs, SBLF, and TARP.

Our activities generally focus on the underlying problems in the credit markets. We developed these programs to provide credit where borrowers are not able to get access to credit with reasonable terms and conditions. Because these programs attempt to correct for a market imperfection, it can expose us to potential costs and losses. Additional risk of costs and losses could result from terrorist attacks under the Terrorism Risk Insurance Program. The extent of the risk we assumed is described in more detail in the notes to the financial statements and, where applicable, is factored into credit reform models and reflected in fair value measurements (refer to Notes 9, 10, and 26).

For *Emergency Economic Stabilization Act* (EESA) programs, the statute requires calculation of budgetary costs of the troubled assets and guarantees of troubled assets by adjusting the discount rate for market risks. We adjust our cost estimates for the TARP programs based on a MRADR to reflect the additional return required by the market to compensate for variability around the expected losses reflected in the cash flows. Under SFFAS No. 2, including market risk in the cash flow estimates is consistent with the type of assets being valued. The inclusion of the MRADR is the mechanism for deriving a fair value of the assets.

We face certain risks and uncertainties as a result of holding securities denominated in foreign currency. The price of holdings of such securities may widely fluctuate as a result of volatility in foreign currency markets and changes in real and perceived credit risk of our counterparties.

# Y. FUNDS FROM DEDICATED COLLECTIONS

We account for revenues and other financing sources for funds from dedicated collections (FDC) separately from other funds. Such funds are financed by specifically identified revenues provided to the U.S. government by non-federal sources, often supplemented by federal and other financing sources, which remain available over time. Statute requires use of these specifically identified revenues and other financing sources for designated activities, benefits, or purposes. We apply the following criteria for purposes of designating funds as dedicated collections: *(i)* a statute committing the U.S. government to use specifically identified revenues and/or other financing sources that are originally provided to the U.S. government by a non-federal source only for designated activities, benefits, or purposes; *(ii)* explicit authority for the fund to retain revenues and/or other financing sources that are of finance the designated activities, benefits, or purposes; *(iii)* a requirement to account for and report on the receipt, use, and retention of the revenues and/or other financing sources that distinguishes the fund from the U.S. government's general revenues; and *(iv)* for funds comprised of both federal and non-federal sources, such funding is predominantly non-federal, or the non-federal funding is material to our financial statements.

# Z. ALLOCATION TRANSFERS

We are a party to allocation transfers with other federal agencies as both a transferring (parent) entity and/or a receiving (child) entity. Allocation transfers are legal delegations by one department of its authority to obligate budget authority and outlay funds to another department. A separate fund account (allocation account) is created in Treasury as a subset of the parent fund account for tracking and reporting purposes. All allocation transfers of balances are credited to this account, and subsequent obligations and outlays incurred by the child entity are charged to this allocation account as they execute the delegated activity on behalf of the parent. Parent federal agencies report both the proprietary and budgetary activity and the child agency does not report any financial activity related to budget authority allocated from the parent federal agency to the child federal agency. However, OMB guidance requires the child to report the activity when we receive allocation transfers, as the child, from the Executive Office of the President (See Circular No. A-136, II.4.2, question 5 for three exceptions).

We allocate funds, as the parent, to the Department of Energy and Department of Health and Human Services (HHS). Also, we receive allocation transfers, as the child, from the Agency for International Development, HHS, Department of Transportation, Executive Office of the President, and General Services Administration.

# **AA. FIDUCIARY ACTIVITIES**

Fiduciary activities are the collection or receipt, and the management, protection, accounting, investment, and disposition by the U.S. government of cash or other assets in which non-Federal individuals or entities have an ownership interest that the U.S. government must uphold. Fiduciary cash and other assets are not assets of the U.S. government. We do not report these activities in our consolidated financial statements, but instead are reported in Note 25.

# **AB. RELATED PARTIES AND OTHER ENTITIES**

The primary "related parties" with whom we conduct business are other federal agencies, mainly through the normal lending activities of the Fiscal Service and the FFB. We disclose these activities in the consolidated financial statements. Additionally, the Secretary serves on the Federal Housing Finance Oversight Board, and consults with the Director of FHFA on matters involving Fannie Mae and Freddie Mac. This provides us with an advisory role in the FHFA's actions as the conservator for Fannie Mae and Freddie Mac. We have no transactions with FHFA, but rather transact directly with the GSEs. We also utilize the services of the FRBs to execute a variety of transactions on behalf of the Fiscal Service and the ESF. Due to the magnitude and variety of services provided, the following provides an overview of the FRBs' purpose, governance, and the various services provided on our behalf.

#### Federal Reserve System

Congress, under the *Federal Reserve Act of 1913*, created the Federal Reserve System (FR System). The FR System consists of the Federal Reserve Board of Governors (Board), the Federal Open Market Committee (FOMC), and the FRBs. Collectively, the FR System serves as the nation's central bank and is responsible for formulating and conducting monetary policy, issuing and distributing currency (Federal Reserve Notes), supervising and regulating financial institutions, providing nationwide payments systems (including large-dollar transfers of funds, automated clearinghouse (ACH) operations, and check collection), providing certain financial services to federal agencies and fiscal principals, and serving as the U.S. government's bank. Monetary policy includes actions undertaken by the FR System that influence the availability and cost of money and credit as a means of helping to promote national economic goals. The FR System also conducts operations in foreign markets in order to counter disorderly conditions in exchange markets or to meet other needs specified by the FOMC to carry out its central bank responsibilities. The FR System is not included in the federal budget. The FR System is considered an independent central bank, and the executive branch of the U.S. government does not ratify its decisions.

We interact with the FRBs in a variety of ways, including the following:

- The FRBs serve as our fiscal agent and depositary, executing banking and other financial transactions on our behalf (refer to Note 5). We reimburse the FRBs for these services, the cost of which is included on the Consolidated Statements of Net Costs.
- The FRBs hold Treasury and other federal securities in the FRBs'System Open Market Account (SOMA) for the purpose of conducting monetary policy (refer to Note 15).
- The FRBs hold gold certificates issued by the Department in which the certificates are collateralized by gold (refer to Note 6).
- The FRBs hold SDR certificates issued by the Department which are collateralized by SDRs (refer to Notes 5 and 7).
- The FRBs are required by Board policy to transfer their excess earnings to us on behalf of the U.S. government (refer to Notes 8 and 22).

We also consult with the FR System on matters affecting the economy and certain financial stability activities. We account for and disclose the above financial activities involving us in our consolidated financial statements. In accordance with SFFAC No. 2, *Entity and Display*, we do not consolidate the FR Systems' assets, liabilities, and operations into our financial statements.

#### Federal Reserve System Structure

The Board is an independent organization governed by seven members appointed by the President and confirmed by the Senate. The full term of a Board member is 14 years, and the appointments are staggered so that one term expires on January 31 of each even-numbered year. The Board has a number of supervisory and regulatory responsibilities for institutions including, among others, state-chartered banks that are members of the FR System, bank holding companies, and savings and loan holding companies. In addition, the Board has general supervisory responsibilities for the 12 FRBs, and issues currency (Federal Reserve Notes) to the FRBs for distribution.

The FOMC is comprised of the seven Board members and five of the 12 FRB presidents. FOMC formulates and conducts monetary policy primarily through open market operations (the purchase and sale of certain securities in the open market), the principal tool of national monetary policy. These operations affect the amount of reserve balances available to depository institutions, thereby influencing overall monetary and credit conditions. The 12 FRBs are chartered under the Federal Reserve Act, which requires each member bank to own the capital stock of its FRB. Each FRB has a board of directors that exercises supervision and control of each FRB, with three members appointed by the Board of Governors of the FR System, and six board members elected by their member banks.

The FRBs participate in formulating and conducting monetary policy, distribute currency and coin, and serve as our fiscal agent, as well as the fiscal agent for other federal agencies and fiscal principals. Additionally, the FRBs provide short-term loans to depository institutions and loans to participants in programs or facilities with broad-based eligibility in unusual and crucial circumstances when approved by the Board.

#### Federal Reserve System Assets and Liabilities

The FRBs hold Treasury and other securities in the SOMA for the purpose of conducting monetary policy. Treasury securities held by the FRBs totaled \$1.8 trillion as of September 30, 2016 and 2015 (refer to Note 15). These assets are generally subject to the same market (principally interest-rate) and credit risks as other financial instruments. In the open market, the FR System purchases and sells Treasury securities as a mechanism for controlling the money supply.

The FRBs have deposit liabilities with Treasury and depository institutions. The FRBs issue Federal Reserve Notes, the circulating currency of the United States, which are collateralized by the Treasury securities and other assets held by the FRBs.

Financial and other information concerning the FR System, including financial statements for the Board and the FRBs, may be obtained from the FR System website.

#### FRB Residual Earnings Transferred to the Department

FRBs generate income from interest earned on securities, reimbursable services provided to federal agencies, and the provision of priced services to depository institutions as specified by the *Monetary Control Act of 1980*. Although the FRBs generate earnings from carrying out open market operations, via the earnings on securities held in the SOMA account, their execution of these operations is for the purpose of accomplishing monetary policy rather than generating earnings. Each FRB is required by Board policy to transfer to us its residual (or excess) earnings after providing for the cost of operations, payment of dividends, and surplus funds not to exceed an FRB's allocated portion of an aggregate of \$10 billion for all FRBs in accordance with the provisions of a new statute, *Fixing America's Surface Transportation Act of 2015* (P.L. 114-94), which became effective December 4, 2015. Prior to this statute, each FRB was required to maintain surplus funds equal to the amount of capital paid-in. The new statue limits the aggregate amount of surplus funds to \$10 billion that all FRBs can maintain.

FRBs' residual earnings may vary due to, among other things, changes in the SOMA balance levels that may occur in conducting monetary policy. Under P.L. 114-94, if an FRB's earnings for the year are not sufficient to provide for the cost of operations, payment of dividends, or allocated portion of the \$10 billion aggregate surplus funds limitation, an FRB will suspend its payments to us until such earnings become sufficient. The FRB residual earnings of \$115.7 billion and \$96.5 billion for fiscal years ended September 30, 2016 and 2015, respectively, are reported as custodial revenues on our Statements of Custodial Activity. They constituted 3.3 percent and 2.8 percent of our total custodial revenues collected in fiscal years 2016 and 2015, respectively. "Taxes, Interest and Other Receivables, Net" includes a receivable for FRB's residual earnings which represents the earnings due to us as of September 30, but not collected by us until after the end of the month (refer to Note 8).

## AC. CHANGE IN BUDGETARY ACCOUNTING AND REPORTING

Effective October 1, 2015, in accordance with OMB guidance, we changed our budgetary accounting and reporting policy for transactions related to the United States' participation in the IMF. Under this change in policy, IMF transactions – other than related interest earnings and cost estimates for U.S. quota and New Arrangements to Borrow adjustments – are no longer reported as budgetary resources and uses on our Combined Statement of Budgetary Resources. As a result of this change in budgetary accounting, we adjusted the beginning balances of "Unobligated" and "Unpaid Obligations" on our Combined Statement of Budgetary Resources for fiscal year 2016 to remove those balances associated with the IMF programs. This change in accounting policy and resulting budgetary beginning balance adjustments did not impact our proprietary accounts. Refer to Note 7 for a further discussion of this change in accounting and its related impact on our Combined Statement of Budgetary Resources for the fiscal year ended September 30, 2016.

# **2. FUND BALANCE**

| (in millions)  | 2016                    | 2015    |
|--|-------------------------|---------|
| Appropriated Funds   | \$<br><b>431,008</b> \$ | 344,691 |
| Revolving Funds  | 2,277                   | 6,269   |
| Special Funds  | 783                     | 686     |
| Clearing Funds   | 689                     | 511     |
| Deposit Funds  | 78                      | 80      |
| Other Funds (principally Receipt, Suspense, and Trust Funds) | 411                     | 289     |
| Total Fund Balance   | \$<br><b>435,246</b> \$ | 352,526 |

As of September 30, 2016 and 2015, Fund Balance consisted of the following:

Appropriated funds consist of amounts appropriated annually by Congress to fund our operations.

We use revolving funds for continuing cycles of business-like activity in which the fund charges for the sale of products or services and uses the proceeds to finance its spending, usually without requirement for annual appropriations. A public enterprise revolving fund is an account that is authorized by law to be credited with offsetting collections from the public, and those monies are used to finance operations. Also included in revolving funds are the working capital fund and financing funds. The working capital fund is a fee-for-service fund established to support operations of our components. The financing funds relate to credit reform activities.

Special funds include funds designated for specific purposes. Clearing funds represent reconciling differences with our balances as reported in the U.S. government's central accounts. These fund accounts temporarily hold unidentifiable general, special, or trust fund collections that belong to the U.S. government until they are classified to the proper receipt or expenditure account by the federal entity. Deposit funds are accounts that record amounts held temporarily by the U.S. government until ownership is determined, and include seized cash and other amounts received as an advance that are not accompanied by an order.

# STATUS OF FUND BALANCE

As of September 30, 2016 and 2015, the status of the fund balance consisted of the following:

| (in millions)  | 2016                    | 2015     |
|--|-------------------------|----------|
| Unobligated Balance - Available                      | \$<br><b>275,595</b> \$ | 291,525  |
| Unobligated Balance - Not Available                  | 41,614                  | 40,467   |
| Unpaid Obligations                                   | 75,617                  | 227,339  |
| Subtotal   | 392,826                 | 559,331  |
| Adjustment for ESF                                   | (94,273)                | (91,066) |
| Adjustment for Intra-Treasury Investments            | (9,347)                 | (13,075) |
| Adjustment for Borrowing Authority                   | (6,520)                 | (93,963) |
| Adjustment for IMF                                   | 138,373                 | (14,809) |
| Adjustment for Authority Unavailable for Obligations | 12,091                  | 3,872    |
| OtherAdjustments                                     | 2,096                   | 2,236    |
| Total Status of Fund Balance                         | \$<br><b>435,246</b> \$ | 352,526  |

Portions of the Unobligated Balance Not Available, as shown on the Combined Statement of Budgetary Resources, include amounts appropriated in prior fiscal years that are not available to fund new obligations. However, we may use such amounts for upward and downward adjustments for existing obligations in future years. The Unpaid Obligations represent amounts designated for payment of goods and services ordered but not received, or goods and services received but for which payment has not yet been made.

Since the following line items are either a component of Fund Balance or post to budgetary status accounts, the following adjustments are required to reconcile the budgetary status to the non-budgetary Fund Balance as reported on the Consolidated Balance Sheets:

- Adjustments for ESF ESF investments in Treasury securities (which are eliminated on the Consolidated Balance Sheets), foreign investments, SDR holdings, and related balances that meet the criteria for reporting as part of budgetary resources are reported on the Combined Statements of Budgetary Resources; however, they are not a component of the Fund Balance as they represent invested funds.
- Adjustments for Intra-Treasury Investments Budgetary resources include Treasury security investments; however, we have moved the money from the Fund Balance to Investments, which we eliminate on the Consolidated Balance Sheets.
- Adjustments for Borrowing Authority Borrowing authority is in budgetary status reported on the Combined Statements of Budgetary Resources but not in the Fund Balance because we have not received the amounts. The significant decline in borrowing authority is related to new legislation effective in fiscal year 2016 which ended the application of FCRA guidelines to the IMF program involving the use of borrowing authority, and commenced the application of non-FCRA guidelines to the IMF program which involves obtaining an appropriation warrant to cover the full amount of the commitment made to the IMF (refer to Note 7).
- Adjustments for IMF In accordance with OMB guidance, effective October 1, 2015, the IMF program transactions are
  no longer reported as budgetary resources and uses on our Combined Statement of Budgetary Resources; however, the
  funding received through appropriation warrants is reported as a component of Fund Balance (Refer to Note 1AC and 7).
  Prior to fiscal year 2016, the IMF program transactions that met the criteria for reporting as part of budgetary resources
  were reported on the Combined Statements of Budgetary Resources; however, they were not a component of the Fund
  Balance as they represented other monetary assets.
- Adjustment for Authority Unavailable for Obligations Resources unavailable for obligations reduced the budgetary resources reported on the Combined Statements of Budgetary Resources; however, they do not impact the Fund Balance.

As of September 30, 2016 and 2015, we had no budgetary authority in the Fund Balance that was specifically withheld from apportionment by the OMB. We hold balances in non-entity funds, such as certain deposit funds (e.g., seized cash), for the public or for another federal entity, such as the General Fund. Such funds have an offsetting liability equal to the Fund Balance. Refer to Note 7 regarding restrictions related to the line of credit held on the U.S. quota in the IMF.

# 3. LOANS AND INTEREST RECEIVABLE - INTRA-GOVERNMENTAL

# **ENTITY INTRA-GOVERNMENTAL**

Through FFB, we issue loans to federal agencies for the agencies' own use or for the agencies to loan to private sector borrowers whose loans are guaranteed by the federal agencies. FFB is a wholly-owned Government corporation that operates under the general supervision of the Secretary, and has its own broad statutory authority to finance any obligations that are issued, sold, or guaranteed by federal agencies. For agencies that have the statutory authority to borrow in the market, but not from Treasury through the Fiscal Service (refer to the Non-Entity Intra-Governmental section below), FFB uses its statutory authority to make these loans directly to federal agencies.

FFB also uses its statutory authority to finance direct or indirect federally-guaranteed obligations which, as a matter of longstanding federal credit policy, is the least expensive and most efficient method of financing these credit-risk obligations when compared to private sector lender financing. When a federal agency has to honor its guarantee because a private-sector borrower defaults, the federal agency that guaranteed the loan must obtain an appropriation or use other resources to repay FFB.

All principal and interest on FFB loans to federal agencies and private-sector borrowers are, or have a commitment to be, backed by the full faith and credit of the U.S. government. Accordingly, we have not recognized any credit-related losses on its loans, nor have we recorded an allowance for uncollectible intra-governmental loans.

As of September 30, 2016 and 2015, entity intra-governmental loans (issued by FFB) and interest receivable consisted of the following:

|   | Loans           | Interest   | 2016             | Loans      | Interest   | 2015   |
|---|-----------------|------------|------------------|------------|------------|--------|
| (in millions)                               | Receivable      | Receivable | Total            | Receivable | Receivable | Total  |
| Department of Agriculture                   | \$<br>43,339 \$ | 25 \$      | <b>43,364</b> \$ | 41,675 \$  | 26 \$      | 41,701 |
| Department of Energy                        | 15,616          | 70         | 15,686           | 15,746     | 70         | 15,816 |
| United States Postal Service <sup>(1)</sup> | 15,000          | 61         | 15,061           | 15,000     | 52         | 15,052 |
| Department of Education                     | 1,442           | 12         | 1,454            | 1,393      | 11         | 1,404  |
| Other Agencies                              | 557             | 1          | 558              | 107        | -          | 107    |
| Total Entity Intra-governmental             | \$<br>75,954 \$ | 169 \$     | <b>76,123</b> \$ | 73,921 \$  | 159 \$     | 74,080 |

 The United States Postal Service (USPS) experienced an operating deficit in both fiscal years 2016 and 2015. We, along with Congress and other stakeholders are aware of the current and long-term financial issues of the USPS. Congress is considering legislative solutions for returning the USPS to financial stability.

# **NON-ENTITY INTRA-GOVERNMENTAL**

Through the Fiscal Service, we account for and report on the principal borrowings from and repayments to the General Fund for various funds managed by other federal agencies, as well as the related interest due to the General Fund. These federal agencies are statutorily authorized to borrow from the General Fund, through the Fiscal Service, to make loans for a broad range of purposes, such as education, housing, farming, and small business support.

As of September 30, 2016 and 2015, non-entity intra-governmental loans (issued by the Fiscal Service) and interest receivable that were due to the General Fund consisted of the following:

|                                      | Loans              | Interest   | 2016                | Loans        | Interest   | 2015      |
|--------------------------------------|--------------------|------------|---------------------|--------------|------------|-----------|
| (in millions)                        | Receivable         | Receivable | Total               | Receivable   | Receivable | Total     |
| Department of Education              | \$<br>1,126,370 \$ | - \$       | <b>1,126,370</b> \$ | 1,050,373 \$ | - \$       | 1,050,373 |
| Department of Agriculture            | 75,627             | -          | 75,627              | 69,894       | 3          | 69,897    |
| Department of Housing and Urban      |                    |            |                     |              |            |           |
| Development                          | 30,447             | -          | 30,447              | 27,048       | -          | 27,048    |
| Export Import Bank of the U.S.       | 25,022             | -          | 25,022              | 22,725       | -          | 22,725    |
| Department of Homeland Security      | 23,017             | -          | 23,017              | 23,020       | -          | 23,020    |
| Department of Transportation         | 10,868             | -          | 10,868              | 8,972        | -          | 8,972     |
| Small Business Administration        | 8,020              | -          | 8,020               | 7,175        | -          | 7,175     |
| Department of Labor                  | 5,706              | -          | 5,706               | 5,687        | -          | 5,687     |

# 4. DUE FROM THE GENERAL FUND AND DUE TO THE GENERAL FUND

The General Fund consists of assets and liabilities used to finance the daily and long-term operations of the U.S government, as a whole. It also includes accounts used in the management of the Budget of the U.S. government.

We hold and manage General Fund assets, such as loans and interest receivable, cash, and investments in the GSEs on behalf of the U.S. government. General Fund assets constitute resources available to meet the operating needs of the U.S. government. We report these managed assets separately on the Consolidated Balance Sheets, with a corresponding amount reported as Due To the General Fund that represents a liability to reflect assets we owed to the General Fund.

General Fund liabilities, primarily federal debt and interest payable and liability for restoration of federal debt principal and interest, are obligations of the U.S. government. We report these Department-managed liabilities separately on the Consolidated Balance Sheets, with a corresponding amount reported as Due From the General Fund that represents a receivable, or future funds required of the General Fund to repay borrowings from the public and other federal agencies.

As of September 30, 2016 and 2015, the General Fund liabilities we owed exceeded the assets held on behalf of the General Fund by \$17.8 trillion and \$17.0 trillion, respectively. This represents the amount needed by the U.S. government, through a combination of future tax collections and/or continued borrowing from the public and federal agencies to meet its obligations.

As of September 30, 2016 and 2015, Due From the General Fund included the following non-entity liabilities:

| Liabilities Requiring Funding from the General Fund (in millions)             | 2016                       | 2015       |
|---|----------------------------|------------|
| Federal Debt and Interest Payable - Held by the Public (Note 15)              | \$<br><b>14,196,734</b> \$ | 13,148,200 |
| Federal Debt and Interest Payable - Intra-governmental (Note 15)              | 5,466,422                  | 5,096,265  |
| Liability for Restoration of Federal Debt Principal and Interest - Due to the |                            |            |
| Public (Note 15)  | -                          | 204,591    |
| Liability for Restoration of Federal Debt Principal and Interest - Intra-     |                            |            |
| governmental (Note 15)  | -                          | 146,066    |
| Refunds Payable (Note 22)   | 2,993                      | 3,039      |
| Adjustment for Eliminated Liabilities   | 33,003                     | 34,092     |
| Total Due From the General Fund   | \$<br><b>19,699,152</b> \$ | 18,632,253 |

The Adjustment for Eliminated Liabilities principally represents investments in U.S. government securities held by our reporting entities that were eliminated against Federal Debt and Interest Payable Intra-governmental.

| Assets to be Distributed to the General Fund (in millions)      | 2016                      | 2015      |
|---|---------------------------|-----------|
| Fund Balance  | \$<br><b>694</b> \$       | 589       |
| Loans and Interest Receivable - Intra-governmental (Note 3)     | 1,324,531                 | 1,232,516 |
| Advances to the Unemployment Trust Fund                         | 8,558                     | 12,840    |
| Cash Due to the General Fund (Held by the Department) (Note 5)  | 347,077                   | 193,449   |
| Accounts Receivable - Intra-governmental                        | 377                       | 390       |
| Foreign Currency  | 118                       | 85        |
| Custodial Gold without Certificates and Silver Held by the Mint | 25                        | 25        |
| Taxes and Other Non-Entity Receivables Due to the General Fund  | 50,201                    | 41,992    |
| Credit Reform Downward Subsidy Re-estimates                     | 152                       | 288       |
| Loans and Interest Receivable                                   | 8                         | 21        |
| In vestments in Government Sponsored Enterprises (Note 10)      | 108,550                   | 106,270   |
| Adjustment for Eliminated Assets                                | 66,332                    | 75,490    |
| Total Due To the General Fund                                   | \$<br><b>1,906,623</b> \$ | 1,663,955 |

As of September 30, 2016 and 2015, Due To the General Fund included the following non-entity assets:

The assets to be distributed to the General Fund do not represent all of the non-entity assets we manage. Refer to Note 14 for all of our non-entity assets held.

The Fund Balance reported above represents the non-entity funds we hold on behalf of the General Fund. It is used to administer programs such as the Presidential Election Campaign and payments for Legal Services Corporation and thus not available for our general use.

The General Fund issues advances to the DOL's Unemployment Trust Fund to disburse to states for unemployment benefits. We transfer repayment of these advances to the General Fund.

Taxes and Other Non-Entity Receivables Due to General Fund primarily represents IRS-related federal taxes receivable (refer to Note 8).

The Adjustment for Eliminated Assets principally represents loans and interest payable owed by our Treasury reporting entities, which were eliminated against Loans and Interest Receivable Intra-governmental held by the Fiscal Service.

# 5. CASH, FOREIGN CURRENCY, AND OTHER MONETARY ASSETS

Cash, Foreign Currency, and Other Monetary Assets held as of September 30, 2016 and 2015 were as follows:

| (in millions)  | 2016                    | 2015    |
|--|-------------------------|---------|
| Entity:  |                         |         |
| Cash   | \$<br><b>32</b> \$      | 40      |
| Foreign Currency and Foreign Currency Denominated Assets   | 11,756                  | 8,310   |
| Other Monetary Assets:                                     |                         |         |
| Special Drawing Right Holdings                             | 50,057                  | 50,336  |
| U.S. Dollars Held in Cash by the IMF                       | 309                     | 149     |
| Total Entity   | 62,154                  | 58,835  |
| Non-Entity:  |                         |         |
| Operating Cash of the U.S. government                      | 346,956                 | 193,325 |
| Foreign Currency   | 118                     | 85      |
| Miscellaneous Cash Held by All Treasury Reporting Entities | 870                     | 891     |
| Total Non-Entity   | 347,944                 | 194,301 |
| Total Cash, Foreign Currency, and Other Monetary Assets    | \$<br><b>410,098</b> \$ | 253,136 |

We hold non-entity operating and other miscellaneous cash due to the General Fund which consisted of the following as of September 30, 2016 and 2015:

| (in millions)                               | 2016                    | 2015    |
|---|-------------------------|---------|
| Operating Cash - FRB Account                | \$<br><b>353,312</b> \$ | 198,716 |
| Outs tanding Checks                         | (6,356)                 | (5,391) |
| Total Operating Cash of the U.S. government | 346,956                 | 193,325 |
| Mi s ce llaneo us Cash                      | 127                     | 133     |
| Subtotal                                    | 347,083                 | 193,458 |
| Amounts Due to the Public                   | (6)                     | (9)     |
| Total Cash Due to the General Fund (Note 4) | \$<br><b>347,077</b> \$ | 193,449 |

# ENTITY

Entity cash, foreign currency, and other monetary assets principally include foreign currency, foreign currency denominated assets (FCDAs), and SDRs. These assets are valued as of September 30, 2016 and 2015 using current exchange rates plus accrued interest.

#### **Foreign Currency Denominated Assets**

We normally invest FCDA holdings in interest-bearing securities issued by or held through foreign governments or monetary authorities. FCDAs with original maturities of three months or less were valued at \$11.8 billion and \$8.3 billion as of September 30, 2016 and 2015, respectively.

# **Special Drawing Rights**

The SDR is an international reserve asset created by the IMF to supplement existing reserve assets. The IMF has allocated new SDRs on several occasions to members participating in the IMF's SDR department. The SDR derives its value as a reserve asset essentially from the commitments of participants to hold and accept SDRs and to honor various obligations connected with their proper functioning as a reserve asset. Pursuant to the *Special Drawing Rights Act of 1968*, as

amended, we issued certificates to the Federal Reserve, valued at \$5.2 billion which were reported as a liability on the Consolidated Balance Sheets as of September 30, 2016 and 2015. The certificates were issued to finance the ESF's acquisition of SDRs from other countries or to provide U.S. dollar resources for financing other ESF operations.

On a daily basis, the IMF calculates the value of the SDR using the currency exchange rate in terms of the U.S. dollar from weighted amounts of each of four freely usable currencies, as defined by the IMF. These currencies are the U.S. dollar, the European euro, the Japanese yen, the British pound sterling, and, effective October 1, 2016, the Chinese renminbi. We revalue the U.S. SDR holdings and allocations from the IMF monthly based on the SDR valuation rate calculated by the IMF.

Pursuant to the IMF Articles of Agreement, SDR holdings and allocations acquired by the United States are permanent resources or liabilities unless:

- cancelled by the Board of Governors pursuant to an 85.0 percent majority decision of the total voting power of IMF members;
- the SDR department of the IMF is liquidated;
- the IMF is liquidated; or
- the United States chooses to withdraw from the IMF or terminate its participation in the SDR department

Except for the payment of interest and charges on SDR allocations to the United States, the payment of the U.S. commitment related to SDR allocations is conditional on events listed above, in which the United States has a substantial or controlling voice. The United States has received no SDR allocations since 2009.

As of September 30, 2016 and 2015, the total amount of SDR holdings of the United States was the equivalent of \$50.1 billion and \$50.3 billion, respectively. As of September 30, 2016 and 2015, the total value of SDR allocations to the United States was the equivalent of \$49.3 billion and \$49.6 billion, respectively.

## **NON-ENTITY**

We manage the non-entity cash, foreign currency, and other monetary assets principally included in the Operating Cash of the U.S. government. Also included is foreign currency maintained by various U.S. disbursing offices, miscellaneous cash such as seized monetary instruments, undistributed cash, and offers in compromises which are maintained as a result of our tax collecting responsibilities. The Operating Cash of the U.S. government represents balances from tax collections, other revenues, federal debt receipts, and other receipts, net of checks outstanding, which are held in the FRBNY.

# 6. GOLD AND SILVER RESERVES, AND GOLD CERTIFICATES ISSUED TO THE FEDERAL RESERVE BANKS

Through the Mint, we are responsible for safeguarding most of the U.S. government's gold and all of the silver reserves in accordance with 31 USC §5117; a smaller portion of the gold is in the custody of the FRBs.

The gold reserves we hold are partially offset by a liability for gold certificates issued by the Secretary to the FRBs at the statutory rate, as provided in 31 USC §5117. Since 1934, Gold Certificates have been issued in non-definitive or book-entry form to the FRBs. Our liability incurred by issuing the Gold Certificates, as reported on the Consolidated Balance Sheets, is limited to the gold we hold at the statutory value. Upon issuance of Gold Certificates to the FRBs, we deposit the proceeds from the certificates into the operating cash of the U.S. government. All of our certificates issued are payable to the FRBs. The Mint also holds 100,000 fine troy ounces (FTO) (\$4 million at the statutory carrying value) of gold reserves without certificates.

The gold and silver bullion reserve (deep storage and working stock) are reported on the consolidated financial statements at the values stated in 31 USC § 5116 – 5117 (statutory rates) which are \$42.2222 per FTO of gold and no less than \$1.292929292 per FTO of silver. Accordingly, the silver is valued at \$1.292929292 per FTO. The market values of the gold and silver reserves disclosed below are based on the London Gold Fixing. As of September 30, 2016 and 2015, the values of gold and silver reserves consisted of the following:

|                                    |                |            | 2016          |             |               |
|------------------------------------|----------------|------------|---------------|-------------|---------------|
|                                    |                |            | Statutory     |             | 2016          |
|                                    |                |            | Carrying      | Market      | Market        |
|                                    |                | Statutory  | Value         | Rate Per    | Value         |
|                                    | FTOs           | Rate       | (in millions) | FTO         | (in millions) |

# 7. RESERVE POSITION IN THE INTERNATIONAL MONETARY FUND AND RELATED LOANS AND INTEREST RECEIVABLE

The United States participates in the IMF through a quota subscription and certain borrowing arrangements that supplement IMF resources.

## LEGISLATIVE CHANGES

The *Supplemental Appropriations Act of 2009* (P.L. 111-32) authorized and funded an increase of approximately SDR 5.0 billion (approximately \$8.0 billion) in the U.S. quota in the IMF, as well as an increase in the United States' participation in the New Arrangements to Borrow (NAB) up to the dollar equivalent of SDR 75 billion. This increase in the U.S. quota and NAB became effective in fiscal year 2011. P.L. 111-32 subjected the increases in both the U.S. quota and the NAB to the requirements of FCRA, and as such, all funding provided pursuant to P.L. 111-32, referred to as "FCRA funds," was accounted for in accordance with credit reform accounting guidelines per SFFAS No. 2. A credit program receivable was established for FCRA fund amounts disbursed (refer to Note 9).

In fiscal year 2016, Congress passed the *Consolidated Appropriations Act of 2016* (P.L. 114-113) which authorized and funded an SDR 40.9 billion (approximately \$57 billion) increase in the U.S. quota in the IMF, and reduced the United States' participation in the NAB by a corresponding amount. This resulted in no net change in the United States' overall financial commitment to the IMF. The provisions of P.L. 114-113 also eliminated our use of FCRA, commencing in fiscal year 2016, for any U.S. funding to the IMF, including any funding disbursements made pursuant to P.L. 111-32.

The fiscal year 2016 legislation had the following significant impacts to the Department's consolidated financial statements as of and for the fiscal year ended September 30, 2016. On the Consolidated Balance Sheet, the "Reserve Position in the IMF" and "Loans and Interest Receivable" increased by \$1.3 billion and \$4.4 billion, respectively, with a corresponding decrease of \$5.7 billion in "Credit Program Receivables, Net" to reclassify those program funds previously presented in accordance with FCRA guidelines pursuant to P.L. 111-32. Furthermore, the "Unexpended Appropriations – Appropriations Received" line reported on our Consolidated Statement of Changes in Net Position for the fiscal year ended September 30, 2016 increased by \$94.4 billion as a result of no longer applying FCRA guidelines to these programs. In connection with the IMF programs, P.L. 114-113 ended the application of FCRA guidelines which involved having borrowing authority, and commenced the application of non-FCRA guidelines which involves obtaining an appropriation warrant to cover the full amount of the commitment made to the IMF, with current indefinite authority to maintain the U.S. dollar equivalent of the SDR funding commitment levels. On our Combined Statement of Budgetary Resources for the 2016 fiscal year, we recorded recoveries of prior year unpaid obligations of \$89.4 billion and other changes in unobligated balances for the withdrawal of borrowing authority of \$87.5 billion related to the legislative termination of the FCRA program.

#### CHANGE IN BUDGETARY ACCOUNTING AND REPORTING

The fiscal year 2016 legislation caused OMB to reconsider its budgetary accounting policy for transactions related to the United States' participation in the IMF. OMB mandated a change in policy, effective October 1, 2015, under which IMF transactions – other than related interest earnings and cost estimates for U.S. quota and NAB adjustments – are no longer reported as budgetary resources and uses on our Combined Statement of Budgetary Resources. For the fiscal year ended September 30, 2016, we adjusted our beginning balances of "Unobligated" and "Unpaid Obligations" on the Combined Statement of Budgetary Resources by \$8.3 billion and \$54.5 billion, respectively, to remove those balances associated with the IMF Quota and NAB programs combined. We made no adjustment to the prior year financial statement presentation.

# **RESERVE POSITION IN THE INTERNATIONAL MONETARY FUND**

We pay quota subscriptions partly through the transfer of reserve assets, such as foreign currencies or SDRs, which are international reserve assets created by the IMF, and partly by making domestic currency available as needed through a non-interest-bearing letter of credit. This letter of credit, issued by us and maintained by the FRBNY, represents our available commitment to the IMF which may be drawn upon by the IMF.

Transfers to the IMF under the U.S. quota do not result in net budgetary outlays as they constitute an exchange of monetary assets in which the United States receives an equal offsetting claim on the IMF in the form of an increase in the U.S. reserve position in the IMF. Similarly, when the IMF repays dollars to the United States, no net budgetary receipt results because the U.S. reserve position declines concurrently in an equal amount. The U.S. reserve position is an interest-bearing asset like other international reserve assets held by the United States, and is available at any time to meet U.S. funding needs.

The U.S. quota is denominated in SDRs. As of September 30, 2016 and 2015, the U.S. quota in the IMF was SDR 83.0 and SDR 42.1 billion, respectively. The increase in fiscal year 2016 was attributable to P.L. 114-113, which increased the U.S. quota by SDR 40.9 billion. The equivalent U.S. dollar value of the U.S. quota consisted of the following:

| (in millions)                   | 2016                    | 2015   |
|---------------------------------|-------------------------|--------|
| Letter of Credit <sup>(1)</sup> | \$<br><b>106,116</b> \$ | 49,766 |
| Reserve Position <sup>(2)</sup> | 9,570                   | 9,363  |
| Total U.S. Quota in the IMF     | \$<br><b>115,686</b> \$ | 59,129 |

(1) Letter of Credit amounts are included as part of the "Fund Balance" as reported on the Consolidated Balance Sheets and "Appropriated Funds" as disclosed in Note 2. Amounts also include approximately 0.25 percent of the U.S. quota held in cash in an IMF account at the FRBNY. Of the Letter of Credit amount reported as of September 30, 2015, \$5.786 billion was subject to FCRA accounting guidelines pursuant to P.L. 111-32 (refer to Note 9).

(2) The Reserve Position amount of \$9.570 billion as of September 30, 2016 was not subject to FCRA and was reported as "Reserve Position in the IMF" on the Consolidated Balance Sheets. Of the Reserve Position amount of \$9.363 billion as of September 30, 2015, \$8.168 billion was not subject to FCRA and was reported as "Reserve Position in the IMF" on the Consolidated Balance Sheets. The remaining \$1.195 billion was subject to FCRA pursuant to P.L. 111-32 and thereby reported within "Credit Program Receivables, Net" on the Consolidated Balance Sheets. This FCRA amount represents the outstanding disbursement under P.L. 111-32 at the then current exchange rate (refer to Note 9).

Fluctuations in the value of the U.S. dollar with respect to the SDR result in valuation changes in dollar terms for the U.S. quota. We periodically adjust this balance to maintain the SDR value of the U.S. quota as required by our agreement with the IMF. As of September 30, 2016 and 2015, the U.S. quota reflects a net downward adjustment in value of \$648 million and \$3.3 billion, respectively, due to the appreciation of the U.S. dollar against the SDR.

# LOANS AND INTEREST RECEIVABLE

In addition to quota subscriptions, the IMF maintains borrowing arrangements to supplement its resources in order to forestall or cope with an impairment of the international monetary system when IMF liquidity is low. The United States has the authority to participate in two such arrangements – the NAB and the General Arrangements to Borrow (GAB). When the United States transfers funds to the IMF under these supplemental borrowing arrangements, the United States receives in exchange a liquid and interest-bearing claim on the IMF. As of September 30, 2016 and 2015, the IMF had not utilized the GAB.

