OFFICE OF
INSPECTOR GENERAL

DEPARTMENT OF THE TREASURY
WASHINGTON, D. C. 20220

November 10, 2021

MEMORANDUM FOR SECRETARY YELLEN

FROM: Richard K. Delmar /s/
Acting Inspector General

SUBJECT: Audit of the Federal Financing Bank's Financial Statements for
Fiscal Years 2021 and 2020

We hereby transmit the attached subject report. Under a contract monitored by our office, KPMG LLP (KPMG), a certified independent public accounting firm, audited the financial statements of the Federal Financing Bank (FFB) as of September 30, 2021 and 2020, and for the years then ended, provided a report on internal control over financial reporting, and on compliance with laws, regulations, and contracts tested. The contract required that the audit be performed in accordance with U.S. generally accepted government auditing standards, Office of Management and Budget (OMB) Bulletin 21-04, *Audit Requirements for Federal Financial Statements*, and the Government Accountability Office/Council of the Inspectors General on Integrity and Efficiency, *Financial Audit Manual*.

In its audit of FFB, KPMG found

- the financial statements were fairly presented, in all material respects, in accordance with U.S. generally accepted accounting principles;
- no deficiencies in internal control over financial reporting that are considered material weaknesses; and
- no instances of reportable noncompliance with laws, regulations, and contracts tested.

In connection with the contract, we reviewed KPMG's reports and related documentation and inquired of its representatives. Our review, as differentiated from an audit performed in accordance with U.S. generally accepted government auditing standards, was not intended to enable us to express, and we do not express, an opinion on FFB's financial statements or conclusions about the effectiveness of internal control or compliance with laws and regulations. KPMG is responsible for the attached auditors' reports dated November 10, 2021, and the conclusions expressed in the report. However, our review disclosed no instances where KPMG did not comply, in all material respects, with U.S. generally accepted government auditing standards.

If you wish to discuss this report, please contact me at (202) 528-8997, or a member of your staff may contact Deborah Harker, Assistant Inspector General for Audit, at (202) 486-1420.

FEDERAL FINANCING BANK

Management's Discussion and Analysis (unaudited)

September 30, 2021 and 2020

(Dollars in thousands)

Introduction

The Federal Financing Bank (the Bank) is a government corporation under the general supervision and direction of the Secretary of the Treasury. The Congress created the Bank in 1973, at the request of the U.S. Department of the Treasury (Treasury). The Bank borrows from Treasury and lends to Federal agencies and to private entities that have Federal guarantees. The Bank also has a debt obligation to the Civil Service Retirement and Disability Fund (CSR&DF).

Mission

The mission of the Bank is to reduce the costs of Federal and federally assisted borrowings, to coordinate such borrowings with the Government's overall fiscal policy, and to ensure that such borrowings are done in ways that least disrupt private markets. To accomplish this mission, the Bank exercises its statutory authority to purchase obligations issued, sold, or guaranteed by Federal agencies.

Objectives

The Bank was formed to be the vehicle through which Federal agencies finance programs involving the sale or placement of credit market instruments, including agency securities, guaranteed obligations, participation agreements, and the sale of assets. This principle is applied in a manner consistent with the Federal Financing Bank Act of 1973 (12 U.S.C. 2281 et seq.) and its legislative history. However, guaranteed programs entailing large numbers of relatively small loans in which local origination and servicing are an integral part of the program are excluded from the Bank's activities.

The Bank makes funds available to Federal agencies and to guaranteed borrowers in accordance with agency program requirements. The Bank is capable of providing lending terms for any amount required and for nearly any maturity. The methods used to determine rates charged by the Bank for terms such as prepayment provisions and service charges are applied consistently for all borrowers.

The lending policy of the Bank is flexible enough to preclude the need for agencies to accumulate pools of funds. This policy does not preclude the maintenance of liquidity reserves for those agencies that have such a need. In no case are funds provided by the Bank invested in private credit instruments outside of federal agency programs or used to speculate in the market for public securities.

Organizational Structure

The Bank is subject to the general supervision and direction of the Secretary of the Treasury. The Board of Directors is comprised of the incumbents of the following Treasury offices: the Secretary of the Treasury, who as provided by law is the Chairman; the Deputy Secretary; the Under Secretary for Domestic Finance; the General Counsel; and the Fiscal Assistant Secretary.