In accordance with P.L. 114-113, the United States decreased its NAB participation to SDR 28.2 billion from SDR 69.1 billion during fiscal year 2016, which was equivalent to \$39.4 billion as of September 30, 2016 compared to \$97.0 billion as of September 30, 2015. As of September 30, 2016, under the U.S. NAB arrangement with the IMF, there was \$8.6 billion of U.S. loans outstanding which were reported as "Loans and Interest Receivable" on the Consolidated Balance Sheets. As of

September 30, 2015, there was \$9.5 billion of U.S. loans outstanding, of which \$5.5 billion was reported as "Loans and Interest Receivable" on the Consolidated Balance Sheets, and the remaining \$4.0 billion was subject to FCRA accounting guidelines pursuant to P.L. 111-32 and thereby reported within "Credit Program Receivables, Net" on the Consolidated Balance Sheets (refer to Note 9).

# 8. TAXES, INTEREST, AND OTHER RECEIVABLES, NET

As of September 30, 2016 and 2015, Taxes, Interest, and Other Receivables, Net consisted of the following:

| (in millions)   | 2016                    | 2015      |
|---|-------------------------|-----------|
| Non-Entity  |                         |           |
| Federal Taxes Receivable, Gross                       | \$<br><b>178,181</b> \$ | 171,159   |
| Less: Allowance on Taxes Receivable                   | (129,165)               | (130,141) |
| Interest Receivable on FRB Deposits of Earnings       | 376                     | 264       |
| Other Receiva bles                                    | 936                     | 821       |
| Less: Allowance on Other Receivables                  | (118)                   | (103)     |
| Total Non-Entity (Note 14)                            | 50,210                  | 42,000    |
| Entity  |                         |           |
| Miscellaneous Entity Receivables and Related Interest | 96                      | 34        |
| Total Taxes, Interest, and Other Receivables, Net     | \$<br><b>50,306</b> \$  | 42,034    |

Federal taxes receivable constitutes the largest portion of these receivables, with IRS-related taxes receivable representing the majority of the balance. IRS federal taxes receivable consists of tax assessments, penalties, and interest which were not paid or abated, and which were agreed to by either the taxpayer and IRS, or the courts. Federal taxes receivable is reduced by an allowance for doubtful accounts which we established to represent an estimate for uncollectible amounts. The portion of taxes receivable estimated to be collectible and the allowance for doubtful accounts are based on projections of collectability from a statistical sample of taxes receivable (refer to the section entitled *Required Supplementary Information (unaudited)* for additional discussion on IRS Federal Taxes Receivable, Net).

In addition to amounts attributed to taxes, these receivables also include accrued interest income due on funds deposited in FRBs. We do not establish an allowance for the receivable on deposits of FRB earnings.

# 9. CREDIT PROGRAM RECEIVABLES, NET

We administer a number of programs designed to stabilize the nation's financial system and restore the flow of credit to consumers, businesses, and homeowners. As of September 30, 2016 and 2015, Credit Program Receivables, Net consisted of the following:

| (in millions)  | 2016                  | 2015   |
|--|-----------------------|--------|
| State and Local Housing Finance Agency Program (GSE sponsored) | \$<br><b>5,718</b> \$ | 6,919  |
| Small Business Lending Fund Program                            | 449                   | 2,395  |
| International Monetary Fund Programs:                          |                       |        |
| U.S. Quota in the IMF Program (FCRA portion)                   | -                     | 1,163  |
| New Arrangements to Borrow Program (FCRA portion)              | -                     | 4,005  |
| Other <sup>(1)</sup>   | 891                   | 663    |
| Total  | \$<br><b>7,058</b> \$ | 15,145 |

 Includes TARP and CDFI credit program receivables valued at \$490 million and \$401 million, respectively, as of September 30, 2016, and \$482 million and \$181 million, respectively, as of September 30, 2015.

## STATE AND LOCAL HOUSING FINANCE AGENCY (HFA) PROGRAM (GSE SPONSORED)

Under the Housing and Economic Recovery Act (HERA), we, together with the FHFA, Fannie Mae, and Freddie Mac, created a program in October 2009 to provide support to HFAs. The HFA Program is comprised of the New Issue Bond Program (NIBP) that is designed to support low mortgage rates and expand resources for low- and middle- income borrowers to purchase or rent homes, making them more affordable over the long term. Under the terms of the NIBP, we purchased securities of Fannie Mae and Freddie Mac backed by new mortgage revenue bonds issued by HFAs. As of September 30, 2016 and 2015, the HFA net credit program receivable of \$5.7 billion and \$6.9 billion, respectively, included a positive subsidy allowance of \$791 million and \$865 million, respectively, which reflects our projection that the HFA program will result in a net cost to us after accounting for repayments, interest, and fees.

We performed a financial statement re-estimate of the NIBP program's cost as of September 30, 2016 and 2015. These reestimates resulted in a downward re-estimate, or a decrease in the cost of the program, of \$38 million and \$17 million as of September 30, 2016 and 2015, respectively. The downward re-estimate in fiscal year 2016 and 2015 was primarily driven by higher than estimated principal collections, and a slightly higher prepayment curve used in the projection of future years' cash flows as a result of improved economic conditions.

## SMALL BUSINESS LENDING FUND PROGRAM

The *Small Business Jobs Act of 2010* (P.L. 111-240) created the SBLF program. Pursuant to the Act, we provided capital to qualified community banks, for purposes of encouraging bank lending to small businesses, by purchasing qualifying noncumulative preferred stock or equivalents in each bank. As an incentive to participating banks to increase lending to small businesses, the dividend rate a bank paid to us for SBLF funding was reduced as the bank's small business lending increased. For most banks, the initial dividend rate of 5.0 percent could be reduced to as low as 1.0 percent. The rates locked in for all participants based on third quarter 2013 lending. The program provides an incentive for banks to repay loans within 4 ½ years. For institutions that did not increase lending by the end of the first two years of the program, the rate increased to 7.0 percent in March 2014. In addition, after 4 ½ years, the rate increased to 9.0 percent and 13.8 percent for C Corporation and S Corporation banks, respectively, remaining in the program effective March 2016. We treat these purchases of capital as direct loans in accordance with the requirements of FCRA. Our authority to provide new capital to SBLF participants expired in September 2011 and, accordingly, there were no new capital disbursements since that date. As of September 30, 2016 and 2015, SBLF's net credit program receivable was \$449 million and \$2.4 billion, respectively. The decrease in this net receivable at September 30, 2016 was due to a sharp increase in redemptions prior to a rate step-up that occurred in the first calendar quarter of 2016. These amounts included a negative subsidy allowance of \$40 million and \$32 million at September 30, 2016 and 2015, respectively, which reflects our projection that the SBLF program will result in net income to us.

We performed financial statement re-estimates of the program's cost as of September 30, 2016 and 2015 which resulted in a downward re-estimate, or a decrease in the cost of the program of \$21 million and \$42 million, respectively. Both the 2016 and 2015 downward re-estimates were driven by changes in performance assumptions, actual performance to-date, and actual program funding costs. The performance assumptions anticipate overall income to the program due to the repurchase of SBLF securities by participating institutions earlier than anticipated, and lower projected defaults relative to previous estimates.

#### INTERNATIONAL MONETARY FUND PROGRAMS

Effective in fiscal year 2016, Congress passed P.L. 114-113 which, among other things, requires that transactions involving the United States' participation in the IMF not be subject to FCRA guidelines. P.L. 114-113 superseded those provisions within P.L. 111-32 that subjected these transactions to FCRA guidelines (refer to Note 7 for further discussion of the financial statement impact of this legislative change). Accordingly, as of September 30, 2016, there was no credit program receivable related to the IMF programs. The remainder of this discussion focuses on the net credit program receivable related to the IMF programs that existed as of September 30, 2015 under the accounting provisions of P.L. 111-32.

As of September 30, 2015, for U.S. budgetary and accounting purposes, there were effectively two portions of the IMF quota and NAB programs. The U.S. quota in the IMF totaled \$59.1 billion at September 30, 2015, and comprised a FCRA and non-FCRA portion of \$7.0 billion and \$52.1 billion, respectively. At September 30, 2015, we reported a net credit program receivable of \$1.2 billion, representing amounts disbursed in connection with the FCRA portion of the U.S. quota's reserve position, net of a positive subsidy allowance of \$181 million, reflecting our projection that the program would result in a net cost to us after accounting for repayments and net interest. During fiscal year 2015, we had repayments of \$651 million, resulting in net proceeds less than cost of \$74 million. We reported the remaining undisbursed FCRA portion of the U.S. quota totaling \$5.8 billion at September 30, 2015 as a letter of credit (refer to Note 7).

The U.S. NAB arrangement with the IMF totaled \$97.0 billion at September 30, 2015, and comprised a FCRA and non-FCRA portion of \$87.6 billion and \$9.4 billion, respectively. At September 30, 2015, we reported a net credit program receivable of \$4.0 billion, representing FCRA disbursements outstanding under the NAB, net of a positive subsidy allowance of \$366 million.

#### **SUMMARY TABLES**

The following tables provide the net composition, subsidy cost, re-estimates, a reconciliation of subsidy cost allowances, and the components of the subsidy for each of our credit programs for the fiscal years ended September 30, 2016 and 2015. The tables also include budget subsidy rates pertaining only to the cohorts for the fiscal year presented. These rates cannot be applied to the direct loans disbursed during the current reporting year to yield the subsidy expense. The subsidy expense for new loans reported in 2016 and 2015 could result from disbursements of loans from both current year cohorts and prior year(s) cohorts, and also includes modifications and re-estimates. Amounts reported in the line item "Net Credit Program Receivables" are not necessarily the same as the proceeds that we would expect to receive from selling these assets.

|   |                                  |   |  | IMF-  | IMF-  |   | 2016   |

(3) CDFI Financial Assistance Direct Loan Program budget subsidy rates for Interest Differential and for Defaults were 3.00%, and 9.41%, respectively.

# **10.** INVESTMENTS IN GOVERNMENT SPONSORED ENTERPRISES

Congress established Fannie Mae and Freddie Mac as GSEs to support mortgage lending. A key function of the GSEs is to purchase mortgages, package those mortgages into securities, which are subsequently sold to investors, and guarantee the timely payment of principal and interest on these securities.

Leading up to the financial crisis, increasingly difficult conditions in the housing market challenged the soundness and profitability of the GSEs, thereby threatening to undermine the entire housing market. In response, Congress passed HERA (P.L. 110-289) in July 2008. This act created FHFA, with enhanced regulatory authority over the GSEs, and provided the Secretary with certain authorities intended to ensure the financial stability of the GSEs, if necessary. In September 2008, FHFA placed the GSEs under conservatorship, and we invested in the GSEs by entering into a Senior Preferred Stock Purchase Agreement (SPSPA) with each GSE. We took these actions to preserve the GSEs' assets, ensure a sound and solvent financial condition, and mitigate systemic risks that contributed to market instability. The purpose of such actions is to maintain the solvency of the GSEs so they can continue to fulfill their vital roles in the home mortgage market while the Administration and Congress determine what structural changes should be made to the housing finance system. Draws under the SPSPAs result in an increased investment in the GSEs as further discussed below.

Under the SPSPAs, we initially received from each GSE: *(i)* 1,000,000 shares of non-voting variable liquidation preference senior preferred stock with a liquidation preference value of \$1,000 per share, and *(ii)* a non-transferable warrant for the purchase, at a nominal cost, of 79.9 percent of common stock on a fully-diluted basis. The warrants expire on September 7, 2028. Under the amended SPSPAs, the quarterly dividend payment changed from a 10.0 percent per annum fixed rate dividend on the total liquidation preference (as discussed below) to an amount equivalent to the GSE's positive net worth above a capital reserve amount. The capital reserve amount, which was initially set at \$3.0 billion for calendar year 2013, declines by \$600 million at the beginning of each calendar year thereafter until it reaches zero by calendar year 2018. On January 1, 2016 and 2015, the capital reserve amount had declined to \$1.2 billion and \$1.8 billion for calendar years 2016 and 2015, respectively. The GSEs will not pay a quarterly dividend if their positive net worth is below their required capital reserve threshold. We received cash dividends of \$11.5 billion and \$20.4 billion during fiscal years ended September 30, 2016 and 2015, respectively.

The SPSPAs, which have no expiration date, provide for us to disburse funds to the GSEs if, at the end of any quarter, the FHFA determines that the liabilities of either GSE exceed its assets. Draws from the Department under the SPSPAs are designed to ensure that the GSEs maintain positive net worth, with a fixed maximum amount available to each GSE under this agreement, established as of December 31, 2012 (refer to the "*Contingent Liability to GSEs*" section below). Draws against the funding commitment of the SPSPAs do not result in the issuance of additional shares of senior preferred stock; instead, it increases the liquidation preference of the initial 1,000,000 shares by the amount of the draw. The combined cumulative liquidation preference totaled \$189 billion as of September 30, 2016 and 2015. There were no payments to the GSEs for the fiscal years ended September 30, 2016 and 2015.

#### **ACCOUNTING TREATMENT**

*Entity Transactions*— If we estimate a probable contingent liability to the GSEs, we will accrue and report this liability on our Consolidated Balance Sheets, and fund the liability through our direct appropriations. We will report the liability accrual, if any, at its gross amount as an "entity" cost on our Consolidated Statements of Net Cost, and within the line item, "Cumulative Results of Operations" on our Consolidated Balance Sheets, without considering the increase in senior preferred stock liquidation preference/fair value adjustments, and future dividend receipts from the GSEs.

*Non-Entity Transactions*— If we make actual payments to the GSEs, they will result in increases to the U.S. government's liquidation preference in the GSEs' senior preferred stock, and thus represent General Fund exchange revenue reported on our Consolidated Statements of Net Cost as "GSEs Non-Entity Cost (Revenue)." Changes in the fair valuation of the GSE preferred stock and common stock warrants, and related dividends received, are General Fund-related costs and revenues which we report as "GSEs Non-Entity Cost (Revenue)."

#### **INVESTMENTS IN GSES**

As of September 30, 2016 and 2015, our investments in the GSEs consisted of the following:

| GSEs Investments (in millions)     | Gross<br>Investments<br>As of 9/30/16 | Cumulative<br>Valuation<br>Gain/(Loss) | 9/30/2016<br>Fair Value |
|------------------------------------|---------------------------------------|--|-------------------------|
| Fannie Mae Senior Preferred Stock  | \$<br>116,989 \$                      | (58,889) \$                            | 58,100                  |
| Freddie Mac Senior Preferred Stock | 72,160                                | (32,560)                               | 39,600                  |
| Fannie Mae Warrants Common Stock   | 3,104                                 | 4,016                                  | 7,120                   |
| Freddie Mac Warrants Common Stock  | 2,264                                 | 1,466                                  | 3,730                   |
| Total GSEs Investments             | \$<br>194,517 \$                      | (85,967) \$                            | 108,550                 |

| Total GSEs Investments             | \$<br>194,517 \$                      | (88,247) \$                            | 106,270                 |

#### SENIOR PREFERRED STOCK AND WARRANTS FOR COMMON STOCK

In determining the fair value of the senior preferred stock and warrants for common stock, we relied on the GSEs' public filings and press releases concerning their financial statements, as well as non-public, long-term financial forecasts, monthly summaries, quarterly credit supplements, independent research regarding preferred stock trading, independent research regarding the GSEs' common stock trading on the OTC Bulletin Board, discussions with each of the GSEs and FHFA, and other information pertinent to the valuations. Because the instruments are not publicly traded, there is no comparable trading information available. The fair valuations rely on significant unobservable inputs that reflect assumptions about the expectations that market participants would use in pricing.

The fair value of the senior preferred stock considers the amount of forecasted dividend payments. The fair valuations assume that a hypothetical buyer would acquire the discounted dividend stream as of the transaction date. The fair value of the senior preferred stock increased as of September 30, 2016 when compared to September 30, 2015, primarily reflecting a lower discount rate which was driven by a lower long-term Treasury rate (or risk-free rate), as well as a reduction in the market value of the GSEs' other equity securities that comprise their total equity (refer to Note 1V).

Factors impacting the fair value of the warrants include the nominal exercise price and the large number of potential exercise shares, the market trading of the common stock that underlies the warrants as of September 30, the principal market, and the market participants. Other factors impacting the fair value include, among other things, the holding period risk related directly to the assumption of the amount of time that it will take to sell the exercised shares without depressing the market. The fair value of the warrants decreased at the end of fiscal year 2016, when compared to 2015, primarily due to decreases in the market price of the underlying common stock of each GSE.

#### **CONTINGENT LIABILITY TO GSES**

As part of the annual process undertaken by the Department, we prepare a series of long-term financial forecasts to assess, as of September 30, the likelihood and magnitude of future draws to be required by the GSEs under the SPSPAs within the forecast time horizon. We used 25-year financial forecasts prepared through years 2041 and 2040 in assessing if a contingent liability was required as of September 30, 2016 and 2015, respectively. If future payments under the SPSPAs are deemed to be probable within the forecast horizon, we will estimate and accrue a contingent liability to the GSEs to reflect the forecasted equity deficits of the GSEs. We will not discount this accrued contingent liability, nor will we take into account any of the offsetting dividends that we could receive, as the dividends, if any, would be owed directly to the General Fund. We will adjust such recorded accruals in subsequent years as new information develops or circumstances change.

Based on our annual assessment, we estimated there was no probable future funding draws as of September 30, 2016 and 2015, and thereby accrued no contingent liability. However, as of September 30, 2016, it is reasonably possible that volatility in interest rates and fair value losses could potentially cause the GSEs to generate quarterly losses and, therefore, result in future funding draws against our funding commitment. Due to challenges quantifying future volatility in interest rates and fair value losses, we could not estimate the total amount of this reasonably possible future funding liability as of September 30, 2016. At September 30, 2016 and 2015, the maximum remaining contractual commitment to the GSEs for the remaining life of the SPSPAs was \$258.1 billion.

In assessing the need for an estimated contingent liability, we rely on the GSEs' public filings and press releases concerning their financial statements, monthly summaries, and quarterly credit supplements, as well as non-public, long-term financial forecasts, the FHFA House Price Index, discussions with each of the GSEs and FHFA, and other information pertinent to the liability estimates. The forecasts prepared in assessing the need for an estimated contingent liability as of September 30, 2016 include three potential wind-down scenarios, with varying assumptions regarding the timing as to when the GSEs would cease issuing new guaranteed mortgage-backed securities. The forecasts also assume a continued gradual wind-down of the retained portfolios (and corresponding net interest income) through 2018, as directed under the amended SPSPAs for each GSE to reduce the maximum balance of its retained mortgage portfolio by 15.0 percent per annum beginning December 31, 2013. The maximum balance of the GSEs' retained mortgage portfolio was initially set at \$650 billion as of December 31, 2012, and the amended SPSPAs requires that we reduce this maximum balance to \$250 billion by December 31, 2018.

#### **ESTIMATION FACTORS**

Our forecasts concerning the GSEs may differ from actual experience. Estimated senior preferred values and future draw amounts will depend on numerous factors that are difficult to predict including, but not limited to, changes in government policy with respect to the GSEs, the business cycle, inflation, home prices, unemployment rates, interest rates, changes in housing preferences, home financing alternatives, availability of debt financing, market rates of guarantee fees, outcomes of loan refinancings and modifications, new housing programs, and other applicable factors.

# FINANCIAL PERFORMANCE OF THE GSES

The summarized unaudited aggregated financial condition of the GSEs as of September 30, 2016 and 2015, along with their summarized unaudited aggregated financial operating results for the nine months ended September 30, 2016 and 2015 were as follows:

| (in millions)  | 2016                      | 2015      |
|--|---------------------------|-----------|
| Combined Assets  |                           |           |
| Investment Securities  | \$<br><b>165,805</b> \$   | 177,395   |
| Mortgage Loans   | 4,831,397                 | 4,770,323 |
| Other  | 274,002                   | 245,211   |
| Total Combined Assets  | 5,271,204                 | 5,192,929 |
| Combined Liabilities   |                           |           |
| Long-Term Debt   | 5,103,417                 | 4,944,536 |
| Other  | 160,101                   | 243,091   |
| Total Combined Liabilities   | 5,263,518                 | 5,187,627 |
| Combined Net Equity  | \$<br><b>7,686</b> \$     | 5,302     |
| For the Nine Months Ended September 30                                   |                           |           |
| Combined Net Interest Income   | \$<br><b>25,984</b> \$    | 27,691    |
| Combined Benefit for Loan Losses   | 4,587                     | 2,934     |
| Combined Net Interest Income After Benefit for Loan Losses               | \$<br><b>30,571</b> \$    | 30,625    |
| Combined Net Income  | \$<br><b>10,246</b> \$    | 12,706    |
| Combined Regulatory Capital - Minimum Capital Deficit as of September 30 | \$<br><b>(228,416)</b> \$ | (232,671) |

We obtained this financial information from the GSEs' quarterly financial reports filed with the SEC. The financial information above excludes certain financial guarantees not directly reflected on the GSEs' balance sheets.

## **GSEs NON-ENTITY REVENUE**

For the fiscal years ended September 30, 2016 and 2015, GSEs Non-Entity Revenue consisted of the following:

| Summary of GSEs Non-Entity Revenue (in millions) | 2016                     | 2015     |
|--|--------------------------|----------|
| Fair Value Gain on GSEs Warrants/Preferred Stock | \$<br><b>(2,280)</b> \$  | (10,460) |
| GSEs Preferred Stock Dividends                   | (11,522)                 | (20,370) |
| Total GSEs Non-Entity Revenue, Net               | \$<br><b>(13,802)</b> \$ | (30,830) |

## **REGULATORY ENVIRONMENT**

To date, Congress has not approved a plan to address the future of the GSEs, thus the GSEs continue to operate under the direction of their conservator, the FHFA, whose stated strategic goals for the GSEs are to: *(i)* maintain foreclosure prevention activities and credit availability to foster liquid, efficient, competitive, and resilient national housing finance markets; *(ii)* reduce taxpayer risk through increasing the role of private capital in the mortgage market; and *(iii)* build a new single-family securitization infrastructure.

The *Temporary Payroll Tax Cut Continuation Act of 2011* was funded by an increase of ten basis points in the GSEs' guarantee fees (referred to as "the incremental fees") which began in April 2012, and is effective through October 1, 2021. The incremental fees are remitted to us and not retained by the GSEs and, thus, do not affect the profitability of the GSEs. For fiscal years 2016 and 2015, the GSEs remitted to us the incremental fees totaling \$2.8 billion and \$2.4 billion, respectively, which are reported within the line item entitled "Fines, Penalties, Interest and Other Revenue" on our Statements of Custodial Activity.

# **11.** INVESTMENTS IN MULTILATERAL DEVELOPMENT BANKS

As of September 30, 2016 and 2015, Investments in Multilateral Development Banks consisted of the following:

| (in millions)   | 2016                  | 2015  |
|---|-----------------------|-------|
| International Bank for Reconstruction and Development | \$<br><b>2,844</b> \$ | 2,658 |
| Inter-American Development Bank (1)                   | 2,001                 | 1,898 |
| As i an Development Bank                              | 991                   | 986   |
| European Bank for Reconstruction and Development      | 636                   | 636   |
| International Finance Corporation                     | 569                   | 569   |
| African Development Bank                              | 337                   | 302   |
| North American Development Bank                       | 225                   | 225   |
| MultilateralInvestment Guarantee Agency               | 45                    | 45    |
| Total   | \$<br><b>7,648</b> \$ | 7,319 |

Refer to Note 26 for a description of the additional commitments related to these institutions.

(1) Includes Inter-American Investment Corporation

# **12. OTHER INVESTMENTS AND RELATED INTEREST**

Other investments and related interest include foreign currency holdings that we typically invest in interest-bearing securities issued or held through foreign governments or monetary authorities (refer to Note 5). ESF holds most of our foreign currency investments. Of the total \$9.8 billion fair value of foreign investments (excluding interest receivable) held at September 30, 2016, \$4.1 billion will mature within one year, \$4.8 billion will mature after one year but before five years, and \$0.9 billion will mature after five years but before ten years.

As of September 30, 2016 and 2015, Other Investments and Related Interest consisted of the following:

| Type of Investment (in millions) | Cost/<br>Acquisition<br>Value | Unamortized<br>(Premium)/<br>Discount | Interest<br>Receivable | 9/30/16<br>Net<br>Investment | Unrealized<br>Gain/(Loss) | 9/30/16<br>Fair Value |
|----------------------------------|-------------------------------|---------------------------------------|------------------------|------------------------------|---------------------------|-----------------------|
| Foreign Investments:             |                               |                                       |                        |                              |                           |                       |
| Euro Bonds & Notes               | \$<br>5,223 \$                | 217 \$                                | 60 \$                  | 5,500 \$                     | (207)\$                   | 5,293                 |
| Japanese Government Bonds        | 3,959                         | 6                                     | 2                      | 3,967                        | 582                       | 4,549                 |

The service life ranges vary significantly due to the diverse nature of PP&E we hold.

## **HERITAGE ASSETS**

We have fifteen heritage assets, of which five are considered multi-use, for fiscal years 2016 and 2015. The Treasury Complex (Main Treasury Building and Annex), declared a national historical landmark in 1972, is treated as a multi-use heritage asset and is expected to be preserved indefinitely. The buildings that house the Mint in Denver, San Francisco, Fort Knox, and West Point are also multi-use heritage assets and included on the National Register of Historic Places. Additionally, the Mint maintains heritage assets consisting of four coin collections and six historical artifacts.

# 14. NON-ENTITY VS. ENTITY ASSETS

Non-entity assets are those that we hold and manage on behalf of the U.S. government (General Fund) but are not available for our use. The table below shows our total assets, segregated between non-entity and entity, as of September 30, 2016 and 2015:

|   |                     | 2016       |            |
|---|---------------------|------------|------------|
| (in millions)   | Non-Entity          | Entity     | Total      |
| Intra-governmental Assets:  |                     |            |            |
| Fund Balance <sup>(a)</sup>   | \$<br>2,228 \$      | 433,018 \$ | 435,246    |
| Loans and Interest Receivable (Note 3)                              | 1,324,531           | 76,123     | 1,400,654  |
| Advances to the Unemployment Trust Fund (Note 4)                    | 8,558               | -          | 8,558      |
| Due From the General Fund (Note 4)                                  | 19,699,152          | -          | 19,699,152 |
| Other Intra-governmental Assets                                     | 377                 | 78         | 455        |
| Total Intra-governmental Assets                                     | 21,034,846          | 509,219    | 21,544,065 |
| Cash, Foreign Currency, and Other Monetary Assets (Note 5) $^{(b)}$ | 347,944             | 62,154     | 410,098    |
| Gold and Silver Reserves (Note 6) <sup>(c)</sup>                    | 11,062              | -          | 11,062     |
| Taxes, Interest, and Other Receivables, Net (Note 8)                | 50,210              | 96         | 50,306     |
| Investments in GSEs (Note 10)                                       | 108,550             | -          | 108,550    |
| Other Assets <sup>(d)</sup>   | 8                   | 46,819     | 46,827     |
| Total Assets  | \$<br>21,552,620 \$ | 618,288 \$ | 22,170,908 |

(a) \$694 million of the non-entity balance represents assets held on behalf of the General Fund (refer to Note 4).

(b) \$347.2 billion of the non-entity balance represents assets held on behalf of the General Fund (refer to Note 4).

(c) \$25 million of the non-entity balance represents assets held on behalf of the General Fund (refer to Note 4).

(d) Other Assets (Entity) include loans and interest receivable, other investments and related interest, reserve position in the IMF, and other various assets on the Consolidated Balance Sheets not separately presented in this table.

(e) \$589 million of the non-entity balance represents assets held on behalf of the General Fund (refer to Note 4).

(# \$193.4 billion of the non-entity balance represents assets held on behalf of the General Fund (refer to Note 4).

(g) \$25 million of the non-entity balance represents assets held on behalf of the General Fund (refer to Note 4).

(b) Other Assets (Entity) include credit program receivables, net, totaling \$15.1 billion, a reserve position in the IMF of \$8.2 billion, and other various assets on the Consolidated Balance Sheets not separately presented in this table.

# **15. FEDERAL DEBT AND INTEREST PAYABLE AND RELATED LIABILITIES**

Treasury is responsible for administering the federal debt on behalf of the U.S. government. The federal debt includes borrowings from the public as well as borrowings from federal agencies. The federal debt does not include debt issued by other governmental agencies, such as the Tennessee Valley Authority or Department of Housing and Urban Development.

Debt held by the public primarily represents the amount the U.S. government has borrowed to finance cumulative cash deficits. In contrast, debt held by other federal agencies, primarily trust funds, represents balances of Treasury securities held by individual federal agencies with either the authority or the requirement to invest excess receipts in Treasury securities, with the principal and interest guaranteed by the full faith and credit of the U.S. government.

Federal Debt and Interest Payable as of September 30, 2016 and 2015 was as follows:

| Held by Other Federal Agencies (Intra-governmental) (in millions) | 2016                       | 2015       |
|---|----------------------------|------------|

## FEDERAL DEBT HELD BY OTHER FEDERAL AGENCIES

Certain federal agencies are allowed to invest excess funds in debt securities we issue on behalf of the U.S. government. The terms and the conditions of debt securities issued allow the U.S. government to meet its cash needs. The vast majority of debt securities are non-marketable securities issued at par value, but others are issued at market prices and interest rates that reflect market terms. The average intra-governmental interest rate for debt held by the federal entities, excluding Treasury Inflation-Protected Securities (TIPS) and Floating Rate Notes (FRNs), for fiscal years 2016 and 2015 was 2.8 percent and 3.1 percent, respectively. The average intra-governmental interest rate on TIPS for both fiscal years 2016 and 2015 was 1.3 percent. The average interest rate represents the original issue weighted effective yield on securities outstanding at the end of the fiscal year.

The federal debt also includes intra-governmental marketable debt securities that certain agencies are permitted to buy and sell on the open market. The debt held by federal agencies at par value (not including premium/discount or interest payable) as of September 30, 2016 and 2015 was as follows:

| (in millions)                                     | 2016                      | 2015      |

| Total Federal Debt Held by the Public         |                            |                     | \$<br>13,123,847 |

We generally issue Treasury bills, notes, bonds, and TIPS to meet the borrowing needs of the U.S. government. We issue marketable bills at a discount or at par, and pay the par amount of the security upon maturity. The average interest rate on Treasury bills represents the original issue effective yield on securities outstanding at year end.

We issue marketable notes and bonds as long-term securities that pay semi-annual interest based on the securities' stated interest rates. We issue these securities at either par value or at an amount that reflects a discount or premium. The average interest rate on marketable notes and bonds represents the stated interest rate adjusted by any discount or premium on securities outstanding at year-end. We also issue TIPS that have interest and redemption payments tied to the Consumer Price Index (CPI) for all Urban Consumers, a widely used measurement of inflation. We adjust the principal for TIPS daily over the life of the security based on the CPI for all Urban Consumers. At maturity, TIPS are redeemed at the inflation-adjusted principal amount, or the original par value, whichever is greater. TIPS pay a semi-annual fixed rate of interest applied to the inflation-adjusted principal. The average interest rate on TIPS represents the stated interest rate on principal plus inflation, adjusted by any discount or premium on securities outstanding as of the end of the fiscal year. The inflation-adjusted TIPS principal balance of federal debt held by the public included inflation of \$90.8 billion and \$90.0 billion as of September 30, 2016 and 2015, respectively.

We also issue marketable FRNs which pay interest quarterly based on the interest rate at the time of payment. The interest rate of FRNs can change over time and indexed to the highest acceptable discount rate of the most recent 13-week marketable bill auction. Similar to marketable notes and bonds, we issue these securities at either par value or at an amount that reflects a discount or premium. The average interest rate on marketable FRNs represents the highest accepted discount rate of the most recent 13-week marketable auction as of September 30, adjusted by any discount or premium on securities outstanding as of that date.

Federal Debt Held by the Public includes federal debt held outside of the U.S. government by individuals, corporations, FRBs, state and local governments, foreign governments, and central banks. As of September 30, 2016, the FRBs had total holdings of \$1.8 trillion which: *(i)* excluded \$714 billion in Treasury securities used in overnight reverse repurchase transactions, and *(ii)* included a net of \$0.7 billion in Treasury securities held by the FRB as collateral for securities lending activities. As of September 30, 2015, the FRBs had total holdings of \$1.8 trillion which: *(i)* excluded \$618 billion in Treasury securities used in overnight reverse repurchase transactions, and *(ii)* included a net of \$1.8 billion in Treasury securities held by the FRB as collateral for securities lending activities. The FRB holds Treasury securities in the FRB System Open Market Account for the purpose of conducting monetary policy.

#### STATUTORY DEBT LIMIT

Congress provided us with statutory authority to take certain extraordinary measures in the event that Treasury debt nears the statutory debt limit and a delay in raising the statutory debt limit occurs. These measures authorize us to deviate from our normal debt management operations and exercise legal authorities to avoid exceeding the statutory debt limit.

During the period of the delay in raising the statutory debt limit, we may undertake the following extraordinary measures: (*i*) suspend new issuances of Treasury securities to the Government Securities Investment Fund of the Federal Employees' Retirement System Thrift Savings Plan (TSP), the Civil Service Retirement and Disability Trust Fund (Civil Service Fund), the Postal Service Retiree Health Benefits Fund (Postal Benefits Fund), and the ESF as investments; (*iii*) redeem early a certain amount of Treasury securities held by the Civil Service Fund; (*iiii*) suspend new issuances of State and Local Government Series (SLGS) securities; (*iv*) utilize FFB to exchange outstanding Treasury securities held by the Civil Service Fund for non-Treasury securities (refer to Note 16); and (*v*) issue cash management bills to manage short-term financing needs. When the period of delay in raising the statutory debt limit ends, we discontinue our use of extraordinary measures and resume our normal debt management operations. Furthermore, we are required by the relevant statutes, to restore the TSP, along with the OPM-administered Civil Service Fund and Postal Benefits Fund (the OPM funds), with the accumulated principal balance of Treasury securities that bears such interest rates and maturity dates necessary to replicate the investments the funds would have held had the delay not occurred (the uninvested principal). In addition, relevant statutes require us to pay these funds the related lost interest (foregone interest) on the uninvested principal. Relevant statutes do not require that we restore the ESF and state and local governments with uninvested principal or lost interest incurred during a period of delay.

A delay in raising the statutory debt limit occurred from March 16, 2015 until Friday, October 30, 2015. On Monday, November 2, 2015, Congress enacted the *Bipartisan Budget Act of 2015* (P.L. 114-74) which temporarily suspended the debt limit through March 15, 2017. During the period March 16, 2015 through October 30, 2015, we undertook the extraordinary measures as described above (also refer to Note 16). On November 2, 2015, when Congress temporarily suspended the debt limit, we resumed normal debt management operations. On this date, we restored uninvested principal totaling \$352.6 billion, of which \$204.8 billion was restored to the TSP and \$147.8 billion was restored to the two OPM funds. We also restored foregone interest totaling \$2.7 billion, of which \$1.7 billion was restored to the TSP on the next interest payment date of November 3, 2015 and \$971 million was restored to the two OPM funds on the next semi-annual interest payment date of December 31, 2015. In addition, we authorized ESF and state and local governments to resume investments in Treasury securities.

Of the \$2.7 billion of foregone interest paid in fiscal year 2016, \$635 million is reported in fiscal year 2016 as a current year, non-entity expense within the line item, "Restoration of Foregone Federal Debt Interest," and \$2.1 billion was accrued in fiscal year 2015 as a non-entity expense within the line item, "Accrued Restoration of Foregone Federal Debt Interest" on our Consolidated Statements of Net Cost. In fiscal year 2015, we also reported the \$2.1 billion of accrued foregone interest as part of other financing sources on the Consolidated Statement of Changes in Net Position, and subsequently reversed this amount in fiscal year 2016 in connection with the actual payment of interest.

Since the delay in raising the statutory debt limit did not end until November 2, 2015, none of the uninvested principal and foregone interest payable had been restored to the TSP and the two OPM funds as of September 30, 2015. Accordingly, we recorded a liability as of September 30, 2015 totaling \$350.7 billion, comprised of uninvested principal owed to these three funds as of that date totaling \$348.6 billion, and foregone interest payable to the funds for the period March 16, 2015 through September 30, 2015 totaling \$2.1 billion. This liability for the uninvested principal and foregone interest payable as of September 30, 2015 totaling \$2.1 billion. This liability for the uninvested principal and foregone interest payable as of September 30, 2015 was reported on our Consolidated Balance Sheets in the line item, "Liability for Restoration of Federal Debt Principal and Interest" of which \$146.1 billion represented an intra-governmental liability of the combined principal and interest payable to the TSP, a public liability. Corresponding amounts were reported in the "Due From the General Fund" line item on the Consolidated Balance Sheets for the total \$350.7 billion of uninvested principal and foregone interest owed to the funds as of September 30, 2015 (refer to Note 4).

# **16. OTHER DEBT AND INTEREST PAYABLE**

Through FFB, we have outstanding borrowings and related accrued interest owed to the Civil Service Fund. At September 30, 2016 and 2015, FFB had outstanding borrowings of \$13.1 billion and \$12.4 billion, inclusive of \$101 million and \$106 million of accrued interest payable, respectively. During fiscal years 2016 and 2015, FFB paid \$2.0 billion and \$1.3 billion in principal, respectively. The outstanding borrowings at September 30, 2016 had stated interest rates that ranged from 2.25 percent to 4.63 percent per annum, and an effective interest rate of 3.08 percent. The outstanding borrowings at September 30, 2015 had stated interest rates that ranged from 2.88 percent to 4.63 percent per annum, and an effective interest rate of 3.43 percent. Maturity dates ranged from June 30, 2017 to June 30, 2029 for outstanding borrowings at September 30, 2016, and from June 30, 2024 for outstanding borrowings at September 30, 2015.

On October 15, 2015, FFB exchanged \$2.7 billion of non-Treasury securities that did not count against the debt limit, for an equivalent amount of Treasury securities held by the Civil Service Fund that did count against the debt limit. FFB used the Treasury securities it had received from the Civil Service Fund to repay \$2.1 billion of outstanding principal borrowings, including interest, owed to the Fiscal Service. The Fiscal Service then extinguished the Treasury securities it had received from FFB, which thereby helped us to remain below the statutory debt limit. These transactions resulted in a cumulative \$13.1 billion outstanding debt obligation owed to the Civil Service Fund as of September 30, 2016, which was reported as an intra-governmental liability on our Consolidated Balance Sheets entitled "Other Debt and Interest Payable."

# **17. D.C. FEDERAL PENSION AND JUDICIAL RETIREMENT ACTUARIAL** LIABILITY

Title XI of the *Balanced Budget Act of 1997*, as amended intended to relieve the D.C. government of the burden of unfunded pension liabilities transferred to the District by the U.S. government in 1979. To fulfill our responsibility, we manage two funds — the D.C. Teachers', Police Officers', and Firefighters' Federal Pension Fund (the D.C. Federal Pension Fund) and the District of Columbia Judicial Retirement and Survivors' Annuity Fund (the Judicial Retirement Fund). We are required to make annual amortized payments from the General Fund to the D.C. Federal Pension Fund and the Judicial Retirement Fund. The D.C. Federal Pension Fund benefit payments relate to creditable service performed on or before June 30, 1997, while the Judicial Retirement Fund benefit payments relate to all creditable service.