The officers are incumbents of the following Treasury offices (corresponding Bank positions are in parentheses): the Under Secretary for Domestic Finance (President); the General Counsel (General Counsel); the Assistant Secretary for Financial Markets (Vice President); the Fiscal Assistant Secretary (Vice President); the Deputy Assistant Secretary for Public Finance (Vice President and Treasurer); the Director of Federal Program Finance (Vice President); and the Director, Office of Federal Lending (Secretary and Chief Financial Officer). A delegation by the Bank President authorizes any Bank Vice President, in consultation with any other Bank officer, to exercise the powers of the Presidency.

FEDERAL FINANCING BANK

Management's Discussion and Analysis (unaudited)

September 30, 2021 and 2020

(Dollars in thousands)

The staff of the Bank is organized into four units: accounting, information technology, lending, and operations. Each functional unit is headed by a Director that reports to the Chief Financial Officer. The Director of Accounting is responsible for loan transactions, including but not limited to overseeing loan disbursements and repayments as well as managing accounting and financial reporting. The Director of Information Technology is responsible for management and oversight of the IT infrastructure, including but not limited to software development and maintenance of mission critical applications that support lending and accounting functions. The Director of Lending is responsible for loan administration functions, including but not limited to loan origination, loan structuring, and managing customer relationships. The Director of Operations is responsible for general management functions, including but not limited to budgeting, procurement, human resources, strategic planning, and facilities.

Loan Programs Activity

The Bank makes funds available to Federal agencies and to guaranteed borrowers in accordance with agency program requirements. However, the Balanced Budget and Emergency Deficit Control Act of 1985, commonly known as Gramm-Rudman-Hollings Act, the Consolidated Omnibus Budget Reconciliation Act of 1985, and the Federal Credit Reform Act of 1990 included provisions that have prohibited or limited the Bank's financing of certain loans.

Impact of Economic Conditions

All Bank assets are, or have a commitment to be, full faith and credit obligations of the U.S. government and economic conditions do not affect repayments to the Bank.

Loans backed by the full faith and credit of the U.S. government are the credit equivalent of Treasury securities. The Bank does not expect to suffer any credit losses from loans backed by the full faith and credit of the U.S. government.

United States Postal Service

The United States Postal Service (USPS) is an independent establishment of the executive branch of the U.S. government, which borrows from the Bank to finance its capital improvements and operating expenses. The USPS has historically maintained a Note Purchase Agreement with the Bank supporting borrowing authority of \$15 billion. This agreement expired on August 31, 2019, and all notes remaining under this agreement have expired or have been fully advanced. The USPS had an outstanding balance of \$11 billion as of September 30, 2021.

Credit Performance

The Bank has not incurred any credit-related losses on its loans as of the date of these statements, and as stated above, all Bank loans are, or have a commitment to be, full faith and credit obligations of the U.S. government.

Financial Highlights

Statements of Income and Changes in Net Position Highlights

The following is a synopsis of the financial performance of the Bank for the fiscal year ended September 30, 2021. Interest on loans decreased \$143,117 to \$2,129,127 for the fiscal year ended September 30, 2021 compared to interest on loans of \$2,272,244 for the fiscal year ended September 30, 2020.

FEDERAL FINANCING BANK

Management's Discussion and Analysis (unaudited)

September 30, 2021 and 2020

(Dollars in thousands)

Loan modification revenue for the fiscal year ended September 30, 2021 was zero compared to \$464,618 for the fiscal year ended September 30, 2020. Loan modification revenue in the prior year resulted from a payment received from the Rural Utilities Service (RUS) as part of the cushion of credit loan prepayments authorized by the Agriculture Improvement Act of 2018 (the 2018 Farm Bill). These 2018 Farm Bill provisions had no impact in the fiscal year ended September 30, 2021.

Legislatively mandated interest credits related to certificates of beneficial ownership (i.e., loans reported as loans receivable on the statements of financial position) from RUS, reduced income by \$10,734 in each of the fiscal years ended September 30, 2021 and 2020. The final payment on the certificates of \$135,000 was made on September 30, 2021. Revenue from servicing loans of \$859 for the fiscal year ended September 30, 2021 decreased from \$1,152 for the fiscal year ended September 30, 2020.