A reconciliation of the combined actuarial pension liability for the D.C. Federal Pension Fund and the Judicial Retirement Fund as of September 30, 2016 and 2015 is as follows:

| (in millions)                                 | 2016                  | 2015  |

# **19. NET POSITION**

Cumulative Results of Operations represents the net results of operations since inception, and includes cumulative amounts related to investments in capitalized assets and donations and transfers of assets in and out without reimbursement. Also included as a reduction in Cumulative Results of Operations are accruals for which the related expenses require funding from future appropriations and assessments. These future funding requirements include, among others: (a) accumulated annual leave earned but not taken, (b) accrued FECA, (c) credit reform cost re-estimates, (d) unfunded D.C. Federal pension, and (d) expenses for contingent liabilities.

Unexpended Appropriations represents the amount of spending authorized as of year-end that is unliquidated or unobligated and has not lapsed, been rescinded, or withdrawn. No-year appropriations remain available for obligation until expended. Annual appropriations remain available for upward or downward adjustment of obligations until canceled. We report adjustments related to unexpended appropriations, such as cancellations of expired funds or rescissions, as "Other Adjustments" on the Consolidated Statements of Changes in Net Position.

#### **APPROPRIATIONS RECEIVED**

Congress appropriates the amount reported as "Appropriations Received" from the General Fund receipts, such as income taxes, that are not dedicated by law for a specific purpose. This amount will not necessarily agree with the "appropriations (discretionary and mandatory)" amount reported on the Combined Statements of Budgetary Resources because of differences between proprietary and budgetary accounting concepts and reporting requirements. For example, certain dedicated receipts are recorded as "appropriations (discretionary and mandatory)" on the Combined Statements of Budgetary Resources, but are recognized as exchange or non-exchange revenue (i.e., typically in revolving, special, and non-revolving trust funds) and reported on the Consolidated Statements of Changes in Net Position in accordance with SFFAS No. 7, *Accounting for Revenue and Other Financing Sources*.

#### **TRANSFERS TO THE GENERAL FUND AND OTHER**

The amount reported as "Transfers to the General Fund and Other" on the Consolidated Statements of Changes in Net Position under "Other Financing Sources" includes the following for the years ended September 30, 2016 and 2015:

| (in millions)  | 2016                   | 2015   |
|--|------------------------|--------|
| Categories of Transfers to the General Fund and Other          |                        |        |
| Interest Revenue   | \$<br><b>44,636</b> \$ | 42,015 |
| Increase in Liquidation Preference of GSEs Preferred Stock,    |                        |        |
| GSEs Preferred Stock Dividends and Valuation Changes (Note 10) | 13,802                 | 30,830 |
| Other  | 6,511                  | 1,760  |
| Total  | \$<br><b>64,949</b> \$ | 74,605 |

Included in "Transfers to the General Fund and Other" is the annual valuation adjustment on the GSE Senior Preferred Stock investments and related dividends. These transfers also include distribution of interest revenue to the General Fund. We accrue interest revenue on inter-agency loans held on behalf of the U.S. government. We report a corresponding amount on the Consolidated Statements of Net Cost under "Non-Entity Costs: Less Interest Revenue from Loans." Eliminations between our bureaus reduce the amount reported on the Consolidated Statements of Net Cost. The "Other" line generally includes collections from other federal agencies for reimbursement of costs we incurred for our administration of trust funds established within the Social Security Act. We execute these administrative services as directed by statute. The fiscal year 2016 activity also includes a \$3.8 billion transfer of forfeited assets to a Fiscal Service-managed miscellaneous receipt account. This line also includes Seigniorage and numismatic profits also are included in the "Other" line. Seigniorage is the face value of newly minted circulating coins less the cost of production. Numismatic profit is any profit on the sale of proof coins, uncirculated coins, commemorative coins, and related products and accessories. The Mint is required to distribute seigniorage and numismatic profits in excess of operating expenses to the General Fund (refer to Note 21). In any given year, the amount recognized as seigniorage may differ from the amount distributed to the General Fund by an insignificant amount due to timing differences. The "Other" line also includes the credit reform downward reestimate subsidies transferred to the General Fund resulting from a change in forecasts of future cash flows.

# **20.** CONSOLIDATED STATEMENTS OF NET COST AND NET COSTS OF TREASURY SUB-ORGANIZATIONS

Our Consolidated Statements of Net Cost display information on a consolidated basis. We consist of DO and seven operating bureaus that we provide supporting schedules for Net Cost in the notes to the financial statements (refer to Note 1). These supporting schedules provide consolidating information, which fully displays the costs, revenues, and net cost of DO and each operating bureau.

The classification of sub-organizations has been determined in accordance with SFFAS No. 4, *Managerial Cost Accounting Standards and Concepts for the Federal Government* which states that the predominant factor is the reporting entity's organization structure and existing responsibility components, such as bureaus, administrations, offices, and divisions within a department.

Each sub-organization is responsible for accumulating costs. The assignment of the costs to Department-wide programs is the result of using the following cost assignment methods: (1) direct costs, (2) cause and effect, and (3) cost allocation.

#### INTRA-DEPARTMENTAL COSTS/REVENUES

We report intra-departmental costs/revenues resulting from the provision of goods and/or services on a reimbursable basis among our sub-organizations as costs by providing sub-organizations and as revenues by receiving sub-organizations. We recognized intra-departmental imputed costs on the Consolidated Statements of Net Cost of \$646 million and \$596 million during fiscal years 2016 and 2015, respectively. Accordingly, we eliminated such costs or revenues in the consolidation process.

#### **INTRA-GOVERNMENTAL** COSTS

Intra-governmental costs relate to the source of goods and services we purchased and not to the classification of the related intra-governmental revenue.

In certain cases, other federal agencies incur costs that are directly identifiable to our operations. In accordance with SFFAS No. 30, *Inter-Entity Cost Implementation Amending SFFAS No. 4, Managerial Cost Accounting Standards and Concepts*, we recognize identified costs paid on our behalf by other agencies. The imputed inter-departmental financing sources we currently recognize include the actual cost of future benefits for the federal pension plans that other federal entities pay, the FEHB, and any un-reimbursed contract dispute payments made from the Treasury Judgment Fund on our behalf. We

reflect the funding for these costs as costs on the Consolidated Statements of Net Cost, and as imputed financing sources on the Consolidated Statements of Changes in Net Position. Costs paid by other agencies on our behalf were \$681 million and \$669 million for the fiscal years ended September 30, 2016 and 2015, respectively.

#### **CONSOLIDATED STATEMENTS OF NET COST PRESENTATION**

OMB Circular No. A-136, *Financial Reporting Requirements*, as revised, requires that the presentation of the Consolidated Statements of Net Cost align directly with the goals and outcomes identified in the Strategic Plan. Accordingly, we have presented the gross costs and earned revenues by our major program categories as defined by the strategic goals reported in our fiscal years 2014 – 2017 Strategic Plan. The majority of our bureaus' and reporting entities' net cost information falls within a single program category in the Consolidated Statements of Net Cost. DO and TTB allocate costs and related revenues to multiple programs using a net cost percentage calculation. All of our management offices coordinate, on a Treasury-wide basis, their efforts to achieve the Management program-related strategic goals (refer to the Strategic Framework section of Management's Discussion and Analysis). For financial statement presentation purposes, we combine the net costs associated with our Management program-related goals with the net costs associated with our Financial program-related strategic goals.

Our Consolidated Statements of Net Cost also present interest expense on the Federal Debt and other federal costs incurred on behalf of the U.S. government. We do not reflect these costs as program costs related to our strategic plan missions. We eliminate these costs in the consolidation process to the extent that they involve transactions with our sub-organizations.

Non-entity other federal costs shown on the Consolidated Statements of Net Cost for the fiscal years ended September 30, 2016 and 2015 consisted of the following:

| (in millions)   | 2016                  | 2015   |
|---|-----------------------|--------|
| Credit Reform Interest on Uninvested Funds (Intra-governmental) | \$<br><b>7,349</b> \$ | 8,088  |
| Judgment Claims and Contract Disputes                           | 3,563                 | 1,885  |
| Resolution Funding Corporation                                  | 2,628                 | 2,628  |
| Corporation for Public Broadcasting                             | 485                   | 445    |
| All Other Payments  | 529                   | 555    |
| Total   | \$<br>14,554 \$       | 13,601 |

# **21.** Additional Information Related to the Combined Statements of Budgetary Resources

## **UNDELIVERED ORDERS**

Undelivered orders represent goods and services ordered and obligated, which have not been received. This includes any orders for which we have paid in advance, but for which delivery or performance has not yet occurred. Undelivered orders as of September 30, 2016 and 2015 consisted of the following:

| (in millions)                             | 2016                   | 2015    |
|---|------------------------|---------|
| Paid                                      | \$<br><b>10</b> \$     | 7       |
| Unpaid                                    | 18,443                 | 170,646 |
| Undelivered orders at the end of the year | \$<br><b>18,453</b> \$ | 170,653 |

### **CONTRIBUTED CAPITAL**

Contributed capital represents the current year authority and prior year balances of amounts actually transferred through non-expenditure transfers to miscellaneous receipt accounts of the General Fund of the Treasury to repay a portion of a capital investment or transfer seigniorage and numismatic profits (refer to Note 19). Contributed capital for the fiscal years ended September 30, 2016 and 2015 was \$195 million and \$171 million, respectively.

## **APPORTIONMENT CATEGORIES OF NEW OBLIGATIONS AND UPWARD ADJUSTMENTS**

Apportionment categories are determined in accordance with the guidance provided in OMB Circular No. A-11, *Preparation, Submission and Execution of the Budget*. Apportionment Category A represents resources apportioned for calendar quarters. Apportionment Category B represents resources apportioned for other time periods for activities, projects or objectives, or for any combination thereof. New obligations and upward adjustments for direct and reimbursable obligations by apportionment category for the fiscal years ended September 30, 2016 and 2015 consisted of the following:

| (in millions)                            | 2016                    | 2015    |
|--|-------------------------|---------|
| Direct - Category A                      | \$<br><b>106</b> \$     | 105     |
| Direct - Category B                      | 31,768                  | 37,291  |
| Direct - Exempt from Apportionment       | 441,961                 | 425,027 |
| Total Direct                             | 473,835                 | 462,423 |
| Reimbursable - Category B                | 4,954                   | 4,549   |
| Reimbursable - Exempt from Apportionment | 1,301                   | 1,072   |
| Total Reimbursable                       | 6,255                   | 5,621   |
| Total Direct and Reimbursable            | \$<br><b>480,090</b> \$ | 468,044 |

## **TERMS OF BORROWING AUTHORITY USED**

Several of our programs have authority to borrow under the FCRA, as amended. The FCRA provides indefinite borrowing authority to financing accounts to fund the unsubsidized portion of direct loans and to satisfy obligations in the event the financing account's resources are insufficient. OMB Circular No. A-11 defines repayment requirements. Interest expense due is calculated based on the beginning balance of borrowings outstanding and the borrowings/repayments activity that occurred during the fiscal year. Undisbursed Departmental borrowings earn interest at the same rate as the financing account pays on its debt owed to the Fiscal Service. In the event that principal and interest collections exceed the interest expense due, we receive the excess payment. If principal and interest do not exceed interest expense due, we will borrow the

difference. We make periodic principal repayments based on the analysis of cash balances and future disbursement needs. All interest on borrowings is due on September 30. Interest rates on FCRA borrowings range from 0.26 percent to 7.59 percent.

## **AVAILABLE BORROWING**

The available borrowing authority and related changes in available borrowing authority as of and for the fiscal years ended September 30, 2016 and 2015 are shown below:

| (in millions)                                | 2016                   | 2015    |
|--|------------------------|---------|
| BeginningBalance                             | \$<br><b>93,963</b> \$ | 99,248  |
| Current Authority                            | 365                    | 921     |
| Borrowing Authority Withdrawn <sup>(1)</sup> | (87,501)               | (6,098) |
| Borrowing Authority Converted to Cash        | (307)                  | (108)   |
| Ending Balance                               | \$<br><b>6,520</b> \$  | 93,963  |

(1) The increase in this activity is due to a withdrawal of borrowing authority related to the IMF program. Refer to Note 7.

## **RECONCILIATION OF THE PRESIDENT'S BUDGET**

The Budget of the United States (also known as the President's Budget), with actual numbers for fiscal year 2016, was not published at the time that these financial statements were issued. The fiscal year 2018 President's Budget is expected to be published in February 2017, can be located on the OMB website, and will be available from the U.S. Government Printing Office. The following chart displays the differences between the Combined Statement of Budgetary Resources (SBR) in the fiscal year 2015 Agency Financial Report and the actual fiscal year 2015 balances included in the fiscal year 2017 President's Budget.

## Reconciliation of Fiscal Year 2015 Combined Statement of Budgetary Resources to the Fiscal Year 2017 President's Budget

(1) These are primarily refundable Earned Income Tax Credit, Child Tax Credit, Build America Bond payments, Cost Sharing Reductions and the Refundable Premium Tax Credit reported with refunds as custodial activities in our financial statements and thus are not reported as budgetary resources.

<sup>(2)</sup> The largest of these resources relates to our International Assistance Programs.

## LEGAL ARRANGEMENTS AFFECTING USE OF UNOBLIGATED BALANCES

The use of unobligated balances is restricted based on annual legislation requirements or enabling authorities. Funds presumably become available for only one fiscal year unless otherwise noted in the annual appropriation language. Unobligated balances in unexpired Treasury account fund symbols are available in the next fiscal year for new obligations unless some restrictions have been placed on those funds by law. In those situations, the restricted funding will be temporarily unavailable until such time as the reasons for the restriction have been satisfied or legislation has been enacted to remove the restriction.

Amounts in expired Treasury account fund symbols are not available for new obligations, but may be used to adjust obligations and make disbursements that were recorded before the budgetary authority expired or to meet a bona fide need that arose in the fiscal year for which the appropriation was made.

# 22. COLLECTION AND DISPOSITION OF CUSTODIAL REVENUE

We collect the majority of federal revenue from income and excise taxes. The table below shows collection activity, by revenue type and tax year, for the fiscal years ended September 30, 2016 and 2015:

|   |    |              |              | Tax Year  |           |             |
|---|----|--------------|--------------|-----------|-----------|-------------|
|   |    |              |              |           | Pre-      | 2016        |

# 23. FUNDS FROM DEDICATED COLLECTIONS

ESF represents the majority of our FDC activities. In addition, such funds managed by BEP, Mint, and OCC (our nonappropriated bureaus) and certain funds managed by the IRS are public enterprise (or revolving) funds and receive no appropriations from the Congress. Fiscal Service, DO, IRS, OFR, TFF, and the CDFI Fund manage other miscellaneous FDCs.

The following is a list of FDCs and a brief description of the purpose, accounting, and uses of these funds.

Pursuant to the legal authority found in Section 10 of the *Gold Reserve Act of 1934*, as amended, the ESF may purchase or sell foreign currencies, hold U.S. foreign exchange and SDR assets, and may provide financing to foreign governments and foreign entities. The ESF accounts for and reports its holdings to the Fiscal Service on the Standard Form 224, "Statement of Transactions," and provides other reports to Congress. Interest on SDRs in the IMF, investments in Treasury securities, and investments in foreign currency assets are ESF's primary sources of revenue. The ESF's earnings and realized gains on foreign currency assets represent inflows of resources to the government, and the interest revenues earned from U.S. Securities are the result of intra-Departmental flows.

The BEP, Mint, OCC, and IRS operate "public enterprise/revolving funds" to account for their respective revenues and expenses. 31 USC § 5142 established the revolving fund for BEP to account for revenue and expenses related to the currency printing activities. P.L. 104-52 (31 USC § 5136) established the Public Enterprise Fund for the Mint to account for all revenue and expenses related to the production and sale of numismatic products and circulating coinage. Revenues and other financing sources at the Mint are mainly from the sale of numismatic and bullion products and the sale of circulating coins to the FRB system. These revenues represent inflows of resources to the government. 12 USC § 481 established the Assessment Funds for OCC. Revenue and financing sources are from the bank examinations and assessments for the oversight of the national banks, savings associations, and savings and loan holding companies. These non-appropriated funds contribute to the inflows of resources to the government to specifically fund these entities' operations. 26 USC § 7810 established the Federal Tax Lien Revolving Fund to account for revenue and expenses from the sale of property foreclosed upon by a holder of a lien. Such revenue represents inflows of resources to the federal government. There are minimal transactions with other government agencies.

There are other FDCs at several of our bureaus, such as donations to the Presidential Election Campaign Fund, gifts to reduce the public debt, and other enforcement related activities. Public laws and the U.S. Code established and authorized the use of these funds. Sources of revenues and other financing sources include contributions, cash and property forfeited in enforcement activities, public donations, and other allocations, all which represent inflows to the government.

### INTRA-GOVERNMENTAL INVESTMENTS IN TREASURY SECURITIES

The U.S. government does not set aside assets to pay future benefits or other expenditures associated with FDCs. Our bureaus and other federal agencies invest some of the funds that they collect from the public, if they have the statutory authority to do so, in securities issued by the Fiscal Service. The Fiscal Service collects cash and makes deposits in the General Fund, which then uses the cash for general government purposes.

The investments provide our bureaus and other federal agencies with authority to draw upon the General Fund to make future benefit payments or other expenditures. When our bureaus or other federal agencies require redemption of these securities to make expenditures, the government finances those redemptions out of accumulated cash balances, by raising taxes or other receipts, by borrowing from the public or repaying less debt, or by curtailing other expenditures. This is the same way that the government finances all other expenditures.

The securities are an asset to our bureaus and other federal agencies and a liability of the Fiscal Service. The General Fund is liable to the Fiscal Service. Because our bureaus and other federal agencies are parts of the U.S. government, these assets and liabilities offset each other from the standpoint of the government as a whole. For this reason, they do not represent an asset or a liability in the U.S. government-wide financial statements.

Our financial statements do not display the balances related to the investments made by our bureaus because the bureaus are subcomponents of the Department. However, the General Fund remains liable to the Fiscal Service for the invested balances and the Fiscal Service remains liable to the investing bureaus (refer to Note 4).

#### Summary Information for Funds from Dedicated Collections as of and for the Fiscal Year Ended September 30, 2016

# 24. RECONCILIATION OF NET COST OF TREASURY OPERATIONS AND NON-ENTITY COSTS TO BUDGET

The Reconciliation of Net Cost of Operations to Budget explains the difference between the budgetary net obligations and the proprietary net cost of Treasury operations and non-entity costs. For the fiscal years ended September 30, 2016 and 2015, the Reconciliation of Net Cost of Operations to Budget consisted of the following:

| (in millions)  | 2016                    | 2015     |
|--|-------------------------|----------|
| RESOURCES USED TO FINANCE ACTIVITIES   |                         |          |
| Budgetary Resources Obligated:   |                         |          |
| New Obligations and Upward Adjustments (Note 21)   | \$<br><b>480,090</b> \$ | 468,044  |
| Less: Actual Offsetting Collections and Recoveries of Prior Year Unpaid  |                         |          |
| Obligations, Net of Change in Uncollected Payments   | (114,447)               | (27,062) |
| New Obligations and Upward Adjustments Net of Offsetting Collections and Recoveries  | 365,643                 | 440,982  |
| Less: Distributed Offsetting Receipts  | (62,565)                | (69,036) |
| Net Obligations  | 303,078                 | 371,946  |
| Other Resources:   |                         |          |

#### Schedule of Fiduciary Net Assets

## **26. COMMITMENTS AND CONTINGENCIES**

#### **LEGAL CONTINGENCIES**

We are a party in various administrative proceedings, legal actions, and claims, which may ultimately result in settlements or decisions adverse to the U.S. government. These contingent liabilities arise in the normal course of operations and their ultimate disposition is unknown. We disclose contingent liabilities where the conditions for liability recognition have not been met and the likelihood of unfavorable outcome is more than remote. We do not accrue for possible losses related to cases where we cannot estimate the potential loss or the likelihood of an unfavorable outcome is less than probable.

In some cases, a portion of any loss that may occur may be paid by our Judgment Fund, which is separate from our operating resources. For cases related to the *Contract Disputes Act of 1978* and awards under federal anti-discrimination and whistle-blower protection acts, we must reimburse the Judgment Fund from future appropriations.

In the opinion of our management and legal counsel, based on information available as of the date of this report, the expected outcome of other legal actions, individually or in the aggregate, will not have a materially adverse effect on our consolidated financial statements, except for the pending legal actions described below which may have a materially adverse impact on our consolidated financial statements depending on the outcomes of the cases.

#### **Pending Legal Actions**

• *Tribal Trust Fund Cases:* Native American tribes have filed numerous cases in the U.S. District Courts seeking a declaration that the United States has not provided the tribes with a full and complete accounting of their trust funds, and also seeking an order requiring the U.S. government to provide such an accounting. In addition, there are a number of other related cases seeking damages in the U.S. Court of Federal Claims, which do not name us as a defendant. The U.S. government is currently in discussion with counsel representing most of the remaining plaintiff tribes with tribal trust fund cases pending against the United States about the feasibility of an out-of-court settlement. Plaintiff tribes in several of the pending cases have chosen to pursue active litigation, rather than settlement discussion, and the U.S. government is litigating those cases vigorously. We are unable to determine the likelihood of an unfavorable outcome or an estimate of potential loss at this time.

- *GSE Related Cases:* A number of cases were filed in the U.S. Court of Federal Claims, the U.S. District Court for the District of Columbia, the U.S. District Court for the District of Delaware, the U.S. District Court for the Northern District of Illinois, the U.S. District Court for the Northern District of Kentucky, and the U.S. District Court for the Southern District of Texas, in which the plaintiffs allege, among other things, that the U.S. government took their property and contractual rights as preferred and common stockholders when the third amendments to the SPSPAs between us and each GSE were executed in August 2012 (refer to Note 10). One case also alleges that the U.S. government took plaintiffs' property and contractual rights when the GSEs were placed into conservatorship and entered into the SPSPAs with us in September 2008. In the Court of Federal Claims, the plaintiffs seek just compensation (damages) from the U.S. government. In the District Courts, the plaintiffs seek to set aside the third amendments to the SPSPAs as well as damages. On September 30, 2014, the D.C. District Court granted the defendants' motions to dismiss four cases pending in that court, and the plaintiffs filed appeals in October 2014 which are still pending. An additional case is pending in the D.C. District Court. On September 9, 2016, the U.S. District Court for the Eastern District of Kentucky granted the defendants' motion to dismiss, and the plaintiffs filed a notice of appeal on November 14, 2016. We are unable to determine the likelihood of an unfavorable outcome or an estimate of potential loss in the remaining cases at this time.
- Starr International Co., Inc. v. United States: The plaintiff, an American International Group, Inc. (AIG) shareholder, brought suit on behalf of two classes of shareholders. The suit alleges that the U.S. government violated the Fifth Amendment to the United States Constitution by illegally exacting or taking property without just compensation. One class, the Credit Agreement Class, claimed the U.S. government violated the Fifth Amendment when it conveyed a majority share of AIG's equity and voting rights in connection with an \$85 billion loan to AIG during the 2008 financial crisis. Starr also asserted a Fifth Amendment violation on behalf of the second class, the Reverse Stock Split Shareholder Class, alleging that a June 2009 reverse stock split constituted a taking of the common stockholders' asserted right to a shareholder vote on whether to approve a reverse split of AIG's common stock. The U.S. Court of Federal Claims held that the Credit Agreement Shareholder Class prevails on liability, but recovers no damages, and that the Reverse Stock Split Shareholder Class does not prevail on liability or damages. Both the Plaintiff and the United States have appealed. We are unable to determine the likelihood of an unfavorable outcome or make an estimate of potential loss at this time.
- Unredeemed Savings Bonds Related Cases: A number of plaintiffs filed claims in the U.S. Court of Federal Claims requesting that we redeem matured savings bonds not possessed by the applicable states, but which have registered owners with last known addresses in those states. We informed the applicable states we would not redeem these savings bonds since those states were not the registered owners of the bonds. On August 20, 2015, the court partially dismissed one claim and denied the U.S. government's motion to dismiss with respect to other claims. We are unable to determine the likelihood of an unfavorable outcome or an estimate of potential loss at this time.
- Adam Steele, Brittany Montrois v. United States: The plaintiffs filed a class claim in the U.S. District Court for the District of Columbia seeking refunds of all user fees paid, plus interest, to obtain a preparer tax identification number (PTIN). Additionally, the plaintiffs seek to force us to cease charging a user fee to obtain a PTIN and asking for more information than is necessary to issue a PTIN. We are unable to determine the likelihood of an unfavorable outcome or an estimate of potential loss at this time.
- Anonymous Whistleblower Cases: A number of whistleblower cases were filed in the U.S. Tax Court under seal, appealing the denial of an award by the IRS Whistleblower Office. The anonymous claimants allegedly provided

confidential information about tax fraud committed by multiple other taxpayers to the IRS. The court is currently holding these cases in abeyance until it determines the scope and standard of review it will follow. We are unable to determine the likelihood of an unfavorable outcome or an estimate of potential loss at this time.

- American Recovery and Reinvestment Tax Act of 2009 (ARRA) Related Cases: A number of cases were filed in the U.S. Court of Federal Claims alleging that the U.S. government violated statutory and regulatory mandates to make proper payments to plaintiffs under ARRA, Section 1603, for having placed certain energy properties into service. We have determined there is a reasonably possible likelihood of an unfavorable outcome in some of the cases. On October 28, 2016, the Court of Federal Claims entered judgment against the United States in the amount of \$207 million in one of the cases. The U.S. government has 60 days to appeal the judgment. Another case with alleged damages of approximately \$47 million remains in litigation.
- Other Legal Actions: We are also involved in employment related legal actions (e.g., matters alleging discrimination and other claims before federal courts, the Equal Employment Opportunity Commission, and the Merit Systems Protection Board) for which an unfavorable outcome is reasonably possible, but for which an estimate of potential loss cannot be determined at this time. We do not expect that these cases will have a material adverse effect on our consolidated financial position or results.

#### **OTHER COMMITMENTS AND CONTINGENCIES**

#### **Loan Commitments**

Through the FFB, we make loan commitments with federal agencies, or private sector borrowers with loans guaranteed by federal agencies, to extend them credit for their own use (refer to Notes 1L and 3). As of September 30, 2016 and 2015, we had loan commitments totaling \$12.5 billion and \$14.6 billion, respectively.

#### **Multilateral Development Banks**

On behalf of the United States, we have subscribed to capital for certain MDBs, portions of which are callable under certain limited circumstances to meet the obligations of the respective MDB. There has never been, nor is there anticipated, a call on the U.S. commitment for these subscriptions. As of September 30, 2016 and 2015, U.S. callable capital in MDBs was as follows:

| (in millions)   | 2016                    | 2015    |
|---|-------------------------|---------|
| Inter-American Development Bank                         | \$<br><b>49,181</b> \$  | 45,082  |
| International Bank for Reconstruction and Development   | 43,427                  | 40,498  |
| As i an Development Bank                                | 18,701                  | 18,572  |
| European Bank for Reconstruction and Development        | 3,055                   | 3,055   |
| African Development Bank                                | 4,085                   | 3,550   |
| North American Development Bank                         | 1,275                   | 1,275   |
| Multilateral Investment Guarantee Agency <sup>(1)</sup> | 315                     | 315     |
| Total   | \$<br><b>120,039</b> \$ | 112,347 |

(1) Both fiscal years 2016 and 2015 include commitments of \$22 million for the undisbursed portion of the subscription to paid in capital investments.

#### **Terrorism Risk Insurance Program**

Congress originally enacted the *Terrorism Risk Insurance Act* (TRIA) in November 2002 to address market disruptions resulting from terrorist attacks on September 11, 2001. Most recently, the *Terrorism Risk Insurance Program* 

*Reauthorization Act of 2015* extended the Terrorism Risk Insurance Program (TRIP) until December 31, 2020. The TRIP helps to ensure available and affordable commercial property and casualty insurance for terrorism risk, and simultaneously allows private markets to stabilize. The authority to pay claims under the TRIP is activated when the Secretary (in consultation with the Secretary of the Department of Homeland Security and the Attorney General of the United States) certifies an "act of terrorism." In the event of certification of an "act of terrorism," insurers may be eligible to receive reimbursement from the U.S. government for associated insured losses – assuming an aggregate insured loss threshold ("program trigger") has been reached – once a particular insurer has satisfied its designated deductible amount. For calendar years 2016 and 2015, the program trigger amount was \$120 million and \$100 million, respectively. This amount will increase by \$20 million annually through calendar year 2020. Insured losses above insurer deductibles will be shared between insurance companies and the U.S. government. The TRIP includes both mandatory and discretionary authority for us to recoup federal payments made under the TRIP through policyholder surcharges under certain circumstances, and contains provisions designed to manage litigation arising from or relating to a certified act of terrorism. There were no claims under the TRIP as of September 30, 2016 or 2015.

#### **Exchange Stabilization Agreement**

The North American Framework Agreement (NAFA), which we signed in 1994, includes the Exchange Stabilization Agreement (ESA) with Mexico. Through the ESF, we have a standing swap line for \$3.0 billion with Mexico under the NAFA and its implementing ESA. The amounts and terms (including the assured source of repayment) of any borrowing under NAFA and ESA will have to be negotiated and agreed to before any actual drawing can occur. The ESA does provide sample clauses that state that transactions shall be exchange rate neutral for the ESF, and bear an interest rate based on that comparable to Treasury bills. There were no drawings outstanding on the ESF swap line as of September 30, 2016 and 2015.

#### **IMF** Commitments

The United States participates in the IMF through a quota subscription and the NAB which is a borrowing arrangement that supplements IMF resources. As of September 30, 2016 and 2015, the United States' financial commitment under the U.S. quota was SDR 83.0 billion and SDR 42.1 billion, respectively, which was equivalent to \$115.7 billion and \$59.1 billion, respectively. Its financial commitment under the NAB arrangement was SDR 28.2 billion and SDR 69.1 billion as of September 30, 2016 and 2015, respectively, which was equivalent to \$39.4 billion and \$97.0 billion, respectively. The increase in the U.S. quota and decrease in the NAB commitment is attributable to the December 18, 2015 enactment of the *Consolidated Appropriations Act 2016* (P.L. 114-113). This Act authorized an increase in the United States' participation in the U.S. quota and a corresponding reduction in the NAB of SDR 40.9 billion (approximately \$57 billion) (refer to Note 7).

#### Housing Programs Under TARP

We design housing programs under TARP to provide stability for both the housing market and homeowners. These programs assist homeowners who are experiencing financial hardships to remain in their homes until their financial position improves or they relocate to a more sustainable living situation, and to obtain other assistance designed to prevent foreclosures. As of September 30, 2016 and 2015, we had committed up to \$37.5 billion for these programs. Outstanding commitments totaled \$15.0 billion and \$19.0 billion as of September 30, 2016 and 2015, respectively. For fiscal years 2016 and 2015, payments made on behalf of the housing programs under TARP totaled \$4.3 billion and \$4.2 billion, respectively, reported within the Economic Program on our Consolidated Statements of Net Cost.

#### **Commitment to GSEs**

The SPSPA agreements between us and each GSE, which have no expiration date, provide for us to disburse funds to the GSEs if, at the end of any quarter, the FHFA determines that the liabilities exceed the GSE's assets. At September 30, 2016 and 2015, our maximum remaining potential commitment to the GSEs was \$258.1 billion. Refer to Note 10 for further information.

## REQUIRED SUPPLEMENTARY INFORMATION (UNAUDITED - SEE ACCOMPANYING

## AUDITORS' REPORT)

#### INTRODUCTION

This section provides the Required Supplementary Information as prescribed by accounting standards.

#### **OTHER CLAIMS FOR REFUNDS**

We estimated that \$7.1 billion and \$4.8 billion as of September 30, 2016 and 2015, respectively, may be payable as other claims for tax refunds. This estimate represents amounts (principal and interest) that we may pay for claims pending judicial review by the federal courts or internally, by Appeals. In fiscal year 2016, the total estimated payout (including principal and interest) for claims pending judicial review by the federal courts is \$4.8 billion and \$2.3 billion, respectively. In fiscal year 2015, the total estimated payout (including principal and interest) for claims pending judicial review by the federal courts and appeals courts is \$4.8 billion and \$2.3 billion, respectively. In fiscal year 2015, the total estimated payout (including principal and interest) for claims pending judicial review by the federal courts and appeals courts was \$2.1 billion and \$2.7 billion, respectively. To the extent judgments against the government in these cases prompt other similarly situated taxpayers to file similar refund claims, these amounts could become significantly greater.

#### **IRS FEDERAL TAXES RECEIVABLE, NET**

In accordance with SFFAS No. 7, *Accounting for Revenue and Other Financing Sources and Concepts for Reconciling Budgetary and Financial Accounting*, some unpaid tax assessments do not meet the criteria for financial statement recognition. Internal Revenue Code Section 6201 authorizes and requires us to make inquiries, determinations, and assessments of all taxes which taxpayers have not duly paid (including interest, additions to the tax, and assessable penalties) under the law. Unpaid assessments result from taxpayers filing returns without sufficient payment, as well as from tax compliance programs such as examination, under reporter, substitute for return, and combined annual wage reporting. We also have authority to abate the paid or unpaid portion of an assessed tax, interest, and penalty. Abatements occur for a number of reasons and are a normal part of the tax administration process. Abatements may result in claims for refunds or a reduction of the unpaid assessed amount.

Under federal accounting standards, we consider unpaid assessments which require taxpayer or court agreement federal taxes receivable. We consider assessments not agreed to by taxpayers or the courts compliance assessments and not federal taxes receivable. Due to the lack of agreement, these compliance assessments are less likely to have future collection potential than those unpaid assessments that we consider federal taxes receivable.

We call assessments with little or no future collection potential write-offs. Write-offs principally consist of amounts owed by deceased, bankrupt, or defunct taxpayers, including many failed financial institutions liquidated by the FDIC and the former Resolution Trust Corporation (RTC). Write-offs have little or no future collection potential, but statutory provisions require that we maintain these assessments until the statute for collection expires.

Although we do not consider compliance assessments and write-offs receivables under federal accounting standards, they represent legally enforceable claims of the U.S. government.

The components of the total unpaid assessments at September 30, 2016 and 2015, were as follows:

| (in millions)                         | 2016                    | 2015      |
|---------------------------------------|-------------------------|-----------|
| Total Unpaid Assessments              | \$<br><b>391,000</b> \$ | 389,000   |
| Less: Compliance Assessments          | (74,000)                | (80,000)  |
| Write Offs                            | (139,000)               | (138,000) |
| Gross Federal Taxes Receivable        | 178,000                 | 171,000   |
| Less: Allowance for Doubtful Accounts | (129,000)               | (130,000) |
| Federal Taxes Receivables, Net        | \$<br><b>49,000</b> \$  | 41,000    |

To eliminate double counting, the compliance assessments reported above exclude trust fund recovery penalties assessed against officers and directors of businesses involved in the non-remittance of federal taxes withheld from their employees. The penalties totaled \$1 billion and \$2 billion as of September 30, 2016 and 2015, respectively. We report the related unpaid assessments of those businesses as taxes receivable or write-offs, but we may also recover portions of those businesses' unpaid assessments from any and all individual officers and directors against whom we assess a trust fund recovery penalty.

#### ALCOHOL AND TOBACCO TAX AND TRADE BUREAU

As an agent of the U.S. government and as authorized by 26 USC, the TTB collects excise taxes from alcohol, tobacco, firearms, and ammunition industries. In addition, the TTB collects special occupational taxes from certain tobacco businesses. During fiscal years 2016 and 2015, TTB collected approximately \$22.1 billion and \$22.3 billion in taxes, interest, and other revenues, respectively. TTB also collects Federal excise taxes on certain articles produced in Puerto Rico and the Virgin Islands, and imported into the United States. In accordance with 26 USC 7652, such taxes collected on rum imported into the United States are "covered over" or paid into the treasuries of Puerto Rico and the Virgin Islands.

TTB remits substantially all of the taxes collected, net of related refund disbursements, to the General Fund. We further distribute this revenue to Federal agencies in accordance with various laws and regulations. The firearms and ammunition excise taxes are an exception. TTB remits those revenues to the Fish and Wildlife Restoration Fund under provisions of the *Pittman-RobertsonAct of 1937*.

#### **DEFERRED MAINTENANCE**

In fiscal years 2016 and 2015, we had no material amounts of deferred maintenance costs to report on vehicles, buildings, and structures we owned.

Deferred maintenance applies to owned PP&E. Deferred maintenance is maintenance that we had not performed when it should have been, or scheduled to be, and put off or delayed for a future period. We define maintenance as the act of keeping capitalized assets in an "acceptable condition" to serve their required mission. It includes preventive maintenance, normal repairs, replacement of parts and structural components, and other activities needed to preserve the asset so that it continues to provide acceptable services and achieves its expected useful life. Maintenance excludes activities aimed at expanding the capacity or significantly upgrading the assets to a different form than it was originally intended (i.e., activities related to capitalized improvements, modernization, and/or restoration).

Logistic personnel use condition assessment surveys and/or the total life-cycle cost methods to determine deferred maintenance and acceptable operating condition of an asset. We use periodic condition assessments, physical inspections, and review of manufacturing and engineering specifications, work orders, and building and other structure logistics reports under these methodologies.

## STATEMENT OF BUDGETARY RESOURCES DISAGGREGATED BY TREASURY REPORTING ENTITY

The following tables provide the Statement of Budgetary Resources for the fiscal years ended September 30, 2016 and 2015 disaggregated by Treasury reporting entity rather than by Treasury major budget account, since we manage our budget at the reporting entity level.

## SECTION A: COMBINED SCHEDULE OF SPENDING

The following Schedule of Spending (SOS) presents an overview of the funds available and how these funds were spent for the Fiscal Year (FY) ended September 30, 2016 and 2015. The financial data used to populate this schedule was also used to populate our Statement of Budgetary Resources (SBR). Accordingly, we present the budgetary financial information in this schedule on a combined basis rather than on a consolidated basis. The SOS presents Total Resources (or "Total Budgetary Resources" per the SBR), Amount Available but Not Agreed to be Spent (or "Unobligated balance, end of year – Apportioned, unexpired accounts and Exempt from Apportionment, unexpired accounts" per the SBR), and Amount Not Available to be Spent (or "Unobligated balances, end of year – Unapportioned, unexpired accounts and Exempt from Apportioned, unexpired accounts and Exempt unobligated balances.

#### **Combined Schedule of Spending (Unaudited)**

| Other Contractual Services                        | 4,644                   | 4,499     |
| Investments and Loans <sup>3</sup>                | 2,700                   | 19,235    |
| Other   | 11,160                  | 12,053    |
| Total Amounts Agreed to be Spent                  | \$<br><b>480,090</b> \$ | 468,044   |
| Who did the Money go to?                          |                         |           |
| Federal   | \$<br><b>175,882</b> \$ | 169,326   |
| Non-Federal                                       | 304,208                 | 298,718   |
| Total Amounts Agreed to be Spent                  | \$<br><b>480,090</b> \$ | 468,044   |

<sup>(1)</sup> Interest and Dividends primarily include interest on the public debt and interest expense related to credit reform activities. <sup>(2)</sup> Grants, Subsidies, and Contributions primarily include cash payments to States, other political subdivisions, corporations, associations, and individuals: credit reform program related subsidies; and contributions to foreign countries.