Interest on borrowings decreased \$61,519 to \$2,049,495 for the fiscal year ended September 30, 2021 compared to interest on borrowings of \$2,111,014 for the fiscal year ended September 30, 2020. After administrative expenses of \$10,409, net income of \$59,348 for the fiscal year ended September 30, 2021 decreased from net income of \$606,213 for the fiscal year ended September 30, 2020, due to the reduction in loan modification revenue and changes to the loan portfolio as a result of prepayments.

Statements of Financial Position Highlights

Funds with U.S. Treasury of \$3,653,781 at September 30, 2021, decreased from the September 30, 2020 balance of \$3,760,250.

The loan portfolio (loans receivable) decreased \$1,851,562 from \$81,811,003 at September 30, 2020 to \$79,959,441 at September 30, 2021. The table below list the net increases and decreases contributing to the change in the loan portfolio.

Programs	Net change
Rural Utilities Service (RUS), Department of Agriculture	\$2,224,487
Rural Utilities Service, Department of Agriculture-certificates of beneficial ownership	(135,000)
United States Postal Service	(3,000,000)
Historically Black College and Universities, Department of Education	(1,342,905)
Department of Housing & Urban Development	266,210
Department of Energy	96,863
Community Development Financial Institution Fund (CDFI Fund), Department of Treasury	52,724
Maritime Administration, Department of Transportation	(13,852)
Other	(89)

All increases and the decrease related to the USPS reflects normal operating activity. The decrease related to Historically Black Colleges and Universities, Department of Education (HBCU) reflect the impacts of the Consolidated Appropriations Act (Act), 2021 (Pub. L. 116-260). This Act forgave all outstanding loans for HBCUs as of December 27, 2020 which resulted in the Department of Education prepaying the Bank in full in 2021 the

FEDERAL FINANCING BANK

Management's Discussion and Analysis (unaudited)

September 30, 2021 and 2020

(Dollars in thousands)

aggregate principal amount of its outstanding debt as of December 27, 2020. New loans after this date continue to be disbursed and are included in the September 30, 2021 balance sheet of the financial statements.

All of the loans in the Bank's portfolio are federally guaranteed or have a commitment to be full faith and credit obligations of the United States. The Bank's borrowings decreased by \$2,017,842 reflecting a related decrease in loans receivable.

Net income of \$59,348 increased the Bank's net position to \$6,472,231 at September 30, 2021 from \$6,412,883 at September 30, 2020.

Performance Highlights

During fiscal year 2021, the Bank processed 125 new loan commitments. The interest rate was set or reset on 2,543 loans in fiscal year 2021 for new loans and maturity extensions. The Bank processed 754 prepayments and 43,877 loan payments in fiscal year 2021.

Management Controls

The Bank completed an in-depth testing of its internal accounting and administrative control procedures in accordance with OMB Circular No. A-123, *Management's Responsibility for Enterprise Risk Management and Internal Control*, as of June 2021. Accordingly, we believe that the Bank's systems of internal accounting and administrative controls fully comply with the requirements for agency internal accounting and administrative control systems, providing reasonable assurance that they are achieving the intended objectives.

Washington, DC 20006

Independent Auditors' Report

Acting Inspector General, U.S. Department of the Treasury and
The Board of Directors, Federal Financing Bank:

Report on the Financial Statements

We have audited the accompanying financial statements of the Federal Financing Bank, which comprise the statements of financial position as of September 30, 2021 and 2020, and the related statements of income and changes in net position and statements of cash flows for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America, in accordance with the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, and in accordance with Office of Management and Budget (OMB) Bulletin No. 21-04, *Audit Requirements for Federal Financial Statements*. Those standards and OMB Bulletin No. 21-04 require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Federal Financing Bank as of September 30, 2021 and 2020, and the results of its operations, changes in net position, and cash flows for the years then ended in accordance with U.S. generally accepted accounting principles.

Other Matter

Other Information

Our audits were conducted for the purpose of forming an opinion on the basic financial statements as a whole. The Management's Discussion and Analysis and Other Information included in Schedule 1 are presented for purposes of additional analysis and are not a required part of the basic financial statements. Such information has not been subjected to the auditing procedures applied in the audits of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on it.

Other Reporting Required by Government Auditing Standards

Internal Control over Financial Reporting

In planning and performing our audit of the financial statements as of and for the year ended September 30, 2021, we considered the Federal Financing Bank's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Federal Financing Bank's internal control. Accordingly, we do not express an opinion on the effectiveness of the Federal Financing Bank's internal control. We did not test all internal controls relevant to operating objectives as broadly defined by the *Federal Managers' Financial Integrity Act of 1982*.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Federal Financing Bank's financial statements as of and for the year ended September 30, 2021 are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, and contracts, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards* or OMB Bulletin No. 21-04.