<sup>(3)</sup> Investments and Loans primarily include investments made in connection with loans issued for non-credit reform and credit reform activities. The decrease is due to a change in our budgetary accounting and reporting policy for the International Monetary Fund (IMF) (refer to Notes 1AC and 7).

## SECTION B: TAX GAP AND TAX BURDEN

#### ΤΑΧ GAP

The tax gap is the difference between the amount of tax imposed by law and what taxpayers actually pay on time. The tax gap and associated concepts are a particular way of defining and analyzing compliance and noncompliance and are based on tax year liability. The tax gap provides a rough gauge of the level of overall noncompliance and voluntary compliance given all the events that occurred during the relevant tax periods and the Internal Revenue Code (IRC) provisions in effect at the time. Tax gap estimates provide the Internal Revenue Service (IRS) with periodic appraisals about the nature and extent of noncompliance for use in formulating tax administration strategies.

The IRS is responsible for administering all tax provisions including several non-refundable and refundable tax credits (RTC). Eligibility rules for RTC are often complex because they must address complicated family relationships and residency arrangements. Compliance with the rules is also difficult for the IRS to verify due to the lack of available third party data. The relatively high overclaim error rates for these credits are a result, in part, of this complexity. Measuring and reporting on taxpayer compliance related to these various tax provisions is complex and challenging. To measure compliance with the current tax system, the IRS estimates the amount of non-compliance as part of the tax gap.

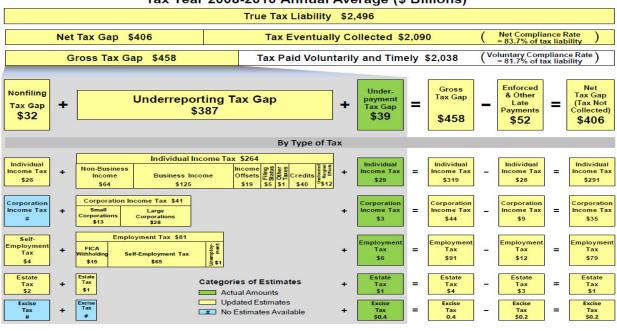

#### **New Tax Gap Estimates**

The IRS periodically estimates the tax gap. In FY 2016 the IRS released updated estimates covering the Tax Year (TY) 2008-2010 timeframe. This section of the AFR includes a brief overview of these estimates. More detail can be found in documents on the IRS website at www.IRS.gov:

- Description of the Tax Gap (https://www.irs.gov/uac/the-tax-gap)
- Tax Gap Estimates for Tax Years 2008-2010 (https://www.irs.gov/pub/irs-soi/p1415.pdf)

The gross tax gap is the amount of tax liability that is not paid voluntarily and timely. The estimated gross tax gap is \$458 billion. The net tax gap is the gross tax gap less tax that will be subsequently collected through voluntarily payments or as the result of IRS administrative and enforcement activities; it is the portion of the gross tax gap that will not be paid. It is estimated that \$52 billion of the gross tax gap will eventually be collected resulting in a net tax gap of \$406 billion.

The tax gap paradigm separates noncompliance into components by type of tax and source of noncompliance. The three primary sources of noncompliance that result in payment of less than the tax owed are: (1) the non-filing tax gap (the tax not paid on time by those who do not file required returns on time); (2) the underreporting tax gap (the net understatement of tax on timely filed returns); and (3) the underpayment tax gap (the amount of tax reported on timely filed returns that is not paid on time). The estimated gross tax gap for each of these components is \$32 billion, \$387 billion, and \$39 billion, respectively. The gross tax gap estimates can also be grouped by type of tax. The estimated gross tax gap for individual income tax is \$319 billion, for corporation income tax is \$44 billion, for employment tax is \$91 billion, and for estate and excise tax combined is \$4 billion. These estimates are displayed in the updated schematic representation of the estimates, known as the tax gap "map" that follows.

#### Tax Gap Map Tax Year 2008-2010 Annual Average (\$ Billions)

Internal Revenue Service, April 2016

Detail may not add to total due to rounding . Not to scale

#### Individual Income Tax Underreporting Tax Gap Estimates for Tax Years 2008 - 2010

The estimates in the table below provide a breakout of the components of the individual income tax underreporting tax gap. The income components are grouped by "visibility" category; i.e., for each component, the table shows the component's share of the individual income tax underreporting tax gap. The table also shows each component's share of the gross tax gap. Business income reported on Schedules C, E, and F accounts for 47 percent of the total individual income tax underreporting tax gap for TY 2008—2010. This consists of nonfarm proprietor income which accounts for 29 percent, flow-through income (partnerships, S corporations, and estates and trusts) which accounts for 8 percent, rent and royalty income which accounts for 8 percent, and farm income which accounts for 2 percent.

#### Tax Gap Estimation Methodology

Estimating the tax gap is inherently challenging and requires assessing the merits of alternative methods, assumptions, and data sources. There is no single approach for estimating all the components of the tax gap. Each approach is subject to non-sampling error; the component estimates that are based on samples are further subject to sampling error. The uncertainty of the estimates is not readily captured by standard errors that typically accompany estimates based on sample data. For that reason, standard errors, confidence intervals, and statistical comparisons across years are not reported. The report noted above (Publication 1415 rev. 5-2016) provides summary information about the estimation methodology used to produce the estimates of the tax gap.

The IRS' National Research Program (NRP) is one important data source used to estimate the tax gap. The NRP involves conducting detailed audits of a random sample of taxpayers to measure compliance with all individual income tax provisions and focuses on assessing the effect of errors made during return filing. These errors include IRS processing errors, unintentional taxpayer mistakes, and intentional taxpayer noncompliance, and result in forgone revenue as well as potential refund payments that may not have been made in the correct amounts.

Unlike prior tax gap estimates that pertain to a single tax year, these estimates reflect an estimated average compliance rate and associated average annual tax gap for the TY 2008—2010 timeframe. This approach was motivated by the decision to pool multiple years of compliance data from the annual individual income tax reporting compliance component of the NRP to provide greater reliability of individual income tax underreporting tax gap estimates by sources of noncompliance. The individual income tax NRP reporting compliance studies are the foundation for the individual income tax underreporting tax gap estimates.

#### **COMPLIANCE WITH INDIVIDUAL INCOME TAX CREDITS**

In addition to informing the tax gap estimate, the NRP data are used to conduct in-depth analyses of tax compliance problems, to guide IRS enforcement strategies (such as by building models that predict the types of returns most likely to have errors), and to develop legislative proposals aimed at improving compliance with the tax laws and reducing the tax gap. NRP data are also used to estimate the Earned Income Tax Credit (EITC) improper payment rate.

#### **Compliance Estimates**

The IRS is responsible for administering 21 non-refundable and refundable individual income tax credits. These credits account for an estimated 15 percent of the individual income tax underreporting tax gap. EITC accounts for 10 percent of the individual income tax underreporting tax gap estimate, followed by the refundable and nonrefundable child tax credit (3 percent), and the refundable and non-refundable education credits (2 percent).

These credits generally have many rules that determine eligibility, which may differ based on personal family and living arrangements. This complexity can cause tax credit errors.

As noted in the IRS response to TIGTA's required annual report of IRS' compliance with the reporting requirements contained in the *Improper Payments Elimination and Recovery Improvement Act* of 2012 (IPERIA) and related legislation and Executive Order 13520 (TIGTA 2016-40-036, *Without Expanded Math Error Authority Billions of Dollars in Identified Potentially Erroneous Earned Income Credit Claims Will Continue to Go Unaddressed Each Year*), the IRS stated that it plans further NRP analyses of Advanced Child Tax Credit (ACTC) and American Opportunity Tax Credit (AOTC) errors. In addition, compliance with Affordable Care Act (ACA) Premium Tax Credit (PTC) will be reported as part of the overall tax gap and in other compliance research, once data become available. TY 2014 represents the first year in which taxpayers received Advance Premium Tax Credit (APTC) payments, filed for PTC, and reconciled APTC payments and PTC amounts. NRP data for TY 2014 is expected to be available in late 2018.

#### **Relationship of Tax Compliance Estimation to Improper Payments**

The Improper Payments Elimination Recovery Act of 2010 (IPERA) requires certain reporting for payments programs determined to be susceptible to significant improper payments. The focus of IPERA, its subsequent amendments, and guidance documents, is on implementing internal controls to prevent and detect improper payments and does not take into consideration all aspects of administering tax provisions in a system that relies heavily on voluntary reporting. In keeping with IPERA requirements, the IRS has historically reported risk assessments for refundable credits and improper payment estimates for the EITC in the annual Agency Financial Report (AFR). The IRS has followed this practice largely because refundable credits may result in a payment in excess of tax liability. However, the distinction between the portion of a credit that offsets tax liability and the portion that is refundable is governed by multiple variables, including other return elements and information provided by the taxpayer, some of which are unrelated to the refundable credit in question. Evaluating only the refunded portion of a credit offers little insight into where tax compliance occurs or how the IRS should address compliance problems. In addition, the same features of the tax system and taxpayer behaviors that create the compliance problems with refundable credits also create the risk of noncompliance with other tax provisions. Furthermore, examining credits alone provides little guidance about how the IRS should allocate its scarce enforcement resources. The IRS reports on the EITC without regard to whether errors are the result of complexity in the tax code, taxpayer behavior, or IRS processes, and despite the fact that amounts of tax offset by the credit are currently considered negative revenue receipts.

Treasury and IRS analyses as well as audits by GAO and TIGTA have consistently found that payment errors for EITC and other tax credit programs are attributable to the complexity of the credits within the tax system, and not rooted in internal control weaknesses, financial management deficiencies, or financial reporting failures. Eligibility rules are complex and lead to high overclaim error rates for these credits.

#### Accountability for Administering Refundable Credits and Strengthening Program Integrity

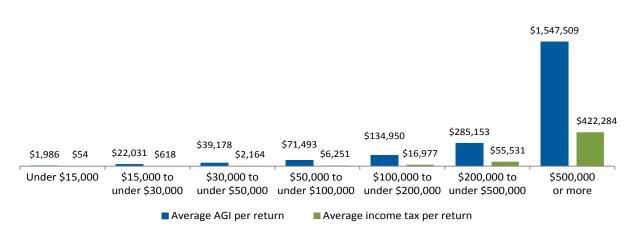

Strengthening program integrity throughout the organization is a Departmental priority, extending to senior executives and program officials at each of our agencies and programs. As evidence of this focus, beginning with senior leadership and cascading down, performance plans contain strategic goals related to strengthening program integrity, protecting taxpayer resources, and reducing erroneous refunds from taxpayers' overclaims. We evaluate senior executives and program officials as part of their semi-annual and annual performance evaluations on their progress toward achieving these goals.

#### TAX BURDEN

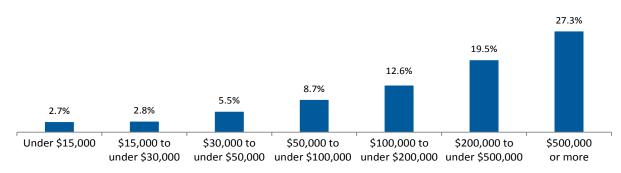

The IRC provides for progressive rates of tax, whereby higher incomes are generally subject to higher rates of tax. The following pages present in both graph and table format various income levels and their associated tax liabilities for individuals and corporations. This information is the most recent available for individuals (tax year 2014) and corporations (TY 2013). The graphs and charts are representative of more detailed data and analyses available from the IRS Statistics of Income office.

For individuals, the information illustrates, in both percentage and dollar terms, the tax burden borne by varying levels of Adjusted Gross Income. The corporate information illustrates, for varying corporate asset categories, the tax burden borne by these entities as a percentage of taxable income.

| \$250,000 under \$500,000   | 29,332                | 9,040                          | 30.8%                           |
| \$500,000 under \$2,500,000 | 133,541               | 39,321                         | 29.4%                           |
| \$2,500,000 or more         | 957,085               | 204,808                        | 21.4%                           |
| Total                       | \$ 1,258,483          | \$ 293,357                     |                                 |

## SECTION C: FREEZE THE FOOTPRINT

One of our key goals is the efficient and effective acquisition, utilization, management, and disposal of our real property assets. Under the direction of the Assistant Secretary for Management (ASM), the Senior Real Property Officer (SRPO) is responsible for ensuring that we develop and maintain appropriate procedures, reviews, and reporting requirements in accordance with our directives, and applicable OMB and GSA regulations that pertain to the acquisition, utilization, and disposal of real property.

The SRPO is responsible for tracking our real property square footage footprint, and developing the annual agency evaluation of compliance for the implementation of the Freeze the Footprint Policy. Under current Departmental directives, bureaus may not pursue any new lease space acquisitions without the approval of the ASM's office. To ensure the optimal utilization of our existing space inventory and to achieve real property cost saving and footprint reductions, we direct all bureaus to pursue consolidation or co-location opportunities into existing inventory before pursuing any new space acquisitions.

Additionally, we are taking other actions to maintain overall square footage and reduce the related costs associated with real property, including:

- Better utilizing real property by undertaking space realignment;
- Increasing teleworking, hoteling, and workspace sharing; and
- Maximizing utilization through improved work station standards.

Our total square footage and related operation and maintenance costs associated with real property assets subject to the Freeze the Footprint policy (from the latest available reporting year of 2015) compared to the FY 2012 Freeze the Footprint baseline (as assigned by GSA) were as follows:

|                                 | 2012          |         |        |
|---------------------------------|---------------|---------|--------|
| (in millions)                   | (Baseline)    | 2015    | Change |
|                                 |               |         |        |
| Square Footage                  | 30.0          | 27.6    | (2.4)  |
| Operation and Maintenance Costs | \$<br>80.9 \$ | 93.0 \$ | 12.1   |

# SECTION D: MANAGEMENT AND PERFORMANCE CHALLENGES AND THE SECRETARY'S RESPONSES

In accordance with the *Reports Consolidation Act of 2000*, the Inspectors General are required to identify specific management and performance challenges facing the Department. At the end of each fiscal year, the Treasury Office of Inspector General (OIG) and Treasury Inspector General for Tax Administration (TIGTA) send an update of these management challenges to the Secretary and cite any new challenges for the upcoming fiscal year. The Special Inspector General for the Troubled Asset Relief Program (SIGTARP) did not identify any management or performance challenges for the Office of Financial Stability (OFS). This section contains the management and performance challenges reported by OIG and TIGTA.

INSPECTOR GENERAL

#### DEPARTMENT OF THE TREASURY WASHINGTON, D.C. 20220

October 26, 2016

| INFORMATION | MEMORANDUM FOR SECRETARY LEW   |
|-------------|--|
| FROM:       | Eric M. Thorson  |
| SUBJECT:    | Management and Performance Challenges Facing the<br>Department of the Treasury (OIG-CA-17-003) |

In accordance with the Reports Consolidation Act of 2000, we are providing you with our perspective on the most serious management and performance challenges facing the Department of the Treasury (hereinafter Treasury or the Department).

We are reporting four challenges, which are updated from last year.

- Cyber Threats
- Efforts to Promote Spending Transparency and to Prevent and Detect Improper Payments
- Anti-Money Laundering and Terrorist Financing/Bank Secrecy Act Enforcement
- · Management of Treasury's Authorities Intended to Support and Improve the Economy

This year, we combined two challenges that were reported separately in the previous year's memorandum. Specifically, we incorporated last year's Challenge, "Gulf Coast Restoration Trust Fund Administration" into the broader Challenge, "Management of Treasury's Authorities Intended to Support and Improve the Economy." We did this because Treasury has implemented many of the requirements under these authorities. However, given the nature and large dollar amounts provided to Treasury to strengthen and restore the economy, ongoing administration will continue for a number of years.

In addition to the above challenges, we continue to report our elevated concerns about two matters: currency and coin production and documenting key activities and decisions. We have also added a new area of concern related to new Enterprise Risk Management (ERM) requirements that Treasury must implement beginning in fiscal year 2017.

#### Operating in an Uncertain Environment

In assessing the Department's most serious challenges, we remain mindful of external factors and future uncertainties that affect its operations. Most notable is the upcoming Presidential election and the transition under a new Administration that change brings. With the change in Administration many Presidentially-appointed, Senate-confirmed leadership positions within Treasury will become vacant. As such, tackling some of the more critical matters at hand could be more challenging.

Another uncertainty facing the Department involves the repeated cycle of budget and debt ceiling stopgaps. As I reported in my last memorandum to you, Congress has yet to resolve unfinished business when it comes to the Federal budget, the Nation's debt, and the long-term sustainability of the Social Security and Medicare programs. Although legislation was passed to temporarily extend the debt limit until March 15, 2017, no long-term solution has been found.

Other than the upcoming Presidential election and the resulting change in Administration, many of the circumstances the Department is operating under have remained the same as in the prior year. Cyber threats to Treasury operations and the financial sector will continue to be a serious risk for the foreseeable future. Additionally, Treasury continues to administer programs that are inherently high-risk, such as programs to combat terrorist financing. Throughout the years, Treasury has also been called upon to administer major new programs and initiatives intended to support and improve the country's economy. In nearly every case, the Department has had to start up and administer new programs and operations with thin staffing and very limited, if any, new resources. That situation remains the same and may possibly worsen during a period of transition. Again, we cannot emphasize enough to the Department's stakeholders how critically important it is that Treasury is resourced sufficiently to carry out its authorities and responsibilities to include maintaining a strong control environment.

#### 2017 Management and Performance Challenges

#### Challenge 1: Cyber Threats

Cybersecurity continues to represent one of the most serious challenges facing the Nation today. A reliable critical infrastructure, including information systems and networks, is vital to our national security and economic stability. Cyber threats are a persistent concern as Treasury's information systems are critical to the core functions of government and the Nation's financial infrastructure. As cyber threats continue to evolve and become more sophisticated and subtle, they pose an ongoing challenge for Treasury to fortify and safeguard its internal systems and operations and the financial sector it oversees.

Attackers frequently exploit vulnerable networks in a string of trusted connections to gain access to government systems. Cyber attacks against Federal agencies are increasing in frequency and severity. The cyber intrusion of the Department of State's networks was used as a route to penetrate computer systems at the White House and gain access to the President's e-mail account. An attack against the Joint Chief of Staff's e-mail forced management to take the system off line, cleanse it, and build in new protections. The recent cyber attacks against the Office of Personnel Management's networks allowed intruders access to personal data on tens of millions of people, including millions with security clearances. According to a recent report issued by the Government Accountability Office (GAO), approximately 1,000 out of 2,500 information security related recommendations made to agencies by GAO were still outstanding. Some of the impairments challenging agencies in implementing their information security programs include an inability to recruit and retain personnel with appropriate skills, not using key security capabilities of their existing systems and devices, use of unsupported or unpatched

software, a lack of in-depth security evaluations, and a lack of consistency in overseeing contractor providing information technology services.<sup>1</sup>

In our recent audits of selected Treasury bureaus, we continue to find that the security measures in place need improvement and many of our findings echo GAO's observations of agencies' impairments, noted above, compounded by competing priorities. In addition to Treasury's own networks and systems, management must be cognizant of, and mitigate, the risks posed by attacks made against other agencies and Treasury contractors and subcontractors. Treasury frequently enters into interconnection agreements with other Federal, State, and local agencies, and service providers, to conduct its business. Treasury management must exercise due care when authorizing such internetwork connections and verify that third parties comply with Federal policies and standards. Management is also challenged with ensuring that critical data and information maintained by cloud service providers are properly protected.

Cyber attacks on financial institutions continue to evolve at an accelerated rate, and include distributed denial of service attacks, phishing attacks, fraudulent wire payments, and ransomware. Organized hacking groups leverage published and unpublished vulnerabilities and vary their methods to make attacks hard to detect and even harder to prevent. Criminal groups and nation-states are constantly seeking to steal information; commit fraud; and disrupt, degrade, or deny access to information systems.

Effective public-private coordination continues to be required to address the cyber threat against the Nation's critical infrastructure. In this regard, Treasury is looked upon to provide effective leadership to financial institutions in particular, and the financial sector in general, to strengthen awareness and preparedness against cyber threats.

#### Challenge 2: Efforts to Promote Spending Transparency and to Prevent and Detect Improper Payments

#### Spending Transparency

The Digital Accountability and Transparency Act of 2014 (DATA Act) requires the Federal Government to provide consistent, reliable, and useful online data about how it spends taxpayer dollars. The stated purpose of the law is to:

- expand the Federal Funding Accountability and Transparency Act of 2006 by disclosing direct Federal agency expenditures and linking Federal contract, loan, and grant spending information to programs of Federal agencies, enabling taxpayers and policy makers to track Federal spending more easily;
- establish Government-wide data standards for financial data and provide consistent, reliable, and searchable Government-wide spending data that is displayed for taxpayers and policy makers on USASpending.gov (or a successor system);
- simplify reporting for entities receiving Federal funds by streamlining reporting requirements and reducing compliance costs while improving transparency;

<sup>&</sup>lt;sup>1</sup> Actions Needed to Address Challenges (GAO-16-885T; issued Sept. 19, 2016) http://www.gao.gov/assets/680/679877.pdf – Released

- improve the quality of data submitted to USASpending.gov by holding Federal agencies accountable for the completeness and accuracy of the data submitted; and
- apply approaches developed by the Recovery Accountability and Transparency Board to spending across the Federal Government.

Implementing the DATA Act is a complex undertaking requiring a significant level of interagency coordination and cooperation to develop, establish, and apply new financial data standards and to develop new data handling methodologies within a short timeframe. One of the first accomplishments for the Treasury Secretary and the Director of the Office of Management and Budget (OMB) was to establish Government-wide financial data standards for reporting spending by Federal agencies and entities receiving Federal funds by the May 2015 statutory deadline.

After a number of delays, Treasury released its DATA Act information model schema (DAIMS) on April 29, 2016 and the production-ready broker on September 30, 2016. The DAIMS prescribes relationships between data elements as well as format and data reporting validation requirements for transmitting these elements between agencies for publication on USASpending.gov. The production-ready broker collects, maps, transforms, validates, and submits agency data into a format consistent with DAIMS. However, the delays in releasing DAIMS and the productionready broker, have hindered agencies' ability to determine the full scope of their implementation effort required.

Other key mandates under the act require Treasury and OMB to:

- by May 2017, ensure this financial data is accurately posted and displayed on USASpending.gov, or a successor system; and
- by May 2018, ensure the data standards established are applied to the data made available on the website.

Inspectors General of each Federal agency are required by the act to perform three biennial reviews of a statistically valid sample of spending data submitted by its agency and the implementation of data standards by the agency. Agency Inspectors General must submit to Congress (and make publicly available) a report assessing the completeness, timeliness, guality, and accuracy of the data sampled, as well as the implementation and use of data standards by the Federal agency. As prescribed in the act, the first reports are due November 2016, with two others to follow in November 2018 and November 2020. However, the Inspectors General community identified an anomaly with the timing of these reviews in that the first required report on data submitted is due prior to the date that agencies are required to submit data in accordance with the Act, Therefore, the Treasury Office of Inspector General and the Federal Audit Executive Council DATA Act working group reached out to stakeholders in Congress and crafted a strategy to deal with this anomaly. The strategy was to extend the first required Inspectors General reports from November 2016 to November 2017, and to encourage the Inspectors General to perform "readiness reviews" of their respective agencies before the agency reporting date (and by November 2016, if possible). A letter documenting this strategy was signed by the CIGIE Chairman and sent to Congress on December 22, 2015.

Given the broad Government-wide implications and critical roles assigned to Treasury by the DATA Act, we consider this an ongoing high risk implementation project and management

challenge. It should be noted that we have initiated a series of audits of Treasury's efforts to meet its responsibilities under the DATA Act. As of this writing, we are performing three DATA Act audits focusing on Treasury's (1) Government-wide implementation efforts, (2) Departmentwide implementation efforts, and (3) Bureau of the Fiscal Service's Administrative Resource Center's efforts to report financial spending information on behalf of its customer agencies.

#### Detect Improper Payments

In light of the continuing problem with improper payments (estimated at \$136.7 billion, or 4.8 percent of all program outlays, for fiscal year 2015), the Federal Government has intensified efforts to reduce improper payments in major Federal programs. The Do Not Pay Initiative, and the Treasury Bureau of the Fiscal Service's (Fiscal Service) Do Not Pay Business Center, are chief components of efforts designed to prevent and detect improper payments to individuals and entities.

The Do Not Pay Business Center provides two services to agencies: the Do Not Pay Portal and the Do Not Pay Data Analytics Service. The Do Not Pay Portal is intended to provide users with a single entry point to search data sources such as the Social Security Administration's (SSA) publicly available Death Master File, the Department of Health and Human Service Office of Inspector General's List of Excluded Individuals/Entities, the General Services Administration's System for Award Management, and Treasury's Debt Check Database. However, as we reported in November 2014, the effectiveness of the Do Not Pay Business Center as a tool to prevent and detect improper payments is hindered because the center does not have access to, among other things, SSA's full death data.<sup>2</sup>

With its potential to reduce improper payments, the Do Not Pay Program is a major and important undertaking by Fiscal Service and Treasury. As part of our ongoing audit work in this area, we will continue to monitor the steps taken by Fiscal Service to improve the effectiveness of the Do Not Pay Business Center. We are also planning to review the Do Not Pay Program's data analytic capabilities during the coming fiscal year.

#### Challenge 3: Anti-Money Laundering and Terrorist Financing/Bank Secrecy Act Enforcement

As we reported in the past, preventing criminals and terrorists from using our financial networks to sustain their operations and/or launch attacks against the U.S. continues to be a challenge. Treasury's Office of Terrorism and Financial Intelligence (TFI) is dedicated to disrupting the ability of terrorist organizations to fund their operations. TFI brings together intelligence gathering and analysis, economic sanctions, international cooperation, and private-sector cooperation to identify donors, financiers, and facilitators supporting terrorist organizations, and disrupt their ability to fund such organizations. Enhancing the transparency of the financial system is one of the cornerstones of this effort.

Treasury carries out its responsibilities to enhance financial transparency through the Bank Secrecy Act (BSA). The Financial Crimes Enforcement Network (FinCEN) is the Treasury

<sup>&</sup>lt;sup>2</sup> OIG, Fiscal Service Successfully Established the Do Not Pay Business Center But Challenges Remain (OIG-15-006; Nov. 6, 2014)

bureau responsible for administering BSA, while Treasury's Office of Foreign Assets Control (OFAC) administers U.S. sanction programs.

TFI's ability to effectively gather and analyze intelligence information on financial crimes and terrorism requires a stable cadre of staff. Concerns over TFI's ability to meet mission critical objectives is heightened by multiple key positions left vacant. Some key leadership positions have been vacant for months and even years, including the Under Secretary for TFI and the Directors of FinCEN, OFAC, and the Treasury Executive Office for Asset Forfeiture. A stable workforce is imperative because of TFI's overarching responsibilities in intelligence gathering and coordination with international and public and private sector entities.

With respect to FinCEN, it faces continuing challenges to enhance financial transparency as a way to strengthen efforts to combat financial crime and collect, analyze, and report data on national threats. FinCEN has focused on enhancing its enforcement efforts to promote compliance with the BSA in partnership with Federal banking regulators and law enforcement. It continues to improve its enforcement processes and systems after its 2013 reorganization. Among other things, FinCEN has been working on clarifying and strengthening customer due diligence requirements. This includes requirements for institutions to identify beneficial ownership of their accountholders so that their true identities are not hidden. In May 2016, FinCEN issued the final rule with customer due diligence requirements and a new requirement to identify and verify the identity of beneficial owners of legal entity customers. Also, FinCEN was challenged with providing clarifying guidance to the financial community who may be reluctant to do business with State-legalized marijuana dispensaries. While these dispensaries remain illegal under Federal law, FinCEN's February 2014 guidance for financial institutions clarified reporting obligations with respect to services to marijuana-related businesses consistent with BSA obligations. This guidance includes conducting due diligence on prospective customers. Prepaid cards also present money laundering and terrorist financing risks. In 2011, FinCEN published a notice of proposed rule-making which requires those carrying prepaid cards with values over \$10,000 to declare them at the border (cross-border transactions). In 2015, OMB postponed the issuance of the final rule because it has not completed a budgetary review of the expected final rule.

Other matters of concern on the horizon include the increasing use of (1) mobile devices for banking, internet banking, internet gaming, and peer-to-peer transactions; and (2) virtual currencies.<sup>3</sup> FinCEN and other regulatory agencies will need to make sure that providers of these services who are covered by BSA understand their obligations under the statute. Monitoring the transactions of tomorrow may prove to be increasingly difficult for Treasury. In this regard, in 2013, FinCEN issued guidance on virtual currencies and regulatory responsibilities in order to provide clarity for businesses and individuals engaged in this expanding field of financial activity. FinCEN's rules defined certain businesses or individuals which use convertible virtual currencies or make a business of exchanging, accepting, and transmitting them as Money Service

<sup>&</sup>lt;sup>3</sup> Bitcoins are an example of a virtual currency. These consist of a series of numbers created automatically on a set schedule and traded anonymously between digital addresses or "wallets." Certain exchange firms buy or sell Bitcoins for legal tender at a rate that fluctuates with the market. Congress and regulators continue their efforts to determine the legality, legitimacy, and regulatory framework for virtual currencies such as Bitcoins.

Businesses (MSBs). MSBs have registration requirements and a range of anti-money laundering, recordkeeping, and reporting responsibilities under FinCEN's regulations.

Given the criticality of this challenge to the Department's mission, and notwithstanding the efforts described above, we continue to consider anti-money laundering and combating terrorist financing programs and operations as inherently high-risk.

#### Challenge 4: Management of Treasury's Authorities Intended to Support and Improve the Economy

Congress provided Treasury with broad authorities to address the financial crisis under the Housing and Economic Recovery Act of 2008 (HERA), the American Recovery and Reinvestment Act of 2009 (Recovery Act), and the Small Business Jobs Act of 2010. In response to the call for further financial reform, Congress passed Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank) in 2010. To address the more specific economic and environmental damage caused by the *Deepwater Horizon* oil spill in the Gulf Coast, Treasury was given authority to administer the Gulf Coast Restoration Trust Fund (Trust Fund) established under the Resources and Ecosystems Sustainability, Tourist Opportunities, and Revived Economics of the Gulf Coast States Act of 2012 (RESTORE Act). We also note that Treasury continues to administer programs established under the Troubled Asset Relief Program. That program, however, is not under the jurisdictional oversight of our office.

As we stated last year, to a large extent Treasury's program administration under these acts has matured, but challenges remain in managing Treasury's programs and its outstanding investments as well as ensuring financial reform and economic recovery. Our discussion of this challenge will begin with reforms under Dodd-Frank and then address the others for which Treasury is responsible.

#### Continued Implementation of Dodd-Frank

Among other things, Dodd-Frank established the Financial Stability Oversight Council (FSOC), which you chair as the Treasury Secretary. FSOC accomplished much over the past year. It issued its sixth annual report in June 2016 as required, and rescinded the designation of one nonbank financial company for supervision by the Board of Governors of the Federal Reserve System (FRB). Additionally, FSOC released the results of a study on the effects of size and complexity of financial institutions on capital market efficiency and economic growth. FSOC continues its analysis of potential financial stability risks that may arise from certain asset management products and activities. FSOC must continue to work in an effective manner to meet all of its responsibilities.

Dodd-Frank also established the Council of Inspectors General on Financial Oversight (CIGFO), which I chair as the Treasury Inspector General. The Council facilitates the sharing of information among member Inspectors General with a focus on reporting our concerns that may apply to the broader financial sector and ways to improve financial oversight. As required, CIGFO met quarterly and issued its sixth annual report in July 2016.

As we have stated in the past, the intention of Dodd-Frank is most notably to prevent, or at least minimize, the impact of a future financial sector crisis on the U.S. economy. To accomplish this,

Dodd-Frank placed great responsibility with the Secretary of the Treasury, as Chairman of FSOC. Management's challenge from our perspective is to maintain an effective FSOC process that timely identifies and appropriately responds to emerging risks, particularly in times of economic growth when government action to curtail risky behavior in marketplaces can be unpopular and seen as unnecessary.

#### Small Business Jobs Act

A \$30 billion Small Business Lending Fund (SBLF) was established within Treasury to assist financial institutions with increasing the availability of credit to small businesses. It also provided Treasury with \$1.5 billion to allocate to eligible State programs through the State Small Business Credit Initiative (SSBCI). These programs represented key initiatives to support job creation by facilitating increased lending to small businesses.

Under SBLF, Treasury invested approximately \$4 billion in 332 participating banks and Community Development Loan Funds (CDLF), which was intended to stimulate lending to small businesses. As of August 2016, 254 institutions have exited the program redeeming approximately \$3.6 billion of their securities. With dividend and interest rates as high as 13.8 percent, it is expected that remaining bank participants will continue exiting the program, but some of these institutions may have difficultly redeeming their securities. Of the 78 participants remaining in the program, more than half comprise CDLFs, which pay an interest rate of two percent during the first eight years in the program, and nine percent thereafter. While the number of participants has decreased significantly since the SBLF program's inception, Treasury must ensure that dividends and interests owed from remaining participants are paid.

Under SSBCI, Treasury disbursed approximately \$1.4 billion to 57 participating States, territories, and eligible municipalities as of March 2016. These funds may be used for programs that partner with private lenders and investors to extend credit to or invest in small businesses. Treasury must ensure that SSBCI participants are accountable for the proper use of these funds as primary oversight is at the participant level. An additional challenge to Treasury's oversight is that, if the SSBCI program is not reauthorized by Congress, its authority to administer the program ends after fiscal year 2017. As such, Treasury will need to recoup funds our office determines were recklessly or intentionally misused before the program ends.

We recognize that the SBLF and SSBCI programs are reaching maturity. However, Treasury must still exercise sufficient oversight while winding down these programs.

#### Housing and Economic Recovery Act

Treasury supports the financial solvency of the Federal National Mortgage Association (Fannie Mae) and the Federal Home Loan Mortgage Corporation (Freddie Mac), which continue to operate under the conservatorship of the Federal Housing Finance Agency. To maintain the positive net worth of these two government sponsored enterprises (GSE), Treasury has invested approximately \$189 billion in senior preferred stock in the two enterprises.<sup>4</sup> While the GSEs have not required additional support since fiscal year 2012, their futures remain uncertain and

<sup>&</sup>lt;sup>4</sup> Treasury's cumulative investment of \$189 billion in the GSEs' senior preferred stock is comprised of approximately \$117 billion in Fannie Mae and approximately \$72 billion in Freddie Mac.

further assistance may be required. If such support is needed, the current funding capacity available to Fannie Mae is \$117.6 billion and available to Freddie Mac is \$140.5 billion.

Treasury must also continue to monitor the underlying assets of its \$7.1 billion investment in the GSEs under the Housing Finance Agency Initiative, which supports State and local housing finance agencies.

Until a solution to address housing finance reform is reached, it is difficult to predict what lies ahead for winding down the GSE investments.

#### Recovery Act

Since 2009, Treasury has been responsible for overseeing an estimated \$150 billion of funding and tax relief for programs intended to strengthen the economy through financial stimulus. While funding for non-Internal Revenue Service programs is coming to a close, Treasury continues to oversee awards totaling around \$30 billion under Treasury's payments-in-lieu of tax credit programs – to persons for specified energy properties and to States for low-income housing projects. In this regard, approximately 101,000 recipients remain obligated to comply with the terms of their awards over an extended period of time (5 years for specified energy property payments and 15 years for funded low-income housing projects). The level of risk involved in this program is evidenced by the fact that our Office of Investigations has several open matters involving program participants. Furthermore, Treasury's energy program continues to attract Congressional and media interest.

#### RESTORE Act

In response to the 2010 *Deepwater Horizon* oil spill, Congress enacted the RESTORE Act, which among other things, established within Treasury the RESTORE Act Trust Fund. Eighty percent of administrative and civil penalties paid by responsible parties pursuant to the Federal Water Pollution Control Act (Clean Water Act) are to be deposited into the Trust Fund and distributed, as stipulated by the act, for the economic and environmental restoration of the Gulf Coast region.

As of this writing, the Trust Fund received approximately \$936 million as a result of the Federal government's settlements with Transocean and Anadarko defendants as well as interest payments. The Trust Fund is further expected to receive deposits of \$4.4 billion plus interest over a 15-year period from the Federal government's settlement with BP Exploration & Production Inc. Deposits are to begin in April 2017.

Distributions from the Trust Fund are allocated among five components that are managed by three administrators. Treasury is responsible for administering the Direct Component (35 percent) and the Centers of Excellence Research Grants Program Component (2.5 percent). The Gulf Coast Ecosystem Restoration Council (Council)<sup>5</sup> is responsible for managing 60 percent of

<sup>&</sup>lt;sup>5</sup> The Gulf Coast Ecosystem Restoration Council consists of the following members, or designees: (1) at the Federal level, the Secretaries of the Interior, Army, Commerce, Agriculture, the head of the department in which the Coast Guard is operating (currently the Secretary of Homeland Security), and the Administrator of the Environmental Protection Agency; and (2) at the State level, the Governors of Alabama, Florida, Louisiana, Mississippi, and Texas.

# Page 10

the Trust Fund distributions allocated to the Council-Selected Restoration Component (30 percent) and the Spill Impact Component (30 percent). The National Oceanic and Atmospheric Administration (NOAA) administers the Science Program Component (2.5 percent). Now that funds are beginning to flow from the Trust Fund, potential risks on the horizon include potential irregularities in the awarding of contracts, misallocation of grant proceeds, duplication of funding for projects, and noncompliance with the laws, regulations, or standard operating procedures. Failure to properly monitor funded activities and funding programs that fail to promote the restoration of the Gulf Coast region create additional exposure to the Trust Funds.

In addition to the Trust Fund, there is a multitude of funding sources available for the economic and environmental restoration of the region given the impact of the oil spill to the Gulf Coast region. Managing restoration activities will be difficult as there is no statutory requirement for all affected parties to coordinate restoration activities, and there is no central authority to identify potential overlaps. In its RESTORE Act rule, effective February 12, 2016, Treasury notes that beyond what the RESTORE Act stipulates, it cannot require the Council, NOAA, States, counties, or parishes to coordinate their selection of projects across components in order to achieve particular economic or environmental goals. However, voluntary efforts to coordinate activities are encouraged. Treasury further intends to facilitate these efforts by publishing Direct Component Multiyear Implementation Plans and other information related to the grant programs it administers.

Going forward, it is expected that demands for technical assistance from the Office of Gulf Coast Restoration will increase now that several Direct Component Multiyear Implementation Plans have been accepted by Treasury and a number of Direct Component planning assistance and construction grants have been awarded.

# Other Matters of Concern

Although we are not reporting these as management and performance challenges, we are highlighting three areas of concern. Two areas of concern are repeated from last year's letter: (1) currency and coin production and (2) documenting key activities and decisions. In addition, we have added a new area of concern, Enterprise Risk Management.

# Currency and Coin Production

In 2012, we reported on deficiencies with the Bureau of Engraving and Printing's (BEP) production process, which led to 1.4 billion finished NexGen \$100 notes being printed (in 2010) but not accepted by FRB because creasing was detected in some of the finished notes. Although the production problems were identified and sufficiently resolved and FRB began supplying financial institutions with the redesigned NexGen \$100 notes in 2013, BEP and FRB still need to decide on the disposition of the 1.4 billion finished notes that have not been accepted by FRB. Furthermore, BEP plans to redesign the \$20, \$10, and \$5 notes and will need to ensure that the design and production projects are adequately managed to avoid another instance of production deficiencies similar to those identified with the rollout of the \$100 note.

#### Page 11

Another matter related to currency redesign that should be kept in mind is meaningful access to U.S. currency for blind and visually impaired individuals. In response to a court ruling on that matter, in 2011 Treasury submitted a three-element approach to provide such access. Two elements of this approach—raised tactile features and large, high-contrast numerals—require changes to the design of currency. The third element is a three-phased program started in 2014 to provide currency readers. The lessons learned from the NexGen \$100 note production process underscore the need for sound and comprehensive project management as BEP undertakes this redesign effort.

Challenges continue to exist with coin production at the U.S. Mint (Mint). For example, the cost of producing penny and nickel coins were double their face value because rising metal prices have resulted in higher production costs. The Mint has undertaken a comprehensive review of U.S. currency to include the production and use of coins, the use of alternative metals, and the suitability of Mint facilities for production.

In addition to concerns over currency and coin production, it is imperative that BEP and the Mint consider the effect of alternative payment methods and other technological advances (such as stored value cards, the Internet, smartphones, and virtual currencies) as well as consumer demand on their respective business models, practices, future planning and interactions with their customers, and FRB.

## Documenting Key Activities and Decisions

In prior years, I have cited several audits by my office that highlighted lapses by the Department in maintaining a complete and concurrent record of key activities and decisions. In several audits, we reported ongoing concern over the lack of documentation supporting the selection of financial agents such as those to administer Treasury's investment in Fannie Mae and Freddie Mac and Fiscal Service's Direct Express<sup>®</sup> Debit MasterCard,<sup>®</sup> as well as, Fiscal Service's selection of financial agents to provide banking services to the Federal Bureau of Prisons. Insufficient documentation was also reported with regard to Treasury's consultative role with the Department of Energy's Solyndra loan guarantee and the Office of the Comptroller of the Currency's oversight of foreclosure-related consent orders. We believe developing and maintaining proper documentation supports transparency and confidence in Treasury's decision making process.

Maintaining proper documentation is a fundamental tenet of government accountability and transparency. Maintaining proper documentation is also in the best long-term interest of Treasury and its component offices and bureaus if actions are later questioned, as they have been. In this regard, appropriate documentation can be as simple as contemporaneous notes providing a record of why decisions were made, the way they were made, and how the Federal Government satisfied itself that the decisions were the best course of action. Also adding to the documentation challenge is the increase in Federal retirements along with the resulting loss of institutional knowledge. We do note that Treasury has issued policy that addresses documentation requirements, such as Treasury Directive 80-05, "Records and Information Management Program." We also believe that policies and procedures are essential to ensure critical functions (1) continue when personnel change and (2) are carried out in a consistent manner in accordance with management's direction. In our view, issues

Page 12

with maintaining documentation and policies and procedures are a matter of Treasury management and personnel needing to remain aware and vigilant.

Enterprise Risk Management

The Office of Management and Budget's revised Circular No. A-123, *Management's Responsibility for Enterprise Risk Management and Internal Control*, requires agencies to develop an ERM capability to integrate strategic planning and review processes and internal control processes. Agencies must begin ERM implementation starting fiscal year 2017 by developing an ERM governance structure and beginning to work on an agency-wide risk profile. This requires close collaboration across all mission and mission-support functions. The challenges highlighted in this letter should be considered as Treasury establishes a comprehensive and effective ERM program.

We would be pleased to discuss our views on the management and performance challenges and the other matters expressed in this memorandum in more detail.

cc: Kody H. Kinsley Assistant Secretary for Management

DEPARTMENT OF THE TREASURY WASHINGTON, D.C. 20005

FOR TAX ADMINISTRATION

October 6, 2016

# MEMORANDUM FOR SECRETARY LEW

FROM: J. Russell George J. Number Manage

SUBJECT: Management and Performance Challenges Facing the Internal Revenue Service for Fiscal Year 2017

The Reports Consolidation Act of 2000<sup>1</sup> requires that the Treasury Inspector General for Tax Administration (TIGTA) summarize, for inclusion in the annual *Department of the Treasury Agency Financial Report*, its perspective on the most serious management and performance challenges confronting the Internal Revenue Service (IRS).

Each year, TIGTA evaluates IRS programs, operations, and management functions to identify the areas of highest vulnerability to the Nation's tax system. For Fiscal Year (FY) 2017, the top management and performance challenges, in order of priority, are:

- Security Over Taxpayer Data and Protection of IRS Resources;
- 2. Identity Theft and Impersonation Fraud;
- Implementing the Affordable Care Act and Other Tax Law Changes;
- Improving Tax Compliance;
- Reducing Fraudulent Claims and Improper Payments;
- Improving Tax Systems and Expanding Online Services;
- Providing Quality Taxpayer Service Operations;
- 8. Impact of Global Economy on Tax Administration;
- 9. Protecting Taxpayer Rights; and
- 10. Achieving Program Efficiencies and Cost Savings.

TIGTA's assessment of the major IRS management challenges for FY 2017 has changed from the prior fiscal year. The trillions of dollars that flow through the IRS each year make it an attractive target for criminals who exploit the tax administration system in various ways for personal gain. Tax-related identity theft continues to have a significant impact on both the IRS and on victims of this crime. In addition, other attempts to defraud tax administration are also increasing. These scams, and the methods used to perpetrate them, are continually changing and require constant

<sup>&</sup>lt;sup>1</sup> 31 U.S.C. § 3516(d) (2006).

monitoring by the IRS. As a result, TIGTA has added Identity Theft and Impersonation Fraud as the number two challenge facing the IRS.

Although not listed this year, human capital remains a serious underlying issue that impacts all 10 of the Major Management Challenges. Between fiscal years 2010 and 2016, the IRS budget decreased by more than \$900 million to approximately \$11.2 billion and the IRS lost approximately 12,000 full-time employees, including many with substantial institutional knowledge and technical expertise. TIGTA has reported how this trend of lower budgets and reduced staffing has affected the IRS's ability to deliver its priority program areas, including customer service and enforcement activities.<sup>2</sup> In FY 2017, it is likely that the IRS will continue to face budgetary pressure.

The following information detailing the management and performance challenges is provided to promote economy, efficiency, and effectiveness in the IRS's administration of the Nation's tax laws.

# SECURITY OVER TAXPAYER DATA AND PROTECTION OF IRS RESOURCES

As cybersecurity threats against the Federal Government continue to grow, protecting the confidentiality of taxpayer information will continue to be a top concern for the IRS. According to the Department of Homeland Security's U.S. Computer Emergency Readiness Team, Federal agencies reported 77,183 cyberattacks in FY 2015, an increase of approximately 10 percent from FY 2014.<sup>3</sup> The increasing number of data breaches in the private and public sectors means more personally identifying information than ever before is available to unscrupulous individuals. Much of the data is detailed enough to enable circumvention of most authentication processes. Therefore, it is critical that the methods the IRS uses to authenticate individuals' identities promote a high level of confidence that tax information and services are provided only to individuals who are entitled to receive them.

TIGTA reported that although the IRS recognizes the growing challenge it faces in establishing effective authentication processes and procedures, the IRS has not established a Service-wide approach to managing its authentication needs.<sup>4</sup> As a result, the level of authentication the IRS uses for its various services is not consistent. Specifically, TIGTA found that while the IRS is evaluating potential improvements to existing authentication methods for the purpose of preventing identity theft, it is not developing overall strategies to enhance authentication methods across IRS functions and programs.

<sup>&</sup>lt;sup>2</sup> TIGTA, Ref. No. 2014-10-025, Implementation of Fiscal Year 2013 Sequestration Budget Reductions (June 2014) and TIGTA, Ref. No. 2015-30-035, Reduced Budgets and Collection Resources Have Resulted in Declines in Taxpayer Service, Case Closures, and Dollars Collected (May 2015). <sup>3</sup> Office of Management and Budget, Annual Report to Congress: Federal Information Security

<sup>&</sup>lt;sup>4</sup> Office of Management and Budget, Annual Report to Congress: Federal Information Security Modernization Act (Mar. 2016).
<sup>4</sup> TIGTA, Ref. No. 2016-40-007, Improved Tax Return Filing and Tax Account Access Authentication

<sup>&</sup>lt;sup>4</sup> TIGTA, Ref. No. 2016-40-007, Improved Tax Return Filing and Tax Account Access Authentication Processes and Procedures Are Needed (Nov. 2015).

The existence of differing levels of authentication assurance among the various access methods increases the risk of unscrupulous individuals accessing and obtaining personal taxpayer information and/or defrauding the tax system. In August 2015, the IRS indicated that unauthorized users had been successful<sup>5</sup> in obtaining information on the Get Transcript application for an estimated 334,000 taxpayer accounts. TIGTA identified additional suspicious accesses to taxpayers' accounts that the IRS had not identified.<sup>6</sup> Based on TIGTA's analysis of Get Transcript access logs, we identified 620,931 taxpayers whose tax account information involved a potentially unauthorized access not identified by the IRS. Further analysis of these access attempts found that potentially unauthorized users were successful in obtaining access to 355,262 of the taxpayers' accounts.

The IRS has subsequently undertaken a number of steps to improve systems and provide for more secure authentication, including strengthening application and network controls.<sup>7</sup> However, TIGTA reported that additional actions could further improve security over the authentication process. The IRS did not clearly specify which parties, including IRS divisions and contractors, were responsible for detecting and preventing such automated attacks. At the time of the Get Transcript incident, audit log reports were not being adequately monitored and these reports did not contain summary information that could be used to identify trends. Additionally, the IRS did not provide responsible staff with the tools and training needed to monitor and analyze large amounts of audit log data.

TIGTA also reported that the IRS did not complete the required authentication risk assessment for its Identity Protection Personal Identification Number (IP PIN) application. We recommended multiple times to the IRS not to reactivate its online IP PIN application for the 2016 Filing Season, due to concerns that the IP PIN authentication process required knowledge of the same taxpayer information that was used by unscrupulous individuals to breach the Get Transcript application.

The risk of unauthorized access to tax accounts will continue to grow as the IRS proceeds with its Future State initiative<sup>8</sup> and focuses its efforts on delivering online tools to taxpayers. The IRS's goal is to eventually provide taxpayers with dynamic online account access that includes viewing their recent payments, making minor changes and adjustments to their accounts, and corresponding digitally with the IRS.

<sup>&</sup>lt;sup>5</sup> A successful access is one in which the unauthorized users successfully answered identity-proofing and knowledge-based authentication questions required to gain access to taxpayer account information. <sup>6</sup> TIGTA, Ref. No. 2016-40-037, *The Internal Revenue Service Did Not Identify and Assist All Individuals Potentially Affected by the Get Transcript Application Data Breach* (May 2016).

 <sup>&</sup>lt;sup>7</sup> TIGTA, Ref. No. 2016-20-082, Improvements Are Needed to Strengthen Electronic Authentication Process Controls (Sept. 2016).
 <sup>8</sup> Preparing the IRS to adapt to the changing needs of taxpayers is described generally as the IRS Future.

<sup>&</sup>lt;sup>o</sup> Preparing the IRS to adapt to the changing needs of taxpayers is described generally as the IRS Future State initiative. A key part of this effort is for taxpayers to have a more complete online experience for their IRS interactions.

In addition to unauthorized access by external parties, the insider threat posed by IRS employees abusing their access to Federal tax information and then disclosing it to others or using the tax data themselves to commit identity theft refund fraud remains a major concern. In one recent Federal prosecution case, an IRS National Taxpayer Advocate employee was sentenced to 110 months in Federal prison and ordered to pay approximately \$438,000 in restitution for her role in orchestrating a large-scale identity theft refund scheme and attempting to obtain more than \$1 million in fraudulent refunds.9

Besides safeguarding a vast amount of sensitive financial and personal data, the IRS must also protect its employees and more than 550 offices. In the last several years. threats directed at the IRS have remained the second largest component of the TIGTA Office of Investigations' work. Recent incidents involving taxpayers who threatened or assaulted IRS employees underscore the dangers that employees face each day. For example, in May 2016, as a result of a criminal complaint filed by a TIGTA special agent,<sup>10</sup> TIGTA agents arrested an individual who threatened a revenue officer with a shotgun.11 Physical violence, harassment, and intimidation of IRS employees continue to pose challenges to the implementation of a fair and effective system of tax administration

# IDENTITY THEFT AND IMPERSONATION FRAUD

Tax-related identity theft continues to have a significant impact on tax administration. Identity theft for the purpose of tax fraud occurs when an individual uses another person's name and Taxpayer Identification Number (TIN), generally a Social Security Number, to file a fraudulent tax return to obtain a tax refund. Unscrupulous individuals are stealing identities at an alarming rate for this purpose. The IRS has described identity theft as one of its "Dirty Dozen" scams.<sup>12</sup>

Since 2012, TIGTA has issued a series of reports assessing the IRS's efforts to detect and prevent fraudulent tax refunds resulting from identity theft. The IRS has implemented many of TIGTA's recommendations and has continued its efforts to improve its detection processes. However, because new identity theft patterns are constantly evolving, the IRS needs to continuously adapt its detection and prevention processes. For example, identity theft also affects businesses. In September 2015, TIGTA determined that processing filters could be developed to identify business tax

<sup>&</sup>lt;sup>9</sup> N.D. Ala. Judgment filed Aug. 26, 2016.

<sup>&</sup>lt;sup>10</sup> S.D. Fla. Crim. Complaint filed May 20, 2016.
<sup>11</sup> S.D. Fla. Crim. Docket filed May 20, 2016.

<sup>12</sup> Compiled annually, the "Dirty Dozen" lists a variety of common scams that taxpayers may encounter.

returns containing certain characteristics that could indicate potential identity theft cases.13

In December 2015, Congress passed legislation to address TIGTA's ongoing concern about limitations in the IRS's ability to prevent the continued issuance of billions of dollars in fraudulent tax refunds.<sup>14</sup> We reported that the IRS did not have timely access to third-party income and withholding information needed to make substantial improvements in its fraud detection efforts. The recently enacted legislation now requires the annual filing of income and withholding information by January 31. beginning in 2017.15 These forms were previously due no later than March 31 (February 28 for forms filed via paper) each year. Access to this information at the beginning of the filing season is an important tool to detect and prevent tax fraud-related identity theft.

Individuals can also learn that they are victims of employment-related identity theft if they receive a notification from the IRS of an income discrepancy between the amount reported on a tax return and the amount employers reported to the IRS. This can occur when a taxpayer's stolen identity is used to gain employment. It can cause significant burden due to the incorrect computation of taxes and Social Security benefits based on income that does not belong to the taxpaver. In response to a TIGTA recommendation. the IRS is developing processes and procedures to notify taxpayers who may be victims of employment-related identity theft.

In addition, the IRS must work to protect taxpayers by educating them on the numerous schemes currently employed by criminals posing as IRS employees intent on deceiving taxpayers into providing their personal financial information or coercing them into paying money on phony tax obligations through wire transfers or preloaded debit cards. One of those schemes, the telephone impersonation scam, continues to be one of TIGTA's top priorities and has also landed at the top of the IRS's "Dirty Dozen" tax scams. The number of complaints TIGTA has received about this scam continues to climb. cementing its status as the largest, most pervasive impersonation scam in the history of our agency. As of August 15, 2016, TIGTA's Office of Investigations has received more than 1.5 million reports of these calls; 8,274 victims of this scam have reported to TIGTA they have collectively paid a total of more than \$45 million, an average of approximately \$5,511 per victim. The highest reported loss by any one individual exceeded \$500,000.

These criminals continuously change their tactics, hoping to ensnare even more victims. In addition to requesting payments in the form of wire transfers or preloaded debit cards, the scammers are now tricking victims into paying phony tax obligations with

However, Additional Actions Can Help Improve Detection (Sept. 2015).

<sup>&</sup>lt;sup>13</sup> TIGTA, Ref. No. 2015-40-082, Processes Are Being Established to Detect Business Identity Theft;

Consolidated Appropriations Act, 2016, Pub. L. No. 114-113, Div. Q, § 201 (2015). 15 Id.

iTunes<sup>®</sup> cards.<sup>16</sup> As of August 15, 2016, 2,480 victims have reported paying approximately \$7.8 million in iTunes cards. The highest dollar loss reported using iTunes cards was \$200,000. Because of the complexity of the scammers' operations, the telephone impersonation scam will continue to pose a challenge to both the IRS and TIGTA as scams such as these are not typically resolved quickly and they place a strain on limited IRS and TIGTA resources. Many taxpayers are aware of the impersonation scam through public service announcements and other outreach efforts which, in turn, creates other challenges for the IRS when those taxpayers question legitimate IRS employees who are conducting official IRS business. Taxpayers have even threatened employees or called the police because they thought IRS employees were impostors.

In addition to the telephone impersonation scam, taxpayers also fall victim to other scams. We continue to receive reports of people who have become victims of lottery winning scams and we are also seeing an uptick in the number of reported phishing attempts.<sup>17</sup> The lottery scam starts with an unsolicited e-mail or telephone call from an impersonator to an unsuspecting victim. The caller tells the intended victim that they have won a lottery or other valuable prize; however, in order to collect the prize, the victim must send money to prepay the tax on the winnings to the IRS. A new phishing scheme involves scammers sending e-mails purporting to be a business's Chief Executive or Financial Officer. These e-mails notify the employees there has been a mistake on their Form W-2, *Wage and Tax Statement*, and direct the employees to either e-mail their Form W-2 to the sender, or to provide information that was on the Form W-2 for verification. Both approaches result in the theft of the employee's identity information.

# IMPLEMENTING THE AFFORDABLE CARE ACT AND OTHER TAX LAW CHANGES

Implementation of the Patient Protection and Affordable Care Act (Affordable Care Act)<sup>18</sup> will continue to present challenges for the IRS. The Affordable Care Act provides incentives and tax breaks to individuals and small businesses to offset health care expenses and imposes penalties for individuals and businesses that do not obtain health care coverage for themselves or their employees. The IRS continues its efforts to verify claims for the Premium Tax Credit (PTC)<sup>19</sup> and must implement processes and

<sup>&</sup>lt;sup>18</sup> An Apple Inc.<sup>®</sup> gift card which can be used to purchase anything available on the Apple App Store, iTunes Store, iBooks Store, or Mac App Store.

<sup>&</sup>lt;sup>17</sup> A fraudulent attempt, usually made through e-mail, to steal an individual's personal information by posing as a trustworthy person or entity.

<sup>&</sup>lt;sup>18</sup> Pub. L. No. 111-148, 124 Stat. 119 (2010) (codified as amended in scattered sections of the Internal Revenue Code and 42 U.S.C.), as amended by the Heath Care and Education Reconciliation Act of 2010, Pub. L. No. 111-152, 124 Stat. 1029.

<sup>&</sup>lt;sup>19</sup> A refundable tax credit to assist individuals and families in purchasing health insurance coverage through an Affordable Insurance Exchange.

procedures to ensure taxpayer compliance with Minimum Essential Coverage<sup>20</sup> and Shared Responsibility Payment<sup>21</sup> requirements. The IRS will also have to implement processes and procedures to ensure employer compliance with Affordable Care Act provisions. Employers that do not offer health insurance coverage, or offer health insurance coverage that does not meet minimum requirements, may be subject to an Employer Shared Responsibility Payment.

For the 2016 Filing Season, as of May 5, 2016, the IRS reported that it processed more than 4.7 million tax returns that reported \$19 billion in PTCs that were either received in advance or claimed at the time of filing. This is a significant increase from the 2015 Filing Season when more than 2.7 million tax returns were processed with PTCs totaling more than \$8.8 billion.

TIGTA reported that its evaluation of the IRS's verification of PTC claims during the 2015 Filing Season identified that not all Exchanges<sup>22</sup> provided monthly Exchange Periodic Data<sup>23</sup> to the IRS prior to the start of the 2015 Filing Season as required. Without the required Exchange Periodic Data, the IRS is unable to ensure that individuals claiming the PTC met the most important eligibility requirement—that the insurance was purchased through an Exchange. In addition, we found that processes did not use the most current tax filing data to identify individuals who received Advance PTC<sup>25</sup> payments but did not file the required tax return. As a result, letters were erroneously mailed to taxpavers who had in fact filed their required tax return.

We also reported that controls over the financial accounting for disbursements associated with the PTC should be improved.26 Specifically, we found errors in the IRS financial accounting and reporting of PTC-related fund outlays. Due to a programing error, the IRS understated the amount of PTC disbursements and overstated the balance in the IRS PTC account by \$447 million. Further, the error we identified in the

<sup>&</sup>lt;sup>20</sup> Minimum Essential Coverage is health insurance coverage that contains essential health benefits including emergency services, maternity and newborn care, and preventive and wellness services. Minimum Essential Coverage also includes doctor visits, hospitalization, mental health services, and prescription drugs.

A payment based on each month that individuals or their dependents are without Minimum Essential Coverage and do not gualify for an exemption.

The Exchange is where taxpayers find information about health insurance options, purchase qualified health plans, and, if eligible, obtain help paying premiums and out-of-pocket costs.

<sup>&</sup>lt;sup>29</sup> The Affordable Care Act requires Exchanges to provide the IRS with information regarding individuals who are enrolled by the Exchange on a monthly basis. These data are referred to as Exchange Periodic

Data. <sup>24</sup> TIGTA, Ref. No. 2016-43-033, Affordable Care Act: Internal Revenue Service Verification of Premium Tax Credit Claims During the 2015 Filing Season (Mar. 2016). <sup>25</sup> An Advance PTC is paid in advance to a taxpayer's insurance company to help cover the cost of

premiums. <sup>26</sup> TIGTA, Ref. No. 2016-13-021, Affordable Care Act: Controls Over Financial Accounting for the

Premium Tax Credit Should Be Improved (Mar. 2016).

financial accounting records, if left uncorrected, would have resulted in a misstatement of the FY 2015 IRS financial statements.

In addition to the Affordable Care Act, the IRS was challenged during the 2016 Filing Season by the passage of legislation that extended a number of expired tax provisions.<sup>27</sup> For example, the Trade Preferences Extension Act of 2015<sup>28</sup> impacted the 2016 Filing Season and prohibits individuals claiming the foreign earned income exclusion or housing deduction from receiving the refundable Additional Child Tax Credit (ACTC). This Act also retroactively extended the Health Coverage Tax Credit for Tax Year 2014 and continued the credit through Tax Year 2019.<sup>29</sup>

Further, the Protecting Americans From Tax Hikes Act of 2015,<sup>30</sup> includes program integrity provisions specifically intended to reduce fraudulent and improper Earned Income Tax Credit (EITC), Child Tax Credit, ACTC, and the American Opportunity Tax Credit (AOTC) payments. These integrity provisions expanded the IRS's ability to verify earned income before claims are paid, increased tax return preparer due diligence requirements and taxpayer reporting requirements, and expanded the IRS's ability to ban individuals previously determined to have filed reckless or fraudulent Child Tax Credit and AOTC claims from receiving the credit. The majority of the program integrity provisions are effective January 1, 2017.

# IMPROVING TAX COMPLIANCE

Despite IRS efforts to reduce it, the Tax Gap remains a serious and persistent challenge. The Tax Gap is defined as the difference between the estimated amount taxpayers owe and the amount they voluntarily and timely pay for a tax year. In FY 2016, the IRS issued Tax Gap estimates for Tax Years 2008 through 2010 that suggest compliance is substantially unchanged since the last estimate for Tax Year 2006. The Tax Gap for Tax Years 2008 through 2010 is estimated to be \$458 billion annually, compared to the \$450 billion estimated for Tax Year 2006. In an effort to lower the Tax Gap, the IRS identifies questionable tax returns to determine if any adjustments to the information reported on the tax returns are needed. In addition, the IRS issues notices and contacts taxpayers to collect delinquent taxes. If necessary, the IRS takes enforcement action, such as filing liens and seizing assets, to collect the taxes. In FY 2015, 44 percent of the IRS's appropriation was allocated to closing the Tax Gap through the enforcement of tax laws.

During FY 2015, reductions in staffing and available funding for enforcement activities contributed to a decrease in enforcement revenue, an increase in delinquent account inventory within the collection functions, and a decrease in the number of examinations.

<sup>&</sup>lt;sup>27</sup> TIGTA, Ref. No. 2016-40-034, Interim Results of the 2016 Filing Season (Mar. 2016).

<sup>28</sup> Pub. L. No. 114-27.

<sup>&</sup>lt;sup>29</sup> The Health Coverage Tax Credit originally expired at the end of Calendar Year 2013.

<sup>&</sup>lt;sup>30</sup> Consolidated Appropriations Act of 2016, Pub. L. No. 114-113, Div. Q, (2015).

Specifically, enforcement revenue collected decreased from \$57.1 billion in FY 2014 to \$54.2 billion (5 percent) in FY 2015. In an effort to support its enforcement programs and make up for attrition in recent years, the IRS announced that between 600 and 700 new enforcement employees will be added through the end of FY 2016. These positions have the primary responsibility to improve taxpayer compliance and collect delinguent liabilities.<sup>31</sup>

TIGTA continues to perform audits related to the IRS's efforts to reduce the Tax Gap. TIGTA reported that the IRS's lack of enforcement of backup withholding requirements contributes to the IRS's continual inability to reduce the Tax Gap.<sup>32</sup> In certain circumstances, payers are required to withhold<sup>33</sup> tax from certain reportable payments. The purpose of backup withholding is to make sure that the Government is able to collect taxes on all appropriate income, particularly income that is not usually subject to withholding. Although the majority of information returns are submitted by payers with valid TINS, TIGTA's review of Tax Year 2013 information returns identified nearly \$9 billion in backup withholding tax that was not withheld as required by payers submitting information returns with missing or incorrect TINs. Enforcing payer backup withholding requirements is essential to ensuring that the Government is able to collect taxes on all appropriate income, particularly income that is not usually subject to withholding.

Approximately \$26 billion (6 percent) of the \$458 billion Tax Gap is due to individual taxpayers who do not file a tax return or timely pay the associated tax due on such delinquent returns (hereafter referred to as nonfilers). TIGTA reported that improvements to the nonfiler program could help the IRS more effectively address additional nonfilers owing billions of dollars in taxes.<sup>34</sup> Although the IRS has implemented a strategy to identify taxpayers who have not filed a tax return, including taxpayers with expired extensions, the IRS failed to identify and address nonfilers with expired extensions due to system programming errors, managerial decisions, and resource constraints. TIGTA estimates that \$2.7 billion in additional tax revenue could be collected by addressing 127,000 Tax Year 2013 nonfilers that we identified with expired extensions who did not voluntarily file a tax return or submit full payment of the estimated tax liability.

 <sup>&</sup>lt;sup>31</sup> TIGTA, Ref. No. 2016-30-073, Trends In Compliance Activities Through Fiscal Year 2015 (Sept. 2016).
 <sup>32</sup> TIGTA, Ref. No. 2016-40-076, Due to the Lack of Enforcement, Taxpayers Are Avoiding Billions of Dollars in Backup Withholding (Sept. 2016).

<sup>&</sup>lt;sup>30</sup> Backup withholding provisions require payers to withhold 28 percent of certain reportable payments associated with payees that do not provide the payer with a TIN or payees that provide the payer with an incorrect TIN.

<sup>&</sup>lt;sup>34</sup> TIGTA, Ref. No. 2016-30-085, Improvements to the Nonflier Program Could Help the Internal Revenue Service More Effectively Address Additional Nonfliers Owing Billions of Dollars in Taxes (Sept. 2016).

### REDUCING FRAUDULENT CLAIMS AND IMPROPER PAYMENTS

The Office of Management and Budget describes an improper payment as any payment that should not have been made, was made in an incorrect amount, or was made to an ineligible recipient. The Improper Payment Information Act of 2002<sup>35</sup> requires Federal agencies, including the IRS, to estimate the amount of improper payments and report to Congress annually on the causes of and the steps taken to reduce improper payments. The Improper Payment Elimination and Recovery Act of 2010<sup>30</sup> amended the 2002 Act by strengthening agency reporting requirements and redefining significant improper payments.

TIGTA continues to identify fraudulent claims and improper payments as an IRS major management challenge. The IRS has made little improvement in reducing EITC improper payments since it has been required to provide an estimate of these payments to Congress.<sup>37</sup> The EITC is the largest refundable credit<sup>38</sup> based on total claims paid, and it continues to be vulnerable to a high rate of noncompliance, including incorrect or erroneous claims caused by taxpayer error or resulting from fraud.

The Consolidated Appropriations Act of 2016<sup>39</sup> provides the IRS with additional tools to reduce EITC improper payments. However, it did not expand the IRS's authority to systemically correct the erroneous claims it identifies. Without this authority, the IRS continues to be unable to address the majority of potentially erroneous EITC claims it identifies. The IRS can audit potentially erroneous EITC claims; however, the number of claims the IRS can audit is limited by resources. As a result, billions of dollars in potentially erroneous EITC claims will continue to go unaddressed each year.

In addition, the IRS continued to rate the risk of improper payments associated with the ACTC and the AOTC in FY 2015 as low. However, based on the IRS's own enforcement data, TIGTA estimates that the potential ACTC improper payment rate for FY 2015 is 24.2 percent, with potential improper payments totaling \$5.7 billion, and estimates that the potential AOTC improper payment rate for FY 2015 is 30.7 percent. with potential improper payments totaling \$1.8 billion. In response to our most recent review assessing its FY 2015 compliance with annual improper payment reporting requirements, the IRS stated that both the ACTC and the AOTC payment error risk assessment are under revision. IRS management indicated that its revised assessment of significant improper payments will better reflect the inherent risks in administering refundable credits through the tax system.

<sup>&</sup>lt;sup>26</sup> Pub. L. No. 107-300, 116 Stat. 2350.

<sup>&</sup>lt;sup>36</sup> Pub. L. No. 111-204, 124 Stat. 2224. <sup>37</sup> TIGTA, Ref. No. 2016-40-036, Without Expanded Error Correction Authority, Billions of Dollars In Identified Potentially Erroneous Earned Income Credit Claims Will Continue to Go Unaddressed Each Year (Apr. 2016).

<sup>&</sup>lt;sup>30</sup> A refundable credit allows taxpayers to reduce their tax ilability to below zero and thus receive a tax. refund even if no income tax was withheld or paid. Pub. L. No. 114-113, 129 Stat. 2242 (2015).

TIGTA has also reported on concerns with the issuance of potentially fraudulent refunds. The IRS's Return Integrity and Compliance Services organization is responsible for identifying, evaluating, and preventing the issuance of improper refunds. This includes the protection of revenue by identifying potentially fraudulent tax returns and verifying the accuracy of reported income and withholding information. However, TIGTA identified more than \$27 million of refunds that were erroneously issued for 13,043 Tax Year 2013 tax returns because of a programming error.<sup>40</sup> The programming error is overriding the IRS's two-week processing delay on some refund tax returns that are identified by the IRS as potentially fraudulent. These are tax returns that the IRS Examination function also identified as claiming a questionable tax credit. The portion of the refund that is not reviewed by the Examination function is erroneously issued before the IRS can complete its verification of income and withholding.

TIGTA also reported that IRS controls over the examination of amended individual tax returns with claims for refunds or abatements of taxes did not always ensure that claims were properly evaluated and were not always effective in preventing the potentially inappropriate issuance of tax refunds and allowance of tax abatements.<sup>41</sup> TIGTA reviewed a statistical sample of FY 2013 closed surveys and audits of amended individual returns with claims for refunds or abatements of taxes and found that claims were not appropriately substantiated and/or had large, unusual, or questionable items on the tax return that were not adequately considered and investigated. We estimate that approximately \$34.4 million in tax refunds and abatements may have been inappropriately allowed.

# IMPROVING TAX SYSTEMS AND EXPANDING ONLINE SERVICES

Successful modernization of IRS systems and the development and implementation of new information technology applications are critical to meet the IRS's evolving business needs and to enhance services provided to taxpayers. A primary focus for the IRS over the past two decades has been to migrate taxpayers to electronic filing. In FY 2015, more than 85 percent of individual tax returns were filed electronically. Outside of filing activities, taxpayers also use the Internet to download forms, view content, and check the status of their refund. In FY 2015, taxpayers made more than 493 million visits to IRS.gov and used the IRS's "Where's My Refund?" application more than 234 million times. These types of online activities will increase as the IRS implements its Future State Initiative.

The IRS's modernization effort continues to focus on core tax administration systems designed to provide more sophisticated tools to taxpayers and IRS employees. It will provide the foundation for implementing a real-time tax system, reducing improper

<sup>&</sup>lt;sup>40</sup> TIGTA, Ref. No. 2016-40-006, Improvements Are Needed to Better Ensure That Refunds Claimed on Potentially Fraudulent Tax Returns Are Not Enoneously Released (Nov. 2015).
<sup>41</sup> TIGTA, Ref. No. 2016-30-032, Improvements Are Necessary to Ensure That Individual Amended

Returns With Claims for Refunds and Abatements of Taxes Are Property Reviewed (May 2016).

payments and fraudulent refunds, and providing the technology infrastructure and architecture that will enable taxpayers and other stakeholders the capability to securely access tax account information.

The IRS is currently developing a new fraud detection system, the Return Review Program, to identify suspected identity theft and fraudulent tax returns. The IRS believes that the Return Review Program provides new and improved capabilities that will advance its fraud detection and prevention into the next generation. However, TIGTA's analysis showed that 54,175 confirmed identity theft tax returns with refunds totaling more than \$313 million were identified by other existing fraud detection systems, but were not selected by the Return Review Program.<sup>42</sup> As the IRS continues to develop this system, it needs to ensure that it will identify identity theft cases that are being identified by existing systems as well as other identity theft cases that are not currently being identified.

Additionally, the IRS implemented the Integrated Production Model (IPM) to provide a single point of access to core taxpayer data (such as taxpayer accounts and tax returns) and other specific data used by a wide range of IRS business applications. The accuracy, completeness, and reliability of data on the IPM are essential to the IRS and its tax administration mission. However, while TIGTA found the IPM system is meeting IRS business needs and has improved the efficiency of data access via a singular data repository, access controls were not documented, and TIGTA was unable to definitively verify that the IPM pulls data from only designated source systems.<sup>43</sup> This increases the risk that inaccurate, incomplete, or unreliable data could be passed from source systems through the IPM database to downstream systems that use the data for case selection. Using inaccurate, incomplete, or unreliable data could result in the erroneous selection of cases for audit or further review. Erroneous case selection could result in the misallocation of limited IRS personnel and the IRS missing larger tax violations for which collections are necessary.

In another audit, TIGTA determined that the IRS is not effectively managing its Tier II environment backup and restoration process.<sup>44</sup> The Tier II environment consists of non-mainframe servers that run various operating systems, but they may also operate as database, web, e-mail, and file servers, and provide a host of other important functions supporting the IRS network infrastructure. Some examples of important data stored within the Tier II environment include e-mails, personal and shared files, and taxpayer information.

<sup>&</sup>lt;sup>40</sup> TIGTA, Ref. No. 2016-40-008, Continued Refinement of the Return Review Program Identity Theft Detection Models Is Needed to Increase Detection (Dec. 2015).

<sup>&</sup>lt;sup>40</sup> TIGTA, Ref. No. 2016-20-058, The Integrated Production Model Increases Data Access Efficiency; However, Access Controls and Data Validation Could Be Improved (July 2016).
<sup>44</sup> TIGTA, Ref. No. 2016-20-019, Management Oversight of the Tier II Environment Backup and

Restoration Process Needs Improvement (Feb. 2016).

Specifically, TIGTA reported that IRS management has not established goals and does not regularly collect sufficient performance metrics to monitor, measure, and report on the effectiveness of the backup and restoration process. The lack of management information about the backup process contributed to a significant incident in December 2014 when a backup did not exist to restore the Work Request Management System<sup>45</sup> database, which had been deleted in error. The IRS's analysis of the incident determined that the backup for the database had not been created for four months prior to its discovery of the condition. As a result, IRS personnel expended significant resources restoring the data lost from the incident. The potential remains for these events to occur to other critical systems within the IRS.

# PROVIDING QUALITY TAXPAYER SERVICE OPERATIONS

Providing taxpayers with quality customer service is a key component in the IRS's mission. Ensuring that taxpayers understand and meet their tax responsibilities is crucial for the IRS in its effort to encourage voluntary compliance with the tax laws. Resolving taxpayer questions before tax returns are filed helps taxpayers avoid unintentional errors and also reduces the burden that results from the issuance of notices and correspondence. Further, successfully addressing and resolving taxpayer inquiries through a quality customer service process allows the IRS to direct its limited resources more efficiently.

Taxpayers have several options to choose from when they need assistance from the IRS, including assistance through the toll-free telephone lines, face-to-face assistance at the Taxpayer Assistance Centers or Volunteer Program sites, and self-assistance through IRS.gov and various other social media channels (*e.g.*, Twitter, Facebook, and YouTube). The IRS continues to increase its dependence on technology-based services and external partners that direct taxpayers to the most cost-effective IRS or partner channel available to provide the needed service. The IRS notes that this approach allows it to focus limited toll-free and walk-in resources on customer issues that can be best resolved through person-to-person interaction. However, the cuts the IRS has made in its traditional services continue to significantly affect a number of critical areas.

For example, the IRS assisted 5.6 million taxpayers in FY 2015 at its Taxpayer Assistance Centers and plans to assist 4.7 million taxpayers in FY 2016, a 16 percent decrease from FY 2015. In addition, assistance provided to taxpayers via the telephone continues to be a challenge. As a result of the IRS receiving additional funding for customer service in FY 2016, the IRS is forecasting a 47 percent Level of Service<sup>48</sup> for

<sup>&</sup>lt;sup>46</sup> The Work Request Management System tracks and controls information technology work requests from submission through completion and maintains the status and assignment information.
<sup>40</sup> The primary measure of service to taxpayers. It is the relative success rate of taxpayers who call for live assistance on the IRS toll-free telephone lines.

its toll-free telephone lines for the full fiscal year, which is an increase from its original forecast of 34 percent.