Purpose of the Other Reporting Required by Government Auditing Standards

The purpose of the communication described in the Other Reporting Required by *Government Auditing Standards* section is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Federal Financing Bank's internal control or compliance. Accordingly, this communication is not suitable for any other purpose.

FEDERAL FINANCING BANK

Notes to Financial Statements

September 30, 2021 and 2020

(Dollars in thousands)

(1) Summary of Significant Accounting Policies

The Federal Financing Bank (the Bank) was created by the Federal Financing Bank Act of 1973 (12 USC 2281) as an instrumentality of the U.S. government and a body corporate under the general supervision of the Secretary of the Treasury (the Secretary). The budget and audit provisions of the Government Corporation Control Act apply to the Bank in the same manner as they apply to other wholly owned government corporations.

The Bank was established by Congress at the request of the U.S. Department of the Treasury (Treasury), in order “to assure coordination of Federal and federally assisted borrowing programs with the overall economic and fiscal policies of the U.S. government, to reduce the cost of Federal and federally assisted borrowing from the public, and to assure that such borrowings are financed in a manner least disruptive of private financial markets and institutions.” The Bank was given statutory authority to finance obligations issued, sold, or guaranteed by Federal agencies so that the Bank could meet these debt management objectives.

The Bank is authorized, with the approval of the Secretary, to issue publicly and have outstanding at any one-time obligations not in excess of \$15,000,000. Additionally, the Bank is authorized to issue obligations in unlimited amounts to the Secretary who, at the discretion of the Secretary, may agree to purchase any such obligations.

(a) Basis of Presentation

The Bank has historically prepared its financial statements in accordance with U.S. generally accepted accounting principles (GAAP), based on standards issued by the Financial Accounting Standards Board (FASB), the private-sector standards-setting body. The Federal Accounting Standards Advisory Board (FASAB) has indicated that financial statements prepared based upon standards promulgated by the FASB may also be regarded as in accordance with GAAP for those Federal entities, such as the Bank, that have issued financial statements based upon FASB standards in the past. Accordingly, consistent with historical reporting, the Bank’s financial statements are presented in accordance with accounting and financial reporting standards promulgated by the FASB.

(b) Basis of Accounting

The financial statements are presented on the accrual basis of accounting. The Bank recognizes loans when they are issued and related repayments when they are received. The Bank recognizes borrowings when they are received and repayments when they are made. In addition, the Bank recognizes interest on loans, interest on investments, and revenue from servicing loans when they are earned and recognizes interest on borrowings and expenses when they are incurred. Legislatively mandated interest credit is recorded in the period the cost is incurred as a contra-revenue to interest on loans in the Statements of Income and Changes in Net Position.

(c) Funds with U.S. Treasury

As a government corporation, the Bank maintains a Fund Balance with Treasury and does not hold cash. For the purposes of the statements of cash flows, the funds with Treasury are considered cash.

FEDERAL FINANCING BANK

Notes to Financial Statements

September 30, 2021 and 2020

(Dollars in thousands)

(d) Loans Receivable

The Bank issues loans to Federal agencies for their own use or to private sector borrowers whose loans are guaranteed by a Federal agency. When a Federal agency has to honor a guarantee because a private sector borrower defaults, the Federal agency must obtain an appropriation or use other resources to pay the Bank. All Bank assets are, or have a commitment to be, full faith and credit obligations of the U.S. government. Accordingly, the Bank has not recorded a reserve for default on any loans receivable.

The Bank has not incurred any credit-related losses on its loans as of the date of these statements.

(e) Interest on Loans

The Bank's general policy is to capture the liquidity premium between Treasury securities and private sector lending rates, and to charge a rate that reflects the risk inherent in a borrower or transaction, when such a rate will accomplish a broader goal. Under amendments to the Federal Credit Reform Act (FCRA), effective October 1, 1998, while the Bank is permitted to charge a spread on loans to government-guaranteed borrowers, the spread is not retained by the Bank, but rather is retained by the loan guarantor. In the event that this requirement results in the Bank being unable to fund its administrative expenses related to these loans, FCRA, as amended, states that the Bank may require reimbursement from loan guarantors.