Further, the IRS's ability to process taxpayer correspondence in a timely manner has also declined. TIGTA evaluated IRS processes for timely resolving taxpayer correspondence and reported that the over-aged correspondence inventory has steadily increased from FY 2012 to FY 2015.<sup>47</sup> Delays in processing correspondence create a burden for taxpayers who must wait to obtain assistance and, in some cases, receive refunds. For the IRS, delays in processing correspondence can result in the unnecessary payment of interest. For example, in FY 2014, the IRS paid more than \$27.6 million to taxpayers as a result of not timely processing or resolving correspondence cases such as amended returns, net operating losses, and injured spouse cases. We reported this same condition in September 2012 in our prior assessment of the IRS's efforts to timely process net operating loss cases.<sup>48</sup>

TIGTA has also identified continuing issues with assistance to victims of identity theft. In September 2013, TIGTA reported that, on average, it took the IRS 312 days to resolve tax accounts of identity theft victims for the cases we reviewed.40 In March 2015, we reported that taxpayers were still experiencing long delays in resolving their tax accounts and that the IRS continued to make errors on the victims' tax accounts.50 We also reported that the majority of identity theft victims are no longer provided with a single point of contact.<sup>51</sup> We also found that the IRS's process does not ensure that taxpayers are timely informed about the IRS's receipt of their supporting documentation or the status of their identity theft claims. In July 2015, the IRS centralized its identity theft victim assistance efforts within its Accounts Management function by creating the Identity Theft Victims Assistance directorate. The IRS stated that centralizing its victim assistance functions will reduce redundancies, streamline leadership accountability and responsibility, help better identify compliance issues, and improve processes. The IRS believes this effort will also allow for more consistent guidance to employees working identity theft cases so that taxpayers receive timely and consistent help in resolving their cases.

In addition, we reported that the IRS has not established an effective process to ensure that the required notice is sent to the Social Security Administration to alert it

<sup>&</sup>lt;sup>47</sup> TIGTA, Ref. No. 2016-40-023, Continued Inconsistent Use of Over-age Correspondence Lists Contributes to Taxpayer Burden and Unnecessary Interest Payments (Feb. 2016).

of earnings not associated with a victim of employment-related identity theft.<sup>52</sup> Our review of a statistically valid sample of 71 cases from the population of 1,878 Tax

Year 2013 cases closed as identity theft (*i.e.*, cases involved a discrepancy related to wages reported on the tax return) identified that the Social Security Administration had no record of receiving an IRS notice for 15 (21 percent) of the 71 cases.

TIGTA also reported that the IRS did not place identity theft incident markers on the tax accounts of 3,206 of the 289,843 taxpayers it initially identified as affected by the Get Transcript application breach.<sup>53</sup> We also found that the IRS did not offer an IP PIN or free credit monitoring to 79,122 individuals whose tax accounts the IRS identified as being involved in an attempted access.

# IMPACT OF GLOBAL ECONOMY ON TAX ADMINISTRATION

The tax compliance of business and individual taxpayers involved in international transactions remains a significant concern. Traditionally, tax administration has been concerned with large corporate taxpayers in the cross-border environment. Continued improvements in and access to information technology allows more small businesses and individuals to conduct business in international markets and make investments in foreign countries, increasing the number of taxpayers involved in international activity.

In its most recent strategic plan,<sup>54</sup> the IRS recognized that the evolution and proliferation of virtual commerce has expanded the exchange of goods, services, and currencies across jurisdictions, further complicating tax administration. The IRS has taken steps to encourage international compliance. Specifically, the IRS is implementing the Foreign Account Tax Compliance Act,<sup>55</sup> which requires taxpayers and foreign financial institutions to report to the IRS specified financial assets that exceed certain thresholds. Additionally, the IRS established the Offshore Voluntary Disclosure Program (OVDP) to encourage taxpayers with offshore accounts and related income to return to the tax system.

In an audit assessing how well the IRS is managing the OVDP, TIGTA found that the IRS needs to improve its efforts to address noncompliance of taxpayers who are denied access to or withdraw from the OVDP.<sup>50</sup> Taxpayers who intentionally fail to report income earned on offshore accounts or who neglect to disclose foreign assets as required by law face significant penalties and possible criminal prosecution if discovered by the IRS. While giving noncompliant taxpayers the opportunity to resolve their

15

<sup>&</sup>lt;sup>50</sup> TIGTA, Ref. No. 2016-40-065, Processes Are Not Sufficient to Assist Victims of Employment-Related Identity Their (Aug. 2016).

<sup>&</sup>lt;sup>54</sup> Internal Revenue Service Strategic Plan – FY 2014-2017, IRS Pub. 3744 (Rev. June 2014).

 <sup>&</sup>lt;sup>46</sup> Pub. L. No. 111-147, Subtitle A, 124 Stat 97 (2010) (codified in scattered sections of 26 U.S.C.).
 <sup>46</sup> TIGTA, Ref. No. 2016-30-030, Improvements Are Needed in Offshore Voluntary Disclosure Compliance and Processing Efforts (June 2016).

potential tax delinquencies through the OVDP, it is important for the IRS to ensure that these taxpayers actually become compliant with their tax obligations. TIGTA found that the IRS did not assess approximately \$21.6 million in delinquent Reports of Foreign Bank and Financial Accounts penalties on OVDP requests that were either denied or withdrawn. TIGTA also identified internal control weaknesses that led to delayed or incorrect processing of OVDP requests through poor communication among IRS functions involved in the OVDP. These weaknesses include the use of separate inventory controls and two separate IRS addresses for taxpayers to send correspondence, which contributed to incorrect processing of some taxpayer disclosure requests.

The IRS has also designated transfer pricing as a key focus of its international compliance initiatives. Transfer pricing refers to the setting of a price for goods or services sold between one member of a multinational entity and another member of the same entity. The principal tax policy concern regarding aggressive transfer pricing is that it does not reflect an arm's-length<sup>57</sup> result from a related party transaction, causing multinational corporation profits to be intentionally inflated in low-tax countries and reduced in high-tax countries. Transfer pricing issues account for approximately 46 percent of the IRS Large Business and International Division's international issues inventory and 71 percent of the potential total dollar adjustment amounts of all international issues.

TIGTA found that the IRS provided external stakeholders adequate education and outreach related to the transfer pricing examination process; however, some IRS employees may not be consistently following the Transfer Pricing Audit Roadmap. The IRS developed the Roadmap to provide IRS examiners with audit techniques and tools to assist with the planning, execution, and resolution of transfer pricing examinations. TIGTA also identified that the IRS has no process to ensure that all transfer pricing issues are identified for specialized review.

### PROTECTING TAXPAYER RIGHTS

The IRS must balance tax compliance activities against the rights of taxpayers to receive fair and equitable treatment. The IRS provides taxpayers with Publication 1, *Your Rights as a Taxpayer*, in many notices and during in-person interviews involving the collection and examination processes. Also referred to as the Taxpayer Bill of Rights, Publication 1 is published in multiple languages and outlines the rights of the taxpayer with respect to examinations, appeals, collections, and refunds. The IRS continues to dedicate significant resources and attention to implementing the taxpayer

<sup>&</sup>lt;sup>57</sup> According to Treas. Reg. § 1.482-1(b), the arm's-length standard is met when the result of a transaction between controlled taxpayers is consistent with the result that would have been realized if an uncontrolled taxpayer had engaged in the same transaction under the same circumstances.
<sup>50</sup> TIGTA, Ref. No. 2016-30-090, Barriers Exist to Property Evaluating Transfer Pricing Issues (Sept. 2016).

rights provisions of the IRS Restructuring and Reform Act of 1998.<sup>59</sup> As mandated by this Act, TIGTA conducts annual audits of certain taxpayer rights provisions.

In general, the IRS has improved its compliance with these statutory taxpayer rights provisions and is documenting its protection of taxpayer rights. However, during the review of the IRS's compliance with Notice of Federal Tax Lien due process procedures, TIGTA found that the IRS did not always notify the taxpayers' representatives of the Notice of Federal Tax Lien filings as required.<sup>60</sup> Based on the sample results, TIGTA estimated that 22,866 taxpayers may have been adversely affected because the IRS did not follow procedures to notify the taxpayers' representatives of the taxpayers' rights related to the Notices of Federal Tax Lien.

TIGTA also identified errors related to the determination of the Collection Statute Expiration Date (CSED) on taxpayer accounts during our review of the IRS Office of Appeals Collection Due Process Program.<sup>61</sup> The CSED is the expiration of the time period established by law to collect taxes. From a statistically valid sample, TIGTA identified instances in which the IRS incorrectly extended the CSED, allowing the IRS additional time it should not have had to collect the delinquent taxes.

In addition, TIGTA conducted an audit to determine whether the IRS appropriately applied manual levies to Social Security benefits.<sup>62</sup> We found that, in most cases, revenue officers are compliant with IRS procedures. However, for 15 percent of our sample, revenue officers took levy action on Social Security recipients that likely caused or exacerbated economic hardship. Additionally, while existing procedures allow revenue officers to manually levy up to 100 percent of Social Security benefits, taxpayers have the right to claim an exemption against the levy. However, in 28 percent of our sampled cases, revenue officers used the wrong form to levy Social Security benefits. As a result, exemption amounts were not considered prior to establishing the levy. Of these cases, 6 percent involved taxpayers who suffered greater Social Security levies than allowed by law.

# ACHIEVING PROGRAM EFFICIENCIES AND COST SAVINGS

Continuing to identify and achieve greater program efficiencies and cost savings is imperative for the IRS as it strives to successfully accomplish its mission in a period of shrinking budgets and declining resources. Implementing cost saving strategies is particularly critical as the IRS is tasked with additional responsibilities, often without

<sup>&</sup>lt;sup>59</sup> Pub. L. No. 105-206, 112 Stat. 685 (codified as amended in scattered sections of 2 U.S.C., 5 U.S.C. app., 16 U.S.C., 19 U.S.C., 22 U.S.C., 23 U.S.C., 26 U.S.C., 31 U.S.C., 38 U.S.C., and 49 U.S.C. (2013)).
<sup>60</sup> TIGTA, Ref. No. 2016-30-047, Fiscal Year 2016 Statutory Review of Compliance With Notice of Federal Tax Lien Due Process Procedures (July 2016).

<sup>&</sup>lt;sup>61</sup> TIGTA, Ref. No. 2016-10-064, The Office of Appeals Has Improved Compliance Within the Collection Due Process Program (Aug. 2016). <sup>62</sup> TIGTA, Ref. No. 2016-30-043, Revenue Officer Levies of Social Security Benefits Indicate That Further

<sup>&</sup>lt;sup>44</sup> TIGTA, Ref. No. 2016-30-043, Revenue Officer Levies of Social Security Benefits Indicate That Further Modification to Procedures Is Warranted (June 2016).

additional budgetary funding. Recent examples of this include implementing new passport restrictions based on delinquent tax debt and the use of private contractors to collect taxes on some past due accounts.<sup>63</sup>

In its most recent Strategic Plan, which guides program and budget decisions, the IRS noted that it must meet the challenge of declining resources by working to achieve the optimal scale and scope for its programs and activities. While the IRS has taken steps to reduce costs and improve program effectiveness, TIGTA has identified a number of areas in which the IRS can more efficiently use its limited resources and make more informed business decisions.

TIGTA recently completed an audit to determine whether Contact Analytics is used to improve taxpayer service and provide services more efficiently.<sup>64</sup> Contact Analytics is a business intelligence and performance management software tool that uses speech analytics technology. This tool enables the IRS to analyze recorded telephone calls from taxpayers to identify opportunities to improve the customer experience as well as reduce the costs of providing taxpayer service.

From October 2011 through December 2014, the IRS rolled out its Hear Me Process to its front-line employees. The Hear Me Process allows the IRS's more than 13,000 Customer Service Representatives to identify emerging taxpayer service issues. Contact Analytics can then be used to research the issue to improve the taxpayer experience by providing alternative and more cost-effective services.

Our interviews with 24 Customer Service Representatives identified that 17 (71 percent) did not have sufficient knowledge of the Hear Me Process, including how to submit a taxpayer service issue. Although employee use of the Hear Me Process is voluntary, success using Contact Analytics to identify taxpayer service improvements relies heavily on front-line employees submitting search requests and suggestions for analysis. If these employees do not elevate customer service issues and concerns, the IRS's ability to improve customer service is impaired.

In another example of improving program efficiency, TIGTA identified that data maintained by the IRS could be used to increase identification of individuals with business tax debt.<sup>66</sup> The IRS's current process does not effectively identify sole proprietors with business tax debt. Using information the IRS captures and maintains from Form SS-4, *Application for Employer Identification Number*, TIGTA identified 53,672 individual taxpayers who received approximately \$74.5 million in tax refunds in

<sup>&</sup>lt;sup>40</sup> Both legislative mandates were included as part of the Fixing America's Surface Transportation Act, Pub. L. No. 114-94, 129 Stat. 1312 (2015).
<sup>61</sup> TIGTA, Ref. No. 2016-40-076, Contact Analytics Has Been Used to Improve Taxpayer Service, but Not.

<sup>&</sup>lt;sup>50</sup> TIGTA, Ref. No. 2016-40-076, Contact Analytics Has Been Used to Improve Taxpayer Service, but Not All Front-Line Employees Are Aware of the Process to Submit Customer Service Issues (Aug. 2016).
<sup>60</sup> TIGTA, Ref. No. 2016-40-028, Revising Tax Debt Identification Programming and Correcting Procedural Errors Could Improve the Tax Refund Offset Program (Mar. 2016).

Tax Year 2013, in which the IRS could have offset the refunds to outstanding tax debt on the taxpaver's associated business tax account.

TIGTA also identified efficiency concerns during a recently completed audit to determine whether the IRS properly developed and sufficiently tested the Foreign Account Tax Compliance Act system for withholding and refund fraud detection.<sup>60</sup> The IRS made improvements, based on prior TIGTA reviews, to strengthen systems development controls for Foreign Account Tax Compliance Act projects. However, in an attempt to meet the project schedule and manage resources, the IRS implemented Withholding and Refund Release 2.0 despite critical data quality problems that resulted in unplanned work and a four-month implementation delay. While there is agreement that the system met stated requirements, the IRS spent \$15 million delivering functionality that has not provided the intended business results.

TIGTA also reported that the IRS purchased \$12 million in software subscriptions for an enterprise e-mail system that, as it turned out, it could not use.<sup>67</sup> The purchase was made without first determining project infrastructure needs, integration requirements, business requirements, security and portal bandwidth, and whether the subscriptions were technologically feasible on the IRS enterprise. The IRS currently maintains an e-mail environment that does not have archive capability. In order to comply with an Office of Management and Budget directive that requires Federal agencies to manage both permanent and temporary e-mail records in an accessible electronic format by December 2016, the IRS plans to procure a new enterprise e-mail system.

TIGTA also conducted a follow-up review to our 2013 report<sup>68</sup> on IRS conference spending.<sup>69</sup> Excessive conference and event spending by Federal agencies has been brought to light by recent Inspectors General reports and resulted in congressional hearings. Given its limited budgetary resources, the IRS must effectively manage conference and event spending to ensure that taxpayer funds are used efficiently.

We found that the IRS issued comprehensive guidance for event planning, approvals, and cost tracking that addressed each of the prior recommendations that TIGTA made in 2013. We also reviewed 650 events that required approval for FYs 2013 and 2014 and found that more than 90 percent of the events received appropriate and timely approval. However, we did identify 55 events that did not receive the correct level of approval and 26 events that exceeded approved costs by more than 15 percent, or exceeded specifically stated thresholds listed in the approval documents, without required reapproval.

# CONCLUSION

This memorandum is provided as our annual summary of the most serious major management and performance challenges confronting the IRS in FY 2017. TIGTA's *Fiscal Year 2017 Annual Audit Plan* contains our proposed reviews, which are organized by these challenges. If you have any questions or wish to discuss our views on the challenges in greater detail, please contact me at (202) 622-6500.

cc: Deputy Secretary Assistant Secretary for Management Deputy Chief Financial Officer Commissioner of Internal Revenue

# DEPARTMENT OF THE TREASURY WASHINGTON, D.C. 20220

| MEMORANDUM FOR: | Eric M. Thorson<br>Treasury Inspector General  |  |
|-----------------|--|--|
|                 | J. Russell George<br>Inspector General for Tax Administration  |  |
| FROM:           | Jacob J. Lew<br>Secretary of the Treasury 7  |  |
| SUBJECT:        | FY 2016 Management and Performance Challenges reported by the<br>Treasury Inspector General and the Treasury Inspector General for Tax<br>Administration |  |

We reviewed the memoranda from the Treasury Inspector General (IG) and the Treasury Inspector General for Tax Administration (TIGTA), dated October 26, 2016 and October 6, 2016, respectively. The memoranda provide the IG's and the TIGTA's perspective on the most serious management and performance challenges facing the Department. The Special Inspector General for the Troubled Asset Relief Program (SIGTARP) did not report any management or performance challenges.

We appreciate the IG and the TIGTA's work on this effort and value the insights and recommendations they have provided. We concur with the reported challenges and will remain committed to focusing resources on overcoming these challenges.

We continue to make progress on these challenges, but overcoming these challenges requires long-term strategies for ensuring stable operations as well as sustained management attention and resources. We have provided a more detailed report on the actions taken in FY 2016 and planned actions for FY 2017 and beyond in the following section.

We look forward to continuing to work with the IG and the TIGTA on these challenges.

| OIG CHALLENGE NO. 1 | SUMMARY OF MAJOR ISSUES   |
|---------------------|---|
| Cyber Threats       | <ul> <li>Exercise due care when authorizing internetwork connections with other<br/>Federal, State, and local agencies and service provides, and verify that third<br/>parties comply with Federal policies and standards</li> <li>Ensure critical data and information maintained by cloud service providers are<br/>properly protected</li> </ul> |
|                     | <ul> <li>Provide effective leadership to financial institutions and the financial sector to<br/>strengthen awareness and preparedness against cyber threats</li> </ul>  |

# Domestic Finance (OCIP/FI)/International Affairs

### FY 2016 Accomplishments

- Met with principals of the Financial and Banking Information Infrastructure Committee (FBIIC) organizations to discuss strategic, policy-level issues around cybersecurity and resiliency for the financial sector; topics included (a) information sharing and removing impediments to effective sharing, (b) best practices for regulatory and supervisory policies and approaches, and (c) response and recovery exercises and initiatives across the sector
- Met with the Financial Sector Coordinating Council (FSSCC) and FBIIC member agencies to coordinate cybersecurity activities across the sector and reinforce a strong public-private partnership around cybersecurity
- Coordinated regional meetings between local FBI and law enforcement and financial institutions to facilitate development of
  relationships between public and private sector partners prior to a cyber event
- Collaborated with other executive agencies and departments to develop the *United States Cyber Incident Coordination*, Presidential Policy Directive 41, to improve public-private incident response coordination
- Tested communication and escalation processes for responding to, and recovering from, cyber-attacks by completing three regional and four large-scale financial sector cybersecurity exercises (including one with the electricity subsector) in collaboration with representatives from Department of Homeland Security (DHS), Department of Defense (DOD), Department of Justice (DOJ), the financial regulators, and private sector
- Created and disseminated 14 circulars on cyber actors' tactics, techniques, procedures and associated indicators to assist network security specialists with network defense capabilities and planning
- Conducted several classified threat briefings and enhanced capabilities to share classified information with financial regulators, financial sector companies, and executive agencies and departments
- Conducted a comprehensive survey of Group of 7 (G-7) countries' measures, regulations, and approaches to cybersecurity in the financial sector, as part of the G-7 Cyber Expert Group co-chaired by the Deputy Secretary

### Actions Planned or Underway

- Executing a memorandum of understanding to provide a mechanism through which all FBIIC members (both federal and state) can share cyber threat, vulnerability, and incident information
- Planning multiple regional and large-scale financial sector cybersecurity exercises in 2017
- Promoting the roll-out of the United States Cyber Incident Coordination across the financial services sector and coordinating with the financial sector's cyber incident protocols
- Developing materials to help small- and medium-sized financial sector companies with cybersecurity and resiliency, including an "exercise in a box" as a tool to help private sector companies conduct internal cybersecurity exercises
- Establishing a mechanism where chief executive officers from financial sector companies can periodically meet with leaders from key government agencies, including the financial regulators, to discuss financial sector cybersecurity
- Finalizing and publishing the G-7 Cyber Expert Group's work on best practices, known as G-7 Fundamental Elements on Cybersecurity for the Financial Sector

# Management (Chief Information Officer)

### FY 2016 Accomplishments

- Provided timely and accurate inputs for the FY 2016 Cybersecurity Strategy implementation to achieve overall President Management Council (PMC) Level-2 with achievement in Level 3 in one area
- Deployed first Einstein 3 Accelerated (E3A) countermeasure (Domain Name Service [DNS] sinkholing) at Fiscal Service Trusted Internet Connection (TIC)
- Continued enhancing cybersecurity threat awareness among Treasury senior leaders and employees by launching the Phishing Awareness Program across all Bureaus
- Launched the Targeted User Training, which provides personalized training to users who have been targets of sophisticated cyberattacks
- Exceeded OMB guidance to complete first iteration of evaluation and prioritization of High Value Assets (HVAs)
- Timely and accurately reported on all required cybersecurity data calls for departmental consolidated reporting 100% for PMC, Cross-Agency Priority (CAP), Federal Information Security Management Act (FISMA) and 98% for Government Security Operations Center (GSOC) reporting

- Deployed a new release of the Treasury FISMA Information Management System (TFIMS) which improved the collection and management of cybersecurity metadata and increased compliance with National Institute of Standards and Technology (NIST) standards through improved controls tracking and management
- Deployed the IRS Threat Sharing Collaboration Site providing a secure space for IRS to share threat information and collaborate with peers in other bureaus reducing reliance on email to exchange security information
- Deployed enhancements to the Treasury Computer Security Incident Response Capability (TCSIRC) application for Treasury's GSOC increasing compliance with DHS US-CERT requirements
- Deployed the GSOC Cyber Analysis and Reporting Dashboard (CARD) allowing recurring and ad-hoc data calls by visualizing data via dashboards
- Completed upgrade to SharePoint 2013 which included new secure protocol and authentication enhancements to make the use of claims-based authentication
- Transitioned the Treasury.gov public website authoring environment to Single-Sign On and Personal Identity Verification (PIV) card authentication providing greater assurance of identity
- Worked closely with the Bureaus to ensure adherence to BOD 15-01 requirements by monitoring the weekly Cyber Hygiene reports/Cyber Exposure Scorecards and remediate any critical findings within 30 days
- Provided Departmental Office (DO) Local Area Network (LAN) and email improvements by implementing the Nessus Tenable vulnerability scanner to replace the near end of life McAfee solution and implementing Exchange 2013 to replace Exchange 2007
- Completed compromise assessments of DO, Fiscal Service, and Financial Crimes Enforcement Network (FinCEN) and found no evidence of undetected malicious activity
- Collaborated with agency partners on incident response and indicator sharing initiatives
- On-boarded 18 new employees in FY16, and reduced the vacancy rate from 42% to 22%
- Improved the Treasury Secure Data Network (TSDN) by:
  - o Applying patches to reduce vulnerabilities;
  - Creating a TSDN Incident Response Plan;
  - o Identifying and vetting all Privileged users access;
  - Developing a Security Assessment and Authorization (SA&A) package and renewing Authority to Operate (ATO) through 2019;
  - o Established Vulnerability Management and Change Management processes/criteria; and
  - Accomplished >90% asset management and monitoring.

### Actions Planned or Underway

- Continue to implement Continuous Diagnostics & Mitigation (CDM) Phase 1 tools in bureaus for the Initial Operating Capability (IOC)
- Finalize and operationalize our Cybersecurity Strategy for FY 17
- Implement Single-Sign on for the HR Connect system (our human resource processing system)
- Upgrade and replace HR Connect system infrastructure platform firewalls

# Office of the Comptroller of the Currency (OCC)

### FY 2016 Accomplishments

- Continued to improve our defense against cyber-attacks and enhance the resiliency of our systems
- Technologies, processes, and controls were implemented and employee awareness was enhanced during the year
- Collaborated with other financial regulators as well as the intelligence and law enforcement communities to address emerging risks
- Began the process of reviewing cybersecurity around critical banking and payments infrastructure
- Recruited security professionals in cyber security office
- Active participation with other federal banking agencies to assess current supervisory guidance and evaluate potential new guidance in response to emerging threats

- Continue outreach activities in support of the ongoing implementation and use of the Cybersecurity Assessment tool by both financial institutions and examiners
- Continue to deploy technologies, processes, and controls within OCC to reduce the potential of cybersecurity attacks
- Recruit, retain, and train security professionals (e.g., Information Systems Security Officers ISSO)
- Reaffirm the need for banks to adequately incorporate resiliency considerations, including recovery from cyber events, into their overall governance, risk management, and strategic planning processes

| Efforts to Promote Spending Transparency and to Prevent<br>and Detect Improper PaymentsSpending Transparency: Given the broad Government-wide implications<br>and critical roles assigned to Treasury by the DATA Act, implementation<br>of the DATA Act is deemed an ongoing high risk project and management<br>challengeDetect Improper Payments: Effectiveness of the Do Not Pay Business<br>Center as a tool to prevent and detect improper payments is hindered<br>because the center does not have access to Social Security<br>Administration's full death data | OIG CHALLENGE NO. 2 | SUMMARY OF MAJOR ISSUES   |

# Spending Transparency:

### Office of the Fiscal Assistant Secretary

FY 2016 Major Accomplishments

- Launched Openbeta.usaspending.gov website to collect public input on the development of the future USASpending.gov website
- Completed the DATA Act Information Model Schema version 1.0 which sets the requirements for federal agencies to submit spending data to Treasury and explains the relationships between the data elements
- Made progress in developing the DATA Act operating infrastructure, including developing the DATA Act Broker, a web based tool agencies will utilize to submit and validate their data to Treasury for publication on USAspending.gov

### Actions Planned or Underway

- Complete the development of the DATA Act operating infrastructure to collect, validate, standardize, and publish over 400 spending data elements
- Launch the new USAspending.gov website in May 2017

## **Detect Improper Payments:**

### FY 2016 Major Accomplishments

- Expanded access to multiple IPERIA specified data sources
- Added more than 1,500 DNP Portal users to our customer base
- Held multiple agency strategic planning sessions and completed 10 agency analytics projects

- Work with OMB to resolve limitations related to the SSA full Death Master File and identify and gain access to other data sources
- Work with OMB to implement a pilot project with a federally-funded state administered program as per the Federal Improper Payments Coordination Act of 2015
- Expand DNP's Analytics Service to include predictive and risk-based modeling with agency partners

| OIG CHALLENGE NO. 3   | SUMMARY OF MAJOR ISSUES   |
|---|---|
| Anti-Money Laundering and Terrorist Financing/Bank<br>Secrecy Act (BSA) Enforcement | <ul> <li>Prevent criminal and terrorists from using our financial networks to sustain their operations and/or launch attacks against the U.S.</li> <li>Vacancies for multiple key positions leads to heightened concerns over TFI's ability to meet mission critical objectives</li> <li>Enhance financial transparency as a way to strengthen efforts to combat financial crime and collect, analyze, and report data on national threats</li> <li>With increasing use of mobile devices for banking, internet banking, internet gaming, and peer-to-peer transactions and use of virtual currencies, providers under the BSA must understand their obligations under the statute</li> </ul> |

FinCEN

FY 2016 Accomplishments

- Issued two Financial Action Task Force (FATF) advisories that identified jurisdictions with Anti-Money Laundering and Countering the Financing of Terrorism (AML/CFT) deficiencies and one cyber threat related advisories to financial institutions regarding E-mail compromise fraud schemes
- Continued the Global Rapid Response Program, recovering or restraining over \$190M funds obtained through cyber-enabled crimes targeting financial institutions and their clients before they could be used by criminals
- Published the Customer Due Diligence (CDD) final rule that requires identification of beneficial owners of legal entity customers, subject to certain exemptions and issued four Notice of Proposed Rulemaking (NPRM) actions, including an NPRM regarding investment advisers
- Developed over 100 business rules to screen daily BSA filings to identify reports that merit further review for topics of national security concern, such as terrorist financing, cyber threats, and financial fraud
- Issued geographic targeting order (GTO) in Florida that contributed to the arrests and pending arrests of 22 alleged co-conspirators in a complex money laundering scheme with ties to the Mexican Sinaloa drug cartel
- Issued several GTOs targeting priority money laundering threats such as tax fraud by identity theft and the movement of U.S. dollar cash across the southern border and trade-based money laundering for priority drug trafficking organizations
- Issued a GTO for real estate fraud and laundering the proceeds through all-cash purchases of luxury real estate in Manhattan and Miami
- Issued six penalties totaling \$8,660,000 against financial institutions in multiple industry groups
- Issued two actions under Section 311 of the USA PATRIOT Act against foreign financial institutions of primary money laundering concern seeking to protect our nation's financial system from their criminal activities
- Inspected 427 MOU holders and instituted corrective actions, as necessary, to ensure compliance with safeguards on use of BSA information
- Continued daily tactical reporting of terrorism-related financial intelligence to law enforcement and foreign partners and began direct distribution of such information to the U.S. intelligence community through intelligence information reports (IIRs)
- Issued secure advisories to financial institutions on red flag indicators of illicit financial activities associated with priority threats, including cybercrime and Islamic State of Iraq and Levant (ISIL), resulting in additional reporting of suspicious activity
- Used financial intelligence to identify foreign terrorist fighters (FTFs) facilitation networks related to Daesh/ISIL, Al Qaeda, and affiliates with a focus on logistic networks and on the information gaps associated with FTF travel

- Continue to issue guidance and actionable advisories to regulated industries, and cooperative efforts with Federal and State regulatory agencies to exchange compliance information and leverage examination resources
- Finalize existing rulemaking proposals and develop new regulations, as warranted, to address money laundering risks or gaps in the regulatory framework
- Use advanced analytics capabilities to apply predictive models to BSA data and identify high-value targets suspected of laundering proceeds of health care fraud, tax fraud by identity theft, and securities fraud
- Publish advanced analytic products identifying illicit finance networks/schemes, and failed institutions or jurisdictions involved in illicit financial activities
- Continue to exercise enforcement authorities where appropriate to ensure compliance with the BSA and combat money laundering in all sectors of the financial services industry
- Use the BSA Advisory Group to share information by and between industry and government, provide government feedback to industry, and discuss the most sensitive and difficult problems facing organizations

#### FY 2016 Accomplishments

- Accelerated the pace of interaction and cooperation on cross-border issues relevant to national regulations
- Collaborated with international agencies to study, organize and implement anti-money laundering practices for banks

### Actions Planned or Underway

- Continue emphasis on BSA/AML related risks with national banks
- · Continue efforts to work with cross border regulators and participate on international working groups

| OIG CHALLENGE NO. 4   | SUMMARY OF MAJOR ISSUES  |
|---|--|
| Management of Treasury's Authorities Intended to<br>Support and Improve the Economy | Protect the taxpayer from unnecessary risk associated with the implementation and administration of programs intended to support and improve the economy, including the provisions of the: |
|   | - Small Business Jobs Act of 2010  |
|   | - American Recovery and Reinvestment Act of 2009   |
|   | - Housing and Economic Recovery Act of 2008  |
|   | - Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010  |
|   | - Resources and Ecosystems Sustainability, Tourist Opportunities, and Revived Economies of the Gulf Coast States Act of 2012   |

# Continued Implementation of Dodd-Frank

# Financial Stability Oversight Council (FSOC)

FY 2016 Accomplishments

- Completed annual reevaluations of previously designated nonbank financial companies
- Monitored the eight financial market utilities designated in 2012 for enhanced risk-management standards and supervision
- Provided a public update on potential risks to our nation's financial stability arising from asset management products and activities and formed a working group to conduct further analysis

# Actions Planned or Underway

- Continue identification of nonbank financial companies for designation for supervision by the Federal Reserve and enhanced prudential standards
- Continue to evaluate potential risks to our nation's financial stability arising from asset management products and activities, in particular the use of leverage by hedge funds
- Facilitate tabletop exercises to improve coordination among central counterparties in a stress scenario, and identify potential
  operational improvements
- Continue monitoring for potential risks to our nation's financial stability, with a focus on significant financial market developments and structural vulnerabilities affecting the financial system
- Continue to implement operational improvements to existing processes and procedures related to the work of the FSOC

# **CDFI Bond Guarantee Program**

### **Community Development Financial Institutions Fund (CDFI Fund)**

### FY 2016 Accomplishments

- Successfully secured \$750 million in the FY 2016 appropriation
- Bonds totaling \$265 million were issued on behalf of four CDFIs in FY 2016
- \$1.11 billion has been guaranteed since the inception of the CDFI Bond Guarantee Program, which provides long-term, low-cost fixed-rate capital for projects in low-income urban, rural, and Native communities

- The FY 2017 budget proposal for the CDFI Bond Guarantee Program proposes the following:
  - $\circ~$  to extend the CDFI Bond Guarantee Program through FY 2017;
  - $\circ~$  to reduce the minimum bond size from \$100 million to \$25 million;
  - to permit the Secretary to adjust the risk-share pool payment requirement, based on the borrower's credit quality, from zero to four percent;

- o to collect a mandatory one percent fee from all borrowers; and
- to revise the relending account language to correct a technical drafting error.

# Small Business Lending Fund and State Small Business Credit Initiative

### Small Business Lending Fund (SBLF)

### FY 2016 Accomplishments

- Collected \$29.593 million quarterly dividends, interest and fees from SBLF participants
- Coordinated and processed full redemptions for 172 institutions and partial redemptions for 17 others totaling \$1.95 billion in proceeds. Redemptions as of September 30, 2016 represented 48.51% of the original \$4.027 billion disbursed and 56.93% of the number of institutions that were originally funded.
- Met with federal regulators to review and plan for managing the large increase in 2015/2016 redemptions
- Participants reported \$1.1 billion overall increase in qualified small business lending (6/30/16 vs 6/30/15) (Current and former participants)
- Participants reported \$11.4 billion overall decrease in qualified small business lending (6/30/16 vs 6/30/15) (Current participants)

### Actions Planned or Underway

- Outline future needs for staffing and third party contractors as program evolves post-SBLF step up for bank participants
- Work closely with transition team to ensure new senior staffs are informed of the program status
- Identify possible disposition strategies post transition for banks remaining in the SBLF program and begin discussions regarding the step up in rates for CDLF participants in 2018
- Continue to work with participants identified for enhanced monitoring

### State Small Business Credit Initiative (SSBCI)

### FY 2016 Accomplishments

- Received, tested, and transferred a cumulative \$1,420 Million to states as they qualified for subsequent disbursements on their allocations (\$57 Million in fiscal year 2016)
- Conducted on-site compliance reviews or training sessions with six states
- Evaluated and approved 12 formal modifications to states' approved SSBCI programs
- Organized final national conference of state SSBCI officials hosted by the OCC
- Published Summary of States' Quarterly Reports (Quarters ending September 2015, December 2015, March 2016)
- Published Summary of States' 2015 Annual Reports
- Published SSBCI 2016 Program Evaluation Report

### Actions Planned or Underway

- Continue to receive, test, and process requests for subsequent disbursements
- Participate in conferences with state officials
- Continue to publish Quarterly Reports and the final Annual Report
- Continue to coordinate responses to audits of states conducted by the OIG
- Conduct an orderly wind down of the SSBCI Program and Office

# Office of Housing and Energy (Recovery Act): (under OIG CHALLENGE NO. 2)

### **Management of Recovery Act Programs**

# Office of the Fiscal Assistant Secretary

FY 2016 Accomplishments

- Managed the low income housing and specified energy property programs, including the extension of the specified energy property program by one year under Section 707 of the Job Creation Act, by supplementing a small core staff in Departmental Offices with support from other Treasury offices.
- Continued to process incoming applications for the energy program and make timely awards
- Continued an interagency agreement for the energy program with the Department of Energy to assist with the technical aspects of the energy program
- Continued an annual reporting process for the low-income housing program to help ensure projects funded under the program remain qualified

### Actions Planned or Underway

• Continue the compliance monitoring programs related to the low-income housing and specified energy property programs

- Complete the processing of incoming applications for the energy program
- Continue to coordinate with IRS's compliance initiative project regarding the energy program
- Continue assessment of staffing needs

### **Community Development Financial Institutions Fund**

FY 2016 Accomplishments

• Closed out all Recovery Act awards

Actions Planned or Underway

• N/A – The CDFI Fund's Recovery Act obligations have been completed

### Management of the Housing and Economic Recovery Act (HERA)

#### Domestic Finance – Housing Finance Agencies Initiative (under HERA)

FY 2016 Accomplishments

- The New Issue Bond Program (NIBP) is the only remaining component of the HFA Initiative. It had an outstanding principal balance of approximately \$6.5 billion as of September 30, 2016, down approximately \$1.3 billion from the prior year balance of \$7.8 billion, and down approximately \$8.8 billion from its original balance of \$15.3 billion in December 2009
- During FY2016, Treasury received timely payment of all NIBP principal, interest and fees that were due
- NIBP has a very high credit quality due to the high degree of Federal and federally-related insurance and guarantees of the underlying mortgage collateral, as well as significant over-collateralization in the bond indentures. Mortgage revenue bonds of the type collateralizing the NIBP portfolio have historically been an extremely safe long-term investment
- All bonds in the NIBP portfolio are rated either in the AAA/Aaa or AA/Aa categories

### Actions Planned or Underway

- NIBP has no policy issues or action items to be resolved. The portfolio will be held to maturity. It declined rapidly in FY2016 and will continue its steady decline in the coming year
- Treasury will continue to monitor the financial health and ratings of all NIBP bond issuers and the overall credit quality of the mortgage collateral underlying the NIBP bonds

#### **Office of Financial Stability**

#### FY 2016 Accomplishments

- Net collections \$56.0 million from investments under the Troubled Asset Relief Program (TARP) through repayments, warrant sales, dividends, and interest payments; with these collections Treasury has cumulatively collected 97.8 percent of the \$434.0 billion in program funds disbursed under TARP (101.9 percent when non-TARP AIG shares are included)
- Exited seven positions in banks under the Capital Purchase Program (CPP) (as of September 30, 2016 only 12 of the original 707 institutions remained in the program)
- Exited seven positions in institutions under the Community Development Capital Initiative (CDCI) (as of September 30, 2016 55 of the original 84 institutions remained in the program)
- Allocated \$2 billion in additional funding to existing Hardest Hit Fund participants in a way designed to maximize the utilization and effectiveness of the funds

#### Actions Planned or Underway

- Implementing the Early Repayment Option for the CDCI; the plan is designed to dispose of a significant percentage of CDCI investments at fair value while eliminating longer term credit and market risk exposure from the portfolio
- Preparing for the retirement of the Modified Housing Assistance (MHA) program as the application deadline of December 30, 2016 approaches; working with stakeholders to influence framework for loss mitigation following the end of MHA
- Managing implementation and oversight of the Hardest Hit Fund program (HHF) to maximize effectiveness and reduce risks associated with the \$9.6 billion program

### Office of Financial Research (OFR)

FY 2016 Accomplishments

- Completed bilateral repurchase and securities lending data collection pilots in collaboration with the Federal Reserve and the Securities Exchange Commission (SEC)
- Launched the OFR U.S. Money Market Fund (MMF) Monitor, an interactive online tool that allows the public to track money market funds—information that was not easily accessible before

- Enhanced the global Legal Entity Identifier (LEI) system, and launched phase 2 of the program, which will make information about complex ownership structures available to the public
- Evaluated vulnerabilities in central clearing and central counterparties
- Launched a programmatic approach that aligns our priorities with our mission and that coordinates our work on data, research, and analysis based on the needs of the OFR's stakeholders and the mandates of the OFR under the Dodd-Frank Act

### Actions Planned or Underway

- Partner with the Federal Reserve and the SEC to design and implement a permanent collection for bilateral repo and sec lending data
- Develop and publish additional monitors to track risks in hedge funds, asset-return correlations, and credit risks
- Collect data and publish research evaluating vulnerabilities on shadow banking activities and other consequential threats to financial stability
- Partner with the Federal Reserve, the Federal Reserve Bank of New York, and industry to explore the creation of a reference rate supporting critical financial market contracts
- Expand the programmatic approach beyond the eight identified programs

# **RESTORE ACT**

### **Office of the Fiscal Assistant Secretary**

### FY 2016 Accomplishments

- Published RESTORE Act final rule, followed by an amendment (interim final rule) to assist the Gulf Coast Ecosystem Restoration Council (Council) manage its administrative expenses effectively and efficiently
- Updated RESTORE Act funding opportunity announcements and frequently asked questions, and modified our OMB-approved forms to conform to the final rule and assist eligible entities apply for and receive grants
- Published trust fund estimate tables to reflect the 15-year civil penalty payment schedule, included in the BP consent decree arising from the Deepwater Horizon oil spill, to assist eligible entities, the Council, and NOAA plan for the use of trust fund deposits
- Conducted grants management training for 139 state and local staff in 43 of 48 eligible entities, and conducted initial reviews of internal controls for 32 of 48 entities and provided technical assistance to ten additional entities

- Work with eligible entities to determine ways to plan for and implement projects for ecological and economic restoration in the Gulf Coast Region, given the 15-year BP civil penalty payment schedule
- Continue to offer training and technical assistance in various aspects of grants management to entities to assist them in applying for and managing grants
- Collaborate closely with the Fiscal Service on RESTORE Trust Fund allocation tables and Automated Standard Application for Payments (ASAP) accounts for Treasury RESTORE Act grants, consistent with established policies and procedures

| Matters of Concern No. 1     | SUMMARY OF MAJOR ISSUES   |
|------------------------------|---|
| Currency and Coin Production | <ul> <li>BEP needs to ensure that the design and production projects are adequately managed to avoid another instance of production deficiencies</li> <li>Mint should ensure comprehensive review of U.S. currency to include production and use of coins, the use of alternative metals, and the sustainability of Mint facilities for production</li> <li>BEP and Mint need to consider the effect of alternative payment methods and other technological advances on their respective business models, practices, future planning and interactions with customers and FRB</li> </ul> |

### FY 2016 Accomplishments

### **Coin Production**

- FY 2016 cost of production for the penny increased slightly to 1.50 cents compared to 1.43 cents in FY 2015, while nickel costs decreased to 6.32 cents from 7.44 cents. The cost reductions for the nickel were realized primarily due to the decline in the cost of metal, which decreased 21%. In spite of a decline in metal costs, penny and nickel costs continue to remain above face value for each denomination.
- Seigniorage (difference between the cost of producing a coin and its face value) has been returned to the general fund in the amount of \$550 million for FY 2016. The second consecutive year of returns at this level.
- Since the second biennial report in December 2014, the Mint continued extensive testing of six different metal compositions, as well as initial testing of other materials that showed potential as either seamless or co-circulate alternatives.