(f) Capitalized Interest

In accordance with their loan agreements with the Bank, the Historically Black Colleges and Universities- Department of Education (HBCU), and the Department of Energy (DOE) have the option of deferring payments of interest on their loans until future periods. When HBCU or DOE elect, in advance, to defer interest payments, the accrued interest is recorded as capitalized interest receivable and added to the respective loan balance by the Bank. The Bank correspondingly capitalizes the interest payable on its related non-FCRA borrowings.

(g) Interest Receivable, Interest Payable and Loan Modification Revenue, net of Legislatively Allowed Prepayments

Section 6503 of the Agriculture Improvement Act of 2018 (the 2018 Farm Bill) amended Section 313(a) of the Rural Electrification Act of 1936 (7 U.S.C. 940c(a)) (the REAct) to allow borrowers to use cushion of credit account balances to prepay loans guaranteed by the U.S. Department of Agriculture's Rural Utilities Service (RUS) under the REAct without such borrowers making prepayment premium payments (if otherwise required).

This 2018 Farm Bill provision expired on September 30, 2020. As a result, there was no impact on the financial statements in fiscal year 2021.

For the year ended September 30, 2020, 211 RUS borrowers prepaid 1,013 loans totaling \$3,085,112 using the 2018 Farm Bill provision.

On June 30, 2020, the Bank received a \$733,170 payment for loan modifications from RUS as part of a final agreement covering the cushion of credit loan prepayments authorized by the 2018 Farm Bill.

In 2020, the Bank concluded that the 2018 Farm Bill abrogated the right of the Bank to receive these premiums from RUS and that the 2018 Farm Bill also abrogated the right for Treasury to receive

FEDERAL FINANCING BANK

Notes to Financial Statements

September 30, 2021 and 2020

(Dollars in thousands)

these premiums from the Bank. As a result, all premiums receivable from RUS to the Bank and all premiums payable to the Treasury were re-estimated to zero at September 30, 2020.

Due to the unusual nature of these transactions, the revenue and expense amounts related to the 2018 Farm Bill provision are included in Loan modification revenue, net on the Statement of Income and Changes in Net Position.

The table below summarizes the impacts to the Statement of Income and Changes in Net Position for the year ended September 30, 2020.

	<u>2020</u>
Loan modification revenue received	\$ 733,170
Premiums receivable	(497,602)
Premiums payable	<u>229,050</u>
Loan modification revenue, net	\$ <u>464,618</u>

(h) Interest on Borrowings from Treasury

Interest rates, interest payable, and interest expense on borrowings from Treasury used to fund guaranteed loans that require the guaranteeing Federal agencies to comply with FCRA (2 USC 661(d)(3)) are determined annually by the borrowing agencies using FCRA and Office of Management and Budget guidelines. Interest on borrowings from Treasury for non-FCRA loans is based on the daily Treasury New Issue Curve (TNIC).

(i) Legislatively Mandated Interest Credit

In prior years, the Bank purchased certificates of beneficial ownership (i.e., reported as loans receivable on the statement of financial position) from RUS. RUS used the funds received from the Bank to issue loans to nonfederal entities, specifically private utility companies. In 1987, Congress passed legislation (7 USC Sec. 940c – Cushion of Credit Payments Program) that required RUS to develop and promote a program to encourage private utility companies to voluntarily make deposits into cushion of credit accounts established within RUS. The legislation also indicated that private utility companies may reduce the balance of their cushion of credit account only if the reduction is used to make scheduled payments on loans received from RUS. In accordance with the legislation, the private utility companies accrue interest at 5% per annum on cash deposited into the cushion of credit accounts with RUS. The legislation also indicated that RUS shall receive an interest credit from the Bank. The Bank records the interest credit in the period the cost is incurred as a legislatively mandated interest credit (contra-revenue to interest on loans) in the Statements of Income and Changes in Net Position. The final certificate of beneficial ownership in the amount of \$135,000 was repaid on September 30, 2021.

(j) Revenue from Servicing Loans

The Bank charges certain RUS borrowers a loan service fee that is reported as revenue from servicing loans on the Statements of Income and Changes in Net Position. The Bank's loan servicing fee is equal to one-eighth of one percent more than the contractual interest rate with Treasury.

FEDERAL FINANCING BANK

Notes to Financial Statements

September 30, 2021 and 2020

(Dollars in thousands)

The Bank also receives fees related to servicing certain loans on behalf of the Federal Emergency Management Agency (FEMA). The loans are FEMA loans and accordingly, the loan balances and any related transactions remain part of FEMA's reporting and are not included in the Bank's financial statements.

(k) Administrative Expenses

The Bank is subject to the general supervision and direction of the Secretary. As provided by law, the Secretary acts as Chairman of the Board of Directors. Employees of Treasury's Departmental Offices perform the Bank's management and operational functions, and its legal counsel is the General Counsel of the Treasury. The Bank reimburses Treasury for the facilities and services it provides. The amounts of such reimbursements are reported as administrative expenses in the Statements of Income and Changes in Net Position.

(l) Net Position

The Bank can borrow from Treasury to meet its immediate cash needs and can also seek appropriations from Congress to make up for accumulated losses that will not be met by income.

(m) Loan Commitments

The Bank is authorized to make commitments to purchase, and to purchase on terms and conditions determined by the Bank any obligation which is issued, sold, or guaranteed by a Federal agency. The Bank has offered Federal agencies the opportunity to enter into mutually beneficial agreements, which provide for the standardization of processes, documents, and conditions upon which the Bank will purchase obligations. A Note Purchase Agreement (NPA) generally sets forth processes, documents, and conditions precedent for the purchase of obligations issued by a Federal agency. A Program Financing Agreement (PFA) sets forth the processes, documents, and conditions precedent for the purchase of obligations guaranteed by a Federal agency. The Bank can purchase obligations under NPAs up to the lesser of individual agency legally authorized borrowing limits or amounts set forth in the NPA. The Bank may purchase obligations under PFAs up to amounts authorized in individual agency annual program appropriations. All NPAs and PFAs are renewed annually upon the request of the agency and at the discretion of the Bank.

Loan commitments represent the Bank's obligations to fund loans under fully executed promissory notes less the amount of previous loans advanced under the note and expired commitments. The Bank uses a future advance promissory note structure allowing a borrower the contractual right to take a single or multiple advances under a note during an agreed upon allowable period for advance.

(n) Classified Activities

The operating results of classified programs (those designated as classified by the U.S. Government which cannot be specifically described), if any, are included in our financial statements and are subjected to the same oversight and internal controls as our other programs.

(o) Tax-Exempt Status

The Bank is exempt from tax in accordance with Section 11(a) of the Federal Financing Bank Act of 1973 (12 USC 2281).

(p) Related Parties

The Bank conducts significant transactions in the ordinary course of business with the Department of Treasury and its components, which are considered related parties as defined by GAAP.

(Dollars in thousands)

(2) Loans Receivable

Loans receivable represent the outstanding balances treated as loans to agencies. The Bank has the ability and intends to hold loans receivable until maturity or payoff. At September 30, 2021, the Bank had outstanding loans receivable of \$79,959,441. Certain of these loans were funded using FCRA borrowing procedures. The outstanding amount of loans funded using FCRA borrowing procedures was \$52,832,872 with interest rates ranging from 0.041% to 4.687%, a weighted average rate of 2.456%, and maturity dates ranging from October 4, 2021 to October 15, 2061. The remaining non-FCRA loans receivable of \$27,126,569 had interest rates ranging from 0.041% to 8.544%, a weighted average rate of 2.507%, and maturity dates ranging from October 15, 2021 to December 31, 2054.

At September 30, 2020, the Bank had outstanding loans receivable of \$81,811,003. The outstanding amount of loans funded using FCRA borrowing procedures was \$50,248,216 with interest rates ranging from 0.091% to 4.687%, a weighted average rate of 2.534%, and maturity dates ranging from October 2, 2020 to October 15, 2060. The remaining non-FCRA loans receivable of \$31,562,787 had interest rates ranging from 0.091% to 8.544%, a weighted average rate of 2.373%, and maturity dates ranging from October 1, 2020 to December 31, 2054.