### **Currency Production**

- Single Note Inspection (SNI): Recovered more than 350 million series 2009 notes for a cost savings of \$26 million
- Retooling: The Federal Reserve Board and BEP agreed to modify the existing manufacturing process to eliminate the need to package notes in serial number numeric sequence and to add a reclamation process to recover good notes from rejected sheets using SNI
- Raised Tactile Feature: Developed and tested six denomination schemes with the blind and visually-impaired community; selected a final denomination scheme (four-position, binary on/off rectangle)
- Western Currency Facility Expansion: Submitted a proposal to add approximately 250,000 square feet of new space to accommodate equipment to add new security features
- Human Capital Strategic Plan: Developed a framework and roadmap for six main areas: Competency Modeling, Workforce Planning, STEM Rotational Training, Apprenticeship and Upward Mobility, Leadership Development, and Knowledge Management

# Banknote Design and Development Program

- All internal and external stakeholders approved detailed technical requirements for the next family of notes
- Developed an integrated master schedule for the first note of the new family of notes, currently known as the Catalyst \$10.=
- Created "low fidelity" concepts for the Catalyst family; held stakeholder workshops to refine the concepts
- Eight new security features moved into the Concept Development phase; three projects moved into the Test and Optimize phase
- Awarded eight new contracts for security feature research and development moving three projects from the Feasibility phase into full development

### Actions Planned or Underway

### **Coin Production**

- Continue efforts to increase efficiency and control or reduce the cost to manufacture the nation's coinage
- Issue the third biennial report to Congress on alternative coinage materials as required in December 2016

### **Currency Production**

- SNI: Complete the SNI recovery effort of series 2009 notes in FY 2017; an additional 180 million notes are expected to be recovered for a cost savings of \$14 million
- Implement the SNI reclamation process for both the NXG \$100 note at the Western Currency Facility and the NXG \$20 note at the Washington, DC facility; more than 100 million NXG \$100 notes and 50 million NXG \$20 notes are expected to be reclaimed in FY 2017 for a savings of more than \$8 million

- Raised Tactile Feature: Final selection of the application method and the feature's location on the note
- Western Currency Facility Expansion: Start design efforts in 2017 with construction commencing in 2018 2019
- Human Capital Strategic Plan: Develop technical competency models for priority job series; implement BEP's workforce planning process within a selected Directorate (FY17); operationalize STEM and Career Development programs; establish management processes for all active apprenticeship programs

# Banknote Design and Development Program

- Finalize low fidelity design concepts and advance into medium fidelity phase
- The Catalyst \$10 note remains targeted for production-readiness in 2020

| Matters of Concern No. 3         | SUMMARY OF MAJOR ISSUES   |
|----------------------------------|---|
| Enterprise Risk Management (ERM) | <ul> <li>Implement guidance to establish a comprehensive and effective<br/>ERM program</li> <li>Implement an ERM capability to integrate strategic planning and<br/>review processes and internal control processes.</li> </ul> |

# Office of Risk Management

FY 2016 Accomplishments

- Held regular discussions of major risk issues with senior leaders at the Treasury Risk Management Committee (co-chaired by the Deputy Secretary and the Chief Risk Officer (CRO) and members include Under Secretaries and Assistant Secretaries), that have led to follow-up work and deliverables to help mitigate the risks discussed
- Created a community of practice Treasury-wide through the Enterprise Risk Management Council (chaired by the CRO) to discuss ERM and share best practices across all the bureaus
- Worked closely with OMB on the development of Circular A-123 revisions to incorporate ERM
- Lead in writing "Playbook: Enterprise Risk Management for the U.S. Federal Government", a helpful guide for agencies to help them implement ERM and the requirements of OMB Circular A-123
- Worked with Management to integrate a risk landscape slide discussion into the Quarterly Performance Reviews (QPR)
- Worked with Management on the Strategic Objective Annual Review (SOAR) process
- Worked with the CDFI Fund on model risk management as well as sitting on its Credit Review Board
- Co-chaired the Fiscal High Value Asset Executive Oversight Council to provide oversight and counsel on our most important mission critical functions.
- Consulted with several offices in Treasury on specific risk management questions

- Continue development of a Treasury-wide ERM Playbook
- Continue working with offices to produce risk profiles which will be used to develop a Treasury-wide risk profile
- Continue Treasury Risk Management Committee and ERM Council meetings in the next administration
- Continue to work with other agencies to help them develop ERM programs by developing an interagency community of practice for risk management who will meet on a bimonthly basis

| TIGTA CHALLENGE NO. 1  | SUMMARY OF MAJOR ISSUES  |
|--|--|
| Security Over Taxpayer Data and Protection of IRS<br>Resources | Promote measures for safeguarding the confidentiality of taxpayer financial and personal data, and ensuring the protection of IRS employees and property |

### FY 2016 Accomplishments

- Created a new executive position which has the responsibility for leading the development of a strategy to provide consistent oversight of all authentication needs across IRS functions and programs
- Established two new offices to provide project management oversight for email policy and archiving implementation and to bring the IRS into compliance with the Code of Federal Regulations for records management of email by January 2017 and other permanent e-records by January 2020 as required by OMB Memorandum M-12-18, Managing Government Records Directive
- Leveraged National Institute of Standards and Technology (NIST) standards to ensure that implemented authentication processes used for all current and future online applications provide the required level of assurance for the determined level of authentication risk
- Established a new IRS organization within Cyber Operations with responsibility for monitoring protected applications to detect and prevent automated attacks. Conducted monthly meetings between the IRS and the contractor related to the prevention of automated attacks, tools in use, and the procedures implemented by the contractor in the use of these tools to prevent automated attacks
- Built refinements into current processes to identify all individuals affected by the Get Transcript application incident and developed procedures to assist the IRS in responding to any future unauthorized data accesses
- Mailed notification letters to additional identified taxpayers affected by the Get Transcript application incident and placed their
  accounts on the Dynamic Selection List for heightened levels of identity theft protection on any subsequently filed returns, and
  placed Data Loss Indicators on the accounts
- Updated policy and developed procedures for monitoring the inventory of external interconnections with financial institutions, which included developing a new combined Memorandum of Understanding (MOU)/Interconnection Security Agreement (ISA) template to ensure that newly developed ISAs have the same expiration dates for both the MOU and ISA components
- Collaborated with the Federal Protective Service (FPS) and the TIGTA to improve the safety and security of IRS facilities and personnel by delivering site-specific, in-person security briefings to employees, holding more than 150 briefings

### Actions Planned or Underway

- Develop major milestones and project plans to upgrade email servers and email archiving functionality, and configure retention policies to implement an IRS email records management policy
- Establish process improvements in the development of ISA with financial institutions and IRS maintenance of the centralized interconnections inventory; and update policy and procedures, as needed, to document ISAs' organizational standards and procedures to ensure effective process improvements and efficiencies
- Review the e-Authentication risk assessment process to ensure that the level of authentication risk for all current and future IRS online applications accurately reflects the risk to the IRS and taxpayers should an authentication error occur
- Provide Security Specialists with the tools and training needed to monitor and analyze large amounts of data to strengthen electronic authentication process controls

| TIGTA CHALLENGE NO. 2                  | SUMMARY OF MAJOR ISSUES                                    |
|--|--|
| Identity Theft and Impersonation Fraud | Impact of tax-related identity theft on tax administration |
|  |  |

FY 2016 Accomplishments

- Collaborated with State and City Departments of Revenue of 39 states and the District of Columbia to expand the State Suspicious Filer Exchange to include suspicious or potentially fraudulent business tax returns
- Implemented two new rules designed to identify potential misuse of Employer Identification Numbers (EINs) on Form 1120, U.S. Corporation Income Tax Return filings. During 2016, these filters identified 740 returns with refund claims of over \$74.3 million
- Created a "Tax Practitioner Guide to Business Identity Theft" that informs tax professionals about the risks of business identity theft, how they can help their business clients navigate the process of protecting their information from misuse, and who to contact if they suspect their business's identity has been stolen
- Collaborated with Security Summit participants to implement additional safeguards to protect taxpayers' federal and state tax accounts from identity thieves
- Promoted events designed to educate private sector entities, law enforcement partners, and taxpayers about identity theft and tax scams

• Participated in outreach presentations focused on theft from tax preparation and payroll service businesses and issued identity theft communications via news releases, Tax Tips, and social media platforms

#### Actions Planned or Underway

- Complete programming changes that will permit the systemic locking of suspicious business tax accounts associated with suspicious EINs and update procedures to recognize the improved account lock-down capability
- Engage tax software developers and the tax preparer community to identify additional data elements from individual and corporate tax returns to improve taxpayer authentication and identify possible identity theft scams
- Implement additional improvements to Business Master File (BMF) identity theft filters for Form 1120, U.S. Corporation Income Tax Return, and Form 1041, U.S. Income Tax Return for Estates and Trusts
- Identify areas for improvement and take additional actions to increase awareness of business identity theft

| TIGTA CHALLENGE NO. 3   | SUMMARY OF MAJOR ISSUES   |
|---|---|
| Implementing the Affordable Care Act and Other Tax Law<br>Changes | Effectively implement new tax provisions, including tax-related health care provisions of the <i>Patient Protection and Affordable Care Act</i> (ACA), and the <i>American Recovery and Reinvestment Act</i> (Recovery Act) |

#### FY 2016 Accomplishments

- Developed and distributed education and outreach materials for employers, tax professionals, and taxpayers, which included employer webinars, news updates via social media, information returns, and ACA tax provision requirements related to return filing and the PTC
- Identified non-filers of the Medical Device Excise Tax using publicly available data from the Food and Drug Administration and Customs and Border Protection and mailed notices to a sample of taxpayers to evaluate the impact of the notices on compliance
- Reconciled the Exchange Periodic Data to the Centers for Medicare and Medicaid Services records of disbursements paid to the marketplace insurance companies
- Ensured adherence to established standards and guidelines during financial systems testing of the Individual Income Tax Credits report and APTC and PTC reconciliation reports through increased monitoring
- Performed improper payment risk assessments, in conjunction with the Department of Health and Human Services (HHS), to identify areas that might affect the APTC, PTC, Cost Sharing Reduction, and Basic Health Program payment accuracy and determined the risk was medium
- Established internal controls to enable and monitor effective program operations, reliable financial reporting, and compliance with laws and regulations

#### Actions Planned or Underway

- Ensure adherence to established standards and guidelines during financial systems testing of the Individual Income Tax Credits report and APTC and PTC reconciliation reporting through increased monitoring
- Analyze tax year 2015 data to identify potential "stop filers" taxpayers who filed in prior years but not in 2015 and develop a plan to test options to bring taxpayers into compliance
- Implement recommendations from the risk assessment study to strengthen controls around the PTC program

| TIGTA CHALLENGE NO. 4    | SUMMARY OF MAJOR ISSUES  |  |  |  |
|--------------------------|--|--|--|--|
| Improving Tax Compliance | Improve compliance and fairness in the application of the tax laws |  |  |  |

FY 2016 Accomplishments

- Evaluated field collection revenue officers' level of burden for case inventories by measuring volume and complexity and determined they were operating at the maximum productivity level based on current Internal Revenue Manual (IRM) guidelines for case assignments
- Applied the Bi-Partisan Budget Act (BBA) of 2015 to FY 2013 filing data to analyze partnership data for the purposes of understanding the number of partnership structures affected and to determine the potential effect on the partnership examination process
- Revised Federal Tax Deposit (FTD) soft notices into three versions designed to be more specifically related to the different types of
  change in deposits or deposit penalty assessment that are identified in the selection process. This improvement will ensure earlier
  contact with taxpayers who are predicted to owe taxes at the end of the quarter, which will in turn encourage greater taxpayer
  response rates and reduce the amount of dollars owed when the taxpayer actually enters accounts receivable. The revised letters
  also allow for flexibility with regard to "call-back" information, making it a lower cost option by reducing the impact on IRS
  resources

DEPARTMENT OF THE TREASURY

- Developed recommendations to improve backup withholding compliance and oversight under IRC section 3406
- Implemented compliance programming to capture and track the volume of taxpayers subject to a Refund Hold in one year and who file their tax returns in the following five years

#### Actions Planned or Underway

- Test the lower cost FTD soft notices treatment using notices without "call back" information and measure the results as compared to the notices that require a call back response or a response by correspondence
- Implement the Field Inventory Process Improvement Team project. This Future State pilot will explore opportunities to increase revenue officers' productivity by testing three different inventory selection and assignment processes
- Establish an implementation plan for enforcing backup withholding processes after approval of final recommendations
- Add future-filing compliance programming to capture and track the volume of taxpayers who are subject to a Refund Hold when complete data is available for TY 2015 filers
- Revise the non-filer strategy to include improving the effectiveness of non-filer notices in order to reach more taxpayers and improve the overall notice response rate
- Perform a detailed evaluation of return delinquency notice metrics to define and determine notice effectiveness, and utilize notice response data and notice effectiveness research results to develop a strategy specific to return delinquency notice effectiveness. The analysis will include results stratified by non-filer priority. The IRS will also ensure the strategy aligns with Future State themes and will include key non-filer metrics in appropriate Enterprise goals

| TIGTA CHALLENGE NO. 5                            | SUMMARY OF MAJOR ISSUES                |
|--|--|
| Reducing Fraudulent Claims and Improper Payments | Effective protection of taxpayer funds |

FY 2016 Accomplishments

- Developed a way to measure how paid return preparers respond to IRS efforts to curb erroneous and fraudulent earned income tax credit (EITC) claims in order to identify the most effective approaches for outreach and compliance
- Analyzed identity theft return information from filing season 2015, resulting in the conclusion that the volume of confirmed and likely identity theft with a foreign address is an extremely low percentage of the total identity theft population a determination that will assist the IRS in better evaluating refund fraud trends and improving fraud filter performance
- Implemented two new rules designed to identify potential misuse of EINs on Form 1120, U.S. Corporation Income Tax Return filings
- Conducted a W-2 Verification Code (VC) pilot for filing season 2016 with four payroll service providers, which tested the capability of a VC to confirm the integrity of Form W-2 data
- Developed a revised risk assessment questionnaire that better reflected IRS business processes and more accurately assessed the risk of improper payments for the IRS refundable credits

Actions Planned or Underway

- Administer Public Law 114-113, Protecting Americans from Tax Hikes (PATH), by incorporating paid preparer returns claiming the American Opportunity Tax Credit, Child Tax Credit, and Additional Child Tax Credit into a combined Refundable Credits Return Preparer program to reduce improper payments and erroneous claims filed by preparers who fail to exercise due diligence
- Continue implementing improvements to BMF identity theft filters for Form 1120, U.S. Corporation Income Tax Return and Form 1041, U.S. Income Tax Return for Estates and Trusts
- Monitor known bad EINs and addresses and cross-reference Social Security Numbers to identify and neutralize the misuse of EINs
- Increase the scope of the W-2 VC pilot in filing season 2017 by increasing the number of W-2s in the pilot to about 50 million forms and types of W-2 issuers to include additional payroll service providers and a large federal organization

| TIGTA CHALLENGE NO. 6                               | SUMMARY OF MAJOR ISSUES   |  |  |  |
|---|---|--|--|--|
| Improving Tax Systems and Expanding Online Services | Modernize taxpayer systems and improve efficiency of operations |  |  |  |

FY 2016 Accomplishments

- Deployed several Customer Account Data Engine 2 (CADE 2) Transition State 2 projects for filing season 2016, which: allowed a more effective way to record and retain taxpayer history; corrected and automated failure to pay calculations for the adjusted refundable credits; and aggregated and provided taxpayer data to downstream systems across the IRS
- Enhanced the capability to detect and block fraud in real-time by integrating other web-facing applications, including the Return Review Program, to determine an individual taxpayer risk profile and detect possible fraudulent usage
- Created the capability to stream e-Authentication log data to the Cybersecurity Data Warehouse for fraud analysis
- Established goals and implemented performance measures to determine the effectiveness of the backup and restoration process for selected non-mainframe servers that perform various functions, including: running various operating systems such as versions of Microsoft Server, Linux, and UNIX; operating as servers for databases, the web, e-mail, and files; and supporting the IRS network infrastructure. Employed selected measures to ensure performance was consistent with stated goals
- Reviewed all network server backup and restoration problem management cases to ensure adherence to the problem management process and identified and remediated root causes. Briefed all employees on the proper use of the problem management processes
- Released the Future State vision for modernizing taxpayer service and enforcement, and prioritized investments in online accounts and other digital capabilities aligned with the vision

#### Actions Planned or Underway

- Leverage the CADE 2 database for all individual taxpayer account data and generate data necessary to build financial and legal transcripts
- Focus on the financial material weakness for individual taxpayer accounts in the Individual Master File (IMF)
- Implement the data services framework to provide CADE 2 data to downstream systems via modernized data distribution services, providing legacy and modernized data formats
- Establish a foundation for a modernized individual tax-processing engine by reengineering core IMF posting, settlement, and analysis functions into Java-based programs
- Establish updated access authorization documentation for the Integrated Production Model (IPM) in each of the source systems and conduct an annual validation of IPM service accounts
- Upgrade the network server backup software to the most current version, contingent upon funding. Maintain alignment with IRS processes and procedures to assess, prioritize, and implement upgrades intended to ensure the IRS continues to use the most current version of the software
- Develop guidelines for the Infrastructure Currency initiative in order to capture repeatable processes and identify instances in which those processes correlate with efforts to assess, prioritize, and implement upgrades intended to ensure the IRS continues to use the most current version of the software
- Develop an Online Account that builds upon several stand-alone tools on IRS.gov such as Get Transcript, Direct Pay, and Online
  Payment Agreement.

| TIGTA CHALLENGE NO. 7 |   | SUMMARY OF MAJOR ISSUES  |  |  |  |
|-----------------------|---|--------------------------|--|--|--|
|                       | Providing Quality Taxpayer Service Operations | Improve taxpayer service |  |  |  |

FY 2016 Accomplishments

- Aligned projects and investments with the Future State vision, and identified new opportunities to improve taxpayer service and compliance using digital services and other Future State capabilities
- Added five new topics to the Interactive Tax Assistant on IRS.gov for the 2016 filing season: Taxes Schedule A, Retirement Contribution Credit, Tip Income, Child and Dependent Credit, and Scholarships, Fellowships, and Grants
- Promoted the availability of self-service options for taxpayers by educating taxpayers using traditional service channels, social media, videos, and public service announcements
- Transitioned additional Taxpayer Assistance Centers (TACs) to the appointment-based model, increasing the number of TACS that operate using appointments for walk-in service, which has resulted in significant reductions in wait time
- Increased the number of partners with Virtual Service Delivery (VSD) capability, which provides face-to-face service to taxpayers in non-TAC locations
- Identified a test location for placement of VSD in a Social Security Administration (SSA) office and began exploring techniques that will allow the SSA and the IRS video networks to connect securely

Actions Planned or Underway

- Educate and encourage taxpayers to use alternative services with a special emphasis on any changes dictated by recent Congressional requirements and the IRS' Future State initiatives
- Provide appointment service at the remaining TACs by the end of calendar year 2016
- Communicate best practices and strategies for resource optimization in the delivery of the Volunteer Income Tax Assistance and Tax Counseling for the Elderly programs
- Assess current procedures to develop a consistent process related to the Automated Age Listing, which identifies cases needing immediate attention
- Notify taxpayers when the IRS has reason to believe they may be victims of employment-related identity theft and subsequently evaluate the results to determine an appropriate course of action with respect to the previously identified potential victims
- Develop processes to ensure that examiners complete the Form 9409, IRS/SSA Wages Worksheet, when required, and to appropriately track the delivery of Forms 9409 to the Social Security Administration

| TIGTA CHALLENGE NO. 8                          | SUMMARY OF MAJOR ISSUES   |  |  |  |  |
|--|---|--|--|--|--|
| Impact of Global Economy on Tax Administration | Increase the outreach efforts to foreign governments on cross-border transactions |  |  |  |  |

#### FY 2016 Accomplishments

- Updated the Foreign Account Tax Compliance Act (FATCA) Compliance Roadmap with activities for identifying non-compliance by Foreign Financial Institutions
- Conducted outreach and education to address errors made by paid preparers on Form 1116, *Foreign Tax Credit (FTC)*, and presented the topic at the 2016 National Tax Forums in an effort to educate as many paid tax practitioners as possible
- Implemented controls related to Form 1116 by programming a new error code, updating policy and procedures to include instructions on processing the form, and updating the 2016 Coding and Editing Individual Income Tax Returns Training
- Deployed enhancements to the FATCA registration system, which included enabling foreign financial institutes to provide a sponsoring entity a Global Intermediary Identification Number, and to manage sponsored entities and sponsored subsidiary branches, and enabled an automated process for Financial Institutions (FIs) to update their registration status and to change FI types and/or transfer under a new lead FI
- Investigated counter-terrorism referrals identified through the course of normal compliance activity, including investigations related to the use of charitable organizations suspected of knowingly being involved in illicit financing of terrorist activities
- Conducted awareness and training programs for employees on how to recognize and understand indicators of the misuse of charities to fund terrorism, and participated in the Financial Action Task Force (Mutual Evaluation of the United States relating to U.S. efforts in the counter-terrorism arena)
- Reviewed withdrawn or denied offshore voluntary disclosure requests to determine if the IRS adequately addressed the tax noncompliance of taxpayers who were denied entry to or withdrew from the Offshore Voluntary Disclosure Program (OVDP)
- Conducted weekly reviews of all denied and withdrawn OVDP applications from the date of receipt to ensure any taxpayer information that was erroneously received was immediately routed to the appropriate unit

#### Actions Planned or Underway

- Use referrals to investigate tax-exempt entities related to counterterrorism matters and, if applicable, move those referrals into the larger national security arena
- Work closely with the FBI's Terrorist Financing Operations Section to identify those funding terrorist activities through the use/abuse of charitable organizations
- Provide project management support to the Organization for Economic Co-operation & Development (OECD) Global Forum Secretariat as the Common Transmission System (CTS) project begins, and work with the International Data Exchange System (IDES) vendor to determine steps necessary to transition from an IDES-only environment to one where IDES is complemented by CTS to ensure system compatibility and that the U.S. can fulfill its treaty obligations in a safe and efficient manner
- Explore opportunities to review future denied or withdrawn offshore voluntary disclosure requests for compliance actions
- Monitor and adhere to established timeliness guidelines for taxpayers to respond to offshore voluntary disclosure-related correspondence and follow those guidelines during the initial eligibility determination, case building, and certification processes

| TIGTA CHALLENGE NO. 9      | SUMMARY OF MAJOR ISSUES   |  |  |
|----------------------------|---------------------------|--|--|
| Protecting Taxpayer Rights | Apply the tax laws fairly |  |  |

FY 2016 Accomplishments

- Provided guidance to Automated Collection System Support (ACSS) sites to conduct research for a new taxpayer address when the lien notice envelope shows multiple reasons for return
- Revised IRM 5.10.4, *Seizure and Sale, Actions Prior to Sale*, for advertising the sale of seized property and issued a memorandum to all Field Collection and Property Appraisal Liquidation Specialist Group Managers and Revenue Officers reminding them of their responsibility to follow IRM 5.10.4.8 (5), which explains the process for documenting revisions to the fair market value
- Expanded the Suspicious Filer Exchange to include 43 states and 6 municipalities whereby the IRS and states share information for confirmed identity theft and questionable returns through secure data transfers, for use with filter and authentication processes
- Utilized data from examination closure results to foster a culture of data-driven decision making to improve examination processes and procedures, assess training needs, and improve case selection models
- Established a process to expedite the sharing of significant tax incidents or threats amongst Security Summit partners
- Incorporated the Taxpayer Bill of Rights in employee training

#### Actions Planned or Underway

- Develop data elements for business returns so that the Tax Software Industry may provide suspicious business return information
- Provide federal and state tax agencies data fields for use in identifying suspicious tax returns
- Test the address verification research procedures for effectiveness and revise IRM 5.19.6, Liability Collection, ACS Support, to align with the test findings and clarify the procedures, as needed
- Revise IRM 5.12.7, Notice of Lien Preparation and Filing, and IRM 5.19.4, Enforcement Action, to clarify procedures for identifying the address of the secondary taxpayer when requesting Notice of Federal Tax Liens on joint liabilities
- Revise IRM 5.19.6.17.4(5), Undeliverable Notice of Federal Tax Lien, to reflect the language found in IRM 5.12.6.3.17(7), Processing Lien Collection Due Process Notices Returned by the USPS

| TIGTA CHALLENGE NO. 10                          | SUMMARY OF MAJOR ISSUES   |  |  |  |
|---|---|--|--|--|
| Achieving Program Efficiencies and Cost Savings | Use resources to focus on producing the best value for stakeholders |  |  |  |

FY 2016 Accomplishments

- Collaborated with FPS to develop a process to obtain current and future FPS Facility Security Assessments (FSA) for IRS facilities; determined that IRS Security Staff would obtain copies of the FSAs and continue to conduct risk assessments in IRS occupied facilities, integrating the FPS FSA findings in risk assessments and revalidation processes
- Collaborated with DOD and BFS to expand the use of the Federal Payment Levy Program (FPLP) and determined there were needed programming changes to exclude disability payments from the military retirement payment file
- Integrated the Enterprise Software Governance Board governance and executive review process into the Infrastructure Executive Steering Committee's standard operating procedures for mainframe software licensing as part of the process to identify additional savings in software spending
- Established a Risk Acceptance Form and Tool directory, which provides a consistent framework for the IRS to document business decisions in the context of risk appetite and/or acceptance
- Developed examples of key risk indicators for four enterprise risk themes
- Completed a performance measures report that identifies cost and revenue data for IRS notices to help determine total costs of programs
- Implemented a requirement that training events with the same course material provided at the same location and for the same dates be approved and reported as one event
- Centralized the retention of the final cost, approval, and reporting information for events with expenses exceeding \$20,000 to ensure that information is accurate and available to meet Treasury Department and IRS requirements

#### Actions Planned or Underway

- Implement military payments in the FPLP upon notification of the DOD's programming changes
- Develop podcasts to foster awareness of Enterprise Risk Management for all IRS employees

<sup>&</sup>lt;sup>1</sup> GAO, Financial Audit: IRS' Fiscal Years 2015 and 2014 Financial Statements, GAO-16-146 (Washington, D.C.: November 12, 2-15)

<sup>&</sup>lt;sup>2</sup> GAO, Financial Audit: U.S. Government's Fiscal Years 2015 and 2014 Consolidated Financial Statements, GAO-16-357R (Washington, D.C.: February 25, 2016)

#### **TREASURY'S MATERIAL WEAKNESSES**

#### **FMFIA AND FFMIA REQUIREMENTS**

The Federal Managers' Financial Integrity Act (FMFIA) requires agencies to establish and maintain internal control to ensure that Federal programs operate efficiently, effectively, and in compliance with laws and regulations. The Secretary must evaluate and report annually on (a) whether there is reasonable assurance that the Agency's controls are achieving their intended objectives and (b) material weaknesses in the Agency's controls (FMFIA Section 2). Additionally, the Secretary must evaluate and report separately on whether the Agency's financial management systems comply with government-wide requirements (FMFIA Section 4). The Federal Financial Management Improvement Act of 1996 (FFMIA) requires agencies to implement and maintain management systems that substantially comply with Federal financial management systems requirements. The requirements of the FMFIA serve as an umbrella under which other reviews, evaluations, and audits should be coordinated and considered to support management's assertion about the effectiveness of internal control over operations, financial reporting, and compliance with laws and regulations.

As of September 30, 2016, we had two material weaknesses under Section 2 of the FMFIA, summarized as follows:

| Summary of FMFIA Material Weaknesses                   | Section 2 | Section 4 | Total |
|--|-----------|-----------|-------|
| Balance at the Beginning of Fiscal Year 2016           | 2         | 0         | 2     |
| Closures/Downgrades during Fiscal Year 2016            | 0         | 0         | 0     |
| Reassessed during Fiscal Year 2016                     | 0         | 0         | 0     |
| New Material Weakness Declared during Fiscal Year 2016 | 0         | 0         | 0     |
| Balance at the End of Fiscal Year 2016                 | 2         | 0         | 2     |

Below are highlights of Treasury's two material weaknesses:

#### Material Weakness Highlights

INTERNAL REVENUE SERVICE – Improvements needed in internal control over unpaid tax assessments.

**SUMMARY:** GAO identified control deficiencies that affected IRS' management and reporting of unpaid tax assessments. GAO reported that (1) IRS' reported balances for taxes receivable and other unpaid tax assessments were not supported by its core general ledger system for tax transactions; (2) system deficiencies in IRS' subsidiary ledger and supporting financial systems for unpaid tax assessments did not allow it to produce reliable and useful information with which to manage and report; and (3) various other control deficiencies that led to errors in taxpayer accounts.

Because of these deficiencies, IRS' financial systems currently do not provide the accurate and complete transaction-level financial information necessary to enable IRS to reliably classify and report unpaid tax assessment balances in accordance with federal accounting standards. The material weakness in internal control over unpaid tax assessments was primarily caused by financial system limitations and errors in taxpayer accounts that rendered IRS' systems unable to readily distinguish between taxes receivable, compliance assessments, and write-offs in order to properly classify these components for financial reporting purposes.

<u>GAO RECOMMENDATION</u>: The IRS Commissioner should direct the appropriate IRS officials to establish and implement formal policies and procedures to annually review unpaid tax assessments that are manually classified to determine whether the classification is correct for the current fiscal year.

| Actions Completed in FY 2016  | What Remains to be Done   |
|---|---|
| <ul> <li>Completed the FY 2015 "After the Audit" report and issued the results to the business owners for follow-up and corrective action</li> <li>The IRS continuously updated a series of long-term actions intended to address all issues impacting the material weakness which, based on funding, will be integrated into the unpaid assessments material weakness action plan</li> <li>Ten action items from the remediation plan were closed and eight added</li> <li>Under CADE2 TS2, implemented a pending payment project as part of a multi-phase approach that will allow IRS to utilize payments that have been received, but not posted</li> </ul> | <ul> <li>Implement action items from the long-term action plan<br/>to close the material weakness</li> <li>Implement CADE2 TS2 financial material weakness<br/>functionality by January 2019</li> <li>Test for downgrade of the financial material weakness in<br/>FY 2019 and request downgrade by GAO for FY 2020 with<br/>a target completion date of November 30, 2020</li> <li>Complete the downgrade and closure of the material<br/>weakness in FY 2021</li> </ul> |

#### Material Weakness Highlights

**BUREAU OF FISCAL SERVICE** – Improvements needed in controls over the processes used to prepare the U.S. Consolidated Financial Statement (CFS).

**SUMMARY:** GAO identified control deficiencies in Treasury's and OMB's processes used to prepare the CFS. These control deficiencies contributed to material weaknesses in internal control that involve the federal government's inability to

- adequately account for and reconcile intragovernmental activity and balances between federal entities;
- reasonably assure that the CFS are (1) consistent with the underlying audited entities' financial statements, (2) properly balanced, and (3) in accordance with U.S. generally accepted accounting principles;
- reasonably assure that the information in the (1) Reconciliations of Net Operating Cost and Unified Budget Deficit and (2) Statements of Changes in Cash Balance from Unified Budget and Other Activities is complete and consistent with the underlying information in the audited entities' financial statements and other financial data;
- verifying the accuracy of certain data transfers of federal entity-reported financial data used in the CFS preparation process; and
- determining whether user accounts already exist before establishing or recertifying user accounts in certain federal financial systems used in the CFS preparation process to help ensure that users are not assigned incompatible roles.

#### GAO RECOMMENDATIONS:

- 1. The Secretary of the Treasury should direct the Fiscal Assistant Secretary to develop and implement sufficiently detailed procedures, including ensuring the independence of information used in data reconciliations, to verify the accuracy of data transfers of federal entity-reported financial data used in the CFS preparation process.
- 2. The Secretary of the Treasury should direct the Fiscal Assistant Secretary to develop and implement procedures to determine whether user accounts already exist before establishing or recertifying user accounts in the Government-wide Treasury Account Symbol Adjusted Trial Balance System or Government-wide Financial Report System.

| Actions Completed in FY 2016   | What Remains to be Done  |  |  |  |  |  |
|--|--|--|--|--|--|--|
| <ul> <li>Monitored the root cause analysis and corrective action plans provided by federal entities for any recurring intergovernmental differences</li> <li>Expanded the monitoring of intergovernmental differences to additional federal entities to ensure sufficient coverage of material items</li> <li>Collected data from all identified reporting entities and/or showed their data was immaterial</li> <li>Outlined the procedures for obtaining audit coverage over a newly identified significant entity or newly identified material line items in the year they become significant</li> <li>Expanded on the robust remediation plan that was developed in FY 2015 to highlight the interim milestones and identify outcome measures to help track and maintain progress</li> </ul> | <ul> <li>Obtain independent audit assurance on the General<br/>Fund of the U.S. Government</li> <li>Demonstrate that the legal contingencies fairly<br/>represent the amount of legal payments made during<br/>a fiscal year</li> <li>Document the process of gathering the list of treaties<br/>and international agreements in the U.S. Government<br/>and put a process in place to ensure that each agency<br/>is properly reporting in their agency AFR</li> <li>Work with federal entities to report criminal debt for<br/>inclusion in the government-wide financial statements</li> <li>Partner with FASAB to revise the federal entities'<br/><i>Reconciliation of Net Cost of Operations to Budget</i><br/>footnote to assist Treasury in demonstrating the<br/>consistency to audited entities' financial statements<br/>when preparing the Reconciliation of Net Operating<br/>Cost and Unified Budget Deficit</li> <li>Monitor a new monthly cash reconciliation to show<br/>completeness for both statements: the Reconciliation<br/>of Net Operating Costs and Unified Budget Deficit and<br/>the Statements of Changes in Cash Balance from<br/>Unified Budget and Other Activities</li> </ul> |  |  |  |  |  |

# SECTION F: IPIA (AS AMENDED BY IPERA AND IPERIA) REPORTING DETAILS

Our FY 2016 Improper Payments Information Act Report includes information required by the *Improper Payments Information Act of 2002* (IPIA) as amended by IPERA and IPERIA, Executive Order 13520, Reducing Improper Payments *and Eliminating Waste in the Federal Government*, OMB Circular A-123, *Management's Responsibility for Enterprise Risk Management and Internal Control*, Appendix C, *Requirements for Effective Estimation and Remediation of Improper Payments* and OMB Circular A-136.

#### I. RISK ASSESSMENT

Each year, we develop a comprehensive inventory of the funding sources for all programs and activities and distribute it to our bureaus and offices. The bureaus and offices must perform risk assessments at the payment type level (e.g., payroll, contracts, vendors, travel, etc.). Our risk assessment process follows the nine risk factors outlined in OMB Circular A-123, Appendix C. The factors considered in the determination of risk levels include:

- Whether the program or activity reviewed is new to the agency
- The complexity of the program or activity reviewed, particularly with respect to determining correct payment amounts
- The volume of payments made annually
- Whether payments or payment eligibility decisions are made outside of the agency, for example, by the State or local government, or a regional Federal office
- Recent major changes in program funding, authorities, practices, or procedures
- The level, experience, and quality of training for personnel responsible for making program eligibility determinations or certifying that payments are accurate
- Inherent risks of improper payments due to the nature of agency programs or operations
- Significant deficiencies in the audit reports of the agency including, but not limited to, the agency Inspector General or the Government Accountability Office (GAO) audit report findings, or other relevant management findings that might hinder accurate payment certification
- Results from prior improper payment work

During FY 2016, we continued the use of our robust risk assessment process.