Loans receivable at September 30, 2021 and 2020, consist of the following:

Agency	2021	2020
Rural Utilities Service, Department of Agriculture	\$ 48,741,809	46,517,322
Rural Utilities Service, Department of Agriculture-certificates of beneficial ownership	-	135,000
U.S. Postal Service	11,000,000	14,000,000
Department of Energy	15,903,524	15,806,661
Historically Black Colleges and Universities, Department of Education	160,362	1,503,267
Community Development Financial Institutions Fund, Department of Treasury	1,207,702	1,154,978
Section 542 Risk Sharing, Department of Housing and Urban Development	2,630,313	2,364,103
Maritime Administration, Department of Transportation	311,675	325,527
Veterans Administration Transitional Housing Program	4,056	4,145
Total loans receivable	<u>\$ 79,959,441</u>	<u>81,811,003</u>

The loans receivable due within one year are \$11,768,051 and \$13,838,160 as of September 30, 2021 and 2020, respectively.

(3) Borrowings

Under the Federal Financing Bank Act of 1973, the Bank may, with the approval of the Secretary, borrow without limit from the Treasury.

For certain borrowings used to fund certain guaranteed loans based on FCRA, the interest rate is determined annually by the borrowing agencies using FCRA and Office of Management and Budget guidelines. At

FEDERAL FINANCING BANK

Notes to Financial Statements

September 30, 2021 and 2020

(Dollars in thousands)

September 30, 2021, the Bank had \$52,540,709 of Treasury borrowings used to fund guaranteed loans based on FCRA with interest rates ranging from 1.3214% to 3.6000%, a weighted average rate of 2.587%, and maturity dates from September 30, 2050 to September 30, 2061. Under FCRA borrowing procedures, interest on borrowings from Treasury are not capitalized.

For the Bank's non-FCRA borrowings, repayments on Treasury borrowings generally match the terms and conditions of corresponding loans made by the Bank and bear interest at the respective rate, as determined by the Secretary, and are repayable at any time, except for loans with fixed-price call options in the no-call period. In November 2004, October 2013, and October 2015, certain borrowings from Treasury were refinanced under a debt limit transaction. At September 30, 2021, the Bank had \$18,625,015 of Treasury borrowings for non-FCRA related loans, with interest rates ranging from 0.041% to 7.854%, a weighted average rate of 1.968%, and maturity dates from November 12, 2021 to August 16, 2049.

At September 30, 2020, the Bank had \$49,888,303 of Treasury borrowings used to fund guaranteed loans based on FCRA with interest rates ranging from 1.8029% to 3.6581%, a weighted average rate of 2.672%, and maturity dates from September 30, 2050 to September 30, 2060. Treasury borrowings for non-FCRA related loans were \$22,086,455, with interest rates ranging from 0.091% to 8.083%, a weighted average rate of 1.753%, and maturity dates from October 1, 2020 to August 16, 2049.

The US Treasury may take certain extraordinary measures in the event that the public debt nears the statutory debt limit and a delay in raising the statutory debt limit occurs. During such a period, one option for US Treasury is to exchange outstanding Treasury securities, which are subject to the debt limit, for securities of the Bank, which are not subject to the debt limit, within the investment portfolio of the Civil Service Retirement and Disability Fund (CSR&DF). At September 30, 2021 and 2020, the Bank had borrowings of \$6,053,039 and \$7,261,857, respectively, from the CSR&DF, which is administered by the Office of Personnel Management. At September 30, 2021, these borrowings were at an interest rate range of 2.25% to 2.875%, an effective interest rate of 2.598%, and with maturity dates ranging from June 30, 2022 to June 30, 2029. At September 30, 2020, these borrowings were at an interest rate range of 2.25% to 2.875%, an effective interest rate of 2.644%, and with maturity dates ranging from June 30, 2021 to June 30, 2029.

The scheduled principal repayments below reflect maturities of the Bank's borrowings and do not necessarily match the maturities of assets in the Bank's loan portfolio. Scheduled principal repayments of borrowings as of September 30, 2021 are as follows:

<u>Repayment date</u>	<u>Amount</u>
2022	\$ 11,797,132
2023	2,962,160
2024	4,242,020
2025	2,193,405
2026	3,002,522
2027 and thereafter	53,021,534
Total borrowing	<u>\$ 77,218,773</u>

(4) Capitalized Interest

Capitalized interest receivable was \$292,163 and \$360,046, and the related capitalized interest payable was \$665,030 and \$601,299 as of September 30, 2021 and 2020, respectively. Capitalized interest receivable

FEDERAL FINANCING BANK

Notes to Financial Statements

September 30, 2021 and 2020

(Dollars in thousands)

and payable are reported as part of the loans receivable and borrowing balances, respectively, on the statements of financial position. The difference between capitalized interest receivable and capitalized interest payable is due to the effects of debt limit transactions on October 1, 2013, and October 15, 2015. These transactions altered the structure of existing debt and capitalized interest.