For those payment types resulting in a high risk level that comprise at least 1.5 percent and \$10 million in total program outlays or \$100 million at any rate, (1) statistical sampling must be performed to determine the improper payment rate, and (2) a corrective action plan must be developed and submitted to the Department and OMB for approval. Responses to the risk assessments produce a score that falls into pre-determined categories of risk. The following table describes the actions required at each risk level:

| Risk Level   | Required Action(s)                                  |
|--|---|
| High Risk > 1.5% Error Rate & > \$10 Million or \$100,000,000<br>at any error rate | Establish corrective action plan                    |
| Medium Risk  | Review Payment Controls for Improvement Opportunity |
| Low Risk   | Monitor annually through the risk assessments       |

Below is a list of all programs assessed in FY 2016. The risk assessments performed on these programs and activities resulted in low and medium risk levels for susceptibility to improper payments. The EITC program is deemed a high risk, high priority program by the Department and OMB. As a result, no new EITC risk assessment was required or performed.

| Bureau                                  | Program Name  | Susceptible to<br>Significant IPs |
|---|---|-----------------------------------|
| Alcohol Tax and Trade Bureau            | Salaries and Expenses                                   | No                                |

<sup>&</sup>lt;sup>3</sup> The program was assessed at Medium Risk. In accordance with the *Treasury-Wide Guidance for the FY 2016 Implementation of OMB Circular A-123, Appendix C, Requirements for Effective Estimation and Remediation of Improper Payments* guidance, IRS submitted an Internal Control Improvement plan for the program.

In FY 2016, the IRS evaluated the ACTC and the AOTC as part of the risk assessment process using a qualitative risk assessment. The risk assessment determined the risk of ACTC and AOTC to be medium. Additionally, as noted in Part 1, the IRS also conducted an assessment of the PTC, which also resulted in a determination of a medium risk level. A risk assessment was not conducted for the EITC program, which has been deemed a high priority / high risk program by OMB. Estimating improper payments does not take into consideration all aspects of administering tax provisions in a system that relies heavily on voluntary reporting as well as statutory requirements that the IRS process tax returns and pay any related tax refunds within 45 days of receipt of the tax return or the tax return due date, whichever is later, or accrue and pay interest on the refund amount beyond this 45 day period to the taxpayer.

Reporting tax refunds under the tax gap section of the AFR allows for the appropriate discussion of misreporting errors and resources dedicated to the IRS' compliance strategy. For refund returns claiming multiple credits, the IRS reports noncompliance related to these credits as part of the estimation of tax gap. The tax gap estimates reveal a more accurate picture of taxpayer behavior than other types of reporting, so the IRS reports on the underreporting related to tax and refundable and non-refundable tax credits under tax gap in the Department's AFR.

In order to maintain accountability for all refundable credit programs, we will continue to perform risk assessments on all IPERA-implicated refundable tax credit programs and will plan to estimate any that exceed the thresholds delineated in IPERA as part of the overall tax gap (e.g. NRP compliance studies and root cause analyses) estimation process, describing this determination in the AFR. In addition, consistent with recent reporting practice, we continue to report these results in the Improper Payments section of the AFR.

#### **Corrective Actions for High-Priority Programs**

Under Executive Order (EO) 13520 and its implementing guidance, OMB identifies programs that have more than \$750 million in annual estimated improper payments and that contribute substantially to the government-wide improper payment estimate. These programs, known as high-priority programs, are required to perform certain activities, including: selecting Accountable Officials to oversee the agency's improper payment efforts; posting improper payment information to <u>www.PaymentAccuracy.gov;</u> and developing supplemental measures in addition to the annual error rate measures.

EITC is the only program deemed by OMB as a high-priority program. Accordingly, the IRS has worked to meet the EO's additional requirements for this high-risk program, and information on the IRS' efforts may be found on <u>www.PaymentAccuracy.gov</u>. In addition, while root causes of errors in our programs can fluctuate from year to year, the IRS remains focused on reducing the annual error rates for all noncompliant behavior, and is taking many actions to prevent and reduce payment errors. For FY 2016, the Department continued to report on EITC including the Supplemental Measures and will evaluate with OMB reporting for FY 2017 and beyond.

#### **II. SAMPLING AND ESTIMATION**

#### **EITC Program**

The EITC is a refundable federal tax credit that offsets income taxes owed by low-income workers who qualify and provides a refund if the credit exceeds the amount of taxes owed.

As described below, the IRS engages in a number of activities to encourage voluntary compliance, performs certain automatic checks of all claims, and audits some claims before tax refunds are paid, all of which prevent improper payments. In addition, as with all tax provisions, IRS performs some examinations after refunds are paid, and subsequently recovers some improper payments. The improper payment amounts reported below include improper overclaims plus the absolute value of underpayments, less certain erroneous payments that are prevented or recovered. The error rate is the net improper payment amount divided by the total amount of EITC claimed.

In keeping with the requirements of IPERIA, we update the estimate of improper payments annually. The EITC improper payment rate is estimated using a statistically valid sample of about 2,700 returns audited through the IRS' NRP. This sample is sufficient to estimate the improper payment rate with plus or minus 2.5 percentage point precision and 90 percent confidence. For TY 2012 (the most recent study completed), the estimated gross amount of improper payments was \$17.7 billion and the total amount of EITC claimed was \$64.0 billion. The amount of erroneous EITC payments prevented or recovered on tax year 2012 returns was \$2.3 billion. This results in a net improper payment amount of \$15.4 billion, or 24.0 percent of the total EITC claimed (or between 22.2 percent and 25.9 percent, accounting for sampling error). The current estimated error rate of 24.0 percent is consistent in magnitude with the five-year average error rate of about 24 percent.

Applying this rate estimated from data for TY 2012 to the estimated FY 2016 level of EITC claims (\$69.8 billion) yields an estimated amount of improper payments for FY 2016 of \$16.8 billion (or between \$15.5 and \$18.1 billion).

#### **III. IMPROPER PAYMENTS REPORTING**

EITC is our only high-risk program that is susceptible to improper payments. Although high-priority programs are generally required to report reduction targets, setting improper payment reduction targets for this program does not create meaningful goals for us. This is due to the complexity of the tax law around EITC, lack of independent data regarding EITC eligibility, and the significant annual turnover within the participating population. The following table provides the improper payment reduction outlook for the EITC:

| Program | 2015 Claims | 2015 IP % | 2015 IP \$  | 2016 Claims         | 2016 IP % | 2016 IP \$  | 2016 Overpayment \$ | 2016 Underpayment \$ | 2017 Est. Claims | 2017 Est. IP % | 2017 Est. IP \$ | 2018 Est. Claims | 2018 Est. IP % | 2018 Est. IP \$ | 2019 Est. Claims    | 2019 Est. IP % | 2019 Est. IP \$ |
|---------|-------------|-----------|-------------|---------------------|-----------|-------------|---------------------|----------------------|------------------|----------------|-----------------|------------------|----------------|-----------------|---------------------|----------------|-----------------|
| EITC    | \$65,600.00 | 23.80%    | \$15,600.00 | \$69,786.23         | 24.02%    | \$16,762.65 | \$16,762.65         | *                    | \$68,995.48      | 24.02%         | \$16,572.71     | \$70,028.73      | 24.02%         | \$16,820.90     | \$66,886.82         | 24.02%         | \$16,066.21     |
| TOTAL   | \$65,600.00 | 23.80%    | \$15,600.00 | \$69,786.2 <b>3</b> | 24.02%    | \$16,762.65 | \$16,762.65         | *                    | \$68,995.48      | 24.02%         | \$16,572.71     | \$70,028.73      | 24.02%         | \$16,820.90     | \$66,886.8 <b>2</b> | 24.02%         | \$16,066.21     |

#### TABLE 1 - IMPROPER PAYMENT REDUCTION OUTLOOK (\$ IN MILLIONS)

\* 2016 Underpayments: The information on underpayments is based on a very small number of taxpayers and therefore has been combined with overpayments to prevent potential disclosure of taxpayer information.

Estimated Claims: Estimated total claims for the EITC are based on projections of EITC tax expenditures plus outlays as estimated by the Office of Tax Analysis within the Department of the Treasury, adjusted to account for the difference between taxpayer claims and amounts received by taxpayers due to return processing and enforcement.

IP %: The estimated net improper payment rate (IP %) for FY 2015 was estimated using a statistically valid random sample of

TY 2011 individual income tax returns that claimed the EITC. The FY 2016 – FY 2019 estimated net improper payment rates were estimated using a statistically valid random sample of TY 2012 individual income tax returns that claimed the EITC.

IP \$: The estimated amount of net improper payments (IP \$) equals the estimated IP % multiplied by the Estimated Claims.

As an alternative to providing reduction targets for EITC, we have collaborated with OMB on the development of a series of supplemental measures. These measures should provide a more nuanced assessment of the EITC program and of our efforts to limit improper payments than would be provided by standard reduction targets. We provided the following supplemental measures to OMB:

- The Annual Error Rate, which identifies the percentage of total EITC payments that are improper
- The amount of Revenue Protected, which shows the total value of erroneous payments prevented, or recovered through compliance activities
- The amount of Revenue Protected from Paid Preparer Treatments, which shows dollars erroneously or fraudulently claimed by paid tax preparers but not paid out, by Treasury
- The number of Preparer Due Diligence Penalties Proposed, reflecting the effectiveness of Treasury efforts to ensure paid tax preparers are submitting accurate, non-fraudulent EITC claims on behalf of taxpayers

These measures are tracked and updated annually based on Tax Filing Season results and are posted to the PaymentAccuracy.gov website. The table below shows estimated values for these measures:

#### TABLE 1.1 – FY 2016 EITC IMPROPER PAYMENT SUPPLEMENTAL MEASURES

| Meas                             | FY 2016 Value     | FY 2015 Value  | FY 2014 Value  |                |
|----------------------------------|-------------------|----------------|----------------|----------------|
| Annual Error Rate                | Total Claims      | \$69.8 Billion | \$65.6 Billion | \$65.2 Billion |
|                                  | Improper Payments | \$16.8 Billion | \$15.6 Billion | \$17.7 Billion |
| Revenue Protected                | Dollars           | \$5.7 Billion  | \$7.3 Billion  | \$6.4 Billion  |
|                                  | Returns           | 1.8 Million    | 2.9 Million    | 2.3 Million    |
| Revenue Protected from           | Dollars           | \$384 Million  | \$399 Million  | \$365 Million  |
| Paid Preparer Treatments         | Preparers         | 26,253         | 20,598         | 18,105         |
| Preparer Due Diligence Penalties | Dollars           | \$32.8 Million | \$34.3 Million | \$39.1 Million |
| Proposed                         | Preparers         | 1,137          | 1,042          | 1,372          |

#### **IV. IMPROPER PAYMENT ROOT CAUSE CATEGORIES**

Beginning in FY 2015, the IRS has been required to categorize improper payments using one or more of the following root causes: Program Design or Structural Issues, Inability to Authenticate Eligibility, Failure to Verify, Administrative or Process Errors, Medical Necessity, Insufficient Documentation to Determine, and Other.

#### TABLE 2 - IMPROPER PAYMENT ROOT CAUSE CATEGORY MATRIX (\$ IN MILLIONS)

|                   |   | EIT          | C             |
|-------------------|---|--------------|---------------|
|                   | Reason for Improper Payment   | Overpayments | Underpayments |
| Program Design    | or Structural Issue   | \$1,005.76   | -             |
| Inability to Auth | enticate Eligibility  | \$15,756.89  | -             |
| Failure to        | Death Data  | -            | -             |
| Verify:           | Financial Data  | -            | -             |
|                   | Excluded Party Data   | -            | -             |
|                   | Prisoner Data   | -            | -             |
|                   | Other Eligibility Data (explain)  | -            | -             |
| Administrative    | Federal Agency  | *            | **            |
| or Process        | State or Local Agency   |              |               |
| Error Made by:    | Other Party (e.g., participating lender, health care provider, or any other organization administering Federal dollars) | -            | -             |
| Medical Necessi   | ty  | -            | -             |
| Insufficient Doc  | umentation to Determine   |              | >             |
| Other Reason (a   | ) (explain)   | -            | -             |
| Other Reason (b   | ) (explain)   | -            | -             |
| Total             |   | \$16,762.65  | \$0           |

\* None identified in the statistically valid sample used to estimate the improper payment

\*\* The information on underpayments is based on a very small number of taxpayers and has therefore been combined with overpayments to prevent potential disclosure of taxpayer information

Based on the updated improper payment reason categories, for FY 2016 IRS estimated that the root causes for EITC improper payments were:

#### Inability to Authenticate Eligibility

It is estimated that \$15.7 billion or 94 percent of improper payments are from the inability to authenticate eligibility. The majority of these errors are associated with the inability to authenticate qualifying child eligibility requirements, mainly relationship and residency requirements, but also the exceptions to the age requirement (full-time student and disability). Authentication is difficult because there is a lack of internal or external databases available with information that would help IRS to make a determination of eligibility.

Another major cause of error in this category is taxpayer income misreporting, mainly self-employment income, where the income is not reported to the IRS by a third party. This category of errors also includes filing status errors, when married couples incorrectly file as single or head of household. Additional errors include data on marital status and living arrangements not being available.

#### **Program Design or Structural Issues**

It is estimated that approximately \$1.0 billion or 6 percent of improper payments are from program design limitations. These errors relate to certain income misreporting, tiebreaker errors, and joint return errors of qualifying children.

Program design errors occur because information needed to confirm payment accuracy is not available at the time the return is processed. For income misreporting, payer information, such as Form W-2, is typically not available to the IRS until after the filing season; therefore the IRS is unable to fully match wages and other income sources against the return at time of filing.

A very small portion of errors are attributable to tiebreaker errors, where more than one taxpayer claims the same qualifying child. The IRS processes returns as they are filed and cannot know of duplicate situations when the first return is filed or who is actually qualified in a tiebreaker situation. Situations where a qualifying child files a joint return also make up a small portion of this category. A child cannot be a qualifying child if he/she files a joint return for a reason other than claiming a refund. However, all returns are not filed at the same time, so the IRS cannot identify this situation until both returns are filed.

The IRS has implemented the following corrective actions to address the root causes identified: TABLE 2.1 – CORRECTIVE ACTION CATEGORIES

| Reason for Improper Payment           | Examination Closures | Math Error Notices | Document Matching | Amended Returns | Two and 10 Year Bans | Identity Theft and Fraud | Criminal Investigations | Soft Notices | Return Preparer Initiatives | Return Preparer Outreach and<br>Education | Software Developer Working Group |
|---------------------------------------|----------------------|--------------------|-------------------|-----------------|----------------------|--------------------------|-------------------------|--------------|-----------------------------|---|----------------------------------|
| Program Design or Structural Issue    | Х                    |                    | Х                 | Х               | х                    | Х                        | х                       | х            | Х                           | Х   |                                  |
| Inability to Authenticate Eligibility | Х                    | Х                  |                   | Х               | Х                    | Х                        | Х                       | Х            | Х                           | х   | Х                                |

#### V. IMPROPER PAYMENT CORRECTIVE ACTIONS

This section describes the ongoing and planned corrective actions to reduce the improper payment rate for the EITC program.

#### **EITC Enforcement**

The IRS' strategy with respect to improper payments is to intervene early to ensure compliance with the law. In FY 2016, the IRS addressed improper payments through its compliance programs as well as through expansive outreach and education efforts to taxpayers and preparers. The IRS' EITC enforcement programs protected approximately \$3.6 billion. The revenue includes EITC and other credits and taxes recovered or prevented from being paid in error in FY 2016, on returns filed in 2016 or earlier years and selected for EITC enforcement. (In contrast, the \$2.3 billion subtracted from gross improper payments to yield the net improper payment amount for TY 2012 above includes EITC amounts only on returns filed for TY 2012, selected for examination or document matching.)

Corrective actions to reduce EITC improper payments include the following:

- **Examinations** The IRS identifies tax returns for examination and, in the majority of cases, holds the EITC portion of the refund until an audit can be conducted. The IRS also holds the ACTC portion of the refund on these EITC examinations.
- **Math Error** Refers to an automated process through which the IRS identifies math or other irregularities and automatically prepares an adjusted return for a taxpayer.
- **Document Matching** Involves comparing income information provided by the taxpayer with matching information (e.g., W-2s, 1099s) from employers and other third parties to identify discrepancies.

The chart below shows that the IRS conducted 380,331 EITC program examinations, issued 150,000 math error notices, and performed 792,305 document matching reviews.

|                              | FY11      | FY12    | FY13    | FY14      | FY15*     | FY16**  | FY17*** | FY11-FY17<br>Total |
|------------------------------|-----------|---------|---------|-----------|-----------|---------|---------|--------------------|
| Audit Closures               | 483,574   | 487,408 | 483,070 | 435,638   | 445,594   | 380,331 | 325,000 | 3,040,615          |
| Math Error Notices           | 293,450   | 270,492 | 241,975 | 194,127   | 166,611   | 150,000 | 120,000 | 1,436,655          |
| Document Matching            | 1,178,129 | 985,172 | 906,994 | 1,053,304 | 1,710,904 | 792,305 | 790,000 | 7,416,808          |
| Amended Returns <sup>1</sup> | 14,317    | 13,284  | 8,130   | 17,723    | 24,282    | 9,910   | 9,900   | 97,546             |

#### **TABLE 2.2 – COMPLIANCE ACTIVITIES**

\* Restated actual

\*\* Preliminary data

\*\*\* Estimate based on FY16 preliminary data and FY17 preliminary estimates

<sup>1</sup>Amended returns are a subset of Audit Closures

These compliance activities had a significant effect, protecting revenue of \$3.6 billion in FY 2016. Treasury projects that continued enforcement efforts will protect a total of nearly \$26.6 billion in revenue through FY 2017, as shown below.

| * Destated actual            |          |          |          |          |          |          |          |                    |
|------------------------------|----------|----------|----------|----------|----------|----------|----------|--------------------|
| Total                        | 3,756.74 | 3,956.77 | 3,861.54 | 3,432.14 | 4,608.47 | 3,648.92 | 3,339.45 | 26,604.03          |
| Amended Returns <sup>1</sup> | 39.38    | 38.45    | 26.18    | 52.42    | 76.63    | 34.65    | 34.65    | 302.36             |
| Document Matching            | 1,323.54 | 1,554.75 | 1,422.60 | 1,385.06 | 2,313.96 | 1,570.54 | 1,570.00 | 11,140.45          |

\* Restated actual.

\*\* Preliminary data.

\*\*\* Estimate based on fiscal year 2016 preliminary data.

#### **Maximizing Current Business Processes**

In addition to base compliance program efforts, the following efforts contributed to the IRS' strategy of identifying and reducing improper EITC refund claims in FY 2016:

*EITC IPERA Methodology and Estimate*: Completed a new error rate estimate based on the EITC component of the Tax Year 2012 National Research Plan (NRP) study that meets IPIA standards for measuring and reporting on improper payments.

*FY 2017 Action Plan and FY 2016 Root Cause Analysis Reports:* Completed the FY 2017 action plan to reduce improper payments and a root cause analysis based on NRP data.

*Compliance Studies:* Continued analysis of the most recent compliance study and NRP data to inform our compliance strategy and amend EITC administration where feasible.

*Two and 10 Year Bans:* Imposed 601 two-year bans and 118 10-year bans for cases where the IRS determined during an EITC audit that the taxpayer intentionally disregarded the rules and regulations or committed fraud.

*Identity Theft and Fraud:* Detected and stopped almost 538,000 fraudulent returns through our fraud detection filters from being processed, preventing nearly \$1.5 billion in improper EITC payments.

*Criminal Investigations:* Continued to stop fraudulent EITC refund claims through our Criminal Investigation (CI) division. Through September 2016, CI issued 254 EITC Questionable Refund Program (QRP) scheme indictments and 83 EITC Return Preparer indictments. CI also secured 240 and 91 convictions, respectively, on outstanding indictments.

*Soft Notices:* Sent more than 85,000 letters to alert taxpayers that a qualifying child for the EITC claimed on their returns had also been claimed by another person.

Dependent Database (DDb) Soft Notice Test: Issued 25,600 soft notices to taxpayers who appeared to have filed TY 2014 returns claiming EITC with either qualifying child or Schedule C income errors. The test population included previously untreated repeat DDb rule/Schedule C filter breakers and first time claimants who self-prepared their returns. The soft notices encourage taxpayers to self-correct their current year return (via an amended return), if needed and to file accurate returns in the future.

*Return Preparer Initiatives:* As a part of the FY 2016 EITC Return Preparer Strategy, the IRS completed activities associated with a suite of progressive EITC preparer treatments, addressing over 26,000 preparers (up from 21,000 in FY 2015) selected through our risk-based scoring model, before and during the filing season.

- The IRS completed 813 pre-filing season Due Diligence Visits (DDVs) with a penalty rate of 82% and more than \$25 million in proposed penalties. Criminal investigation and/or revenue agents completed 164 educational Knock-and-Talk Visits (KTV). The IRS also mailed more than 18,000 educational notices and called more than 1,300 preparers before the FY 2016 filing season.
- The IRS closed 295 filing season DDVs with a penalty rate of 82% and over \$4.4 million in proposed penalties. The IRS also proposed penalties of almost \$249,000 on 19 of 28 DDVs completed as a follow-up for those preparers who received pre-filing season KTVs but did not improve their due diligence. The IRS mailed more than 9,400 educational notices and called over 2,200 preparers during the 2016 filing season.
- The analysis of the FY 2016 EITC Return Preparer Strategy revealed that, in addition to the proposed penalties described above, the preparer treatments protected more than \$474 million (\$384 million EITC and \$90 million Child Tax Credit).

*Return Preparer Penalties:* Proposed almost \$1 million in penalties to 78 TY 2015 EITC return preparers, and more than \$2 million in penalties for 132 TY 2014 EITC return preparers, for failure to exercise due diligence by attaching Form 8867, *Paid Preparer's Earned Income Credit Checklist*, to taxpayer returns, as authorized by IRC §6695(g) and Treasury Regulation §1.6695–2. The IRS also sent more than 2,500 warning letters and 300 electronic alerts for TY 2015 to warn preparers that did not attach Form 8867 to taxpayer returns.

Return Preparer Outreach and Education: Focused outreach and education efforts on EITC return preparers to educate them on EITC and due diligence requirements. Almost 15,300 preparers received a certificate of completion for the English and Spanish interactive EITC Due Diligence Training module. Additionally, more than 6,900 preparers attended the Refundable Credits – New Rules, New Laws seminar and almost 4,900 preparers attended the Your Due Diligence Requirements: What's New for You in 2017 seminar at the 2016 National Tax Forums.

*Servicewide EITC Strategy:* Continued activities to evaluate potential new solutions identified to address improper payments.

Supplemental Measures: Continued to report supplemental measures that capture key components of revenue protected through compliance activities and paid return preparer treatments, as well as paid return preparer due diligence penalties proposed.

*Software Developer Working Group:* Continued our partnership with members of key tax software associations to reduce EITC errors and assist preparers in meeting their EITC due diligence requirements.

*Taxpayer Outreach and Education:* The IRS conducted its EITC outreach campaign, including the tenth annual EITC Awareness Day, which centered on EITC underserved populations and included focused compliance messages. Through collaboration with IRS national, state, and local partners as well as Congressional and government officials, the IRS held more than 240 local events, resulting in media coverage that helped spread the word about the EITC tax credit. The IRS also held interviews in English and Spanish, resulting in more than 1,500 radio stations and 480,000 newspapers sharing the interviews. Social media outreach continued to expand with Twitter EITC messages reaching 5.8 million people and Thunderclap, a new tool for IRS this year, reaching almost 373,000 people. Also for the year, nearly 601,800 taxpayers visited the EITC Assistant on IRS.GOV, a tool that allows taxpayers to determine if they qualify for the credit.

Legislative Proposals: Include the following FY 2017 legislative proposals:

• Provide greater flexibility to address correctable errors to help the IRS deny certain erroneous EITC claims before paying refunds.

- Increase oversight of paid tax return preparers to help promote high quality services and improve voluntary compliance.
- Simplify the rules for claiming the EITC without a qualifying child for taxpayers who reside with a child that they do not claim as a dependent, in order to reduce taxpayer burden and improve EITC compliance.

*Enterprise Research:* Assessed the results of the FY 2016 enterprise research strategy and developed the FY 2017 strategy in partnership with internal organizations to better focus EITC compliance and outreach activities using research data.

*EITC Summit:* The IRS hosted an EITC Summit that was attended by numerous EITC stakeholders including tax industry professionals, representatives of state and federal agencies, consumer advocates, and representatives from non-government organizations. The objective was to obtain different perspectives on ways to reduce EITC errors, mitigate compliance risks, increase participation for eligible EITC populations, and ease taxpayer and government burden.

#### VI. INTERNAL CONTROL OVER PAYMENTS

#### **IRS Internal Control Framework**

EITC improper payments are not rooted in internal control weakness, financial management deficiencies, or financial reporting failures but through the inherent difficulty of delivering benefits through the tax system. Much of the difficulty administering the EITC derives from the complexity of its statutory eligibility requirements. Whether a taxpayer meets these eligibility rules may be difficult for the taxpayer to understand and cannot be independently confirmed by the IRS using third-party corroborating data. The computation of improper payments, as established by OMB, also does not take into consideration all internal control processes in place that stop erroneous returns from being processed. For example, the controls and filters in the IRS' fraud and identity theft programs stop EITC returns with billions of dollars in fraudulently claimed EITC.

The IRS has internal controls in place to verify eligibility when data are available. For example, the IRS may reject a return from processing or systemically adjust a return if a Social Security Number is incorrect, data on the return is not consistent with eligibility requirements, or the return contains mathematical errors. The IRS cannot verify that key EITC eligibility criteria are met in the absence of a burdensome tax audit. The IRS' internal controls include a sophisticated scoring and selection program for EITC examinations that identifies a significant number of high risk returns, but due to limited resources the IRS cannot examine all returns identified. For those that the IRS does examine, about 80 percent are examined in a pre-refund environment where the IRS holds the EITC refund until eligibility is verified by taxpayers.

The IRS has a strong internal control environment based on a risk assessment around EITC and other programs administered and make decisions based on overall cost-benefit considerations. The IRS annually reviews and enhances its compliance plan that addresses erroneous EITC. Each year the IRS updates its strategy using the most recent research findings (e.g. compliance studies and root cause analyses), prior year audit results, TIGTA/GAO audit findings, and legislative updates. The IRS also submits legislative proposals which, if approved by Congress, may further enhance efforts to address areas of risk and reduce improper payments.

The IRS reviews and updates Internal Revenue Manuals (IRMs) throughout the year and ensures that IRS employees who administer refundable credits receive annual training and have the requisite knowledge to address the evolving nature of improper payments and fraud. Employees are also encouraged to bring internal control problems to management's attention. In fact, processes are in place to address internal control questions and concerns through the Service-wide Electronic Research Project (SERP) feedback application.

The IRS conducts routine reviews to ensure that EITC internal control processes are worked in accordance with written procedures. The IRS constantly monitors its compliance activities through established management information reports. The data is shared with all stakeholders and managers who directly implement or lead EITC control activities. The IRS shares ongoing program information with policy and decision-makers via monthly and quarterly briefings.

Listed below are the ratings for EITC Internal Control Standards.

#### TABLE 3 – STATUS OF INTERNAL CONTROLS

|                               | Earned Income Tax Credit |
|-------------------------------|--------------------------|
| Internal Control Standards    | (020x0906000)            |
| Control Environment           | 4                        |
| Risk Assessment               | 3                        |
| Control Activities            | 4                        |
| Information and Communication | 4                        |
| Monitoring                    | 4                        |

#### Legend:

4 = Sufficient controls are in place to prevent improper payments

3 = Controls are in place to prevent improper payments but there is room for improvement

2 = Minimal controls are in place to prevent improper payments

1 = Controls are not in place to prevent improper payments

#### **VII. ACCOUNTABILITY**

The Secretary of the Treasury has delegated responsibility for addressing improper payments to the Assistant Secretary for Management (ASM). Improper payments fall under the Department's management and internal control program. A major component of the internal control program is risk assessments, which are an extension of each bureau's annual improper payment elimination and recovery review process, as required under OMB Circular A-123, Appendix C. Under Treasury Directive 40-04, *Treasury Internal (Management) Control Program*, executives and other managers are required to have management control responsibilities as part of their annual performance plans. With oversight mechanisms such as the Treasury CFO Council and the Management Controls Executive Steering Committee, managerial responsibility and accountability in all management and internal control areas are visible and well-documented. We have identified executives who are responsible and accountable for reducing the level of EITC overclaims, while other senior and mid-level officials have responsibility for monitoring progress in this area as bureau and program internal control officers.

#### VIII. AGENCY INFORMATION SYSTEMS AND OTHER INFRASTRUCTURE

Overall, we have the internal controls, human capital, and information systems and other infrastructure it needs to reduce improper payments to the targeted levels.

#### **IX. BARRIERS**

A number of factors continue to serve as barriers to reducing overclaims in the EITC program. These include:

- Complexity of the tax law
- Lack of correctible error authority, (which would require Congressional authorization)
- Lack of independent data with which to verify EITC eligibility and structure of the EITC, which has taxpayers submitting claims without the IRS having information to validate eligibility
- Confusion among taxpayers about their eligibility contributing to overclaims and underclaims
- High turnover of eligible claimants

- Unscrupulous and/or incompetent return preparers
- Fraud

None of these factors can be considered the primary driver of program error. However, these barriers severely impede the IRS' dual mission of issuing refunds to those who are entitled, while ensuring refunds are paid only to those who truly qualify for the credit.

Also, statutory requirements further constrain the IRS' ability to ensure that EITC claims are valid before they are processed and paid. Since the EITC is administered through the Internal Revenue Code (IRC), it is claimed by taxpayers during the filing and processing of their tax returns. The IRC requires the IRS to process tax returns and pay any related tax refunds within 45 days of receipt of the tax return or the tax return due date, whichever is later. Beyond this 45 day period interest begins accruing on the refund amount, which must be paid along with the refund to the taxpayer. For the majority of EITC returns, which tend to be filed early in the filing season, the IRS does not receive information to verify income reporting accuracy or other data needed to validate these EITC claims at the time of filing or within a reasonable period thereafter in which a taxpayer would expect their refund. The IRS faces further challenges when attempting to validate the EITC claims of filers with non-wage income. The requirements, expectations, and data accessibility relative to the timely payment of refunds constrain the IRS' ability to conduct up-front verification of claims. These conditions distinguish EITC and its administration through the tax system from the extensive validity checks conducted by agencies administering other federal programs that typically establish eligibility prior to the issuance of payments or benefits.

The IRS submitted legislative proposals in the FY 2017 Budget to help address EITC improper payments.

#### X. RECAPTURE OF IMPROPER PAYMENTS REPORTING

In accordance with IPERA and OMB Circular A-123, Appendix C, we perform and report annually on our payment recapture program. During FY 2016, we issued contracts and other reviewed payments totaling approximately \$11 billion. The amended act expanded the payment types reviewed beyond just contracts to include grants, benefits, loans, and miscellaneous payments.

Our annual risk assessment process includes a review of pre-payment controls that minimize the likelihood and occurrence of improper payments. We require each bureau and office to conduct post-award audits and report on payment recapture activities, contracts issued, improper payments made, and recoveries achieved. Bureaus and offices may use payment recapture audit contingency firms to perform many of the steps in their payment recapture auditing program and identify candidates for payment recapture action. However, no Treasury bureaus used contractors to perform recapture activities for fiscal year 2016. Treasury employees performed this work.

We consider both pre- and post-reviews to identify payment errors a sound management practice that should be included among basic payment controls. All bureaus have a process in place to identify improper payments during pre- and postreviews. When applicable, bureaus may use the results of the Treasury IGs and GAO reviews to help identify payment anomalies and target areas for improvement. However, we apply extensive payment controls at the time each payment is processed, making recapture activity minimal.

|                     |                                 |                   |                         |                                   |                                   |                   | 0                 | verpayr                 | nents R                           | ecaptu                            | red thro          | ough Pay          | yment I                 | Recaptu                           | re Aud                            | its               |                   |                         |                                   |                                   |                   |                  | Recap<br>outsi    | yments<br>otured<br>de of |

In FY 2016, we determined that conducting a Payment Recapture Audit on the following six low risk programs was not cost-effective:

- Fiscal Service Debt Activity Programs
- Fiscal Service Treasury Managed Accounts
- Fiscal Service Trust Funds Management
- Treasury Executive Office for Asset Forfeiture
- Departmental Offices International Financial Institutions International Assistance Programs
- The Office of the Comptroller of the Currency Assessment Funds

The Fiscal Service Debt Activity Programs, Treasury Managed Accounts disbursements, and Trust Funds Management programs continued to reflect a low risk level in nearly every group and payment type category assessed.

The Treasury Executive Office for Asset Forfeiture's program payments were deemed low risk. However, based on the high dollar value requiring minimal resources, the Executive Office for Asset Forfeiture will continue to conduct internal contract audits on the payments.

The DO International Financial Institutions non-federal payments to the Multilateral Development Banks are submitted by either a voucher on a letter of credit administered by the Federal Reserve Bank of New York or through direct cash payments via the Fiscal Service Secure Payment System. Based on the volume of payments processed by OAS, it would not be cost effective to perform a payment recapture audit.

The OCC assessment funds risk assessment has resulted in a low risk rating each of the last five years for all rating categories.

Based on the above justifications, payment recapture audits for these programs were not deemed cost effective. We sent notifications on these justifications to OMB and the Treasury OIG in October 2016.

# TABLE 5 – DISPOSITION OF FUNDS RECAPTURED THROUGH PAYMENT RECAPTURE AUDIT PROGRAMS (\$ IN MILLIONS)

\* Cumulative balances from FY 2012 to FY2016

\*\* Combined bureau cumulative balances prior to FY 2012

Of the bureaus reporting an amount determined not to be collectible in the table above, we determined all of the write-off amounts to be immaterial, with the exception of the District of Columbia Pensions (DCP). The amount determined not to be collectible was based on individual debt cases deemed uncollectible after thorough reviews resulting in a determination to cease active collective actions.

#### **XI. ADDITIONAL COMMENTS**

In FY 2016, the OIG issued Report Number OIG-16-041, *Treasury Was Not in Compliance with IPERA for Fiscal Year 2015 Due to High Improper Payment Rate for the Earned Income Tax Credit Program*, which covered the IPERA program as presented in our FY 2015 Agency Financial Report. During FY 2016, we implemented corrective actions to address the findings and recommendations in the OIG report.

#### XII. AGENCY REDUCTION OF IMPROPER PAYMENTS WITH THE DO NOT PAY INITIATIVE

The IPERIA requires pre-payment and pre-award reviews to determine program or award eligibility and to prevent improper payments before the release of any Federal funds. This review must include the relevant databases as prescribed by IPERIA, including:

- the death records maintained by the Commissioner of Social Security;
- the General Services Administration's Excluded Parties List System (EPLS), (or the updated System for Award Management (SAM));
- the Debt Check Database (Debt Check);
- the Credit Alert System or Credit Alert Interactive Voice Response System (CAIVRS) of the Department of Housing and Urban Development;
- the List of Excluded Individuals/Entities (LEIE) of the Office of Inspector General of the Department of Health and Human Services; and
- the Prisoner Update Processing System (PUPS) of the Social Security Administration, as added to IPERIA by the Bipartisan Budget Act of 2013, Pub. L. 113–67.

All bureaus have incorporated pre-payment and pre-award reviews, as mandated by IPERIA, through established internal control processes and procedures that require reviews against the databases consolidated within the Do Not Pay Business Center or through their own established databases. All Treasury non-tax payments are compared against the Death Master File (DMF) and SAM Exclusion Records at the time of payment via the Do Not Pay Business Center. Matches that occur are then reviewed by staff at the appropriate bureau to determine if the payment was proper or improper. No bureau has identified incorrect information within the original databases.

#### TABLE 7 - RESULTS OF THE DO NOT PAY INITIATIVE IN PREVENTING IMPROPER PAYMENTS (IN MILLIONS)

|   | Number (#) of<br>payments<br>reviewed for<br>possible<br>Improper<br>Payments | Dollars (\$) of<br>payments<br>reviewed for<br>possible Improper<br>Payments | Number (#) of<br>payments<br>stopped * | Dollars (\$) of<br>payments<br>stopped * | Number (#) of<br>potential<br>improper<br>payments<br>reviewed and<br>determined<br>accurate ** | Dollars (\$) of<br>potential<br>improper<br>payments<br>reviewed and<br>determined<br>accurate ** |
|---|---|--|--|--|---|---|
| Reviews<br>with the Do<br>Not Pay<br>databases  | 2.97  | \$54,533.00  |  | _  | 0.003   | \$56.09   |
| Reviews<br>with<br>databases<br>not listed in<br>IPERIA as<br>Do Not Pay<br>databases | N/A   | ,554,555.00<br>N/A   | N/A                                    | N/A                                      | N/A   | ,50.05<br>N/A   |

Note: The period covering the data is October 2015 to August 2016

\* Payments stopped is currently not applicable since the Do Not Pay matching and adjudication process is based on post payment results.

\*\* Potential improper payments reviewed and determined accurate includes the total number of matches identified by the Do Not Pay Initiative that were adjudicated as proper by the agency.

The change to the Payment Automation Manager (PAM) standard format from Payments, Claims, and Enhanced Reconciliation (PACER) system, has increased the quantity of Department's payments reviewed with the DMF.

### SECTION G: CIVIL MONETARY PENALTIES INFLATION ADJUSTMENT

The Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (the 2015 Act) amended the Federal Civil Penalties Inflation Adjustment Act of 1990 (the Inflation Adjustment Act), to improve the effectiveness of civil monetary penalties (CMP) and to maintain their deterrent effect. The 2015 Act requires agencies to: 1) use an interim final rulemaking (IFR) to adjust the level of civil monetary penalties in 2016 with an initial "catch-up" adjustment, 2) continue to make annual inflation adjustments in future years, and 3) report on these adjustments annually. The 2015 Act requires that agencies publish IFRs with new penalty levels in the Federal Register by July 1, 2016, and for these penalties to take effect no later than August 1, 2016. The Inflation Adjustment Act and the 2015 Act exclude penalties under the Internal Revenue Code of 1986 and the Tariff Act of 1930. The table below depicts the covered civil monetary penalties that are under our purview.

| Statutory Authority   | Penalty (Name or<br>Description)                | Year<br>Enacted | Latest Year of<br>Adjustment (via<br>Statute or<br>Regulation) | Current Penalty<br>Level (\$<br>Amount or<br>Range) <sup>(1)</sup>   | Sub-Agency<br>Bureau/<br>Entity     | Location for Penalty<br>Update Details  |

(1) Current penalty level amounts represent the maximum penalty amounts.

(2) We did not previously have a regulation addressing the civil penalty authority under TRIA. On April 1, 2016, we published a proposed rule revising the rules for the Terrorism Risk Insurance Program created under TRIA, which included for the first time a proposed civil penalty provision [81 FR 18950 (April 1, 2016)]. We cleared an interim final rule addressing the annual readjustment of the civil penalty as required by the Federal Civil Penalties Inflation Act Improvements Act of 2015 and submitted the rule to OMB for final review in July 2016, and for publication in the Federal Register. Final Program Rules have not been published as of the date of this report.

(3) For purposes of calculating the appropriate inflation factor, OMB's guidance issued February 24, 2016 uses the calendar year 1914 CMO Catch-Up Adjustment Multiplier for all penalties enacted prior to 1914.