(5) Loan Commitments

The Bank makes loan commitments to extend credit to Federal program agencies based on the loan agreements executed between the parties. The loan commitments are not reported on the statements of financial position and generally have fixed expiration dates or other termination clauses. Since many of the loan commitments are expected to expire without being completely drawn upon, the total loan commitment amounts do not necessarily represent future cash requirements. The Bank uses the same credit policies in making loan commitments as it does for loans receivable reported on the statements of financial position. The Bank funds the loan commitments with its borrowing authority from the Secretary. There is no exposure or credit risk related to these commitments.

The contract amounts and remaining loan commitments by program agency as of September 30, 2021, are as follows:

Agency	Contract Amounts	Remaining Loan Commitments
National Credit Union Administration – Central Liquidity Facility	\$ 30,000,000	30,000,000
Rural Utilities Service, Department of Agriculture	17,298,227	9,590,916
Department of Energy	3,287,903	821,313
Community Development Financial Institutions Fund, Department of Treasury	550,000	286,269
Historically Black Colleges and Universities, Department of Education	<u>382,250</u>	<u>330,284</u>
Total commitments	<u>\$ 51,518,380</u>	<u>41,028,782</u>

In addition to the above, the Bank has PFAs to purchase obligations guaranteed by the Department of Transportation's Maritime Administration (MARAD) and the Department of Housing and Urban Development, Section 542 Risk Sharing Program (HUD-542). MARAD, which offered its first note for purchase in 2020, and HUD-542 program activities are expected to continue in fiscal year 2022 but currently have no active commitments. Obligations purchased under the HUD-542 program are immediately disbursed upon transaction close. There are no outstanding commitments with the U.S. Postal Service.

The Bank has NPAs with the Federal Deposit Insurance Corporation and the Farm Credit System Insurance Corporation for them to offer notes for purchase up to \$100,000,000, and \$10,000,000 respectively. No notes under these two NPAs are currently active.

(6) Subsequent Events

The Bank has evaluated subsequent events from the balance sheet date through November 10, 2021, the date at which the financial statements were available to be issued and determined that there are no other items to accrue or disclose.

FEDERAL FINANCING BANK

Other Information – Schedule 1 (unaudited)

Unaudited – See Accompanying Auditors' Report

September 30, 2021 and 2020

(Dollars in thousands)

In prior years, the Federal Financing Bank (the Bank) purchased certificates of beneficial ownership (i.e., loans reported as loans receivable on the statement of financial position) from the Rural Utilities Service (RUS), a component of the U.S. Department of Agriculture. RUS used the funds received from the Bank to issue loans to nonfederal entities, specifically private utility companies. In 1987, Congress passed legislation (7 USC Sec. 940c Cushion of Credit Payments Program) that required RUS to develop and promote a program to encourage private utility companies to voluntarily make deposits into cushion of credit accounts established within RUS. The legislation also indicated that a private utility company may reduce the balance of its cushion of credit account only if the reduction is used to make scheduled payments on loans received from RUS. In accordance with the legislation, the private utility companies accrue interest at a rate of 5% per annum. The legislation also indicated that RUS shall receive an interest credit from the Bank. The Bank records the interest credit in the period the cost is incurred as a legislatively mandated interest credit (contra-revenue to interest on loans) in the Statements of Income and Changes in Net Position.

The final payment on the certificates of beneficial ownership (CBO) legislation of \$135,000 was made on September 30, 2021. As of September 30, 2021, the outstanding principal balance of the RUS loan subject to the certificates of beneficial ownership (CBO) legislation was zero while as of September 30, 2020 the total outstanding principal was \$135,000, with an interest rate of 7.951%, and a maturity date of September 30, 2021. In October 1998, the Bank received an appropriation that offset the RUS-CBO interest credits by \$917,699.

The final amount of the interest credits that the Bank has provided RUS-CBO through September 30, 2021 are as follows:

	Amount
1988-2017	\$ 3,265,171
2018	10,734
2019	10,734
2020	10,734
2021	10,734
Total interest credits	3,308,107
Less appropriation	(917,699)
Total	\$ 2,390,408
